

## Global Domains Division - Consensus Policy Implementation Framework (Updated May 2015)

- I. **Goals and Objectives:** ICANN's Consensus Policy implementation framework is designed to support predictability, accountability, transparency, and efficiency in the Consensus Policy implementation process.
  
- II. **Working Principles:**
  - A. ICANN staff's implementation of GNSO Consensus Policy recommendations<sup>1</sup> should be transparent throughout the project lifecycle. Staff communications regarding the status of an implementation—including to the Implementation Review Team and the GNSO Council—are a central component of the implementation lifecycle from beginning to end.
  - B. ICANN staff strive to follow the letter and the intent of GNSO Consensus Policy recommendations when implementing Consensus Policy recommendations. Staff is accountable to the GNSO Council (or its agent, such as an implementation review team) for ensuring that the implementation of policies is consistent with the policy recommendations and the reasoning underlying the policy recommendations as outlined in the Final Report. Where there is uncertainty surrounding the intent underlying a policy recommendation, staff will consult with the IRT to clarify that intent.
  - C. ICANN staff will use the Consensus Policy implementation framework as a guide when implementing Consensus Policy recommendations. Staff will follow an implementation checklist, outlined below, to ensure that all necessary steps are followed during each implementation phase before contracted parties must physically implement a Consensus Policy.
  - D. The implementation process must ensure that the integrity of Consensus Policy recommendation(s) is maintained as these are transformed into implementable processes, systems, and standards. The implementation process must enable staff to plan and manage the capacity and resources required to package, build, test, and deploy a release into production and establish the service(s) and support structure.
  - E. ICANN staff will follow a formal transition process (GNSO Policy Team to GDD, GDD implementation, and GDD to Compliance checklists) for use by project sponsors as each new implementation project is executed.
  - F. Policy implementation activities should follow a life cycle according to standardized implementation phases or windows. To support contracted parties' implementation efforts, the policy implementation activities should be coordinated as much as possible according to deployment cycles and implementation deadlines, taking into account factors such as other related activities or events with conflicting or simultaneous timelines.
  - G. Any change or release that is required due to immediate security and stability issues will be deployed in an expedited manner, per Consensus Policies and temporary policies specifications within the Registry Agreement and Registrar Accreditation Agreement. In such cases, ICANN staff will collaborate with the community and consider throttling back on other implementations in the pipeline to ease the burdens of emergency changes.
  - H. ICANN staff will continually review the implementation framework and related materials to encapsulate additional best-practices or to adjust the steps as a result of lessons learned with previous Consensus Policy projects. The current version of this framework will be available on ICANN's implementation status webpage, which is currently in development.

---

<sup>1</sup> More information about the GNSO Consensus Policy Development Process is available at <http://gnso.icann.org/en/basics/consensus-policy/pdp>.

### III. **Roles and Responsibilities**

- A. GNSO Council: The GNSO Council is responsible for developing and recommending to the ICANN Board substantive policies relating to generic top-level domains. Once policies are adopted by the Board, the GNSO serves as a resource for staff who have questions about the background or intent of the policy recommendations during its implementation. The GNSO may continue to provide input on the implementation of a policy, for example, if the GNSO believes that the implementation is inconsistent with the policy.
- B. GNSO Policy Staff: The Policy staff support the GNSO in its policy development activities. As such, the Policy staff are responsible for handing off GNSO policies for implementation to the GDD staff once the policies are approved by the Board. Policy staff can also serve as a resource for GDD staff should questions arise surrounding the intent or history of a policy recommendation.
- C. Global Domains Division (GDD) Staff: The GDD staff are responsible for the entire implementation lifecycle, from creating an implementation plan, engaging the Implementation Review Team (IRT) (if there is one), consulting with relevant ICANN staff and any outside parties that are required, and conducting outreach surrounding the implementation, including communicating with the public and relevant stakeholders regarding the progress of implementation.
- D. Implementation Review Team (IRT): The Implementation Review Team, if convened by the GNSO Council, will serve as a resource to implementation staff on policy and technical questions that arise. An IRT will typically consist of, but will not be limited to, volunteers who were also involved in the development of the policy recommendations. As such, the IRT is expected to serve as a resource to staff on the background and rationale of the policy recommendations and return to the GNSO Council for additional guidance as required. Where relevant, the IRT should also include technical or subject-matter experts and contracted parties who can assist staff in the planning for the technical implementation of a policy change.
- E. ICANN Supporting Organizations and Advisory Committees: SO/ACs may serve as a resource to ICANN staff during implementation as specific projects require.
- F. General Counsel's Office: Legal staff will review all amended policy language to ensure the changes are legally sound and that amendments will not create issues under any other policies or contracts.
- G. Contractual Compliance: Contractual Compliance staff is involved in the implementation lifecycle to ensure that changes are implemented in a manner that creates clear and enforceable obligations on contracted parties (and also in a way that is efficiently tracked and enforceable for compliance).
- H. Enterprise Risk Management: Enterprise risk management staff will review the policy advice, the implementation plan, and amended policy language and/or new services to evaluate associated risks.
- I. Third-Party Service Providers: Contractors may carry out, offer, and/or support a service at ICANN's direction. These contractors may be expected to provide recommendations on the feasibility of certain approaches or assist with proposed solutions to issues raised during implementation.

#### IV. Consensus Policy Implementation Framework (time ranges are estimated)

- **Prepare:** GDD staff will follow policy development activities to engage on implementation-related matters, as appropriate. Consideration and feedback to policy work products and Consensus Policy recommendations as it relates to implementation will occur through the various phases of the GNSO Policy Development Process. The Board’s approval of Consensus Policy recommendations marks the formal endpoint of this phase.
- **Plan:** Policy and GDD staff arrange for the recruitment of the IRT at the beginning of this stage. Policy formally hands off the project to GDD for implementation. GDD staff will organize the activities required to implement Consensus Policy recommendations. A project plan with complete work breakdown structure is the primary output; including a draft requirements document. GDD’s initial contacts with relevant service providers and the Implementation Review Team (IRT) will occur during this stage. This phase is completed when the implementation project plan is posted.
- **Analyze and Design:** GDD staff will work with the IRT, if convened, during this stage to develop and complete new Consensus Policy language (if required) and any new service that may be needed. Public comments regarding the implementation will also be solicited at this stage. This stage is completed when the final implementation and effective date is announced.

- **Implement:** GDD staff will announce final implementation details to the community and conduct targeted outreach to contracted parties during this phase. The implementation project is formally handed off from GDD to Contractual Compliance staff at the conclusion of this phase, when the Consensus Policy goes into effect.
- **Support and Review:** GDD staff may serve as a resource to Contractual Compliance in its enforcement of new Consensus Policies. GDD staff may also review Consensus Policy implementations.

## V. Implementation Process and Milestones

Phase	Step	Responsible	Requirements
PREPARE	Provide input on staff Preliminary Issue Reports	GDD staff	Designated GDD staff member will monitor Policy staff's creation of Issue Reports and provide input on behalf of the team(s) as appropriate.
PREPARE	Follow policy development projects with an eye toward implementation	GDD staff	Designated GDD staff member will monitor PDP activities with an eye toward implementation issues. The staff member(s) will participate in PDP discussions as required to share an implementation perspective.
PREPARE	Provide input on GNSO PDP Initial Report	GDD staff	Designated GDD staff member will coordinate the teams' input on the GNSO PDP initial report.
PREPARE	Provide input on GNSO PDP Final Report	GDD staff	Designated GDD staff member will coordinate the teams' input on the GNSO PDP Final Report.
PREPARE	Provide input on GNSO recommendations to ICANN Board Report and/or Staff Recommendations Report to ICANN Board	GDD staff	Designated GDD staff member will coordinate the teams' input on WG materials to prepare the ICANN Board with their consideration of the Consensus Policy recommendations and other SO/AC advice where necessary.

PLAN	Recruit Implementation Review Team (if applicable)	GNSO Policy staff, GDD staff	GNSO Policy staff, in consultation with GDD staff, will issue a call for IRT volunteers and create a listserv for the IRT <sup>2</sup> . GDD staff will consult with the IRT regarding meetings schedule and convene one or two ad-hoc sessions to establish agreement on the rules of engagement and deliverables of the IRT.
PLAN	Conduct GNSO Policy Team to GDD Implementation team turnover	GNSO Policy staff, GDD staff	Once the Board passes a resolution, the Registry/Registrar Services teams will designate a staff member to lead implementation. This GDD staff member will coordinate with GNSO Policy staff to complete the policy to implementation handoff. At handoff, GDD assumes responsibility for reporting and communicating on project status.
PLAN	Create draft implementation plan	GDD staff	GDD staff will define the project deliverables and will create a draft implementation plan <sup>3</sup> —including milestones, target dates, and descriptions of issues to be addressed—to present to the IRT, starting with a project plan template and making modifications as needed to accommodate the project.
PLAN	Create draft Consensus Policy language (if applicable) and service requirements (if applicable)	GDD staff, GCO	When a PDP requires changes to an existing consensus policy or the creation of a new consensus policy, GDD staff will create a draft consensus policy language proposal to kick off implementation discussions.  When policy recommendations requires the creation of a new service or changes to an existing service, GDD staff will also create draft requirements for systems and third party engagement for new/changed services.
ANALYZE AND DESIGN	Engage Implementation Review Team	GDD staff, GNSO Policy staff, in consultation with IRT	Draft consensus policy language should be distributed to the IRT and call(s) should be held to clarify or improve the language consistent with the intent of the policy recommendations.  If the IRT concludes that staff’s planned implementation of Consensus Policy recommendations is inconsistent with the stated intent of the Consensus Policy recommendations, the IRT may consult with the GNSO Council as outlined in the IRT principles and guidelines.  <i>Note: The role and working of IRT is also actively under consideration by the P &amp; I WG and any recommendations coming out of that effort that are approved by the GNSO Council will be factored in here.</i>

<sup>2</sup> See ICANN Bylaws, at Annex A, Section 10, “The GNSO Council may, but is not required to, direct the creation of an implementation review team to assist in implementation of the policy.”

<sup>3</sup> See ICANN Bylaws, at Annex A, Section 10, “Upon a final decision of the Board adopting the policy, the Board shall, as appropriate, give authorization or direction to ICANN staff to work with the GNSO Council to create an implementation plan based upon the implementation recommendations identified in the Final Report, and to implement the policy.”

ANALYZE AND DESIGN	Engage additional third parties as may be needed for implementation (service providers, technical experts, etc)	GDD staff, in consultation with IRT	If the implementation will require changes to existing services or the building of a new service, the implementation lead should consult service providers and tech experts as early as possible to ensure that these viewpoints are included from the outset of the implementation. This process could include issuing a RFI or RFP.
ANALYZE AND DESIGN	Solicit public comment on proposed policy language and implementation plan (if applicable)	GDD staff, in consultation with IRT	GDD staff will decide whether the proposed implementation should be posted for public comment (there is a strong presumption that items will be posted for public comment). If so, the proposed consensus policy language and/or details of the new service as well as the implementation plan will be posted for public comment.
ANALYZE AND DESIGN	Draft final policy language (if applicable)	GDD staff, in consultation with IRT	GDD staff will adjust policy language based on public comments, in consultation with the IRT (if applicable).
ANALYZE AND DESIGN	Complete new proposed service (if applicable)	GDD staff, in consultation with IRT	GDD staff will complete all required elements of new proposed service based on public comments, in consultation with the IRT (if applicable) after consulting with relevant service providers.
ANALYZE AND DESIGN	Consult with IRT and relevant staff regarding draft final policy language and/or new proposed service	GDD staff, in consultation with IRT	The GDD staff will consult with relevant staff (as needed) and the IRT (or GNSO in cases where there is not an IRT) on final policy language and/or service.
ANALYZE AND DESIGN	Solicit additional public comments, if required	GDD staff	If the final policy language and/or proposed service is materially changed following the initial public comment period, the GDD staff will seek public comments on the updated language/service before it is implemented.
ANALYZE AND DESIGN	Complete policy language and/or new service	GDD staff, in consultation with IRT	Once all relevant staff, service providers and the IRT have reviewed the final policy language/service, the final product should be announced to the public and to relevant stakeholders.
ANALYZE AND DESIGN	Establish Policy Effective Date	GDD staff, in consultation with IRT	Define a reasonable date in which contracted parties can implement changes to become compliant with the intent of the Consensus Policy.

<b>IMPLEMENT</b>	Announce Policy Effective Date	GDD staff	<p>A proposed policy effective should already have been scheduled/published, but this marks the formal milestone.</p> <p>Formal legal notice, as required under the Registry and Registrar Accreditation Agreements, should be provided to contracted parties.</p> <p>Notice should be emailed to the contracted parties and posted on the ICANN website in the “consensus policies” section.</p>
<b>IMPLEMENT</b>	Develop education and outreach materials	GDD staff	GDD staff will coordinate with Communications to create any materials needed for socializing the policy changes across the contracted parties and general internet community. Items include webinars, FAQs, online documentation, service/compliance requests, etc.
<b>IMPLEMENT</b>	Conduct outreach	GDD staff	GDD staff will schedule a series of webinars to educate affected stakeholders on the pending policy changes (if needed).
<b>IMPLEMENT</b>	Send reminder notices	GDD staff	Reminder notices about the upcoming Policy Effective Date should be sent to contracted parties 30 days before the effective date and on the effective date.
<b>IMPLEMENT</b>	Deploy Consensus Policy change	GDD staff	This represents a milestone rather than a task. The draft implementation plan, any requirements docs, and/or AtTask project plans should contain a detailed schedule of sub-tasks and details associated with its execution.
<b>SUPPORT AND REVIEW</b>	Initiate Compliance monitoring & enforcement on effective date	Compliance	This marks the formal commencement of enforcement of the new Consensus Policy. Contractual Compliance should be fully prepared to respond to any enforcement activities and able to take a proactive approach to monitoring for compliance.
<b>SUPPORT AND REVIEW</b>	Continuous improvement & measure of policy effectiveness	All	Measurement of the Consensus Policy effectiveness is important to understand if the policy changes met the objectives defined by the GNSO. A series of metrics should be defined and created to measure the policy as required across the contracted parties or ICANN services.
<b>SUPPORT AND REVIEW</b>	Formal review (if applicable)	GDD staff, Policy staff	If a Consensus Policy has a scheduled formal staff review following its effective date, or if the GNSO Council or ICANN Board calls for a formal review, GDD and/or Policy staff will initiate this process.
<b>SUPPORT AND REVIEW</b>	Policy status report	Compliance, GNSO Policy Staff	Compliance and GNSO Policy Staff should provide a report to the GNSO Council when there is sufficient data and there has been adequate time to highlight the impact of the policy recommendations, which could serve as the basis for further review and/or revisions to the policy recommendations if deemed appropriate.
