

Please accept my application as an Independent Expert on the review team for the WHOIS Policy Review.

My CV is attached and my letter of motivation follows below.

My relevant experience includes experience on an ICANN GNSO Whois Working Group in 2007 and more recent participation this year in the ICANN Advisory Group for HSTLD.

I own a consulting practice, Good Security Consulting LLC, with focus on information security and privacy strategies. Some of my activities have included various uses of WHOIS involving private security investigations related to denial of service attacks, phishing scams and domain registration abuse. I have also had extensive experience in responding to consumer privacy complaints from individuals residing in the EU, Australia, Canada and the U.S.

In addition, I have 8 years of non-profit Board experience in three different organizations. This has given me insight and perspectives on the use of the Internet by non-profit groups, particularly for fundraising and public awareness campaigns.

I am professionally and personally committed to contributing to growth and innovative uses of the Internet as well as its stability and security.

Submitted respectfully,
Ms. Lynn Goodendorf, CIPP, CISSP
