

*ICANN Five-Year Operating Plan*

*FY2016- FY2020*

## Introduction

ICANN developed a multi-year planning framework based on input from the ICANN community during the development of the Strategic Plan. At ICANN 51 opening remarks by Fadi Chehadé (ICANN President and CEO) included an overview of the Planning Process (link: <https://www.icann.org/presidents-corner>). The framework includes the following three elements:

- I. Five-Year Strategic Plan FY16-FY20** – Developed with community input, to be updated every five years, and includes vision & mission, strategic objectives, goals, key success factors, and strategic risks.
- II. Five-Year Operating Plan FY16-FY20** – Developed with community input and to be updated annually to include: five-year planning calendar; strategic goals with corresponding key performance indicators, dependencies, five-year phasing, and list of portfolios; and five-year financial model.
- III. Annual Operating Plan & Budget** – Based and derived from the ICANN Five-Year Operating Plan and annual community input, it will include portfolios of activities that support the achievement of the goals and objectives with corresponding key performance indicators, dependencies, budgets, and projects.

The Five-Year Strategic Plan for fiscal years 2016 through 2020 (FY16-FY20) was approved by the Board and published on 14 October 2014.

[Version 1](#) of the *Annual Operating Plan & Budget* was reviewed by the Board on 16 October 2014 and published for [Public Comment](#) from 11 November 2014 to 4 January 2015. Version 2 of the *Annual Operating Plan & Budget* includes modifications based on [public comments](#), feedback received at ICANN 52 from community interactions, and management review. The Five-Year Operating Plan helps establish and communicate the roadmap to operationalize ICANN's menu of work.

ICANN acknowledges that stakeholder bandwidth and support continues to be a key dependency to meeting the goals set forth in ICANN's portfolio of work.

## Reference and Notes

1. The ICANN community (community) encompasses ICANN’s stakeholders—including its Supporting Organizations, Advisory Committees, and Nominating Committee—the Board of Directors, and staff. ICANN’s multistakeholder model, therefore, defines its community.
2. ICANN [Portfolio Management System](#). Below is a high-level composite of ICANN's work structure.

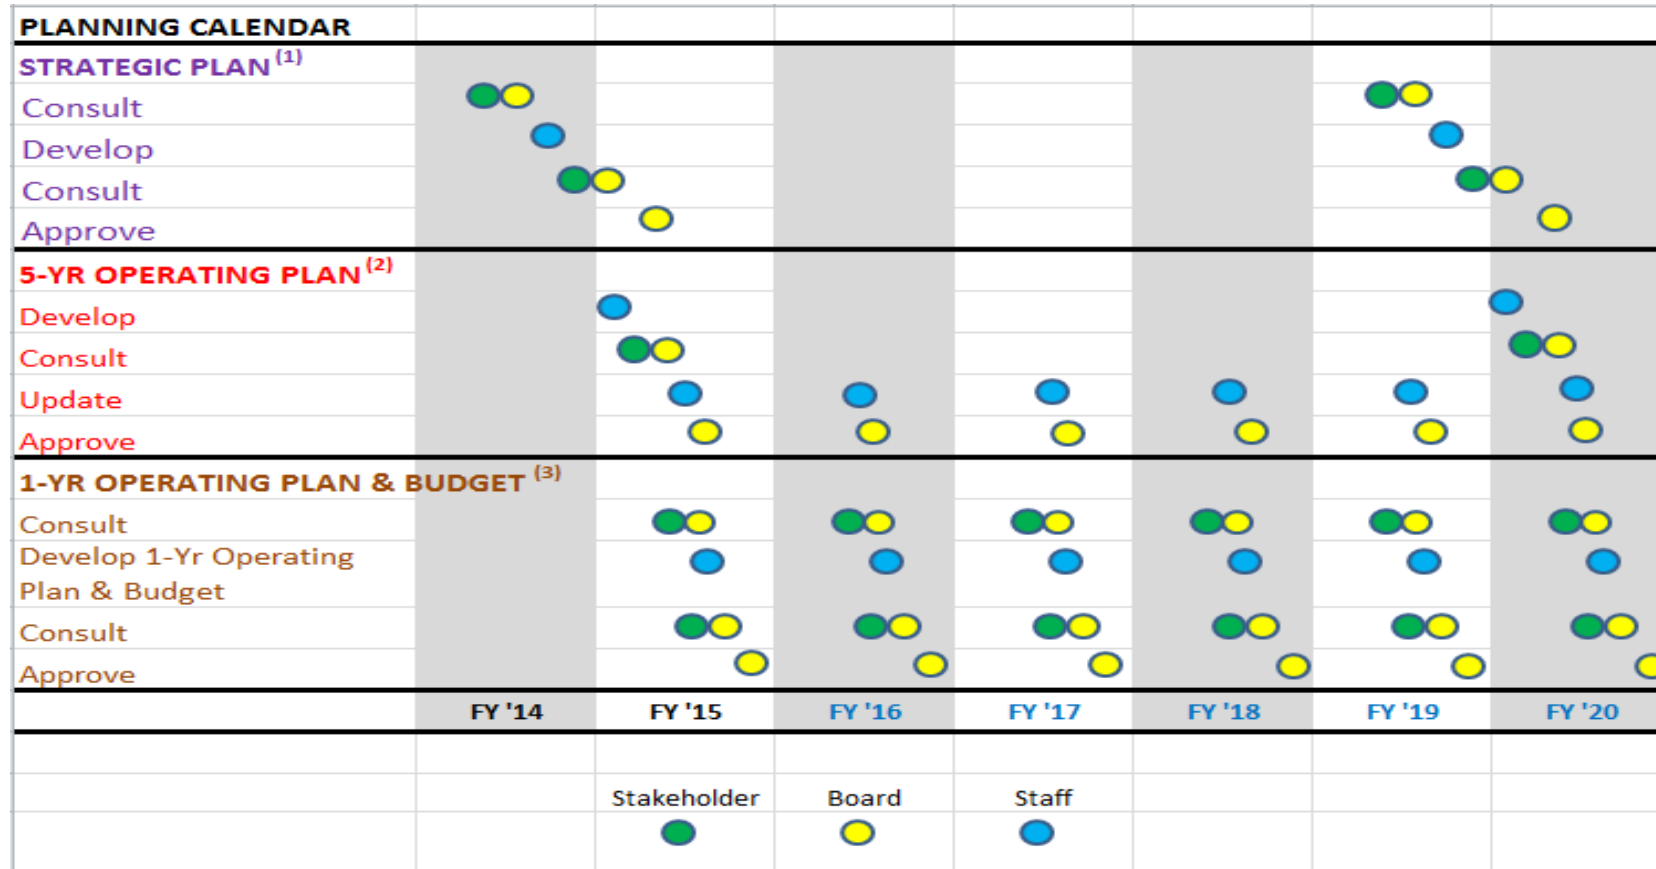

3. Definition of terms can be found in the [ICANN online glossary](#)
4. Key Performance Indicators (KPIs) may vary over time as they are refined. Typically KPI’s start with:
  - \$ = Value of
  - # = Number of
  - % = Percentage of
5. Throughout the Five-Year Operating Plan, portfolios contain various projects that contribute to other goals (such as Portfolios in Goal 5.3 support Goal 3.3 as well).
6. Goal-level risks are stated in the Five-Year [Strategic Plan](#).

## **Planning – Calendar, Community Roles and Responsibilities**

The planning process requires the collaborative effort of all aspects of the ICANN community, which encompasses ICANN’s stakeholders—including its Supporting Organizations, Advisory Committees, and Nominating Committee—the Board of Directors, and staff, and is part of the bottom-up multi-stakeholder process.

The calendar below depicts the involvement of the ICANN community and the timeline of the planning process.

<sup>(1)</sup> The next Strategic Planning effort for FY21 – FY25 will start in FY19.

<sup>(2)</sup> The Five-Year Operating Plan will be updated annually to reflect how actual performance and recent events at the time would impact the remaining years in the then current planning cycle. The current **Five-Year Operating Plan calendar** is available on page 9.

<sup>(3)</sup> The Five-Year Strategic Plan for FY16–FY20 is linked to the Five-Year Operating Plan, which informs the One-Year Operating Plan & Budget.

The charts below propose a starting point for defining how ICANN community – Board, staff and stakeholders– will be involved in the planning process. It includes frequency of activities, supporting elements as well as roles and responsibilities.

### Strategic Plan Process:

<sup>2</sup> All documents will be posted and publically available.

<sup>3</sup> The planning cycle will begin approximately 24 months prior to the start of the next planning cycle (FY21–FY25), to allow sufficient time for key planning steps.

<sup>4</sup> An important aspect of strategic planning is the environmental analysis, including assessment of Strengths and Weaknesses (internally-focused) and Opportunities and Threats (externally-focused).

# Five-Year Financial Model

## Introduction

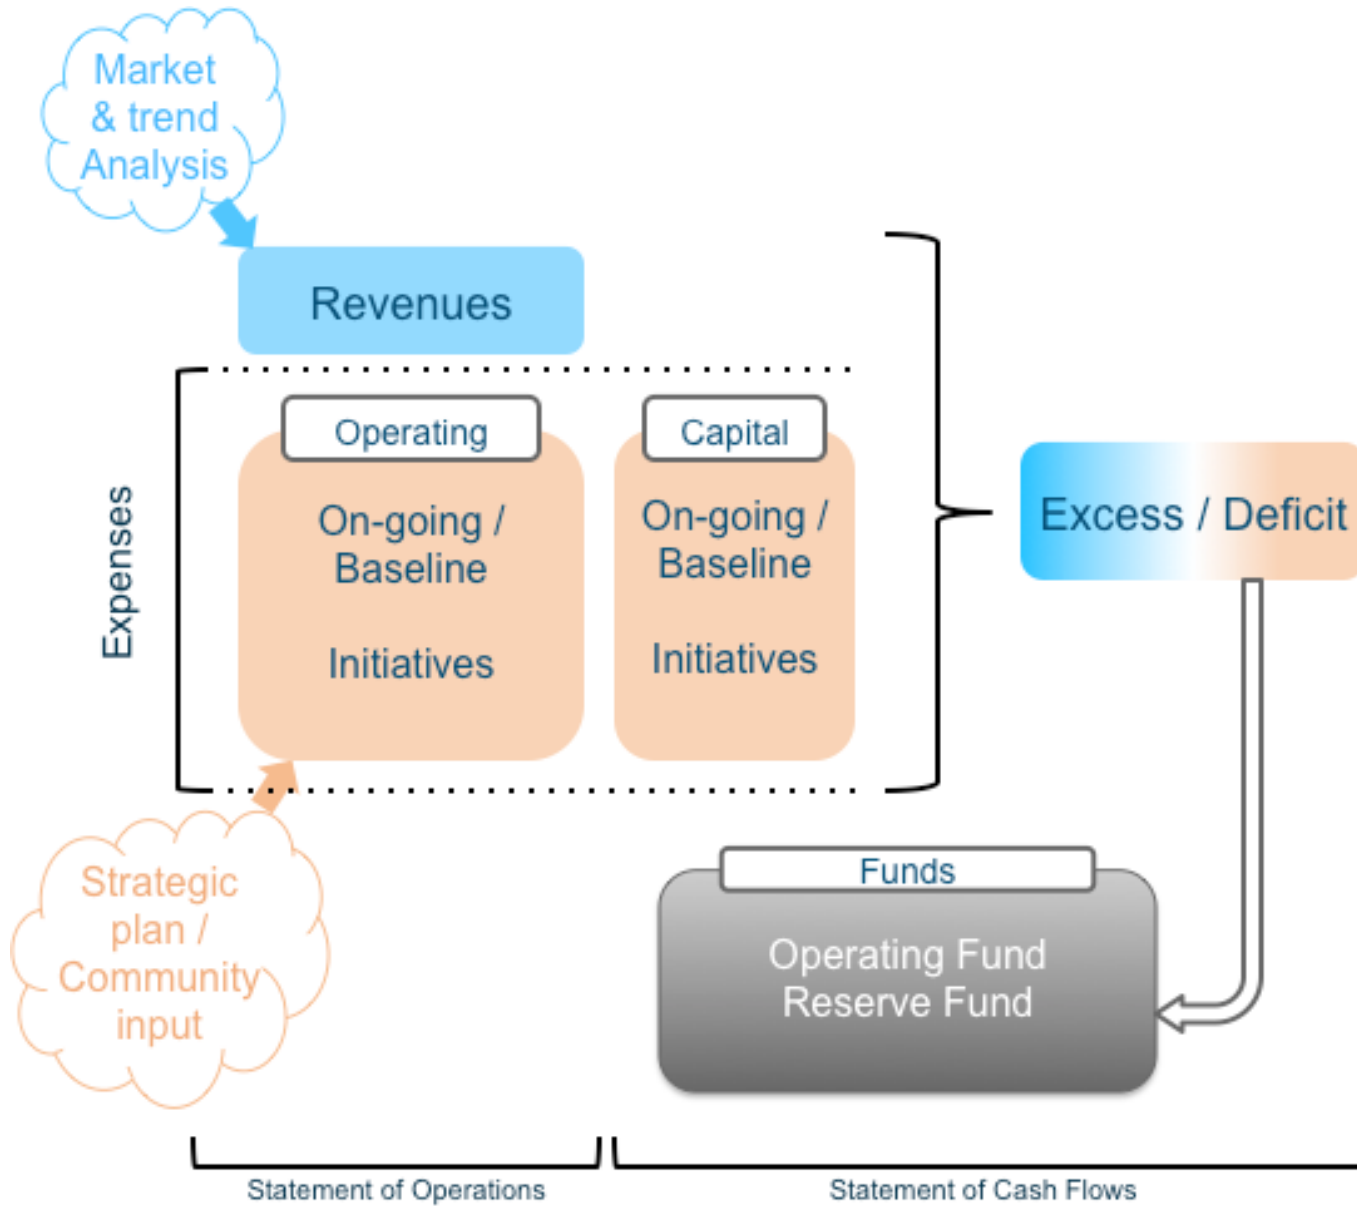

The financial model provides a long-term perspective on ICANN's high-level revenue and expenses trends. It is a forward looking perspective based on assumptions.

The benefit of building such a model is to raise strategic questions, suggest possible trends, and to provide a tool for management to plan organizational activities. As events and activities unfold, adjustments may become necessary and will naturally impact the five-year financial model.

The financial model is not:

- the result of a detailed budget-like exercise
- a public position statement
- fixed for a long time

# 1. Approach to Five-Year Financial Model

## 2. Principles:

The five-year financial model should:

- a. Reflect a conservative approach.
- b. Assume that incoming funds should equal or exceed outgoing funds.
- c. Assume that the level of outgoing funds reflects the costs of the resources required to achieve the strategic and operating plans.
- d. Include an assumption on maintaining the appropriate level of cash reserve.
- e. Be developed and communicated with clear assumptions.
- f. Provide the sensitivity of fluctuations (e.g., scenarios).
- g. Define aggregates (envelopes), not itemized components.

### 3. Assumptions:

#### a. Revenue Assumptions:

- Market and historical trends impacting the evolution of registration volumes, separately for historical Top Level Domains (TLDs) (previous to the current round) and for new TLDs.
- For new TLDs, registration volumes exceeding the billing threshold for the registry transaction-based fees.
- Number of active TLDs (delegated in the root), including resulting from a subsequent generic TLD (gTLD) application round.
- Fee per unit.
- Contributions received from country code TLD (ccTLD) operators and Regional Internet Registries.
- Sponsorship contribution received.
- Revenues for the New gTLD Program: duration, and level of application refunds.

#### b. Expenses Assumptions:

- Year-on-year variation of operating and capital expenses.
- Non-cash expenses (e.g., depreciation of fixed assets).
- Special/large initiatives and related expenses (e.g., USG IANA stewardship transition, ATRT2, Whois, infrastructure expansion/improvements,...).
- Expenses for the New gTLD Program divided between evaluation costs, historical development costs repayment, and hard-to-predict costs (including risks). Evaluation costs to be split into direct costs by phase (initial evaluation, extended evaluation, other phases), and overhead (new gTLD team costs, administration costs, and costs allocation).

## 4. Contents of the financial model

- a. Financial statements
  - Statement of Operations (“P&L”)
  - Statement of Cash flows
- b. Assumptions, including scenarios
- c. Risks and Opportunities
