First stop social media to spread the word. The internet is the peoples, not the elitists, get ready for combat. You can laugh and delete this email be my guest, the fallout will follow. I am a little nobody who has been pushed to the limit and will not stop until the world knows of your corruption and greed. How dare you tell me to go buy a domain, that email will be the end of the current regime. You can thank the fool who sent it, he just took you all down.
