

Dear Registry Operator,

Please be aware that as of yesterday, 8 June 2022, the ICANN organization has temporarily suspended the email notifications of received zone file access requests from public users through the Centralized Zone Data Service (CZDS) system.

To view the complete list of CZDS access requests received for your gTLD, you may log in to the Naming Services portal (NSp) and select the "CZDS request" tab, under the "CZDS" persona.

By the end of June-2022, ICANN will resume notifications by sending a single daily digest email listing all the new zone file access requests received for your gTLDs.

For any questions, please contact [ICANN Global Support](#).

Best regards,

Technical Services Team
