

Statement of Interest

I am applying to be Member of the Review Team **“Preserving Security, Stability and Resiliency of the DNS”**. As member of the AC/ASO representing the LA&C Region, I hope to receive the endorsement of the EC/NRO and/or AC/ASO.

After 15 years coordinating the DNS for ccTLD <.br>, I believe that I have a good understanding of how the DNS works and where it might be handled in the future.

As Executive Director of the Brazilian Internet Steering Committee - CGI.br I had/have to oversee following activities: a.) To coordinate the allocation of Internet addresses (IPs) and registration of domain names for ccTLD <.br>; b.) To recommend standards for technical and operational procedures for the Internet in Brazil; c.) To establish strategic directives related to the use and development of the Internet in Brazil; d.) To promote studies and technical standards for network and service security in the country; e.) To collect, organize and disseminate information on Internet services, including indicators and statistics; f.) To coordinate the Brazilian National Computer Emergency Response Team (CERT), responsible for handling computer security incident reports and activity related to networks connected to the Brazilian Internet; g.) To coordinate the Center of Study and Research in Network Technology and Operations, responsible for services and projects that aim to improve the quality of the Internet in Brazil, working more specifically with Internet infrastructure, which includes the operation of 12 Internet Exchange Points in Brazil; and, h.) To coordinate the W3C Office in Brazil.

I expect and wish to support ICANN through the enhancement of the Security, Stability and Resilience of the DNS.

Sincerely

Prof.
Hartmut Glaser
