| Section I: General Overview and Next Steps | | | | | | | | | | | | | | | | | | |
| <p>A Global Policy Proposal has been received for ratification by the ICANN Board. The purpose of the proposal is to enable handling of IPv4 address blocks returned from any RIR and redistribution of such address blocks to the RIRs, with smaller minimum block sizes than in the existing IPv4 allocation policy. Comments were invited to inform the ICANN Board prior to the Board's decision regarding ratification of the Proposal.</p> <p>Following the closing of the public comment forum, the Board will consider the proposal and decide whether to ratify it. Provided the proposal is ratified as a Global Policy, it will then be implemented by IANA.</p> | | | | | | | | | | | | | | | | | | |
