Dear ICANN,

In reviewing the requirements for hosting an instance of the L-Root (also called the ICANN Managed Root Server (IMRS)), it states that in order to host an instance of the L-Root, you must sign a document called the IMRS Agreement. Can you please provide me with a copy of that Agreement? If there are any confidential elements of that Agreement, such as the fees that need to be paid, budget, or specific security details that need to be redacted, please indicate generally what the material relates to. However, general information such as any codes of conduct that must be adhered to, public standards followed, term and termination provisions, etc. should not be confidential I would assume.

Please feel free to post.

Thank you.

Sincerely,

Jeff Neuman
