I. Introduction

On 17 September 2016, the Board of Directors of the Internet Corporation for Assigned Names and Numbers (ICANN organization) directed the President and CEO or his designees to undertake a review of the "process by which ICANN [organization] interacted with the [Community Priority Evaluation] CPE Provider, both generally and specifically with respect to the CPE reports issued by the CPE Provider" as part of the New gTLD Program.¹ The Board's action was part of the ongoing discussions regarding various aspects of the CPE process, including some issues that were identified in the Final Declaration from the Independent Review Process (IRP) proceeding initiated by Dot Registry, LLC.²

On 18 October 2016, the Board Governance Committee (BGC) discussed potential next steps regarding the review of pending Reconsideration Requests relating to the CPE process.³ The BGC determined that, in addition to reviewing the process by which ICANN organization interacted with the CPE Provider related to the CPE reports issued by the CPE Provider (Scope 1), the review would also include: (i) an evaluation of whether the CPE criteria were applied consistently throughout each CPE report (Scope 2); and (ii) a compilation of the reference material relied upon by the CPE Provider to the extent such reference material exists for the evaluations which are the subject of pending Reconsideration Requests (Scope 3).⁴ Scopes 1, 2, and 3 are collectively referred to as the CPE Process Review. FTI Consulting, Inc.'s (FTI) Global Risk and Investigations Practice and Technology Practice were retained by Jones Day on behalf of its client ICANN organization in order to conduct the CPE Process Review.

On 26 April 2017, Chris Disspain, the Chair of the BGC, provided additional information about the scope and status of the CPE Process Review.⁵ Among other things, he identified eight Reconsideration Requests that would be on hold until the CPE Process Review was completed.⁶ On 2 June 2017, ICANN organization issued a status update.⁷ ICANN organization informed the community that the CPE Process Review was being conducted on two parallel tracks by FTI. The first track focused on gathering information and materials from ICANN organization, including interviewing relevant ICANN organization personnel and document collection. This work was completed in early March 2017. The second track focused on gathering information and materials from the CPE Provider, including interviewing relevant personnel. This work was still ongoing at the time ICANN issued the 2 June 2017 status update.

On 1 September 2017, ICANN organization issued a second update, advising that the interview process of the CPE Provider's personnel that were involved in CPEs had been completed.⁸ The update further informed that FTI was working with the CPE Provider to obtain the CPE Provider's communications and working papers, including the reference material cited in the CPE reports prepared by the CPE Provider for the evaluations that are the subject of pending Reconsideration Requests. On 4 October 2017, FTI completed its investigative process relating to the second track.

This report addresses Scope 2 of the CPE Process Review and specifically details FTI's evaluation of whether the CPE Provider consistently applied the CPE criteria throughout each CPE.

II. Executive Summary

FTI concludes that the CPE Provider consistently applied the criteria set forth in the New gTLD Applicant Guidebook (Applicant Guidebook)⁹ and the CPE Guidelines throughout each CPE. This conclusion is based upon FTI's review of the written communications and documents and FTI's interviews with the relevant personnel described in Section III below.

Throughout its investigation, FTI carefully considered the claims raised in Reconsideration Requests and Independent Review Process (IRP) proceedings related to CPE. FTI specifically considered the claim that certain of the CPE criteria were applied inconsistently across the various CPEs as reflected in the CPE reports. FTI found no evidence that the CPE Provider's evaluation process or reports deviated in any way from the applicable guidelines; nor did FTI observe any instances where the CPE Provider applied the CPE criteria in an inconsistent manner. While some applications received full points for certain criterion and others did not, the CPE Provider's findings in this regard were not the result of inconsistent application of the criteria. Rather, based on FTI's investigation, it was observed that the CPE Provider's scoring decisions were based on a consistent application of the Applicant Guidebook and the CPE Guidelines.

III. Methodology

A. FTI's Investigative Approach.

In Scope 2 of the CPE Process Review, FTI was tasked with evaluating whether the CPE Provider applied the CPE criteria consistently throughout each CPE. This type of evaluation is commonly referred to in the industry as a "compliance investigation." In a compliance investigation, an investigator analyzes applicable policies and procedures and evaluates whether a person, corporation, or other entity complied with or properly applied those policies and procedures in carrying out a specific task. Here, FTI

⁹ See Applicant Guidebook, Module 4.2 at Pgs. 4-7 to 4-19 (https://newgtlds.icann.org/en/applicants/agb/string-contention-procedures-04jun12-en.pdf).

employed the aforementioned compliance-focused investigative methodology and strategy in connection with Scope 2 of the CPE Process Review.

FTI also incorporated aspects of a traditional investigative approach promulgated by the Association of Certified Fraud Examiners (ACFE).¹⁰ This international investigative methodology is used by both law enforcement and private investigative companies worldwide.

These types of investigations begin with the formation of an investigative plan which identifies documentation, communications, individuals, and entities that may be potentially relevant to the investigation. The next step involves the collection and review of all potentially relevant materials and documentation, including applicable procedures, materials, and communications pertaining to the subject of the investigation. After gaining a comprehensive understanding of the relevant background facts, investigators then interview relevant individuals deemed to have knowledge pertinent to the subject being investigated.

Investigators then re-review relevant documents and materials, compare information contained in those materials to the information obtained in interviews, identify any gaps, inconsistencies, or contradictions within the information gathered, and ascertain any need for additional information. This step also frequently results in follow-up interviews in order to either confirm or rule out any gaps, inconsistencies, or contradictions. Follow-up interviews also may be conducted to re-confirm with interviewees certain facts or ask for elaboration on certain issues.

Investigators then re-analyze all relevant documentation to prepare for writing the investigative report.

4

THE ACFE is the largest and most prestigious anti-fraud organization globally; it grants certification to members who meet its standards of professionalism. See www.acfe.com. FTl's investigative team, which includes published authors and frequent speakers on investigative best practices, holds this certification.

B. FTI's Investigative Steps for Scope 2 of the CPE Process Review.

Consistent with the above-described methodology, FTI undertook the following process to evaluate whether the CPE criteria were applied consistently throughout each CPE.

Specifically, FTI did the following:

- Reviewed publicly available documents pertaining to CPE, including:
 - New gTLD Applicant Guidebook (the entire Applicant Guidebook with particular attention to Module 4.2): https://newgtlds.icann.org/en/applicants/agb;

 - 1. Internal emails among relevant ICANN organization personnel relating to the CPE process and evaluations (including email attachments); and
 - 2. External emails between relevant ICANN organization personnel and relevant CPE Provider personnel relating to the CPE process and evaluations (including email attachments).
- Requested the following from the CPE Provider:
 - Internal emails among relevant CPE Provider personnel, including evaluators, relating to the CPE process and evaluations (including email attachments);
 - 2. External emails between relevant CPE Provider personnel and relevant ICANN organization personnel related to the CPE process and evaluations (including email attachments); and
 - 3. The CPE Provider's internal documents pertaining to the CPE process and evaluations, including working papers, draft reports, notes, and spreadsheets.

FTI did not receive documents from the CPE Provider in response to Items 1 or

2. FTI did receive and reviewed documents from ICANN Organization that were

responsive to the materials FTI requested from the CPE Provider in Item 2 (i.e., emails between relevant CPE Provider personnel and relevant ICANN organization personnel related to the CPE process and evaluations (including email attachments)). FTI received and reviewed documentation produced by the CPE Provider in response to Item 3.

- Interviewed relevant ICANN organization personnel.
- Interviewed relevant CPE Provider personnel.
- Compared the information obtained from both ICANN organization and the CPE Provider.

FTI understands that various applicants requested that they be interviewed in connection with the CPE Process Review. FTI determined that such interviews were not necessary or appropriate because FTI's task is to evaluate whether the CPE Provider consistently applied the CPE criteria as set forth in the Applicant Guidebook and CPE Guidelines, and neither of those governing documents provide for applicant interviews. Further, in keeping with the Applicant Guidebook and CPE Guidelines, the CPE Provider did not interview applicants during its evaluation process; accordingly, FTI determined that it was not warranted to do so in connection with Scope 2 of the CPE Process Review. FTI did obtain an understanding of applicants' concerns through a comprehensive review and analysis of the materials described above, including claims raised in all relevant Reconsideration Requests and IRP proceedings.

In the context of Scope 2 of the CPE Process Review, FTI examined all aspects of the CPE Provider's evaluation process in evaluating whether the CPE Provider consistently applied the CPE criteria throughout each CPE. Specifically, FTI's investigation included the following steps:

- 1. FTI formulated an investigative plan and, based on that plan, collected potentially relevant materials (as described above).
- 2. FTI analyzed all relevant materials (as described above) to ensure that FTI had a solid understanding of the CPE process and specifically the guidelines pertaining to the scoring of the CPE criteria.

- 3. With that foundation, FTI then evaluated the materials and email communications (including attachments) provided by ICANN organization and the CPE Provider (as described above). FTI also analyzed drafts and final versions of the CPE reports, as well materials submitted in relevant Reconsideration Requests and IRP proceedings challenging CPE outcomes. These documents were particularly relevant to Scope 2 of the CPE Process Review because they reflect the manner in which the CPE Provider applied the CPE criteria to each application and the concerns raised by various applicants regarding the CPE process.
- 4. FTI then interviewed relevant ICANN organization personnel separately. FTI asked each individual to describe the CPE process and his/her role in that process. FTI also asked each individual to explain his/her interaction with the CPE Provider and his/her understanding of the steps the CPE Provider undertook in order to perform CPE.
- 5. FTI then interviewed two members of the CPE Provider's staff and asked each to explain in detail his/her understanding of the CPE guidelines. As noted in FTI's report addressing Scope 1 of the CPE Process Review, these two individuals were the only two remaining personnel who participated in the CPE process (both were also part of the core team for all 26 evaluations). Each explained in detail his/her understanding of the CPE criteria. The interviewees also explained the evaluation process the CPE Provider undertook to perform CPE.
- 6. FTI then analyzed the CPE Provider's working papers associated with each evaluation, including documents capturing the evaluators' work, spreadsheets prepared by the core team for each evaluation and which reflect the initial scoring decisions, notes, and every draft of each CPE report including the final report as published by ICANN organization.
- 7. FTI engaged in follow-up communications with CPE Provider personnel in order to clarify details discussed in the earlier interviews and in the materials provided.
- 8. FTI then re-analyzed the Reconsideration Requests and materials submitted in IRP proceedings pertaining to CPE with a specific focus on identifying any claims that the CPE Provider inconsistently applied the CPE criteria.
- 9. FTI then reviewed the written materials produced by ICANN organization and the CPE Provider and prepared this report for Scope 2 of the CPE Process Review.

IV. Background on CPE

CPE is a contention resolution mechanism available to applicants that self-designated their applications as community applications.¹¹ CPE is defined in Module 4.2 of the Applicant Guidebook, and allows a community-based application to undergo an evaluation against the criteria as defined in section 4.2.3 of the Applicant Guidebook, to determine if the application warrants the minimum score of 14 points (out of a maximum of 16 points) to earn priority and thus prevail over other applications in the contention set.¹² CPE will occur only if a community-based applicant selects to undergo CPE for its relevant application and after all applications in the contention set have completed all previous stages of the new gTLD evaluation process. CPE is performed by an independent provider (CPE Provider).¹³

As noted, the standards governing CPE are set forth in Module 4.2 of the Applicant Guidebook.¹⁴ The CPE Provider personnel interviewed by FTI stated that they were strict constructionists and used the Applicant Guidebook as their "bible." Further, the CPE Provider stated that it relied first and foremost on material provided by the applicant. The CPE Provider informed FTI that it only accessed reference material when the evaluators or core team decided that research was needed to address questions that arose during the review.

In addition, the CPE Provider published the CPE Panel Process Document, explaining that the CPE Provider was selected to implement the Applicant Guidebook's CPE provisions.¹⁵ The CPE Provider also published supplementary guidelines (CPE Guidelines) that provided more detailed scoring guidance, including scoring rubrics,

definitions of key terms, and specific questions to be scored.¹⁶ The CPE Provider personnel interviewed by FTI stated that the CPE Guidelines were intended to increase transparency, fairness, and predictability around the assessment process. As discussed in further detail below, the CPE Guidelines set forth the methodology that the CPE Provider undertook to evaluate each criterion.

Based upon the materials reviewed and interviews with ICANN organization and CPE Provider personnel, FTI learned that each evaluation began with a notice of commencement from ICANN organization to the CPE Provider via email. As part of the notice of commencement, ICANN organization identified the materials in scope, which included: application questions 1-30a, application comments, correspondence, objection outcomes, and outside research (as necessary). ICANN organization delivered to the CPE Provider the public comments available at the time of commencement of the CPE process. The CPE Provider was responsible for gathering the application materials, including letters of support and correspondence, from the public ICANN organization website.¹⁷

The CPE Provider personnel responsible for CPE consisted of a core team, a Project Director, a Project Coordinator, and independent evaluators. Before the CPE Provider commenced CPE, all evaluators, including members of the core team, confirmed that no conflicts of interest existed. In addition, all evaluators underwent regular training to ensure full understanding of all CPE requirements as listed in the Applicant Guidebook, as well as to ensure consistent judgment. This process included a pilot training process, which was followed by regular training sessions to ensure that all evaluators had the same understanding of the evaluation process and procedures.¹⁸

Two independent evaluators were assigned to each evaluation. The evaluators worked independently to assess and score the application in accordance with the Applicant

Guidebook and CPE guidelines. During its investigation, FTI learned that the CPE Provider's evaluators primarily relied upon a database to capture their work (i.e., all notes, research, and conclusions) pertaining to each evaluation. The database was structured with the following fields for each criterion: Question, Answer, Evidence, Sources. The Question section mirrored the questions pertaining to each sub-criterion set forth in the CPE Guidelines. For example, section 1.1.1. in the database was populated with the question, "Is the community clearly delineated?"; the same question appears in the CPE Guidelines. The Answer section had space for the evaluator to input his/her answer to the question; FTI observed that the answer generally took the form of a "yes" or "no" response. In the Evidence section, the evaluator provided his/her reasoning for his/her answer. In the Source section, the evaluator could list the source(s) he/she used to formulate an answer to a particular question, including but not limited to, the application (or sections thereof), reference material, or letters of support or opposition. The same questions were asked and the same criteria were applied to every application, and the responses and resulting evaluations formed the basis for the evaluators' scoring decisions.

According to the CPE Provider interviewees, each evaluator separately presented his/her findings in the database and then discussed his/her findings with the Project Coordinator. Then, the Project Coordinator created a spreadsheet that included sections detailing the evaluators' answers to the Question section in the database and summarizing the evaluators' conclusions on each criterion and sub-criterion. The core team then met to review and discuss the evaluators' work and scores. Following internal deliberations among the core team, the initial evaluation results were documented in the spreadsheet. The interviewees stated that, at times, the evaluators came to different conclusions on a particular score or issue. In these circumstances, the core team evaluated each evaluator's work and then referred to the Applicant Guidebook and CPE Guidelines in order to reach a conclusion as to scoring. Consistent with the CPE Panel Process Document, before the core team reached a conclusion, an evaluator may be asked to conduct additional research to answer

questions that arose during the review.¹⁹ The core team would then deliberate and coming up with a consensus as to scoring.

The process of drafting a CPE report would then commence. Each sub-criterion and the scoring rationale were addressed in each relevant section of the draft report. As discussed in further detail in FTI's report relating to Scope 1 of the CPE Process Review, ICANN organization had no role in the evaluation process and no role in the writing of the initial draft CPE report. Based upon FTI's investigation, the CPE Provider followed the same evaluation process in each CPE.²⁰ The CPE Provider's role was to determine whether the community-based application fulfilled the four community priority criteria set forth in Section 4.2.3 of the Applicant Guidebook. As discussed in detail below, the four criteria include: (i) Community Establishment; (ii) Nexus between Proposed String and Community; (iii) Registration Policies; and (iv) Community Endorsement. The sequence of the criteria reflects the order in which they will be assessed by the panel.²¹ To prevail in CPE, an application must receive at least 14 out of 16 points on the scoring of the foregoing criteria, each of which is worth a maximum of four points.²² The CPE criteria is discussed further below.

A. Criterion 1: Community Establishment.

The Community Establishment criterion evaluates "the community as explicitly identified and defined according to statements in the application."²³ The Community Establishment criterion is measured by two sub-criterion: (i) 1-A, "Delineation;" and (ii) 1-B, "Extension."²⁴

²⁴ *Id*.

An application may receive a maximum of four points on the Community Establishment criterion, including up to two points for each sub-criterion, which are Delineation and Extension. To obtain two points for Delineation, the community must be "clearly delineated, organized, and pre-existing."25 One point is awarded if a community is a "clearly delineated and pre-existing community" but does not fulfill the requirements for a score of 2.26 Zero points are awarded if there is "insufficient delineation and preexistence for a score of 1."27

To obtain two full points for Extension, the community must be "of considerable size and longevity."28 One point is awarded if the community is "of either considerable size or longevity, but not fulfilling the requirements for a score of 2."29 Zero points are awarded if the community is "of neither considerable size nor longevity."30

For sub-criterion 1-A, Delineation, the CPE Guidelines state that the following questions must be evaluated when considering the application:

- Is the community clearly delineated?³¹
- Is there at least one entity mainly dedicated to the community?³²
- Does the entity have documented evidence of activities?³³
- Has the community been active since at least September 2007?³⁴

The CPE Guidelines provide additional guidance on factors that can be considered when evaluating these four questions.³⁵

For sub-criterion 1-B, Extension, the CPE Guidelines state that the following questions must be evaluated when considering the application:

- Is the community of considerable size?³⁶
- Does the community demonstrate longevity?³⁷

B. Criterion 2: Nexus between Proposed String and Community.

The Nexus criterion evaluates "the relevance of the string to the specific community that it claims to represent." The Nexus criterion is measured by two sub-criterion: (i) 2-A, "Nexus"; and (ii) 2-B, "Uniqueness."

An application may receive a maximum of four points on the Nexus criterion, including up to three points for Nexus and one point for Uniqueness. To obtain three points for Nexus, the applied-for string must "match the name of the community or be a well-known short-form or abbreviation of the community." For a score of 2, the applied-for string should closely describe the community or the community members, without overreaching substantially beyond the community. As an example, a string could qualify for a score of 2 if it is a noun that the typical community member would naturally be called in the context. If the string appears excessively broad (such as, for example, a globally well-known but local tennis club applying for ".TENNIS") then it would not

qualify for a 2.41 Zero points are awarded if the string "does not fulfill the requirements for a score of 2."42 It is not possible to receive a score of one for this sub-criterion.

To obtain one point for Uniqueness, the applied-for string must have "no other significant meaning beyond identifying the community described in the application." Uniqueness will be scored both with regard to the community context and from a general point of view. For example, a string for a particular geographic location community may seem unique from a general perspective, but would not score a 1 for Uniqueness if it carries another significant meaning in the common language used in the relevant community location. The phrase "beyond identifying the community" in the score of 1 for Uniqueness implies a requirement that the string does identify the community, i.e. scores 2 or 3 for Nexus, in order to be eligible for a score of 1 for Uniqueness. It should be noted that Uniqueness is only about the *meaning* of the string - since the evaluation takes place to resolve contention there will obviously be other applications, community-based and/or standard, with identical or confusingly similar strings in the contention set to resolve, so the string will clearly not be "unique" in the sense of "alone." Zero points are awarded if the string "does not fulfill the requirements for a score of 1."46

For sub-criterion 2-A, Nexus, the CPE Guidelines state that the following question must be evaluated when considering the application:

 Does the string match the name of the community or is it a well-known short-form or abbreviation of the community name? The name may be, but does not need to be, the name of an organization dedicated to the community.⁴⁷

For sub-criterion 2-B, Uniqueness, the CPE Guidelines state that the following question must be evaluated when considering the application:

• Does the string have any other significant meaning (to the public in general) beyond identifying the community described in the application?⁴⁸

C. Criterion 3: Registration Policies.

The Registration Policies criterion evaluates the registration policies set forth in the application on four elements: (i) 3-A, "Eligibility"; (ii) 3-B, "Name Selection"; (iii) 3-C, "Content and Use"; and (iv) 3-D, "Enforcement." An application may receive a maximum of four points on the Registration Policies criterion, including one point for each of the four sub-criterion stated above.

For sub-criterion 3-A, Eligibility, one point is awarded if "eligibility is restricted to community members." ⁵⁰ If there is a "largely unrestricted approach to eligibility," zero points are awarded. ⁵¹

For sub-criterion 3-B, Name Selection, one point is awarded if the policies set forth in an application "include name selection rules consistent with the articulated community-based purpose of the applied-for gTLD."⁵²

For sub-criterion 3-C, Content and Use, one point is awarded if the policies set forth in an application "include rules for content and use consistent with the articulated community-based purpose of the applied-for gTLD."⁵³

For sub-criterion 3-D, Enforcement, one point is awarded if the policies set forth in an application "include specific enforcement measures (e.g., investigation practices,

For sub-criterion 3-A, Eligibility, the CPE Guidelines state that the following question must be evaluated when considering the application:

Is eligibility for being allowed as a registrant restricted?⁵⁵

For sub-criterion 3-B, Name Selection, the CPE Guidelines state that the following questions must be evaluated when considering the application:

- Do the policies set forth in the application include name selection rules?⁵⁶
- Are name selection rules consistent with the articulated community-based purpose of the applied-for gTLD?⁵⁷

For sub-criterion 3-C, Content and Use, the CPE Guidelines state that the following question must be evaluated when considering the application:

- Do the policies set forth in the application include content and use rules?
- If yes, are the content and use rules consistent with the articulated communitybased purpose of the applied-for gTLD?⁵⁹

For sub-criterion 3-D, Enforcement, the CPE Guidelines state that the following question must be evaluated when considering the application:

• Do the enforcement policies set forth in the application include specific enforcement measures constituting a coherent set with appropriate appeal mechanisms?⁶⁰

D. Criterion 4: Community Endorsement.

The Community Endorsement criterion evaluates community support for and/or opposition to an application."⁶¹ The Community Endorsement criterion is measured by two sub-criterion: (i) 4-A, "Support"; and (ii) 4-B, "Opposition."⁶² An application may receive a maximum of four points on the Community Endorsement criterion, including up to two points for each sub-criterion.

To obtain two points for the Support sub-criterion, an applicant must be the recognized community institution/member organization or have documented support from the recognized community institution/member organization, or have otherwise documented authority to represent the community.⁶³ "Recognized" community institutions are those institution(s)/organization(s) that, through membership or otherwise, are clearly recognized by the community members as representative of the community.⁶⁴ In cases of multiple institutions/organizations, there must be documented support from institutions/organizations representing a majority of the overall community addressed in order to score 2.⁶⁵ To be taken into account as relevant support, such documentation must contain a description of the process and rationale used in arriving at the expression of support. Consideration of support is not based merely on the number of comments or expressions of support received.⁶⁶

One point is awarded if the applicant has submitted documented support with its application from at least one group with relevance,⁶⁷ but does not have documented support from the majority of the recognized community institutions/member organizations, or does not provide full documentation that it has authority to represent

the community with its application.⁶⁸ Zero points are awarded if the applicant fails to provide documentation showing support from recognized community institutions/community member organizations, or does not provide documentation showing that it has the authority to represent the community.⁶⁹

To obtain two points for the Opposition sub-criterion, there must be "no opposition of relevance" to the application. One point is awarded if there is "relevant opposition from one group of non-negligible size." Zero points are awarded if there is "relevant opposition from two or more groups of non-negligible size." When scoring "Opposition," previous objections to the application as well as public comments during the same application round will be taken into account and assessed. There will be no presumption that such objections or comments would prevent a score of 2 or lead to any particular score for "Opposition." To be taken into account as relevant opposition, such objections or comments must be of a reasoned nature. Sources of opposition that are clearly spurious, unsubstantiated, made for a purpose incompatible with competition objectives, or filed for the purpose of obstruction will not be considered relevant.

For sub-criterion 4-A, Support, the CPE Guidelines state that the following questions must be evaluated when considering the application:

- Is the applicant the recognized community institution or member organization?⁷⁴
- Does the applicant have documented support from the recognized community institution(s)/member organization(s) to represent the community?

V. The CPE Provider Applied The CPE Criteria Consistently In All CPEs.

FTI assessed whether the CPE Provider consistently followed the same evaluation process in all CPEs, and whether the CPE Provider applied the CPE criteria on a consistent basis throughout the evaluation process. FTI found that the CPE Provider consistently followed the same evaluation process in all CPEs and that it consistently applied each CPE criterion and sub-criterion in the same manner in each CPE. In particular, as explained in detail below, the CPE Provider evaluated each application in the same way. While some applications received full points, others received partial points, and others received zero points for any given criterion, the scoring decisions were not the result of any inconsistent or disparate treatment by the CPE Provider. Instead, the CPE Provider's scoring decisions were based on a rigorous and consistent application of the requirements set forth in the Applicant Guidebook and CPE Guidelines. FTI also evaluated whether the CPE Provider was consistent in the use of Clarifying Questions, and concludes that a consistent approach was employed.

FTI's investigation was informed by the concerns raised in the Reconsideration Requests, IRP proceedings and correspondence submitted to ICANN organization related to the CPE process. Reconsideration is an accountability mechanism available under ICANN organization's Bylaws and involves a review process administered by the

⁷⁸ *Id.* at Pg. 19.

Reconsideration Requests have been filed where the requestor sought reconsideration of CPE results. FTI reviewed in detail these requests and the corresponding BGC's recommendations and/or determinations, as well as the Board's actions associated with these requests. Several requestors made claims that are of particular relevance to Scope 2 of the CPE Process Review. Specifically, FTI observed several claims that certain CPE criteria were applied inconsistently across the various CPEs as reflected in the CPE reports, particularly with respect to the Community Establishment and Nexus criteria. FTI also reviewed claims raised by various claimants in IRP proceedings challenging CPE outcomes. FTI factored the CPE-related claims raised in both the Reconsideration Requests and the IRPs into its investigation. It is noted, however, that FTI's task is to evaluate whether the CPE criteria as set forth in the Applicant Guidebook and CPE Guidelines were applied consistently throughout each CPE. TI was not asked to re-evaluate the applications. Ultimately, as detailed below, FTI found no evidence of inconsistent or disparate treatment by the CPE Provider.

A. The Community Establishment Criterion (Criterion 1) was Applied Consistently in all CPEs.

To assess whether the Community Establishment criterion was applied consistently, FTI evaluated how the CPE Provider applied each sub-criterion, i.e., Delineation and Extension. In doing so, FTI considered whether the CPE Provider approached in a consistent manner the questions that, pursuant to the Applicant Guidebook and CPE Guidelines, must be asked by the CPE Provider when evaluating each sub-criterion. In order to complete this evaluation, FTI reviewed the CPE Provider's scoring and

Prior to 22 July 2017, the BGC was tasked with reviewing reconsideration requests. Following 22 July 2017, the Board Accountability Mechanisms Committee (BAMC) is tasked with reviewing and making recommendations to the Board on reconsideration requests. corresponding rationale for each sub-criterion for Community Establishment for each report and compared all reports to each other to determine if the CPE Provider applied each sub-criterion consistently and in accordance with the Applicant Guidebook and CPE Guidelines.

As noted above, the Community Establishment criterion is measured by two sub-criterion: (i) Delineation (worth two points); and (ii) Extension (worth two points).⁸² While some applications received full points for the Community Establishment criterion and others did not, the CPE Provider's findings in this regard were not the result of inconsistent application of the criterion. Rather, based on its investigation, FTI concludes that all applications were evaluated on a consistent basis by the CPE Provider.

1. Sub-criterion 1-A: Delineation

To receive two points for Delineation, the Applicant Guidebook and CPE Guidelines require that the community as defined in the application be clearly delineated, organized, and pre-existing.⁸³ FTI observed that all 26 CPE reports revealed that the CPE Provider methodically evaluated each element across all 26 CPEs. As reflected in twelve CPE reports, the relevant applications received the maximum two points;⁸⁴ as

shown in one CPE report, the relevant application received one point;⁸⁵ and as noted in 13 CPE reports, the relevant applications received zero points.⁸⁶

a. <u>Clearly Delineated</u>

Two conditions must be met for a community to be clearly delineated: (i) there must be a clear, straightforward membership definition; and (ii) there must be awareness and recognition of a community as defined by the application among its members.⁸⁷

FTI observed that "a clear and straightforward membership" definition was deemed to be sufficiently demonstrated where membership could be determined through formal registration, certification, or accreditation (i.e., license, certificate of registration, etc.).⁸⁸ This was the case even if the CPE Provider found the community definition to be

The CPE Provider determined that six of the 13 applications that received zero points for the Delineation sub-criterion were not "clearly delineated" because they did not demonstrate "a clear and straightforward membership." See ART (eflux) CPE Report (https://www.icann.org/sites/default/files/tlds/art/art-cpe-1-1675-51302-en.pdf), GMBH CPE Report (https://www.icann.org/sites/default/files/tlds/gmbh/gmbh-cpe-1-1273-63351-en.pdf); IMMO CPE Report (https://www.icann.org/sites/default/files/tlds/immo/immo-cpe-1-1000-62742-en.pdf); ART (Dadotart) CPE Report (https://www.icann.org/sites/default/files/tlds/art/art-cpe-1-1097-20833-en.pdf); KIDS CPE Report (https://www.icann.org/sites/default/files/tlds/kids/kids-cpe-1-1309-46695-en.pdf); and SHOP (GMO) CPE Report (https://www.icann.org/sites/default/files/tlds/shop/shop-cpe-1-890-52063-en.pdf).

broad.⁸⁹ On the other hand, the CPE Provider determined that a community definition did not demonstrate a "clear and straightforward membership" if it was too broadly defined in the application and could not be determined through formal registration, or was "unbound and dispersed" because the community may not resonate with all stakeholders that it seeks to represent.⁹⁰ The CPE Provider also determined that a community definition showed a clear and straightforward membership where the membership was dependent on having a clear connection to a defined geographic area.⁹¹

FTI observed that the CPE Provider determined that there was "awareness and recognition of a community as defined by the application among its members" where membership could be determined through formal registration, certification, or accreditation (i.e., license, certificate of registration, etc.).⁹² On the other hand, the CPE Provider determined that the community as defined in the application did not have awareness and recognition among its members if the affiliated businesses and sectors had only a tangential relationship with the core community. In those instances, the CPE Provider found that the affiliated businesses and sectors would not associate

themselves with the community as defined.⁹³ The CPE Provider also determined that commonality of interest was not enough to satisfy the "awareness and recognition of a community" element because it did not provide substantive evidence of what the Applicant Guidebook defines as "cohesion."⁹⁴

The applications underlying the 12 CPE reports that recorded two points, and the one CPE report that recorded one point satisfied both aspects of the clearly delineated prong of the Delineation sub-criterion: the applications demonstrated a "clear and straightforward membership" of community and an "awareness and recognition of a community as defined by the application among its members." Of the applications underlying the 13 CPE reports that recorded zero points for the clearly delineated prong of the Delineation sub-criterion, six did not satisfy either element for the clearly delineated prong. The applications underlying the seven CPE reports that recorded

zero points for the clearly delineated prong were determined to have demonstrated a "clear and straightforward membership" of community, but failed to demonstrate an "awareness and recognition of a community as defined by the application among its members." The applications underlying all 13 of the CPE reports that recorded zero points failed to satisfy the "awareness" element of the clearly delineated prong of the Delineation sub-criterion.

b. <u>Organization</u>

Two conditions must be met to fulfill the requirements for organization: (i) there must be at least one entity mainly dedicated to the community; and (ii) there must be documented evidence of community activities.⁹⁸

FTI observed that, where the CPE Provider determined that there was not "at least one entity mainly dedicated to the community," then the existing entities did not represent a majority of the community as defined in the application.⁹⁹ If the CPE Provider determined that an application failed to satisfy either prong under the "clearly delineated" analysis (*see infra*), then the CPE Provider also determined that there was not "at least one entity mainly dedicated to the community" as defined in the application.¹⁰⁰ All applications that received two points for the Delineation sub-criterion

c. Pre-existence

To fulfill the requirements for pre-existence, the community must have been active prior to September 2007 (when the new gTLD policy recommendations were completed). Thirteen applications failed to satisfy the pre-existence prong; 107 twelve applications satisfied this prong. 108

FTI observed that, if the community as defined in the application was determined by the CPE Provider to be a "construed" community, 109 then the CPE Provider also found that the community did not exist prior to September 2007, even if its constituent parts may have been active prior to September 2007. 110 Further, if the CPE Provider determined

The Applicant Guidebook and CPE Guidelines require a community of considerable size and longevity to receive full points for the Extension sub-criterion.¹¹⁴

a. Size

Two conditions must be met to fulfill the requirements for size: the community must be of considerable size and must display an awareness and recognition of a community among its members. The CPE Provider determined that all community applicants defined communities of considerable size. FTI observed that, where the CPE Provider determined that the community lacked clear and straightforward membership or there was not awareness of a community (i.e., where the CPE Provider found that the

underlying the 13 CPE reports that recorded points for Delineation also satisfied the awareness requirement for size.¹²⁰

b. Longevity

Two conditions must be met to fulfill the requirements for longevity: the community must demonstrate longevity and must display an awareness and recognition of a community among its members. FTI observed that, where the CPE Provider determined that the community lacked clear and straightforward membership or there was not awareness of a community (i.e., where the CPE Provider found that the community as defined in the application was not "clearly delineated"), then the CPE Provider determined that the longevity requirement could not be met. Of the 13 CPE Reports that recorded zero points for the "clearly delineated" prong, all 13 corresponding applications failed to demonstrate awareness of a community among its members. Therefore, each of the applications underlying the 13 CPE reports that recorded zero points for the "clearly delineated" prong could not satisfy the longevity requirements. Because each of the applications underlying the 12 CPE reports that recorded two points and the one that recorded one point for the Delineation sub-criterion satisfied the awareness requirement for the "clearly delineated" prong as well as the pre-existence prong, each of the

applications that received points for Delineation satisfied both requirements for longevity.¹²³

The CPE Guidelines state that if an application obtains zero points for Delineation, an application will receive zero points for Extension. Accordingly, the 13 applications that received zero points for Delineation also received zero points for Extension.

One application received three out of a possible four points for the Community Establishment criterion. For the Delineation sub-criterion, the application received one point because the CPE Provider determined that there was not one entity mainly dedicated to the community as defined in the application, and therefore the community as defined in the application was deemed not sufficiently organized. The application received the full two points on the Extension sub-criterion.

Twelve applications received full points on the Community Establishment criterion.

Ultimately, FTI observed that the CPE Provider engaged in a consistent evaluation process that strictly adhered to the criteria and requirements set forth in the Applicant Guidebook and CPE Guidelines. FTI observed no instances where the CPE Provider's evaluation process deviated from the applicable guidelines. Based on FTI's investigation, FTI concludes that the CPE Provider consistently applied the Community

Establishment criterion in all CPEs. While the CPE Provider awarded different scores to different applications, the scoring decisions were based on the same rationale, namely a failure to satisfy the requirements that are set forth in the Applicant Guidebook and CPE Guidelines.

B. The Nexus Criterion (Criterion 2) was Applied Consistently in all CPEs.

To assess whether the Nexus criterion was applied consistently, FTI evaluated how the CPE Provider applied each sub-criterion, i.e., Nexus and Uniqueness. In doing so, FTI considered whether the CPE Provider approached in a consistent manner the questions that, pursuant to the Applicant Guidebook and CPE Guidelines, must be asked by the CPE Provider when evaluating each sub-criterion. In order to complete this evaluation, FTI reviewed the CPE Provider's scoring and corresponding rationale for each sub-criterion for Nexus for each report and compared all CPE reports to each other to determine if the CPE Provider applied each sub-criterion consistently and in accordance with the Applicant Guidebook and CPE Guidelines.

As noted above, the Nexus criterion is measured by two sub-criterion: (i) Nexus (worth three points); and (ii) Uniqueness (worth one point). While some applications received full points for the Nexus criterion and others did not, the CPE Provider's

findings in this regard were not the result of inconsistent application of the criterion. Rather, based on FTI's investigation, it was observed that all applications were evaluated on a consistent basis by the CPE Provider.

1. Sub-Criterion 2-A: Nexus

To receive a partial score of two points for Nexus,¹²⁹ the applied-for string must identify the community. According to the Applicant Guidebook, "'Identify' means that the applied-for string closely describes the community or the community members, without over-reaching substantially beyond the community."¹³⁰ In order to receive the maximum score of three points, the applied-for string must: (i) "identify" the community; and (ii) match the name of the community or be a well-known short-form or abbreviation of the community.

FTI observed that the CPE Provider determined that the applications underlying 19 CPE reports received zero points for the Nexus sub-criterion because, in the CPE Provider's determination, the applications failed to satisfy both of the requirements described above. First, for the applications underlying 11 of the 19 CPE reports that recorded zero points for the Nexus sub-criterion, the CPE Provider determined that the applied-for string did not identify the community because it substantially overreached the

The Applicant Guidebook does not provide for one point to be awarded for the Nexus sub-criterion. An application only may receive two points or three points for the Nexus sub-criterion.

community as defined in the application by indicating a wider or related community of which the applicant is a part but is not specific to the applicant's community.^{131, 132}

Second, for the applications underlying eight of the 19 CPE reports that recorded zero points for the Nexus sub-criterion, the CPE Provider found that the applied-for string did not match the name of the community or was not a well-known short form or abbreviation. In this regard, the CPE Provider determined that, although the string identified the name of the core community members, it failed to match or identify the peripheral industries and entities included in the definition of the community set forth in the application. Therefore, there was a misalignment between the proposed string and the proposed community.¹³³ In several cases, the CPE Provider's conclusion that the

string did not identify the entire community was the consequence of the CPE Provider's finding that the proposed community was not clearly delineated because it described a dispersed or unbound group of persons or entities.¹³⁴ Without a clearly delineated community, the CPE Provider concluded that the one-word string could not adequately identify the community.

Five CPE reports recorded two points for the Nexus sub-criterion. The STI observed that these CPE reports recorded partial points because the CPE Provider determined that the underlying applications satisfied only the two-point requirement for Nexus: the applied-for string must identify the community. The CPE Provider determined that, although the applied-for string identified the proposed community as defined in the application, it did not "match" the name of the community nor constitute a well-known short-form or abbreviation of the community name. Specifically, the CPE Provider concluded that, for the applications underlying these five CPE reports, the community definition encompassed individuals or entities that were tangentially related to the proposed community as defined in the application and therefore, the general public may

not necessarily associate all of the members of the defined community with the string.¹³⁸ Thus, for these applications, there was no "established name" for the applied-for string to match, as required by the Applicant Guidebook for a full score on Nexus.¹³⁹ For all CPE reports that did not record the full three points for the Nexus sub-criterion, the CPE Provider's rationale was based on the definition of the community as defined in the application.

Two CPE reports recorded the full three points for the Nexus sub-criterion.¹⁴⁰ The CPE Provider determined that the applied-for string in the applications underlying these two CPE reports was closely aligned with the community as defined in the application,¹⁴¹

2. <u>Sub-Criterion 2-B: Uniqueness</u>

To fulfill the requirements for Uniqueness, the string must have no other significant meaning beyond identifying the community described in the application. According to the Applicant Guidebook and CPE Guidelines, if an application did not receive at least two points for the Nexus sub-criterion, it could not receive the one point available for the Uniqueness sub-criterion. Therefore, the CPE Provider determined that the applications underlying the 19 CPE reports that recorded zero points for Nexus were ineligible for a score of one for Uniqueness. Each of the applications underlying the five CPE reports that recorded two points for Nexus, as well as the applications underlying the two CPE reports that recorded three points for Nexus, Received one point for Uniqueness. For each of the applications underlying these seven CPE reports, the CPE Provider determined that the applied-for string had no other significant meaning beyond identifying the community described in the application.

Ultimately, FTI observed that the CPE Provider engaged in a consistent evaluation process that strictly adhered to the criteria and requirements set forth in the Applicant Guidebook and CPE Guidelines. FTI observed no instances where the CPE Provider's evaluation process deviated from the applicable guidelines pertaining to the Nexus

criterion. Based on FTI's investigation, FTI concludes that the CPE Provider consistently applied the Nexus criterion in all CPEs. While the CPE Provider awarded different scores to different applications, the scoring decisions were based on the same rationale, namely a failure to satisfy the requirements that are set forth in the Applicant Guidebook and CPE Guidelines.

C. The Registration Policies Criterion (Criterion 3) was Applied Consistently in all CPEs.

To assess whether the Registration Policies criterion was applied consistently, FTI evaluated how the CPE Provider applied each sub-criterion, (i) Eligibility, (ii) Name Selection, (iii) Content and Use; and (iv) Enforcement. In doing so, FTI considered whether the CPE Provider approached in a consistent manner the questions that, pursuant to the Applicant Guidebook and CPE Guidelines, must be asked by the CPE Provider when evaluating each sub-criterion. In order to complete this evaluation, FTI reviewed the CPE Provider's scoring and corresponding rationale for each sub-criterion for Registration Policies for each application and compared all CPE reports to each other to determine if the CPE Provider applied each sub-criterion consistently and in accordance with the Applicant Guidebook and CPE Guidelines.

As noted above, the Registration Policies criterion is measured by four sub-criterion: (i) Eligibility; (ii) Name Selection; (iii) Content and Use; and (iv) Enforcement, each of which is worth one point. While some applications received full points for the Registration Policies criterion and others did not, the CPE Provider's findings in this regard were not the result of inconsistent application of the criterion. Rather, based on FTI's investigation, it was observed that all applications were evaluated on a consistent basis by the CPE Provider.

1. Sub-Criterion 3-A: Eligibility

To fulfill the requirements for Eligibility, the registration policies set forth in the application must restrict the eligibility of prospective registrants to community members. All applications received one point for Eligibility. The CPE Provider made this determination on a consistent basis. Specifically, FTI observed that the CPE Provider awarded one point for Eligibility for all applications that underwent CPE because each application restricted eligibility to community members only, as required by the Applicant Guidebook. 49

In particular, the CPE Provider found that each application contained a registration policy that restricted eligibility in one of the following ways: (i) by requiring registrants to be verifiable participants in the relevant community or industry;¹⁵⁰ (ii) by listing the professions that are eligible to apply;¹⁵¹ (iii) by requiring proof of affiliation through licenses, certificates of registration or membership, official statements from

2. <u>Sub-Criterion 3-B: Name Selection</u>

To fulfill the requirements for Name Selection, the application's registration policies for name selection for registrants must be consistent with the articulated community-based purpose of the applied-for gTLD.¹⁵⁵

In the sub-criterion for Name Selection, five CPE reports recorded zero points.¹⁵⁶ The CPE Provider made this determination on a consistent basis. Specifically, FTI observed that the CPE Provider awarded zero points to these five applications because each failed to satisfy a required element of the CPE Guidelines, including: (i) the name selection rules were too vague to be consistent with the purpose of the community;¹⁵⁷ (ii) there were no comprehensive name selection rules;¹⁵⁸ (iii) there were no restrictions or

3. Sub-Criterion 3-C: Content and Use

To fulfill the requirements for Content and Use, the registration policies set forth in the application must include rules for content and use for registrants that are consistent with the articulated community-based purpose of the applied-for gTLD.¹⁷¹

In the sub-criterion for Content and Use, six CPE reports recorded zero points.¹⁷² The CPE Provider made this determination on a consistent basis. Specifically, FTI observed that the CPE Provider awarded zero points to the applications underlying six of the CPE reports for one of three reasons: (i) the rules for content and use for the community-based purpose were too general or vague;¹⁷³ (ii) there was no evidence in the application of requirements, restrictions, or guidelines for content and use that arose out of the community-based purpose of the application;¹⁷⁴ or (iii) the policies for content and use were not finalized.¹⁷⁵

Twenty CPE reports recorded one point for Content and Use. FTI observed that the CPE Provider awarded one point to the applications underlying these CPE reports because the corresponding applications included registration policies for content and use that were consistent with the articulated community-based purpose of the applied-for gTLD. The CPE Provider found this to be the case when the application: (i) set forth specific registration policies for content and use that were tailored to the community-based purpose of the gTLD;¹⁷⁶ (ii) had policies that stated that content or use could not be inconsistent with the mission/purpose of the gTLD;¹⁷⁷ or (iii) had prohibitions on certain types of content and/or abuse.¹⁷⁸

4. <u>Sub-Criterion 3-D: Enforcement</u>

Two conditions must be met to fulfill the requirements for Enforcement: (i) the registration policies set forth in the application must include specific enforcement

measures constituting a coherent set; and (ii) the application must set forth appropriate appeal mechanisms.¹⁷⁹

In the sub-criterion for Enforcement, 14 CPE reports recorded zero points.¹⁸⁰ The CPE Provider made this determination on a consistent basis. Specifically, FTI observed that the CPE Provider awarded zero points to the applications underlying 13 CPE reports because each of the relevant applications lacked appeal mechanisms.¹⁸¹ The remaining CPE report recorded zero points because the corresponding application did not outline specific enforcement measures constituting a coherent set.¹⁸² A coherent set refers to enforcement measures that ensure continued accountability to the named community, and can include investigation practices, penalties, and takedown procedures with

appropriate appeal mechanisms. This includes screening procedures for registrants, and provisions to prevent and remedy any breaches of its terms by registrants.¹⁸³

Twelve CPE reports recorded one point.¹⁸⁴ The CPE Provider made this determination on a consistent basis. Specifically, FTI observed that the CPE Provider awarded one point to the applications underlying these CPE reports because the corresponding applications set forth appeal mechanisms and outlined specific enforcement measures constituting a coherent set.

Ultimately, FTI observed that the CPE Provider engaged in a consistent evaluation process that strictly adhered to the criteria and requirements set forth in the Applicant Guidebook and CPE Guidelines. FTI observed no instances where the CPE Provider's evaluation process deviated from the applicable guidelines pertaining to the Registration Policies criterion. Based on FTI's investigation, FTI concludes that the CPE Provider consistently applied the Registration Policies criterion in all CPEs. While the CPE Provider awarded different scores to different applications, the scoring decisions were based on the same rationale, namely a failure to satisfy the requirements that are set forth in the Applicant Guidebook and CPE Guidelines.

D. The Community Endorsement Criterion (Criterion 4) Was Applied Consistently in all CPEs.

To assess whether the Community Endorsement criterion was applied consistently, FTI evaluated how the CPE Provider applied each sub-criterion, (i) Support and (ii) Opposition. In doing so, FTI considered whether the CPE Provider approached in a consistent manner the questions that, pursuant to the Applicant Guidebook and CPE Guidelines, must be asked by the CPE Provider when evaluating each sub-criterion. In order to complete this evaluation, FTI reviewed the CPE Provider's scoring and corresponding rationale for each sub-criterion for Community Endorsement for each application and compared all CPE reports to each other to determine if the CPE Provider applied each sub-criterion consistently and in accordance with the Applicant Guidebook and CPE Guidelines.¹⁸⁵

As noted above, the Community Endorsement criterion is measured by two sub-criterion: (i) Support; and (ii) Opposition, each worth two points. While some applications received full points for the Community Endorsement criterion and others did not, the CPE Provider's findings in this regard were not the result of inconsistent application of the criterion. Rather, based on FTI's investigation, it was observed that all applications were evaluated on a consistent basis by the CPE Provider.

1. Sub-Criterion 4-A: Support

To receive two points for Support: (i) the applicant must be the recognized community institution/member organization; (ii) the application has documented support from the recognized community institution(s)/member organization(s); or (iii) the applicant has

materials in the course of its investigation. See https://newgtlds.icann.org/en/applicants/cpe/panel-process-07aug14-en.pdf; and https://www.icann.org/en/system/files/correspondence/abruzzese-to-weinstein-14mar16-en.pdf.

In its investigation, FTI observed that the CPE Provider engaged in the following process to evaluate the Community Endorsement criterion. The CPE Provider sent verification emails to entities that submitted letters of support or opposition in order to attempt to verify their authenticity. The CPE Provider's evaluators then logged the results into a database. Separate correspondence tracker spreadsheets also were maintained by the CPE Provider for each applicant. FTI reviewed all of these

documented authority to represent the community.¹⁸⁶ To receive one point for Support, the application must have documented support from at least one group with relevance.¹⁸⁷ Zero points are awarded if the application has "insufficient proof of support for a score of 1."¹⁸⁸

All 26 CPE reports recorded at least one point for Support. Of those, 17 CPE reports recorded only one point. Specifically, FTI observed that the CPE Provider awarded one point to the applications underlying these CPE reports because the CPE Provider determined that each application had sufficient documented support from at least one group with relevance, but could not receive a full score of two points because the applicant was not the recognized community institution/member organization, the applicant did not have documented support from the recognized community institution/member organization, nor did the applicant have documented authority to represent the community, as required by the Applicant Guidebook. In each instance, the entity(ies) expressing support for the application was not deemed by the CPE Provider to constitute the recognized institutions that represent the community as

defined in the application.¹⁹¹ In some cases, this meant that, although the supporting entity was dedicated to the community, the supporting entity lacked reciprocal recognition from community members as the entity authorized to represent them.¹⁹² In others, the supporting entity did not "represent" the community because the supporting entity was limited in geographic or thematic scope and, therefore, did not represent the entire community as defined in the application.¹⁹³

Nine CPE reports recorded the full two points for Support. Of the applications underlying these nine CPE reports, FTI observed that four applications received two points because the CPE Provider determined that the applications had documented support from the recognized community institution/member organization.¹⁹⁴ For the other applications that received two points, the CPE Provider determined that the applicant was the recognized community institution/member organization with the authority to represent the community.¹⁹⁵ Whether the applicant or the supporting entity

2. <u>Sub-Criterion 4-B: Opposition</u>

To receive two points for Opposition, an application must have no opposition of relevance. To receive one point, an application may have relevant opposition from no more than one group of non-negligible size. 198

Nine CPE reports recorded one point for Opposition.¹⁹⁹ In each instance, the CPE Provider determined that the underlying applications received relevant opposition from no more than one group of non-negligible size. Opposition was deemed relevant on several grounds: (i) opposition was from a community not identified in the application but had an association to the applied-for string;²⁰⁰ (ii) the application was subject to a legal rights objection (LRO);²⁰¹ or (iii) opposition was not made for any reason forbidden by the Applicant Guidebook, such as competition or obstruction.²⁰²

Seventeen CPE reports recorded the full two points for Opposition.²⁰³ The CPE Provider determined that the applications corresponding to 17 CPE reports did not have any letters of relevant opposition.²⁰⁴

Ultimately, FTI observed that the CPE Provider engaged in a consistent evaluation process that strictly adhered to the criteria and requirements set forth in the Applicant Guidebook and CPE Guidelines. FTI observed no instances where the CPE Provider's evaluation process deviated from the applicable guidelines pertaining to the Community Endorsement criterion. Based on FTI's investigation, FTI concludes that the CPE Provider consistently applied the Community Endorsement criterion in all CPEs. While the CPE Provider awarded different scores to different applications, the scoring decisions were based on the same rationale, namely a failure to satisfy the requirements that are set forth in the Applicant Guidebook and CPE Guidelines.

VI. The CPE Provider's Use of Clarifying Questions Did Not Evidence Disparate Treatment.

Throughout the CPE process, the CPE Provider had the option to ask Clarifying Questions of the applicant about the relevant application.²⁰⁵ Clarifying Questions were not intended to permit an applicant to introduce new material or otherwise amend an application, but rather were a means for the applicant to make its application more clear and free from ambiguity.²⁰⁶ The CPE Provider composed the Clarifying Questions and sent them to ICANN organization, which would transmit the Clarifying Questions to the applicants. FTI observed that ICANN organization would review the wording of Clarifying Questions prior to sending them to the applicants. The CPE Provider confirmed that was done to ensure that the wording of the question was appropriate insofar as it did not contravene the Applicant Guidebook's guideline that responses to Clarifying Questions may not be used to introduce new material or amend the application.²⁰⁷ ICANN organization did not comment on the substance of any Clarifying Question.

Based on FTI's investigation, it was observed that the CPE Provider posed Clarifying Questions seven times in the CPE process. Based on a plain reading, five of the seven were framed to clarify information in the applications. For example, the CPE Provider asked a Clarifying Question where it found part of an application to be unclear or internally inconsistent insofar as the community was defined by the applicant differently in two different sections of the application.

Two Clarifying Questions related to letters of support. In one application, letters of support were referenced, but were not submitted with the application materials.

Accordingly, the CPE Provider issued a Clarifying Question identifying the

administrative error. In the other, the applicant submitted multiple letters of support, but the CPE Provider was unable to verify the nature and relevance of the support that the applicant received because the CPE Provider's verification attempts were unsuccessful. As a result, the CPE Provider issued a Clarifying Question; this application ultimately received the full two points for the Support sub-criterion.

Based on FTI's investigation, the CPE Provider did not issue Clarifying Questions on an inconsistent basis; nor did the CPE Provider's use of Clarifying Questions reflect disparate treatment of any applicant.

VII. The CPE Provider's Use of Outside Research.

FTI understands that "certain complainants [have] requested access to the documents that the CPE panels used to form their decisions and, in particular, the independent research that the panels conducted."²⁰⁸ This is the subject of Scope 3 of the CPE Process Review, where FTI will compile the reference material relied upon by the CPE Provider to the extent such reference material exists for the evaluations that are the subject of pending Reconsideration Requests.

VIII. Conclusion

Following a careful and comprehensive investigation, which included several interviews and an extensive review of available documentary materials, FTI concludes that the CPE Provider consistently applied the CPE criteria throughout all Community Priority Evaluations.
