- Final budget agreement in 11-2004

ICANN reduced spending plan by ~17% to compensate for revenue shortfall  
- Delayed hiring  
- Reduced commitments and travel  
- Deferred capital expenditures
FY2005/2006 Budget Planning

Expense Plan of 23.0 M$
- Staff growth from 59 to 68 to accomplish operational plan objectives
- Security and Stability Program
- Developing Country Internet Community Program

Revenue Plan of 23.5 M$
- Registrar & Registry Fee structure constant
- Increase by new sTLD and .net agreements
Committee Recommendation

As ICANN is increasing its global responsibilities the planned budget structure covers a good part of the strategic and most of the operational plan initiatives. The prioritized tasks are covered in this budget even though some elements including the provision of reserves had to be deferred. The Finance Committee takes this opportunity to stress the importance its members attach to the implementation of processes focused upon ICANN’s stakeholder relations management.
