### Failure to retain registered name holder and registration data and failure to make such data available for inspection and copying

Sections 3.4.2 and 3.4.3 of the RAA requires registrars to maintain registered name holder and registration data, and to make those records available to ICANN upon reasonable notice. documentdata Anstalt's failure to provide the requested registration data and records is a breach of Sections 3.4.2 and 3.4.3 of the RAA.

### Failure to provide AuthInfo codes within five calendar days of request

Section 5 of the IRTP requires registrars to provide the RNH with a unique AuthInfo code within five (5) calendar days of the RNH's initial request. Registrars may only deny a transfer request for the reasons listed in Section 3 of the IRTP. documentdata Anstalt's failure to provide the AuthInfo code within five (5) calendar days of the RNH's request concerning the domain name <maramonesse.com> is a breach of Sections 3 and 5 of the IRTP.

### Failure to provide domain name data in the required response format

Section 1.4 of the Whois Specification of the RAA requires registrars to display domain name data in a specified format in response to Whois queries. The format of responses shall contain all of the elements and follow a semi-free text format outlined in Section 1.4 of the Whois Specification. documentdata Anstalt's failure to provide domain name data in the specified format is a breach of Section 1.4 of the Whois Specification of the RAA.

### Failure to clearly display a link to redemption/restore fees on registrar's website

Section 4.1 of the ERRP requires registrars to make their renewal fees, post-expiration renewal fees (if different) and redemption/restore fees reasonably available to registered name holders and prospective registered name holders at the time of registration of a gTLD name. At a minimum, these fees must be clearly displayed on the registrar's website and a link to these fees must be included in the registrar's registration agreements. documentdata Anstalt's failure to clearly display on its website or provide a link to redemption/restore fees is a breach of Section 4.1 of the ERRP.

Failure to send pre-expiration notifications at the specified times

Section 2.1 of the ERRP requires registrars to, prior to the expiration of any gTLD registration, notify the RNH of the expiration at least two times. One of these notices must be sent approximately one month prior to expiration and one must be sent approximately one week prior to expiration. documentdata Anstalt’s failure to send pre-expiration reminder notices at these specified times, prior to expiration, is a breach of Section 2.1 of the ERRP.

Failure to pay accreditation fees

Section 3.9 of the RAA requires registrars to timely pay accreditation fees to ICANN, consisting of yearly and variable fees. documentdata Anstalt’s failure to pay ICANN \$1,382.21 in past due accreditation fees, is a breach of Section 3.9 of the RAA.
