Sarmad Hussain

Internationalized Domain Names (IDN) Programs Director
Internet Corporation for Assigned Names and Numbers (ICANN)

Sarmad Hussain is the IDN Programs Director at ICANN.

Before joining ICANN, Hussain was a professor of Computer Science. His research is focused on developing computing solutions for Pakistani languages, including research in linguistics, localization, language computing standards, speech processing and computational linguistics. He has led the PAN Localization program from 2004-2010, which saw the development of local language computing capacity across developing Asia, including Afghanistan, Bangladesh, Bhutan, Cambodia, Indonesia, Laos, Mongolia, Nepal, Pakistan, and Sri Lanka.

Hussain's involvement with IDNs commenced in 2006 and has been actively involved in IDN country code top-level domain (ccTLD) work for Pakistan. He has been an active member of the ICANN community since 2008 and was a member of ICANN's Security and Stability Advisory Committee (SSAC) before joining ICANN as staff.

Hussain obtained his doctoral degree in Speech Science from Northwestern University, USA in 1997, an M.Phil. In Computer Speech and Language Processing from Cambridge University, UK, in 1993, and a BS in Electrical Engineering (with specialization in Computer Engineering with honors) from University of Texas, Austin, USA, in 1992.
