

Dear Registry Operator,

ICANN org was notified by NCC Group of an update required to (i) the **RRI DEA IP Address Whitelist fields** and (ii) the **Primary and Secondary Data Escrow Agent Contacts fields** that need to be entered into the ICANN org Naming Services portal (NSp).

You are receiving this message because these changes impact one or more TLDs that you operate.

ICANN org will be coordinating a *bulk update in NSp* of the identified data fields on behalf of NCC Group and all impacted registry operators, so that each registry operator need not do so manually for each impacted TLD.

In coordination with NCC Group, ICANN org is expecting to complete the bulk update between *12 -14 July 2022*, and will provide a follow up confirmation once the bulk update is completed.

If you wish to have your TLDs excluded from the ICANN org coordinated bulk update, please contact [ICANN org's Global Support team](#) by **11 July 2022 - 23:59 UTC** with your request to be excluded. Please note that if you elect to opt out of the ICANN org coordinated bulk update, you must apply the changes directly to your TLDs supported by NCC Group **prior to 15 July 2022**.

Kind Regards,
