9 August 2006

Dear Dr Twomey,

The Council of Hungarian Internet Providers (full name in Hungarian: Magyarországi Internet Szolgáltatók Tanácsa Egyesület, Hungarian abbreviation: ISZT) is the registry for the ccTLD for Hungary, .hu, and recorded as such in the IANA database. ISZT is committed to administer the .hu domain in a way that serves the Hungarian Internet community and to this end, it uses appropriate policy development process. ISZT stands firm behind the concept of industry self regulation in the Internet and therefore supports ICANN as the organization that performs the IANA function. ISZT has continuously been expressing its interest in the stability and interoperability of the Internet Domain Name System and contributing to the funding of ICANN in order to provide a reliable IANA function .

With this letter, we would like to let you know what ISZT does and will continue to do to fulfil its commitment to the Hungarian Internet community as well as all users of .hu domain names:

- a) ISZT operates and maintains the authoritative name servers for .hu (and the public subdomains over which it has administrative authority) in a stable and secure manner, adequate to resolve names under .hu by users throughout the Internet and in compliance with applicable relevant IETF standards and subject to and within the limits of relevant Hungarian law;
- b) ISZT keeps the .hu zone data as stored in the authoritative name servers for .hu up to date;
- c) ISZT in a timely manner notifies ICANN as the organization that performs the IANA function of any change of the information on .hu that is being stored in the IANA database, including possible changes of the administrative or technical contact;
- d) ISZT is legally established and geographically located in Hungary and its administrative contact resides in Hungary and is an official representative of ISZT.

We shall voluntarily contribute to your cost of operations relevant to ccTLDs in the amount of USD 22,000 per annum. We acknowledge that the ccTLD community and you are working together to obtain a formula to determine permanent and satisfactory contribution to you. If there is no agreement on a permanent solution for ccTLD contributions to you we agree to review in good faith on the first anniversary of the date of this letter, our voluntary contribution to you set out above with a view to agreeing continued voluntary contributions by us. We understand that this review will take into account all relevant circumstances.

For avoidance of doubt, nothing contained in this letter shall give rise to any liability, monetary or otherwise for ISZT.

We look forward to continuing working together and hope for a long and mutually beneficial relationship with you.

Yours sincerely

Balázs Martos
Official representative
Internet Szolgáltatók Tanácsa

Balázs Martos
Council of Hungarian Internet Providers (ISZT)
Victor Hugo u. 18-22. I.140
Budapest H-1132
Hungary

Dear Mr Martos

The mission of ICANN is to coordinate, at the overall level, the global Internet's systems of unique identifiers, and in particular to ensure the stable and secure operation of the Internet's unique identifier systems. ICANN also performs the IANA function.

This letter sets out our understanding at a high level of what we do in order to demonstrate our commitment to securing and enhancing the stability and interoperability of the Internet's Domain Name System (DNS) for the benefit of the local and global Internet community.

To this end, ICANN:

- a) maintains a stable, secure, and authoritative publicly available database of relevant information about TLDs, including .hu, the country code Top Level Domain for Hungary. This Authoritative Root Database shall contain information for the public authoritative name servers in respect of .hu, contact information for ISZT as the registry for .hu, the designated administrative contact(s), and the designated technical contact(s) as notified by ISZT to ICANN;
- b) implements on notification by ISZT changes to the domain name or IP address(es) of the name servers for .hu as recorded in the Authoritative-Root Data for .hu in the Authoritative-Root Database;
- c) publishes data maintained in the Authoritative Root Database about TLD's including .hu which shall include at least the name of ISZT as the .hu ccTLD registry, the administrative contact(s), the technical contact(s), and the domain names and IP addresses of the authoritative name servers for .hu;
- d) coordinates the Authoritative Root Server System so that it is operated and maintained in a stable and secure manner; and causes the Authoritative Root Server System to publish DNS resource records delegating the Top Level Domain .hu to the name servers recorded in the Authoritative Root Database;

ICANN

e) maintains authoritative records and an audit trail regarding changes to delegations and records related thereto with respect to TLD's including .hu and informs ISZT of the status of a requested change related to .hu and

f) notifies TLDs, including ISZT of any changes to our contact information no later than seven days after the change becomes effective.

For avoidance of doubt, nothing contained in this letter shall give rise to any liability, monetary or otherwise for ICANN.

We look forward to continuing working together and hope for a long and mutually beneficial relationship with you.

Yours sincerely

Dr Paul Twomey
