- November the 3rd, 2003: +Arabic +Greek +Hebrew
- February the 26th, 2004: Cyrillic
registration rules
First Come, First Served
registration rules...

- First Come, First Served method,
- No pre-registrations,
- No „sunrise” period,
- ACE version only for input, output, processing,
- NASK accepts only valid ACE strings according to RFC 3490, 3491, 3492,
- “xn--” is the only accepted prefix for ACE domain names,
registration rules...

- No special rules for ACE domain names,
- A combination of characters from different character sets is not allowed
- No variants,
- No bundling,
- No association with languages – no "language tags",
- No changes to internal databases, protocols (EPP), invoicing, procedures, customer care etc.
registration rules...

- „xn-“ domain name is the subject of the contract,

- **Transparency:**
  - The IDN registration rules are publicly available as NASK’s IETF Internet Draft (draft-bartosiewicz-idn-pltld-07)
  - Technical part of Registry-Registrar agreement refers to the IETF documents including RFCs and the NASK’s drafts (concerning EPP, IDNs), as the best source of the up-to-date information.

- **No changes to Arbitration Cout’s procedures**
IETF Internet Drafts

remarks...

- Our mission is to support all minorities and ethnic groups living in Poland.
- NASK’s policy helps preserve culture and tradition of different minorities living in Poland.
I had a dream: all ccTLD and gTLD registries supporting Polish language.
Thanks to ICANN/IANA and all publishing the language tables...

- .jp (IETF draft & IANA language table registry)
- .info (IANA language table registry)
- .kr (IANA language table registry)
- .museum (IANA language table registry)
Thanks to MINC and other organizations for their effort in supporting Internationalized Domain Names especially ML.ML concept.

We understand that ML.ASCII for some countries is not sufficient.
