**Subject:** Notification - Upcoming SLA Monitoring System Probe Node IP Address Changes

Dear Colleagues,

We will upgrade the SLA Monitoring System platform in December 2017 to allow for new and improved features. This upgrade replaces the existing 40 probe nodes with 40 new probe nodes. There will be a transition period when the old and new probe nodes will display in the probe node list concurrently. Please note that only 40 probe nodes will be sending queries at any given time. The old probe nodes will be removed once the upgrade and associated testing is completed.

Please add the new probe IP addresses to your whitelist before 21 November 2017. These IP addresses have been appended to the lists located at <https://tld-monitor.icann.org/nodes.csv> and <https://tld-monitor.icann.org/nodes.json>. They are also listed at the end of this email for your convenience.

We will notify you when the upgrade is complete to remove the old probe node IP addresses from your whitelist.

Thank you for your assistance.  
Best Regards,

Technical Services and Registry Services Teams  
Global Domains Division  
ICANN

**The new IP addresses are below:**

95.143.192.50
