Dear Sir/Madam,

We have been trying to get the ccTLD agreement for .mv domains between ICANN and the responsible party from Maldives (DHIRAAGU Plc or Communication Authority of Maldives (CAM)) from your resource's pages of your site but unfortunately, we could find any document regarding .mv domain.

We would very much appreciate if you could provide us the agreement(s), MoU(s), terms, conditions, policies agreed between you and the party responsible for handling .mv domains while assigning the manager, sponsorship, government manager, policies and exchange of letter regarding the .mv ccTLD as we believe that the current .mv domain name service provider in the Maldives is not abiding the agreements, terms, conditions and policies of ICANN on providing such service.

The government regulating body for internet related service in Maldives, Communication Authority of Maldives (CAM) has also been failed as it has been more than 2 decades since Dhiraagu is selling .mv SLDS and TLDS, and CAM couldn't produce and enforce even a single regulation or policy which may protect the consumer's rights.

So, before we file an official complain on this at ICANN we would like to study the case thoroughly and for that we need all and any document related to .mv domains from ICANN.

In anticipation for your kind cooperation, I remain.

Kind regards

Ibrahim Rasheed,
Managing Director
