Dear Sirs,

Re: Application to Volunteer for Affirmation of Commitments Periodic Review Team.

This is an application to volunteer as a GNSO representative on the following review teams:

1. Ensuring accountability, transparency and the interests of global Internet users; or
3. Promoting competition, consumer trust and consumer choice.

I have previously been as a member of two Constituencies, the NCUC and the IPC, and participated in the following GNSO Working Groups.

1. In 2009-2010, the Constituency & Stakeholder Group Operations WG (CSG WG) to develop implementation proposals from the Board Governance Committee's GNSO Review on improvements in representativeness, transparency and accountability.
2. In 2007, various WGs dealing with the Introduction of New Top-Level Domains, including the Protecting the Rights of Others WG (PRO-WG).

ICANN has emerged as a global leader in internet governance and I wish to assist it as it continues to evolve and strives to achieve the highest standards in accountability, transparency and governance while retaining its unique consensus driven multi-stakeholder model. To this end I have sought to learn ICANN's processes at this key juncture in its history.

I am able to bring advocacy, analytical, research and writing skills, as well as the ability to find middle ground and work towards compromise, to these tasks. My legal experience across a variety of jurisdictions is also helpful in identifying common norms.

Solicitors & Attorneys

Transparency and participation, and ensuring a level playing field for all, not just commercial and institutional players, are themes I feel strongly about and this is the reason I wish to volunteer for the timely and important work of the review.

Yours sincerely,

Victoria McEvedy
