Report for ICANN Public Participation Committee: ICANN 43 Document Publication

0. Overview

This report relates to the Document Publication Operational Policy [1] and the documents that were published or delayed with respect to the ICANN 43 publication deadline. It is organized into two sections:

> **1. Document Production and Timelines:** This section provides an overview of the type of the documents produced, the publication time frames, and some examples of the documents published after the document deadline.

> **2. Observations, Conclusions and Future Improvements:** Suggestions on how delays can be avoided are discussed.

1. Document Production and timelines

According to the Document Publication Operational Policy, the document publication deadline is 15 working days for ICANN Public Meetings related documentation. For ICANN 43 the deadline was 20 February 2012.

Below each document published before and during ICANN 43 is considered in relation to this requirement.

1.1 Meeting Schedule and Session details:

Meeting schedule:
ICANN 43 Meeting Schedule was published on 1 March 2012, 10 days after the deadline.

Primarily, the schedule publication was delayed due to a new internal method for assigning the competitive slots for Monday. While new, collaborative methods are important to develop, this should have been managed with more discipline in order to meet the deadline.

This was explained during the Public Forum at ICANN 43 publicly in response to a question[2] (pages 19-20 from the Public Forum Transcript file linked at **http://costarica43.icann.org/node/29713**).

The table below shows the timeline for operational activities relating to meeting schedules and session details:

Session requests forms due from staff	03 February 2012
Board sessions submitted	15 February 2012
20 additional sessions submitted	03 February - 07 March 2012
15-day schedule posting deadline	20 February 2012
Schedule changes recommended by board and exec team submitted	24 February 2012
Actual schedule posting date due to delays outlined above	01 March 2012
100+ changes made by staff to time/date/ room or other session details	20 February - 14 March 2012
25+ new agendas added to existing sessions	08 -13 March 2012
21 new presentations added	23 February - 10 March 2012
15 new presentations added	11 March 2012
16 new presentations added	12 March 2012
12 new presentations added	13 March 2012
12 new presentations added	14 March 2012
17 new presentations added	15 - 16 March 2012

Presentations:
ICANN seeks to follow a deadline of 48 hours for presentations to be published on the meeting session pages. This allows presenters to use the most up-to-date data in their presentations and helps remote participants to follow the sessions. It is often a challenge to collect materials from all of the relevant presenters (which may include both staff and external presenters) in time to meet this deadline.   Presentations also often reflect content from a recent meeting.

Public Forum agenda:
In regard to the Public Forum agenda, this is developed with input from ICANN community leaders (SO/AC/SG Chairs). Their input depends on their consultations within their groups and this takes time. ICANN staff continues to work with the community to balance the desire for early publication with the need to collect community input and the need for flexibility to address topics that emerge leading up to or during the meeting.

Publishing the agenda about a week prior to the Public Forum helps increase community awareness and allows participants to prepare their remarks. This improves the quality and quantity of the participation during the forum. Community members expressed appreciation for this new approach in Costa Rica.

1.2 Documents

A review of announcements and data collected from Staff indicate that over 80 documents or Document sets (Announcements, Reports, Fact sheets, Public

Comments (containing multiple documents so counted as 1 Document set)) were published during the period of 01 November - 16 March 2012). The full set of documents is attached.

Among these 41 were tagged to be related to ICANN 43 and required to facilitate sessions during the meeting.

Of these 41, four (4) were documents for GNSO Council Open Meeting for which an 8-day advance publication deadline applies. These were considered timely due to the specific policy. GNSO members have not complained of this timing. These are the documents that are highlighted in blue in the attached full set of documents.

Overall, out of the 41 documents, 7 were delayed (17%) and 34 were on time (83%) according to the set policies. (If we are to consider the GNSO Council documents as late, then of 41 documents, 11 were delayed or 73% were on time.)

In two of the delayed documents (or document sets) the reason for delay was related to the involvement and/or response/approval of a third party or an ICANN community group.

1.1 Some examples of documents published after 20 February 2012:

1) Inter-Registrar Transfer Policy Part B Policy Development Process – Recommendation 8 Concerning Standardizing and Clarifying WHOIS Status Messages (Type: Public Comment, Opened for Comments on 21 February, Not for public review/discussion in Costa Rica so not tagged as delayed)

2) Final Report FoI WG Obtaining and documenting Consent of ccTLD manager for request of delegation and redelegation (Type: Report, Published on 27 February, Tagged as Delayed, Reason for Delay: Signed off by the ccNSO FoI WG on 25 February).

3) Progress Report Negotiations on the Registrar Accreditation Agreement (Type: Report, Published on 1 March 2012, Tagged as Delayed, Reason for delay: bilateral agreement on negotiation status caused a delay in production of the final report. [3])

1.2 Post-meeting Materials and Archives

Materials used for all sessions are linked and archived through the following links and session details:

http://costarica43.icann.org/full-schedule
http://costarica43.icann.org/documents-archive

The following materials can be reached for sessions through these links as archives:

- Presentations
- Transcripts (if applicable)
- Audio and video recordings

Note that for those sessions that receive live scribing during sessions, the transcripts are provided within 7 days. For those sessions that did not receive live scribing, the transcripts are provided within 30 days post-meeting.

There were no delays reported for these postings following ICANN 43.

2. Observations, Conclusions and Future Improvements

- There were delays observed at ICANN 43 for meeting schedule, agenda and some document publication as outlined above. ICANN Staff should work towards better planning and community collaboration, which will help to reduce majority of these delays.

- This report was also delayed in terms of its submission to the PPC due to missing data for ICANN 43 and for previous meetings.

- Staff is committed to timely publication, and tracking of publications that will also result in effective reporting for the future.

- As a further improvement, it is also recommended that the PPC revise the wording of the Document Publication Operational Policy and present an improved version to the ICANN Board for approval due to the following problems:

  - Which documents should be subject to the policy should be better defined. Current wording creates confusion among readers, leads to false expectations among the community, and adds complexity for clear data collection for reporting. In many cases, it is difficult to draw a clear line between a document that is required for the meeting (e.g., a commitment has already been made, or there is a specific session to discuss it), versus a document that may be relevant to the meeting (e.g., new information is available, and as such would be useful to discussions, but no meeting session is dependent on the document being published).

  - The policy also does not seem to consider the more specific documentation policies and deadlines of various policy-making bodies of ICANN, such as GNSO and ccNSO Councils and working groups. These should be mentioned in the policy explicitly as exceptions to the general

policy (Examples of these for ICANN 43 are the documents that are highlighted in blue in the attached full set of documents).
