Re: Proposed Measure to Avoid Confusion - Use of 'AI' at the second level

To Whom it May Concern:

The .JMP Registry is a Specification 13 approved brand registry for the exclusive use of Matrix IP LLC and its affiliates and licensees.

Matrix IP LLC. for the .JMP TLD has executed Specification 13 to the Registry Agreement. Specification 13 already contractually requires that the Matrix IP LLC. will apply measures which, by their very nature, avoid confusion with the corresponding country code, namely the following:

1. .JMP is identical to a qualifying registered trademark;

2. .JMP is not a Generic String, as this is defined in Specification 11;

3. .JMP TLD has developed and will implement a closed registration policy for .JMP that requires that all domain names in the .JMP TLD be registered ONLY by Registry Operator, its Affiliates, and its Trademark Licensees;

4. As required under the Registry Agreement, the .JMP TLD will clearly publish this registration policy;

5. .JMP TLD will conduct internal reviews at least once per calendar year to ensure continued compliance with Specification 13.

Compliance with Specification 13 prohibits the .JMP TLD from registering domain names to unaffiliated third parties and thus clearly designate to the public that .JMP TLD is a proprietary space in which all second-level domains in the TLD are being operated by Matrix IP LLC., its Affiliates and Trademark Licensees and not the Government of Anguilla or the corresponding country code operator.

By this undertaking Matrix IP LLC. confirms that all registrations of two letter domain names shall comply with the requirements of Specification 13.

Respectfully submitted,

Karen L. Day
Registry Operations Manager
Matrix IP LLC.

4. As required under the Registry Agreement, the .JMP TLD will clearly publish this registration policy;

5. .JMP TLD will conduct internal reviews at least once per calendar year to ensure continued compliance with Specification 13.

Compliance with Specification 13 prohibits the .JMP TLD from registering domain names to unaffiliated third parties and thus clearly designate to the public that .JMP TLD is a proprietary space in which all second-level domains in the TLD are being operated by Matrix IP LLC., its Affiliates and Trademark Licensees and not the Saint Helena, Ascension and Tristan Da Cunha or the corresponding country code operator.

By this undertaking Matrix IP LLC. confirms that all registrations of two letter domain names shall comply with the requirements of Specification 13.

Respectfully submitted,

Karen L. Day
Registry Operations Manager
Matrix IP LLC.

Re: Proposed Measure to Avoid Confusion - Use of 'SU' at the second level

To Whom it May Concern:

The .JMP Registry is a Specification 13 approved brand registry for the exclusive use of Matrix IP LLC and its affiliates and licensees.

Matrix IP LLC. for the .JMP TLD has executed Specification 13 to the Registry Agreement. Specification 13 already contractually requires that the Matrix IP LLC. will apply measures which, by their very nature, avoid confusion with the corresponding country code, namely the following:

1. .JMP is identical to a qualifying registered trademark;

2. .JMP is not a Generic String, as this is defined in Specification 11;

3. .JMP TLD has developed and will implement a closed registration policy for .JMP that requires that all domain names in the .JMP TLD be registered ONLY by Registry Operator, its Affiliates, and its Trademark Licensees;

4. As required under the Registry Agreement, the .JMP TLD will clearly publish this registration policy;

5. .JMP TLD will conduct internal reviews at least once per calendar year to ensure continued compliance with Specification 13.

Compliance with Specification 13 prohibits the .JMP TLD from registering domain names to unaffiliated third parties and thus clearly designate to the public that .JMP TLD is a proprietary space in which all second-level domains in the TLD are being operated by Matrix IP LLC., its Affiliates and Trademark Licensees and not the Government of the Russian Federation or the corresponding country code operator.

By this undertaking Matrix IP LLC. confirms that all registrations of two letter domain names shall comply with the requirements of Specification 13.

Respectfully submitted,
