SUBJECT  Community Priority Evaluation Letters of Opposition for Application Number 1-980-7217 as Filed by Merck KGaA for .MERCK

Dear ICANN and the Economist Intelligence Unit

Please find enclosed a selection of letters of opposition for application number 1-980-7217 as filed by Merck KGaA for .MERCK. These are submitted as part of the Community Priority Evaluation process and are to be posted as correspondence.

Kind regards

David Taylor
April 1, 2016

Brenda D Colatrella  
Executive Director, Corporate Responsibility  
Merck & Co., Inc.

Letter of Support for US Merck's Community application

Dear Brenda,

We would like to take this opportunity to express our support for Merck & Co., Inc.'s gTLD application number 1-1702-73085 for the domain .MERCK for the “Merck Community” and to note our objection to the gTLD application number 1-980-7217 as filed by Merck KGaA for the same domain.

We are writing to express our support for the application filed by Merck Registry Holdings, Inc., a subsidiary of Merck & Co., Inc. (“Merck”), to operate the .MERCK gTLD for the benefit of the Merck Community. The Merck Community is centered around the economic, educational and philanthropic activities conducted by Merck.

Through our work with Merck, the Merck Company Foundation and their many other charitable foundations and educational programs in the furtherance of our mission we identify with the values and goals of the Merck Community as we strive towards improving access to health care and the eradication of poverty and hunger.

The Task Force for Global Health has partnered with Merck for 29 years on its pioneering donation of Mectizan for the control and elimination of river blindness and lymphatic filariasis, two devastating tropical parasitic diseases. The donation of Mectizan is the longest ongoing drug donation of its kind. Merck and The Merck Mectizan Donation Program changed the face of global health by setting a precedent and creating a model for pharmaceutical donations of anti-parasitic and anti-bacterial medications that can be distributed on a massive scale for a group of diseases known as “Neglected Tropical Diseases” (NTDs). As a result of Merck’s generosity, billions of people are now treated annually for NTDs, which has dramatically improved access to medicines in the developing world. Merck’s Mectizan Donation Program and its partners successfully rid four countries of river blindness in Latin America and two more are not far behind. This success is also being seen in Africa as river blindness and lymphatic filariasis are disappearing due to the drugs’ interference with disease transmission.

The Task Force for Global Health is a non-profit 501(c)(3) organization.
We strongly believe that the operation of the .MERCK TLD to serve as a trusted, hierarchical, and intuitive namespace for the Merck Community will greatly assist in the continuing philanthropic endeavours of the Merck Community and the programs that they support and the beneficiaries of these programs worldwide. By operating the .MERCK TLD in a manner that restricts domain name registrations and use to members of the Merck Community, the .MERCK namespace will be providing genuine, reliable and trusted content related to the Merck Community and its economic, educational and philanthropic activities. As access to the Internet and usage of the Internet grows on a worldwide basis, it is vital that the Merck Community keeps pace with this changing landscape not only to ensure that information relating to their community activities is accessible, but also to ensure that Internet users can interact with the Merck Community and its economic, educational and philanthropic activities in a secure online environment.

As such we would like to express our support for the application filed by Merck Registry Holdings, Inc. for the .MERCK gTLD to be operated for the benefit of the Merck Community and the wider network of partners and communities who work together to improve living conditions and access to health care across the world.

Sincerely,

David Ross, ScD
President

The Task Force for Global Health is a non-profit 501(c)(3) organization.

Re: Letter of Opposition for Application No 1-980-7217 and Letter of Support for Application No 1-1702-73085

Dear Ms. Willett:

We would like to take this opportunity to express our support for Merck & Co., Inc.'s gTLD application number 1-1702-73085 for the domain .MERCK for the "Merck Community", and to note our objection to the gTLD application number 1-980-7217 as filed by Merck KGaA for the same domain.

We would like to raise our concerns to the ICANN Board and evaluation panels regarding the Merck KGaA application and its proposed operation. Through Helen Keller International's global efforts to improve access to health care and alleviate suffering and loss of productivity caused by blindness, malnutrition and disease, we have worked closely with Merck & Co., Inc. and its community of philanthropic foundations, non-profit organizations, and health and education programs on several initiatives. Through these collaborations, we have come to appreciate and identify with the values and goals of the Merck Community, formed by Merck & Co., Inc. The Merck Community has a truly global footprint via its economic, educational and philanthropic activities across multiple health care sectors from the fight against HIV/AIDS, to the provision of vaccines and medicines to aid in the fight against diseases such as rotavirus and onchocerciasis (river blindness), to the promotion of family planning services and prevention of maternal mortality.

Helen Keller International and Merck & Co. have partnered for more than 25 years to address important health challenges. Chief among our collaborations has been our work to eliminate river blindness. In 1987, Merck & Co. established the Mectizan® Donation Program based on a community directed treatment model. This health care innovation places the power to control river blindness in the hands of community members themselves by building partnerships between communities and health care systems that can be sustained over time with minimal resources after initial technical assistance and training are provided. These systems now cover more than 100 million people each year. Our own partnership with Merck & Co. reaches more than 12 million people per year, but the impact of the collaboration is far greater as Helen Keller International utilizes this innovative delivery mechanism in service of multiple global health challenges, including malnutrition, cataract blindness, and the fight against other debilitating tropical diseases.

As we see it, the operation of the .MERCK TLD as proposed by Merck KGaA on a closed basis, exclusively for their internal, corporate use would be detrimental to the Merck Community established by Merck & Co., Inc. and the wider network of communities, initiatives and educational programs that it supports. As access to and usage of the Internet grow on a worldwide basis, more people and organizations are going to be looking for information online relating to the Merck Community and its economic, educational and philanthropic activities. They would likely be drawn to a .MERCK TLD expecting to find information relating to the Merck Community and its global network of partners. However, if the .MERCK TLD is operated in the closed manner proposed by Merck KGaA, Internet users will not only be unable to access information relating to the Merck Community, but are also likely to be confused as to the nature of the TLD and assume that there is a
genuine connection with the larger Merck Community. Beyond this possibility for confusion is the potential risk that these information seekers would be misled, thinking incorrectly that the .MERCK TLD is tied to the global reputation of the Merck Community and its educational and philanthropic activities, rather than in fact existing solely to promote Merck KGaA's own corporate activities.

This would be an undesirable situation and could have adverse impacts on the Merck Community's philanthropic activities to improve living conditions and access to health care across the world. Thus, we urge you to grant the .MERCK LTD to Merck & Co., Inc. as set forth in their application and not to grant use of this domain to Merck KGaA.

Sincerely yours,

Kathy Spahn
President and CEO

Los Angeles, CA 90094

Dear Ms Willett,

RE: Community Priority Evaluation - .MERCK (1-980-7217)

We would like to take this opportunity to express our opposition to the gTLD application number 1-980-7217 as filed by Merck KGaA for .MERCK. Merck & Co., Inc. is our parent company, and we use the name ‘MSD’.

Merck & Co., Inc., with its headquarters in Whitehouse Station, NJ, USA, is a Fortune 100 company and one of the largest healthcare companies in the world. For nearly a century, Merck & Co., Inc. has operated continuously under the MERCK name and trademark in the United States and Canada, and under a family of MERCK-composite trademarks in other countries outside the US and Canada, by agreement with Merck KGaA, Darmstadt. During this time, Merck & Co., Inc. has established a family of MERCK and MERCK-composite trademarks and names which cover a range of goods and services and are registered in various countries. Merck & Co., Inc., has accordingly developed a community of companies, licensees and affiliates that have evolved since 1917, which is based upon the values, purposes, and common aims created through decades of development by virtue of that community’s economic, educational and philanthropic endeavours.

As a subsidiary of Merck & Co., Inc., we are a part of that community, and we strongly identify with Merck & Co., Inc. and its activities, whereas in no way do we identify with Merck KGaA. We, therefore, would like to raise our concerns to the ICANN Board and evaluation panels regarding the Merck KGaA application for .MERCK and its proposed operation. We are concerned that the successful application by Merck KGaA to operate the MERCK gTLD will not be representative of our community. The operation of the MERCK gTLD as proposed by Merck KGaA will, it appears, exclude us entirely and be detrimental to the community established by Merck & Co., Inc. and the wider network of communities, initiatives and educational programs that it supports.

As access to and usage of the Internet grow on a worldwide basis, more people and organizations will look for information online relating to Merck & Co., Inc., its community and its economic, educational and philanthropic activities. If the MERCK gTLD is operated in the manner proposed by Merck KGaA, many Internet users will almost
certainly be misled thinking incorrectly that the MERCK gTLD of Merck KGaA is connected to our community and its educational and philanthropic activities, rather than in fact existing solely to promote Merck KGaA's own corporate activities.

This would be an undesirable situation and could have adverse impacts on our community including its philanthropic activities to improve living conditions and access to health care.

Thus we would like to bring to your attention our opposition to the operation of the MERCK gTLD as set out in gTLD application number 1-980-7217 and to recommend that the applicant is not permitted to run the MERCK gTLD.

Yours sincerely,
Merck Sharp & Dohme (Australia) Pty Limited

Re: Community Priority Evaluation - .MERCK (1-980-7217)

Dear Ms. Willett:

We would like to take this opportunity to express our opposition to the gTLD application number 1-980-7217 as filed by Merck KGaA for .MERCK. Merck & Co., Inc. is our parent company, and we use the name ‘MSD’.

Merck & Co., Inc., with its headquarters in Whitehouse Station, NJ, USA, is a Fortune 100 company and one of the largest healthcare companies in the world. For nearly a century, Merck & Co., Inc. has operated continuously under the MERCK name and trademark in the United States and Canada, and under a family of MERCK-composite trademarks in other countries outside the US and Canada, by agreement with Merck KGaA, Darmstadt. During this time, Merck & Co., Inc. has established a family of MERCK and MERCK-composite trademarks and names which cover a range of goods and services and are registered in various countries. Merck & Co., Inc., has accordingly developed a community of companies, licensees and affiliates that have evolved since 1917, which is based upon the values, purposes, and common aims created through decades of development by virtue of that community’s economic, educational and philanthropic endeavours.

As a subsidiary of Merck & Co., Inc., we are a part of that community, and we strongly identify with Merck & Co., Inc. and its activities, whereas in no way do we identify with Merck KGaA. We, therefore, would like to raise our concerns to the ICANN Board and evaluation panels regarding the Merck KGaA application for .MERCK and its proposed operation. We are concerned that the successful application by Merck KGaA to operate the .MERCK gTLD will not be representative of our community. The operation of the .MERCK gTLD as proposed by Merck KGaA will, it appears, exclude us entirely and be detrimental to the community established by Merck & Co., Inc. and the wider network of communities, initiatives and educational programs that it supports.

As access to and usage of the Internet grow on a worldwide basis, more people and organizations will look for information online relating to Merck & Co., Inc., its community and its economic, educational and philanthropic activities. If the .MERCK gTLD is operated in the manner proposed by Merck KGaA, many Internet users will almost certainly be misled thinking incorrectly that the .MERCK gTLD of Merck KGaA is connected to our community and its educational and philanthropic activities, rather than in fact existing solely to promote Merck KGaA’s own corporate activities.
This would be an undesirable situation and could have adverse impacts on our community including its philanthropic activities to improve living conditions and access to health care.

Thus we would like to bring to your attention our opposition to the operation of the .MERCK gTLD as set out in gTLD application number 1-980-7217 and to recommend that the applicant is not permitted to run the .MERCK gTLD.

Sincerely,

[Signature]
