ICANN Public Forum
Items of Note Since Cape Town

• New hire: Barbara Roseman, Operations Mgr
  – Extensive background in industry and ICANN
  – Responsible for day to day operations, including supervision of root management request processing
  – Staffing plan adjusted based on experience

• Request tracking system implemented
  – Current system is temporary, but all data will be transferred when new system is ready
Items of Note Since Cape Town

• TLD Manager’s mailing list re-implemented
  – First message went out 17 December as promised
  – Allocation messages have been sent, as discussed at the last meeting
  – New messages will be sent regularly
• ccNSO <> IANA Working Group
  – Similar to existing group for the IETF
• Congratulations to AfriNIC
Plans for the future

• Recruiting proceeding very well, excellent candidates
  – Anticipate that current staffing plan will be completed this month

• New Template System for TLD Managers
  – Coding is done, currently filling in explanatory text
  – Security elements added per discussion with TLD managers at regional forums

• PGP for Root Management, and other requests
  – Important role for the regional ccTLD associations
  – ICANN staff eager to set up “key signing” meetings
Help Wanted
