**Subject:** [Ext] Feedback on Accreditation and Access Model for Non-Public Whois Data

To Whom It May Concern —

Recorded Future, a cybersecurity vendor that serves many of the Fortune 500 and public-sector customers, has reviewed the Accreditation & Access Model for Non-Public Whois Data, and was wondering the right mechanism to provide feedback.

Specifically, we noted that the proposal includes “security intelligence” as one potential Eligible Entity, however, the industry generally refers to this as **Threat Intelligence**. To minimize confusion, and ensure consistency, our feedback is to either rename security intelligence to threat intelligence, or add it as an additional category.

Please let us know the best avenue to provide this feedback.

Regards
