RE: Proposal #201008, One and Two-Character ASCII .TEL Names proposal

Dear Vladimir,

ICANN has conducted a preliminary review of Telnic's request to release and allocate one and two-character ASCII domain names

In dot-TEL, in accordance with the Registry Services Evaluation Policy and process set forth at <http://www.icann.org/en/registries/rsep/rsep.html>.

Based on the information provided, ICANN's preliminary review did not identify any significant competition or security and stability issues. The proposed modification requires an amendment to the dot-TEL Registry Agreement (signed 30 May 2006). We will be in touch with you shortly regarding the process for reaching agreement on and posting of an appropriate amendment for public comment and consideration.

Patrick
