  conducting outreach to variety of groups
  - Professional societies (e.g. engineers, attorneys, etc.)
  - Consumer advocacy and civil society groups
  - Computer user organizations
  - Others
Policy activities: Registry services

- Position on Jan 17th
  - Everything should be allowed unless proven harmful
  - Special attention to cases where market competition can’t work
  - DNS must be application- and protocol-neutral
  - Changes that increase revenues for registries but dump costs on end users should be prevented
  - Registries should not exploit market dominance in their field to enter into other fields
  - Monopolies should not be established if competition is possible
More activities: WSIS

- Informal participation by some ALAC members in WSIS and in related events
- WSIS workshop co-organized here in Rome
- Very important that the ICANN community:
  - is informed about what is happening at WSIS
  - mobilizes local Internet communities
  - participates in the upcoming UN WG activities
- Statement released in the last weeks
  - Support for public-private partnership and ICANN
  - A couple of issues still need to be addressed
  - ALAC willing to participate in UN working group
Thank you
