

Dear colleagues,

This week, ICANN organization has published an RDAP conformance tool. The RDAP conformance tool is a stand-alone, open source tool that can be used to verify if an RDAP server implementation is conformant with the specifications developed by the IETF and optionally, the gTLD RDAP profile.

For more information about the RDAP conformance tool you may visit this recent publication at <https://www.icann.org/en/blogs/details/icann-launches-new-tool-to-verify-conformance-with-rdap-requirements-3-2-2022-en>

The RDAP conformance tool and source code is available at <https://github.com/icann/rdap-conformance-tool/>

If you have any questions, please contact ICANN Global Support as described in <https://www.icann.org/resources/pages/customer-support-2015-06-22-en> .

Best regards,

Eduardo Alvarez  
Technical Services Director  
ICANN
