

## Registry Services Evaluation Policy (RSEP) Request

December 15, 2020

### Registry Operator

Donuts (Parent)

### Request Details

Case Number: 00992737

This Registry Services Evaluation Policy (RSEP) request form should be submitted for review by ICANN org when a registry operator is adding, modifying, or removing a Registry Service for a TLD or group of TLDs.

The RSEP Process webpage provides additional information about the process and lists RSEP requests that have been reviewed and/or approved by ICANN org. If you are proposing a service that was previously approved, we encourage you to respond similarly to the most recently approved request(s) to facilitate ICANN org's review.

Certain known Registry Services are identified in the Naming Services portal (NSp) case type list under "RSEP Fast Track" (example: "RSEP Fast Track – BTAPPA"). If you would like to submit a request for one of these services, please exit this case and select the specific Fast Track case type. Unless the service is identified under RSEP Fast Track, all other RSEP requests should be submitted through this form.

## Helpful Tips

- Click the "Save" button to save your work. This will allow you to return to the request at a later time and will not submit the request.
- You may print or save your request as a PDF by clicking the printer icon in the upper right corner. You must click "Save" at least once in order to print the request.
- Click the "Submit" button to submit your completed request to ICANN org.
- Complete the information requested below. All fields marked with an asterisk (\*) are required. If not applicable, respond with "N/A."

## 1. PROPOSED SERVICE DESCRIPTION

### 1.1. Name of proposed service.

Removal of Arabic IDN table.

### 1.2. Provide a general description of the proposed service including the impact to external users and how it will be offered.

We would like to remove the current Arabic table that is being use for .REALTY, as we are onboarding the TLD to Donuts, and the current IDN table is not supported by Donuts.

### 1.3. Provide a technical description of the proposed service.

Removal of the current Arabic IDN table.

### 1.4. If this proposed service has already been approved by ICANN org, identify and provide a link to the RSEP request for the same service that was most recently approved.

We have currently launched .CONTACT and not had an Arabic table.

### 1.5. Describe the benefits of the proposed service and who would benefit from the proposed service.

Being that Donuts cannot support the current Arabic IDN table, it will not confuse registrants to see the TLD offered and then find out it is not fully supported.

1.6. Describe the timeline for implementation of the proposed service.

We would like to remove the Arabic IDN table upon moving .REALTY onto the Donuts backend, which we have currently filed a Material Subcontracting Arrangement for with ICANN.

1.7. If additional information should be considered with the description of the proposed service, attach one or more file(s) below.

1.8. If the proposed service adds or modifies Internationalized Domain Name (IDN) languages or scripts that have already been approved in another RSEP request or are considered pre-approved by ICANN org, provide (a) a reference to the RSEP request, TLD(s), and IDN table(s) that were already approved or (b) a link to the pre-approved Reference Label Generation Rules (LGR). Otherwise, indicate “not applicable.”

Not applicable

The most current IDN requirements will be used to evaluate a submitted table.

## 2. SECURITY AND STABILITY

2.1. What effect, if any, will the proposed service have on the life cycle of domain names?

None.

2.2. Does the proposed service alter the storage and input of Registry Data?

None.

2.3. Explain how the proposed service will affect the throughput, response time, consistency or coherence of responses to Internet servers or end systems.

None.

2.4. Have technical concerns been raised about the proposed service? If so, identify the concerns and describe how you intend to address those concerns.

None.

2.5. Describe the quality assurance plan and/or testing of the proposed service prior to deployment.

None.

2.6. Identify and list any relevant RFCs or White Papers on the proposed service and explain how those papers are relevant.

None.

### 3. COMPETITION

3.1. Do you believe the proposed service would have any positive or negative effects on competition? If so, please explain.

It will allow Donuts to onboard the TLDs and then work in collaboration with ICANN to file an RSEP for an Arabic table that meets ICANN's requirements and is supported by Donuts.

3.2. How would you define the markets in which the proposed service would compete?

The Arabic IDN table would be used in all markets where the TLD is marketed and registered.

3.3. What companies/entities provide services or products that are similar in substance or effect to the proposed service?

Donuts currently is the registry operator for .CONTACT which does not have an Arabic IDN table.

3.4. In view of your status as a Registry Operator, would the introduction of the proposed service potentially affect the ability of other companies/entities that provide similar products or services to compete?

No we do not believe so.

3.5. Do you propose to work with a vendor or contractor to provide the proposed service? If so, what is the name of the vendor/contractor and describe the nature of the services the vendor/contractor would provide.

No we do not need the assistance of a vendor or contractor to remove the IDN table.

3.6. Have you communicated with any of the entities whose products or services might be affected by the introduction of your proposed service? If so, please describe the communications.

No we have not communicated anything regarding the IDN talbe.

3.7. If you have any documents that address the possible effects on competition of the proposed service, attach them below. ICANN will keep the documents confidential.

## 4. CONTRACTUAL PROVISIONS

4.1. List the relevant contractual provisions impacted by the proposed service. This includes, but is not limited to, Consensus Policies, previously approved amendments or services, Reserved Names, and Rights Protection Mechanisms.

IDN tables.

4.2. What effect, if any, will the proposed service have on the reporting of data to ICANN?

We will no longer be reporting on the Arabic IDN table.

4.3. What effect, if any, will the proposed service have on Registration Data Directory Service (RDDS)?\*

None.

4.4. What effect, if any, will the proposed service have on the price of a domain name registration?

None.

4.5. Will the proposed service result in a change to a Material Subcontracting Arrangement (MSA) as defined by the Registry Agreement? If so, identify and describe the change. Please note that a change to an MSA requires consent from ICANN org through the MSA change request process. The RSEP request must be approved prior to submitting the MSA change request.

No.

## 5. AUTHORIZATION LANGUAGE

5.1. A Registry Agreement (RA) amendment is required when the proposed service: (i) contradicts existing provisions in the RA or (ii) is not contemplated in the RA and, therefore, needs to be added to Exhibit A of the RA and/or as an appropriate addendum/appendix. If applicable, provide draft language (or a link to previously approved RA amendment language) describing the service to be used in an RA amendment if the proposed service is approved. If an RA amendment is not applicable, respond with "N/A" and provide a complete response to question 5.2.\*

For examples or for IDN services, you may refer to the webpage for standard RA template amendments for commonly requested Registry Services.

Please see response to 5.2 below.

5.2. If the proposed service is permissible under an existing provision in the Registry Agreement, identify the provision and provide rationale. If not applicable, respond with “N/A” and provide a complete response to question 5.1.

We do not believe that there is any amendment required for this RSEP. Currently, Section 4.3 of the Registry Agreement read, "Registry Operator may offer registrations of IDNs in the following language/scripts..... 4.3.1 Arabic language." Because the document is drafted so that Arabic language may but offered, but is not required to be offered, we do not believe that any adjustment to the language is required.

## 6. CONSULTATION

6.1. ICANN org encourages you to set up a consultation call through your Engagement Manager prior to submitting this RSEP request. This is to help ensure that necessary information is assembled ahead of time.

Identify if and when you had a consultation call with ICANN org. If you did not request a consultation call, provide rationale.

We had discussed this matter with Andee Hill, who also consulted with Grant Nakata on the matter. Ande and Grant recommended this path forward.

6.2. Describe your consultations with the community, experts, and/or others. This can include, but is not limited to, the relevant community for a sponsored or community TLD, registrars or the registrar constituency, end users and/or registrants, or other constituency groups. What were the quantity, nature, and results of the consultations? How will the proposed service impact these groups? Which groups support or oppose this proposed service?

None.

## 7. OTHER

7.1. Would there be any intellectual property impact or considerations raised by the proposed service?

No.

7.2. Does the proposed service contain intellectual property exclusive to your gTLD registry?

No.

7.3. Provide any other relevant information to include with the request. If none, respond with "N/A."

N/A

7.4. If additional information should be considered, attach one or more file(s) below.

**Affected TLDs**

<b>Current Registry Operator</b>	<b>Top Level Domain</b>	<b>Registry Agreement Date</b>
Donuts (Parent)	realty	2015-03-19
