

Dear Registry Operator,

Today we have released new functionality in the Centralized Zone Data Service (CZDS) system that allows zone file access requesters to cancel a previously submitted access request that is still in pending status.

Canceled access requests will no longer require any action from the requester or the registry operator and will have no effect on future access requests by the same requester. Canceled requests, if any, will be listed in the new "Canceled" list view for CZDS requests in the Naming Services portal (NSp).

If you have any questions, please contact globalsupport@icann.org.

Best regards,
