**Motivation Letter for Affirmation of Commitments Review Team: SSR**

Dear Julie,

BoD Member Ray Plzak forwarded me some information that identified you as a point of contact that would facilitate volunteering for review team 2.

I've attached my CV.

My motivation is fairly straight forward. I'm interested in participating in the review team so that I can better understand the underlying technology that helps to reliably support operation of the systems responsible for one of the two unique identifiers required to operate the infrastructure of the Internet and learn my current and possibly lend my expertise to a successful review of ICANN's implementation of the security plan. I have significant experience in all major vectors of the review; security, contingency planning and process development.

I wish to serve on Review Team 2: Security, Stability and Resiliency of the DNS

I am currently an appointed member of the ASO AC, but am applying directly.
