Goodmorning,

i'm tired to write many email without you have a reply. I had the problem with renewel of the domain "festivalverghiano.com[festivalverghiano.com]". It registered with a cybersquatting action. I wrote many times, sent the documentation but no one ever answered me. At this point you seem to protect the criminals and the scammers.

I am addressing the Italian Embassy and I will do it to the American police denouncing your work. You will also be given a press release informing the behavior of your organization

Best
