After internal consultations were carried out to determine language needs, .GENTING consulted with its backend provider, Versign, on technical implementation. There was no consultation with the broader community as registration and usage of .GENTING TLDs will be restricted to the Registry and its affiliates.\text{Vn}

a. If the registry is a sponsored TLD, what were the nature and content of these consultations with the sponsored TLD community?:

Not applicable.\r\n

b. Were consultations with gTLD registrars or the registrar constituency appropriate? Which registrars were consulted? What were the nature and content of the consultation?:

c. Were consultations with other constituency groups appropriate? Which groups were consulted? What were the nature and content of these consultations?:

\\r\\nNot applicable.\r\n

d. Were consultations with end users appropriate? Which groups were consulted? What were the nature and content of these consultations?:

\lambda \text{In addition, as a lorand Registry we will chose up to 3 registrar maximum, and each of them will have to support IDNs, so further consultation was not required.\text{IDNs}

Only the Registry and its affiliates are eligible to register and use .GENTING domain names. Registration will be available via .GENTING accredited registrars. The SRS supports the IDN extension for EPP and registrars may use this extension to signal which IDN table an IDN domain name corresponds to.\r\n

Describe quality assurance plan or testing of Proposed Service:

VINVerisign has tested all operations including searching, registering, updating, and deleting of IDN registrations. This careful testing has also ensured that the existence of a canonical IDN label prohibits any registrations in the same set of variant labels, and that the variants become available again for registration once the IDN label is deleted. Versign will continue to analyze newly registered IDN labels to ensure that all registrations are in full compliance with .GENTING IDN Policies.\text{VnVn}

Please list any relevant RFCs or White Papers on the proposed service and explain how those papers are relevant.:

Vrn.GENTING 's selected backend registry services provider's (Versign?s) SRS IDN implementation complies with IDN standards defined by IDNA BIS (i.e., IDNA2008). Moreover, along with this standard migration, the IDN code points are based on Unicode 5.2. As part of the software development lifecycle (SDLC) process, Versign incorporates design reviews, code reviews, and peer reviews to help ensure compliance with the relevant RFCs. In addition, a dedicated quality assurance (QA) team creates extensive test plans and issues internal certifications once it has confirmed the accuracy of the code in relation to requirements and RFCs. To help ensure adopted processes and procedures are followed and to further ensure the security and stability of the TLD is fully accounted for in all software releases, the QA team is an independent organization from the development team within engineering. \times\time

Mapping Characters for Internationalized Domain Names in Applications 2008\r\n

Contractual Provisions

List the relevant contractual provisions impacted by the Proposed Service:

\lv\\n/CANN Registry Agreement, Exhibit A - Approved Services, Section 4: Internationalized Domain Names (IDNs)\r\n

What effect, if any, will the Proposed Service have on the reporting of data to ICANN:

\\r\\nNone.\r\n

What effect, if any, will the Proposed Service have on the Whois?:

\lr\lnNone. Whois searches will be available for IDN names using IDN characters or a-label (punycode). \lr\lnThe public interface to .GENTING's selected backend registry services provider's (Versign's) Whois service for IDN domain names is the same as for ASCII domain names. Versign uses punycode to encode IDN domain names in the DNS and Whois servers. In accordance with RFC 3492, Versign uses ASCII punycode. A client uses the ASCII punycode domain name to query the Whois server. \\r\\n\\r\\nFor the Extensible Provisioning Protocol (EPP) interface, IDN domain names are also passed using their punycode encoding. The client converts native character IDN domain names to punycode domain names on commands, and then converts punycode domain names to native character IDN domain names on responses. Versign supports all the same commands and responses for IDN domain names as it supports for ASCII domain names. The only IDN-specific EPP interface requirement is to pass the language tag on a domain create. The client handles the passing of the **EPP** language including Versign IDN Language Tag http://www.Versigninc.com/assets/idn-valid-language-tags.pdf) with an EPP domain create command. The Versign IDN Language Tag EPP extension includes a single ?idnLang:tag? element for the language tag value. The following link defines the possible language tag values supported by the server: http://www.iana.net/domains/idn-tables/.\r\\n\r\n

Contract Amendments

Please describe or provide the necessary contractual amendments for the proposed service:

\\r\\nThe new service would require the following amendment to paragraph 4.3 of Exhibit A -Approved Services. (All scripts and language are added to the list of approved IDN services)\\r\\n\\r\\n4.3. Registry Operator may offer registration of IDNs in the following languages/scripts (IDN Tables and IDN Registration Rules will be published by the Registry Operator as

Do you believe your proposed new Registry Service would have any positive or negative effects on competition? If so, please explain.:

\lambdar\nAs a brand TLD, .GENTING is not available to the general public. Under the terms of Specification 13 in the Registry Agreement, registration is restricted to the use of the Registry and its affiliates, and as such the new service will have no effect on competition.\rangle\tau\n

How would you define the markets in which your proposed Registry Service would compete?:

\\r\\nIDNs will primarily be adopted for use in respective-speaking markets\r\n

What companies/entities provide services or products that are similar in substance or effect to your proposed Registry Service?:

\\r\\nMany registry operators provide IDN registration.\r\n

In view of your status as a registry operator, would the introduction of your proposed Registry Service potentially impair the ability of other companies/entities that provide similar products or services to compete?:

\\r\\nAs stated above, .GENTING is only open to registration by the Registry and its affiliates and therefore the service will not directly compete with other IDNs.\r\n

Do you propose to work with a vendor or contractor to provide the proposed Registry Service? If so, what is the name of the vendor/contractor, and describe the nature of the services the vendor/contractor would provide.:
