...pre-call chatter...

Steven_TECH: BRIDGE INFO: +1 866 692 5762, CODE: ZFA

Steven_TECH: For those on the bridge. we are connected, you will be added when meeting starts

Rick_Wilhelm: -5726

Rick_Wilhelm: transposition in last 4 digits.

Craig Schwartz: thanks for the correction on the phone number Rick.

Michele Neylon: it's the ''normal'' gnso bridge - so there are local numbers as well

Craig Schwartz: yes...same as gnso numbers except for the passcode

Michele Neylon: Craig - yup :)

Michele Neylon: Craig - I got disconnected the first time, so I just rang the Dublin number

Craig Schwartz: Please remember to mute if you're not speaking...it keeps the line clear of noise . Thanks

Michele Neylon: I am on mute

Steven_TECH: Please mute if your not speaking

Mikey: Somebody isn't muted. Please check your phone

Rick_Wilhelm: Just lost Vlad...

Rod Rasmusseh 2: did we lose Nairobi?

Nacho Amadoz: looks like

Vladimir Shadrunov 2: We can hear Dave; anyone else having issues on the bridge?

Pat_Kane: has any registry indicated that this is really a burden

Craig Schwartz: Reston is fine.

Jothan Frakes: Pat I think in the context of 'as opposed to nothing'

Craig Schwartz: did we lose vladimir again>

Vladimir Shadrunov: I'm back on

ME 2: hi, no sound here, only music

Yumi Ohashi: only music in Tokyo, too.

Vladimir Shadrunov: All fine in Nairobi

Craig Schwartz: ME2 - when did you lose the audio?

ME 2: five minutes ago

Craig Schwartz: i would dial back in…same for Tokyo.

Gordon Chillcott: Same for Toronto

Yumi Ohashi: thank you.

Craig Schwartz: Sorry Gordon…please re-dial.

Gordon Chillcott: I did. No result.

ME: same for me, redialled several times

Craig Schwartz: working on it with the operator…apologies..

Craig Schwartz: Gordon, Yumi, ME2…working on it.

Steven_TECH: Here is the dialin info I have: +1 866 692-5726, Code: ZFA

Craig Schwartz: Steven…that is only the USA number, not helpful for everyone.

Craig Schwartz: ME - whare are you calling from?

Gordon Chillcott: I have audio again now

Jothan Frakes: also Yumi, Gordon, ME you can also use 64k audio stream

Jothan Frakes: and if you have questions craig can ask them

Jothan Frakes: link to audio stream: http://stream.icann.org/impala-64-en.m3u

Gordon Chillcott: Actually, that's what I'm using now.

Craig Schwartz: thanks jothan!

Gordon Chillcott: I had lost audio there as well, but it's back now.   Thanks, Craig

Craig Schwartz: Yumi - number is 0066-33-132439

Yumi Ohashi: Thanks Jothan and Craig.

Mikey: Memo to self -- don't try to talk to cost models after 4 all-nighters in a row

Craig Schwartz: Vladimir - we'll shortly be opening the floor for quetsions and discussion.

ME 2: both lines not working here, sigh

Jothan Frakes: ようこそ Yumi

ME 2: low-bandwith-line back up

Robert Hoggarth: techs are trying to diagnose audio issues. something about ''stream paths''

Yumi Ohashi: Good to see you Jothan! :-)

ME 2: thanks!

Craig Schwartz: Thanks for your patience.

Mikey: Rob, can you give us a heads up when the sound is fixed?

Pat_Kane: How are there heavy users when the current agreements allow for a once a day download

Yumi Ohashi: Thanks Craig and Robert. Unfortunately, it still does not work in Tokyo, although I tried.

Craig Schwartz: Dave, Rod…see Pat's question.

Jothan Frakes: @Pat Heavy users might be someone pulling a zone with 85+M domains in it vs 40k

Mikey: Pat -- that's what we're calling a heavy user -- our ''light user'' is one who does a lot *less* than that

Pat_Kane: still single access

Rod Rasmusseh 2: Correct

Jothan Frakes: difference in bandwidth

Jothan Frakes: I reckon that was partially rhetorical as a question

Steven_TECH: FYI: Our Internet stream has stabilized out of Kenya. The VoIP call was 100% during the blip.

Bob Hutchinson: How many GB are the total of all ZFs today?

John McCormac: com is approx 1.5g alone

Michele Neylon: Why aren't they using rsync?

Bob Hutchinson: compressed or flat?

Michele Neylon: FTP seems a bit silly tbh

John McCormac: circa 2gb compressed (estimate)

Bob Hutchinson: thx

Yumi Ohashi: Craig and Robert, audio is back in Tokyo! Thanks!

Craig Schwartz: Good to hear Yumi.

Bob Hutchinson: did the group consider P2P secure file sharing with controlled access?

Vladimir Shadrunov: YEs we did

Pat_Kane: who is liable for the accuracy of the data in a consolidated model

Jothan Frakes: the registry most likely pat

Jothan Frakes: although I'll caveat

Michele Neylon: Pat - depends on what expectation you set

Jothan Frakes: I saw a question about p2p

Pat_Kane: if I am not the publisher then I find it hard to be responsible

Jothan Frakes: and we were looking at other methods of access

Michele Neylon: Pat - mirrors don't accept liability for how valid their data is

Jothan Frakes: so for example using the delta

Michele Neylon: ie. software mirrors

Pat_Kane: thanks michele - but my left side looks better than my right

Michele Neylon: Pat???

Pat_Kane: yes

Michele Neylon: left / right/ huh?

Craig Schwartz: Jothan is stepping up to the mic in Reston.

Pat_Kane: the mirror is lying

Michele Neylon: ROFL

Kathy Kleiman: Tx you, Dave

Pat_Kane: will a third party have a compliance program for those restricted uses

Jothan Frakes: Dave covered what I was going to say

Craig Schwartz: Rods, you're up next.

Craig Schwartz: Rod

Jothan Frakes: as did Brian

Rod Rasmusseh 2: Just going to make a point on ccTLD access today

Craig Schwartz: ok

Kathy Kleiman: Tx you, Brian!

Jothan Frakes: well, we also discussed access for emerging nations, frequency, format

Jothan Frakes: perhaps having some minimal modification of the data, like a diff from the previous to download vs a full file

Bob Hutchinson: files are small enough to vss or other SC management

John McCormac: the smaller gtlds would be -cnoi probably not

Jothan Frakes: right, sure

John McCormac: the key is to keep it simple and reliable (consumer view)

Jothan Frakes: other VERY minimal modification might be domain only, glue only, or list of IPs

Jothan Frakes: lists

Mark McFadden: Also: alternative distribution strateiges.

John McCormac: new/deleted/xferred would be the main delta

Michele Neylon: John - nice to see you doing something :)

Jothan Frakes: ·   Public mailing list archive at: http://mm.icann.org/pipermail/zfa-ag/·   Adobe Connect Link: http://icann.na3.acrobat.com/zfa-advisory-group/·   Materials will be posted at http://www.icann.org/en/topics/new-gtlds/zone-file-access-en.htm

Robert Hoggarth: thanks everyone! great job Craig and Vladimir!!

John McCormac: well the stats are going out now Michele :)

Gordon Chillcott: Thank yoium Craig!
