FY22 BUDGET

APPENDIX

The term “ICANN,” throughout this document, refers to the ICANN ecosystem as a whole – ICANN Board, community, and organization (org) – unless otherwise specified. ICANN’s fiscal year begins 1 July and ends 30 June.
ICANN's planning process involves close collaboration among the community, Board, and organization to prioritize and effectively implement ICANN's work while ensuring accountability, transparency, fiscal responsibility, and continuous improvement. This robust planning process and the resulting plans help to fulfill ICANN's Mission.

To protect ICANN's long-term financial sustainability, we must ensure that expenses do not exceed funding and that sufficient reserves are reached and maintained at all times. Over the next five years, we expect ICANN's financial position to remain stable. We anticipate that operating expenses will remain below budget due to careful cost control, funding will remain consistent with previous years, and the Reserve Fund will continue to be at or above target level. Additionally, the FY22–26 Operating and Financial Plan is forward-looking and uses “base” scenario funding projections. However, the financials used beyond FY22 are intended to be flexible to allow ICANN to adjust the level of activity and expenses should future funding change.

Our planning and budgeting forecast for the next five years anticipates a return to face-to-face meetings and engagement at pre-pandemic levels in FY22. This is a practical assumption, intended to ensure that ICANN is prepared to resume travel based on historical levels, while leaving room for adjustment resulting from permanent or ongoing challenges related to pandemic health concerns. As needs arise, ICANN org will adapt, and update operations as required in close collaboration with the Board and community.

The plans include the implementation of Board-approved recommendations of the Cross-Community Working Group on ICANN Accountability Work Stream 2 as a priority, as well as facilitation and implementation of the Enhancing the Multistakeholder Model work plan, which is critical to ensuring that the multistakeholder model is able to evolve and meet the ever-changing needs of ICANN's global community. All other Board-approved recommendations, including the five recommendations from the third Accountability and Transparency Review, are subject to prioritization efforts with the exception of one recommendation which itself calls for a prioritization process.
Letter from SVP Planning & CFO, Cont’d.

ICANN’s focus remains firmly on the prioritization and allocation of resources needed to successfully implement the operating initiatives and functional activities set forth in the FY22–26 Operating and Financial Plan and the FY22 Operating Plan and Budget. Over time, ICANN org expects to continuously improve organizational effectiveness through adequate planning and measurement of the delivery against plans. ICANN’s robust planning process facilitates collaboration, prioritization, and performance-monitoring on important activities, which enables progress toward the achievement of the Strategic Plan and ICANN’s Mission in a financially responsible and affordable way.

Sincerely,

Xavier Calvez

Senior Vice President, Planning and Chief Financial Officer

INTRODUCTION

- About ICANN
- ICANN Plans
- FY22–26 Planning Assumptions
About ICANN

ICANN’s MISSION is to help ensure a stable, secure, and unified global Internet. To reach another person on the Internet, you need to type an address – a name or a number – into your computer or other device. That address must be unique so computers know where to find each other. ICANN helps coordinate and support these unique identifiers across the world. ICANN was formed in 1998 as a not-for-profit public-benefit corporation with a community of participants from all over the world.

ICANN’s VISION is that of an independent, global organization trusted worldwide to coordinate the global Internet’s systems of unique identifiers to support a single, open, globally interoperable Internet. ICANN builds trust through serving the public interest, and incorporating the transparent and effective cooperation among stakeholders worldwide to facilitate its coordination role.

ROLES AND RESPONSIBILITIES WITHIN ICANN

ICANN provides a service to the world through the performance of a specific set of technical jobs that play a fundamental role in maintaining the stability and security of the Internet. ICANN is an ecosystem made up of three components: the ICANN community, the ICANN Board of Directors, and the ICANN organization.

The ICANN community works together through a bottom-up process to give advice, make policy recommendations, conduct reviews and propose implementation solutions for common problems within ICANN’s Mission and scope.

The fundamental responsibility of the Board of Directors is to act in the best interests of ICANN and for the benefit of the Internet community as a whole. It is the duty of the Board to oversee management’s performance to ensure that ICANN operates with efficiency and effectiveness, in a fiscally responsible and accountable manner, and in a manner that is responsive to the needs of the global Internet community. The Board is also responsible for setting the strategy of ICANN and oversight of ICANN org’s development of the Operating Plan for Board consideration.
The ICANN organization is the operational arm of ICANN. ICANN org:

1. Focuses personnel and resources on policy development support, event management, registrars and registries support, community support, contract compliance, IANA functions, outreach and capacity development, external services for the broader community (ICANN Managed Root Server, WHOIS, etc.), and internal personnel services.

2. Implements the community’s recommendations adopted by the Board and that are within ICANN’s Mission and scope.

3. Accomplishes accountability through transparency, financial responsibility, operational excellence, and continuous improvement while acting in the global public interest in a continuously evolving global environment.
ICANN Plans

ICANN’s planning process has three components: a Five-Year Strategic Plan, a Five-Year Operating and Financial Plan, and an annual Operating Plan and Budget. Input from ICANN constituency groups, stakeholders, Board of Directors and ICANN org is key to the development of these plans, in keeping with ICANN’s multistakeholder model.

FIVE-YEAR STRATEGIC PLAN
Designed to shape ICANN’s priorities, the Five-Year Strategic Plan establishes a vision and a set of strategic objectives and goals in service of ICANN’s Mission. The Strategic Plan enables ICANN to continue to fulfill its Mission and meet new and continuously evolving challenges and opportunities. ICANN’s Bylaws require the preparation and adoption of a Strategic Plan every five years. The current Five-Year Strategic Plan covers fiscal years 2021 through 2025.

FIVE-YEAR OPERATING AND FINANCIAL PLAN
The Five-Year Operating and Financial Plan articulates the feasibility and timing of services, activities, and milestones identified to achieve the Strategic Plan’s objectives and goals. It is intended to serve as an overarching, holistic view of the activities ICANN org is undertaking, or will undertake, in support of the Strategic Plan, to carry out its Mission in the public interest over the next five years. ICANN’s Bylaws require the preparation and adoption of a Five-Year Operating Plan at the beginning of each fiscal year.

ANNUAL OPERATING PLAN AND BUDGET
Informed by the Five-Year Operating and Financial Plan, the Annual Operating Plan and Budget further clarifies specific activities and resources for the upcoming year. The Annual Operating Plan and Budget sets forth the focus of efforts and organizational commitments for the current fiscal year. ICANN’s Annual Operating Plan and Budget includes the IANA and PTI Annual Operating Plan and Budget. ICANN’s Bylaws require the preparation and adoption of an Annual Operating Plan and Budget prior to the commencement of each fiscal year.

A set of targeted outcomes and strategic risks for each strategic goal determine the conditions for success of the Strategic Plan. While the strategic risks identify external or internal factors that may impact the pursuit of the strategic goals and objectives, the targeted outcomes illustrate what achieving the strategic goals looks like. All activities in the Five-Year and Annual Operating Plans are linked to the targeted outcomes that motivate them, creating a clear connection between the Strategic Plan and the Operating Plan.
FY22–26 Planning Assumptions

Below are the assumptions underlying the operations of ICANN, which apply to both the five-year and one-year operating plans.

UPDATES TO THE STRATEGIC PLAN
Throughout its life cycle, the Five-Year Strategic Plan is periodically reviewed and adapted as needed to account for significant shifts in existing or new trends. ICANN tracks and monitors trends that impact the Internet ecosystem to update and inform its plans as needed.

Between November 2019 and March 2020, ICANN convened 21 strategic outlook sessions with 398 participants from the community and the org. Feedback received during those trend sessions was collected and analyzed as strategic outlook trends, risks, opportunities, and potential impacts on ICANN were assessed.

With new five-year plans just coming into effect in July 2020, little to no changes were expected. The assessment made of this year’s strategic outlook trends focused on evaluating potential short- and/or long-term impacts of the COVID-19 pandemic on ICANN’s plans. While the pandemic has not changed ICANN’s strategic objectives over the five-year horizon, it has produced some opportunities for adjustments to the Five-Year Operating and Financial Plan, specifically in how and when objectives are addressed. On 17 December 2020, the Board resolved that the ICANN Strategic Plan for Fiscal Years 2021 to 2025 shall remain in force and unchanged, with no restatement of the Strategic Plan needed at this time. The details of this analysis and conclusions have been documented in the 2020 Strategic Outlook Trends Report, which can be found here.

AFFORDABILITY
The FY22–26 Operating and Financial Plan is forward-looking and uses “base” scenario funding projections. However, the financials used beyond FY22 are intended to be flexible to allow ICANN to adjust the level of activity and expenses should future funding change. During FY22–26, ICANN will prioritize allocation of funds to its Reserve Fund. Ensuring that expenses do not exceed funding and that sufficient reserves are reached and maintained at all times are two key principles of ICANN’s long-term, financial sustainability.
FACE-TO-FACE MEETINGS AND ENGAGEMENT
The COVID-19 pandemic has changed how the ICANN community has worked and interacted since late FY20. Resulting safety protocols shifted nearly all face-to-face work and engagement activities online in FY21. While the future is unknown, ICANN org has elected to conduct its planning and budgeting forecasts processes for FY22–26 based on normal, pre-COVID operations including face-to-face ICANN meetings and other types of engagement activity. ICANN org will adapt and update operations as required in close collaboration with the Board and community.

CHANGES FROM FY21–25 OPERATING PLAN
The current Operating and Financial Plan for Fiscal Years 2022–2026 updates the Operating and Financial Plan for Fiscal Years 2021–2025, and continues to demonstrate how ICANN org implements its current Strategic Plan. Many of ICANN org’s activities to implement its Mission or operate the organization recur each year. Any new activities or changes to existing ones are marked with a delta (△).

PLANNING DEPENDENCIES AND ROLLING PLANS
ICANN org supports the community-led activities that result in review recommendations, cross-community working group recommendations, policy development processes, and advisory recommendations. Policies and recommendations progress through various stages such as initiation, development, finalization, Board consideration, implementation planning, and implementation. ICANN begins designing the expected implementation work only as recommendations and policies move forward and reach the stage of Board consideration. After the Board adopts these recommendations and policies, the implementation work of design, planning, scheduling and delivery starts.

In an effort to present a comprehensive view of projected ICANN org operations over the five-year period, the FY22–26 Operating and Financial Plan includes areas of work still under discussion within the community or under Board consideration. (Please see Appendix A for more details of the ICANN Rolling Five-Year Roadmap).

ICANN org updates its Five-Year Operating and Financial Plan annually to include the latest activities that the org is responsible to implement. While the Five-Year Operating and Financial Plan reflects a high-level roadmap of community-led activities; any implementation activities expected during the coming fiscal year are incorporated into the Annual Operating Plan and Budget.
FIVE-YEAR OPERATING PLAN

- Approach
- FY22–26 Operating Initiatives
- FY22–26 Functional Activities
Approach

ICANN org’s FY22–26 Operating and Financial Plan includes descriptions of the major work ICANN org will undertake to achieve its Strategic Plan, operate the organization and implement its Mission.

Within the FY22–26 Operating and Financial Plan, ICANN org describes 15 operating initiatives and 34 functional activities for the upcoming five-year period. Each entry within this document includes background on the purpose, scope and activities related to each major workstream, as well as a description of needed resources and considerations or risks that may impact the work.

Each operating initiative and functional activity are also cross-referenced against the targeted outcomes developed in the Strategic Plan, so that readers can gain a comprehensive understanding of the strong interconnectedness of ICANN org’s work. Any new activities or changes to existing ones are marked with a delta (△).

The operating initiatives and functional activities provide what can be considered ICANN org’s statement of intention, outlining planned activities while acknowledging the challenges and dependencies that could impact ultimate delivery.

It is important for readers to consider that planning over a five-year horizon is quite different than budgeting for the next year. A five-year plan is much more high-level and relies on more assumptions and fewer facts than a one-year budget does. This is simply because there is more unknown information in a longer horizon and therefore less specificity can be provided. This is particularly well illustrated in the lack of specificity that can be provided to the financial information supporting a five-year plan.
Operating Initiatives
FY22–26

Operating initiatives describe how ICANN org will achieve the objectives and goals set out in the ICANN Strategic Plan. The 15 operating initiatives listed here represent major areas of work that support the strategic objectives identified in the strategic plan. Draft operating initiatives were published for public comment and presented to the ICANN Board for feedback.

For each initiative, high-level financial estimates of possible expenses, with a low and a high range have been offered. A mid-point between the “low” and the “high” was used for financial modeling as described in the Financials section of this document.

- Support the Evolution of the Root Server System
- Facilitate DNS Ecosystem Improvements
- Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking
- Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking
- Develop Internal and External Ethics Policies
- Promote and Sustain a Competitive Environment in the Domain Name System
- Promote the Universal Acceptance of Domain Names and Email Addresses
- Root Zone Management Evolution
- Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem
- Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGO) Engagement and Participation in ICANN
- Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration with Others that May Impact the ICANN Mission
- Formalize the ICANN Org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers
- Implement New gTLD Auction Proceeds Recommendations as Approved by Board
- Planning at ICANN
- ICANN Reserves
Support the Evolution of the Root Server System

PURPOSE
As the Root Server System evolves with greater demand, new technologies and governance models, ICANN will continue to support and collaborate with key stakeholders to ensure the stable, secure, and resilient operation of the Domain Name System (DNS) root zone for the global Internet community.

SCOPE
This initiative covers these work areas:

- Support the implementation of the Root Server System Advisory Committee (RSSAC) document RSSAC037 “A Proposed Governance Model for the DNS Root Server System” and RSSAC038 “RSSAC Advisory on a Proposed Governance Model for the DNS Root Server System,” both published on 15 June 2018.

- Support eventual outcome of RSSAC 037 and 038 that could propose a plan for the coordination of an appropriate response to any Root Server System incidents.

- Develop mechanisms by which the community can be alerted to issues relating to overly-rapid growth in the root zone.

- Develop a prototype Root Server System Metric Monitoring System to collect data on the operation of the root server system as discussed in RSSAC 047.

- Encourage development of mechanisms to further distribute and scale the root of the DNS, e.g., “hyperlocal” root configuration in recursive resolvers and set up a root zone distribution service, as discussed in OCTO-016.

- Leveraging lessons learned from the first root zone Key Signing Key (KSK) rollover, define and publish a long-term root zone KSK Rollover Policy and implement the next rollover in accordance with that policy.
Support the Evolution of the Root Server System, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.

• Working with DNS root server operators and other relevant parties, ICANN continues to enhance the governance and technical evolution of DNS root server operations and services.

• ICANN, in collaboration with DNS root server operators and other relevant parties, develops a coordinated emergency plan to address DNS Root Server System attacks.

• Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

• The Internet community’s trust in ICANN to provide resilient, scalable, and accountable KSK management – as an adjunct to existing public key infrastructures – increases, facilitating improved security technologies and greater use of the DNS.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following measures will be used over the five-year period for this initiative:

• Monitor and report on the implementation of the Root Server System governance changes proposed in RSSAC 037/038.

• Deployment of items related to root zone distribution service.

• Measure the ease of enabling hyperlocal support in popular recursive resolver implementations.

• Occurrence of the Root KSK Rollover.
Support the Evolution of the Root Server System, Cont’d.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• The progression of RSSAC 037/038, such as development of a coordinated emergency response, requires collaboration between ICANN org’s Office of the Chief Technology Officer (OCTO) and Policy Development Support.

• Deployment of the root zone distribution service will require collaboration with ICANN org’s Global Stakeholder Engagement and Government Engagement functions to reach audiences and coordinate messaging.

• The awareness about the implementation plan of RSSAC 037/038 will require collaboration with ICANN org’s Global Stakeholder Engagement and Government Engagement functions to reach audiences and coordinate messaging.

• OCTO will need support from ICANN org’s Communication team to develop tailored messaging for relevant stakeholders.

• Resources to support ICANN’s efforts to preserve and enhance the security, stability, and resiliency of the DNS including Root Server System governance, mitigation of DNS security threats, promotion and/or facilitation of DNSSEC deployment, the mitigation of name collisions, and DNS operations research.

Learn more about ICANN’s overall approach in Appendix C — ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers.

</table>

Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.
CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Political considerations surrounding root server operators.
• Continued unforeseen risks surrounding future Root KSK Rollovers.
• Ensuring the Root Server System continues to meet requirements as defined by the Internet community.
Facilitate DNS Ecosystem Improvements

PURPOSE
This initiative encompasses efforts to understand, document, and improve the emergency readiness of ICANN and other actors in the DNS ecosystem.

SCOPE
The scope of this initiative covers three main work areas:

• **Advocate and Promote Improvements to DNS Security Infrastructure**
  - Advocate for developers to enable Domain Name System Security Extensions (DNSSEC), both signing and validation, by default.
  - Promote hyperlocal as an additional root zone distribution model and encourage resolver developers to enable the technology by default.
  - Support the implementation of DNS-based Authentication of Named Entities (DANE).

• **Technical Engagement and Capacity Development**
  - Continue to improve and deliver capacity-building training on key Internet technologies that support a secured DNS ecosystem aligned with ICANN’s technical remit, such as DNSSEC and DANE. Work internally to expand ICANN org’s technical remit, such as DNSSEC and DANE.
  - Expand ICANN org’s training footprint.
  - Expand programs for DNS ecosystem security and technical engagement.
  - Work with the community to develop and promote commonly agreed norms for a secure DNS ecosystem.

• **Research**
  - Continue to collect data, analyze, and publish fact-based, unbiased, objective information on how the DNS is used and abused.
  - Research, report, and raise community awareness on Emerging Identifiers Technologies and how they impact and/or compare to the DNS.
  - Research the use of artificial intelligence to enhance understanding and identification of abusive trends in DNS registration.
STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.

• ICANN continues to provide a trusted forum that effectively convenes relevant parties for discussions on the security, stability, evolution, and interoperability of the DNS.

• ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.

• The inherent security of the DNS and unique identifiers system measurably increases, due to higher adoption of global open Internet standards and greater awareness of security threats among stakeholders.

• ICANN, in collaboration with relevant hardware, software, and service vendors, enhances knowledge about DNS safety and security.

• Security threats leveraging the DNS measurably decline as a result of encouraging relevant hardware, software, and service vendors to incorporate key security measures.

• The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

• Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

• The Internet community’s trust in ICANN to provide resilient, scalable, and accountable KSK management – as an adjunct to existing public key infrastructures – increases, facilitating improved security technologies and greater use of the DNS.

• Enhanced engagement with contracted parties creates more robust industry relationships, dynamic participation, and improved responsiveness to emerging technologies.

• Mechanisms are established with which ICANN assesses new technologies and, when appropriate, embrace them.
Facilitate DNS Ecosystem Improvements, Cont’d.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures will be used over the five-year period for this initiative:

• Establishment of community agreement on the needs for the DNS Security Facilitation Center. The DNS Security Facilitation Initiative will investigate and promote activities with reach into the DNS community and other communities as appropriate. The goal is to establish and promote best practices, facilitate communications between ecosystem participants, and implement processes to help the community handle threats.

• Formalization of the Special Interest Forum on Technology (SIFT) program.

• Implementation of data collection and gathering for various statistical analyses.

RESOURCES
Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• Training and outreach activities require collaboration with the ICANN community as well as ICANN org functions such as Global Stakeholder Engagement, Communications, and Government and IGO Engagement.

• Emergency preparedness efforts also support the work of teams such as Contractual Compliance.

• Activities support ICANN’s efforts to preserve and enhance the security, stability, and resiliency of the DNS including root server system governance, mitigation of DNS security threats, promotion and/or facilitation of DNSSEC deployment, the mitigation of name collisions, and DNS operations research.

Learn more about ICANN’s overall approach in Appendix C — ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers.
Facilitate DNS Ecosystem Improvements, Cont’d.

<td>Low</td>
</tr>
<tr>
<td>Facilitate DNS Ecosystem Improvements</td>
<td>$4.0</td>
</tr>
</tbody>
</table>

*Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.*

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Care must be taken not to exceed ICANN’s remit.
- Privacy considerations may impact activities.
- Lack of access to all the relevant data may impede activities.
- Key stakeholders may not agree with norms developed.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking

PURPOSE

This initiative aims to ensure that participation in the policy development work of ICANN’s three Supporting Organizations (SOs) and policy advice developed by the four Advisory Committees (ACs) is globally representative. The work of the SOs and ACs is carried out through the facilitation of informed participation in the policy process by diverse groups and interests, with clearly demonstrated levels of stakeholder support and commitment to reaching consensus.

SCOPE

The scope of this initiative covers these work areas:

- The regular cycle of Bylaws-mandated Organizational and Specific Reviews, which plays a key role in identifying any new participation gaps and challenges, and developing and assessing possible short- and long-term solutions.

- The Bylaws-mandated Reviews of stakeholder group and constituency charters ensure that the governance structures, membership and other rules of these groups are analyzed and improved to maintain recognition with the ICANN Board.

- The implementation of the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2 (WS2) recommendations will allow the community to inventory, document, and improve its processes and efforts to ensure diverse and inclusive participation in its work.

- Additional community, Board and org work may be initiated to develop approaches and solutions to improve the effectiveness of ICANN’s Multistakeholder Model (see “Enhancing the Effectiveness of ICANN’s Multistakeholder Model” paper which was revised in October 2020), including addressing the issue of representation and inclusivity as described in that work plan.

- Continuation of policy development support for the work of all the ICANN SOs and ACs, including stakeholder groups and constituencies, by providing subject matter and process expertise as well as day-to-day secretariat operations, is essential to ensure progress is made and documented.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.

• The knowledge and skill levels across the stakeholder community and organization increase, demonstrated by community members and ICANN org personnel equipped with basic knowledge of the DNS as well as ICANN policy and advisory processes.

• The ICANN community establishes mechanisms, such as an accurate measure of community participation, to equitably distribute workload among the pool of stakeholder representatives.

• Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.

• Continued efforts of the ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

• Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.

• Decision-making processes ensure that input from all stakeholders is considered.

• Improved multistakeholder model processes, such as Policy Development Process (PDP) 3.0 or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.

• ICANN stakeholders collaborate to define prioritization mechanisms that ensure the cumulative workload is reasonable at any one time, and that ICANN priorities reflect the community’s collective needs.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures are examples of those that will be used over the five-year period for this initiative:

• Membership tracking by SOs, ACs, stakeholder groups, and constituencies and other metrics.
• Implementation of Board-approved recommendations from Organizational Reviews and Community Charter Reviews.
• Metrics related to Public Comment proceedings.
• Community activity indicators that track global participation in projects and activities as well as the translation and interpretation services required for those projects and activities.
• Reports and statistics for ICANN prep week and ICANN Public Meetings.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• ICANN org Language Services, Meetings, and Engineering and IT functions each provide services that facilitate diverse and inclusive participation and directly impact community service levels and work.
• ICANN org’s Policy Development Support function collaborates with the ICANN Board and community on prioritization and planning for anticipated future work.
• Collaboration across IT, Communications, Policy Development Support and other ICANN org functions must occur to ensure a clear, early communications strategy and coordinated approach across related functions when transitioning to new technological tools.
• Increased understanding across ICANN org of the need for better data collection for use within the policymaking realm, such as through the Generic Names Supporting Organization (GNSO) Data Metrics for Policymaking process.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking, Cont’d.

RESOURCES, Cont’d.

- Increased collaboration with the Global Domains and Strategy, Operations and Policy Research and Global Stakeholder Engagement teams.

### OPERATING INITIATIVE

<table>
<thead>
<tr>
<th>Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking</th>
<th>Low</th>
<th>Mid-point</th>
<th>High</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$3.0</td>
<td>$4.3</td>
<td>$5.5</td>
</tr>
</tbody>
</table>

*Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.*

### CONSIDERATIONS

Risks and considerations exist for this initiative and may impact its advancement:

- Community expectations for facilitation and other support from the Policy Development Support function must be balanced with robust discussions about costs and benefits. There is a connection between personnel levels and the ability to provide support to existing policy development and advisory work as well as the anticipated increase in projects and workload stemming from implementation of the Board-approved Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2 (CCWG-Accountability WS2) recommendations and Board-approved recommendations from the recently concluded reviews.

- Generally, extended operations by the Policy Development Support department below the 35 full-time employee (FTE) level runs the risk of:
  - Lower levels of service to the community and regional disparity.
  - Delayed policy and advisory outputs.
  - Community frustration and loss of active participants.
  - Potential team member burnout.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking, Cont’d.

CONSIDERATIONS Cont’d.

• Adequate funding of the Policy Development Support budget is important because it may signal to the community:
  – Prioritization of policy activities integral to ICANN’s Mission.
  – Emphasis of support for community operations central to ICANN governance processes.
  – Organizational support for efforts to ensure global, diverse volunteer participation that provides legitimacy to ICANN’s multistakeholder model.

• Newer community members need time to get used to ICANN’s participation and working methods; veteran community members need to adjust to any new tools and platform changes.

• Challenges to effective participation due to the diverse nature of community groups, priorities, interests, and structural issues (e.g., lack of alignment as between Board-community goals and priorities, need to factor in cadence of Bylaws-mandated reviews and Empowered Community timelines).

• As reliance on accurate and relevant data within the policymaking process increases, there is a need to develop capacity among community participants in data analysis and related skills.

• Continued impact of COVID-19 on community volunteers and the need to rely on largely virtual interactions (with accompanying challenges such as time zone issues) may affect stakeholder participation in policy discussions.
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking

PURPOSE

This initiative focuses on the facilitation of more efficient, timely, and effective policy development work by ICANN’s three SOs and advice by the four ACs. Personnel support is provided for developing, documenting, and implementing changes and improvements to community procedures and processes intended to reflect commitment to reaching consensus and effective policymaking.

SCOPE

The scope of this initiative covers these work areas:

- Periodic review by community groups of their internal procedures and requirements to address new challenges and gaps, such as improvements to membership outreach and participation requirements.

- Development and improvement of community templates and procedures in relation to the Empowered Community (EC) powers and Bylaws-mandated processes.

- Additional community, Board, and org work may be initiated to develop approaches and solutions to improve how consensus is achieved by addressing the issues identified through the work on the Evolution of ICANN’s Multistakeholder Model.

- Policy Development Support personnel support for community projects and activities that strengthen the consensus-building process by providing guidance and clarifications on existing procedural rules, alternative processes, and possible improvements for community decision-making and planning.

- Management of Public Comment proceedings, community consultations, and other processes for public input that are essential for ICANN’s accountability and transparency.

- Organizational support for enhanced data collection and analysis, including legal or other types of expertise, surveys, and policy impact assessments.
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.
- Decision-making process ensures that input from all stakeholders is considered.
- Improved multistakeholder model processes, such as Policy Development Process 3.0 (PDP 3.0) or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. Milestones and progress for this initiative are tracked through indicator metrics aimed at measuring ICANN org accountability and community activity. Among these indicators are metrics related to:
- Processes for Empowered Community actions.
- Public Comment proceedings.
- Milestone reporting by working groups.
- Tracking of hours spent on community deliberations.
- Meeting and report statistics.

RESOURCES

Effective cross-functional and community collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:
- Engagement with the ICANN Board and community on workload management and project and activity prioritization. This is critical to ensure shared realistic expectations regarding scope, timing, and resource allocation for current and anticipated projects and activities.
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking, Cont’d.

RESOURCES, Cont’d.

- Collaboration with IT, Communications, and other ICANN org functions must occur to ensure a clear, early communications strategy and coordinated approach across related functions when transitioning to new technological tools.

- The GNSO PDP 3.0 Improvements Project and the Consensus Playbook may result in clearer roles for working group chairs and personnel that can be adapted for other SOs and ACs as appropriate.

- Implementing training and research opportunities for interested personnel may improve writing and analytical skills.

- Development of a proactive internal plan is needed to achieve the effective and successful implementation of policy outcomes across functions.

- Coordination with ICANN org’s Meetings, Language Services, Meetings Technical Services and Board Operations teams is required to implement improvements to ICANN Public Meeting planning.

### OPERATING INITIATIVE

<table>
<thead>
<tr>
<th>OPERATING INITIATIVE</th>
<th>FIVE-YEAR FINANCIAL ESTIMATE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking</td>
<td>Low $1.0</td>
</tr>
</tbody>
</table>

*Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.*
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

• Community expectations for facilitation and other support from the Policy Development Support team must be balanced with robust discussions about costs and benefits. There is a connection between personnel levels and the ability to provide support to existing policy development and advisory work, especially with the potential launch of several new PDPs within this five-year timeframe.

• Generally, extended operations by the Policy Development Support team below the 35 FTE level runs the risk of:
  – Lower levels of service to the community and regional disparity.
  – Delayed policy and advisory outputs.
  – Community frustration and loss of active participants.
  – Potential team member burnout.

• Adequate funding for the Policy Development Support budget is important as it may signal to the community:
  – Prioritization of policy activities integral to ICANN’s Mission.
  – Emphasis of support for community operations central to ICANN governance processes.
  – Organizational support for efforts to ensure global, diverse volunteer participation that provides legitimacy to ICANN’s multistakeholder model.

• Ensure the introduction of new technological tools as well as platform changes is orderly and well-planned, and that community training and transition needs are accounted for, particularly in an environment of increased reliance on virtual meetings.

• Prioritization is challenging and better tools are needed to support meaningful and effective prioritization.

• Lack of academic-quality policy research despite having qualified personnel, due to workload issues.

• Limited data collection to date means that data-driven policy work has been difficult and time-consuming, and that decision-making is sometimes required without specific data or other factual evidence.

• Continued impact of COVID-19 on community volunteers may affect project timelines and increase the amount of time required for decision-making.
Develop Internal and External Ethics Policies

PURPOSE

This operating initiative focuses on the development of internal and external ethics policies to guide behavior within ICANN org and the community. The internal Ethics Policy will provide additional guidance and direction for ICANN org personnel. This will continue to improve the confidence that the ICANN community places in org personnel, by providing further transparency into how ICANN org expects personnel to conduct their work.

The ICANN Community Ethics Policy will provide transparency and guidance regarding how members of the ICANN community should approach their ICANN-related work and interact with one another.

SCOPE

The scope of this initiative covers these work areas:

- Develop an internal ICANN org Ethics Policy.
- Develop an ICANN community Ethics Policy.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN Board and org continue enhancing transparency initiatives and upholding accountability.
- ICANN community enhances their transparency practices to increase cross-community accountability and trust.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following steps will be taken over the five-year period for this initiative:

- Gather all existing policies that will make up elements of the ethics policies and conduct a gap analysis.
- Conduct an assessment to understand the baseline ethics level as of FY20.
Develop Internal and External Ethics Policies, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

• Develop a plan or policies to fill the gaps.
• Launch internal Ethics Page and Ethics Dashboard on ICANN org Intranet.
• Deliver ICANN Internal Ethics Policy.
• Deliver ICANN Community Ethics Policy.
• Launch Ethics Page and Ethics Dashboard on ICANN.org.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• The Legal team leads this initiative and coordinates with Human Resources.
• Collaboration with ICANN org’s Engineering and IT functions to help with tracking mechanisms.

<table>
<thead>
<tr>
<th>OPERATING INITIATIVE</th>
<th>FIVE-YEAR FINANCIAL ESTIMATE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Develop Internal and External Ethics Policies</td>
<td>Low</td>
</tr>
<tr>
<td></td>
<td>$0.5</td>
</tr>
</tbody>
</table>

*Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.*

CONSIDERATIONS

The primary risks that may impact this initiative’s advancement are the lack of internal and external awareness of the work and resulting lack of buy-in to the effort.
Promote and Sustain a Competitive Environment in the Domain Name System

PURPOSE

This initiative encompasses ICANN org activities in support of a competitive environment in the DNS marketplace. This includes preparation for the launch of additional rounds of new gTLDs, applying knowledge gained through the implementation of the 2012 round and subsequent reviews aimed at evaluating different aspects of the program. ICANN org is in the pre-planning phase of a potential subsequent round of new gTLDs, monitoring community discussions, supporting Board and community work, and estimating anticipated resource requirements.

Though the policy work is still underway through processes such the GNSO’s New Generic Top-Level Domain Subsequent Procedures (Subpro) Policy Development Process Working Group, the possibility of an additional round of new gTLDs being launched within this five-year period exists. Each year the Operating and Financial Plan will be progressively updated to reflect the latest policy developments related to subsequent rounds of new gTLDs.

SCOPE

The scope of this initiative covers these work areas:

• Implementation of community-developed recommendations that the Board adopts and then directs ICANN org to implement prior to opening the next application window.

• Implementation of an operational infrastructure (systems, processes, and people) to support ongoing operations of the New gTLD Program.

• Development and execution of a global communications and awareness campaign.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Support the continued evolution of the Internet’s unique identifier systems with a new round of gTLDs that is responsibly funded, managed, risk-evaluated, and consistent with ICANN processes.
HOW PROGRESS IS TRACKED

Work within this initiative is expected to occur in three distinct areas, dependent on ICANN Board and community actions:

- **Planning and Preparation**: As per the Consensus Policy Implementation Framework, in parallel to PDP discussions, ICANN org prepares for the eventual implementation of policy recommendations. Activities include monitoring community discussions, considering preliminary implementation options, assessing implementation feasibility, and estimates of resource requirements.

- **Policy Implementation**: This track of activity commences once the Board adopts community-developed recommendations and directs ICANN org to implement. During this phase, ICANN org works with the community to implement recommendations adopted by the Board. Activities may include a detailed assessment of the recommendations, drafting and development of documentation to support the execution of an application process, and building on work done in the planning and preparation phase.

- **Operational Readiness**: To bring the organization to operational readiness, ICANN org onboards and trains vendors and internal resources, tests systems and tools, conducts exercises of the defined processes and tools, and continues executing the communications and awareness-building campaign. Opening the application window marks the end of this phase and beginning of application acceptance.

Once the application window opens, the program is operational. Once the application window closes, ICANN org begins processing applications according to the procedures defined during the implementation phase. If an application successfully completes the required evaluation and other relevant phases, the applicant will then move to a process to execute an agreement with ICANN and then pass technical testing of its infrastructure prior to delegation of a new top-level domain (TLD) into the DNS root zone.
RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. This project will likely require significant cross-functional collaboration and support from functions such as Legal, Communications, Global Stakeholder Engagement, Human Resources, Finance, Global Domains and Strategy, Office of the Chief Technology Officer, IANA, and Engineering and IT.

Based on the draft reports issued by the SubPro Policy Development Process Working Group, the processing of applications received through future application rounds for new gTLDs is expected to remain subject to the principle of cost recovery, meaning that funding the necessary preparatory and development expenses (as well as future processing fees) comes from fees paid by applicants.

Two implications should be noted: First, application fees may need to be set at levels that are appropriate for the repayment of the preparatory and development expenses to be incurred to launch the next round. Second, an alternative and temporary source of funds will need to be used to cover these expenses, which will be incurred before application fees are received. This source of funding will need to be identified and approved by the Board.

Resources for this initiative will be funded from the subsequent round of new gTLDs which is separate from ICANN Operations.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

• This initiative is highly dependent upon community-developed recommendations, and subsequent approval and direction by the Board to ICANN org regarding what needs to be implemented prior to launching the next application round. The number of changes and new things that need to be implemented will determine the scope, level of effort, and timeline of the implementation.

• Given the scale of the anticipated implementation work, planning and preparation before implementation begins is essential to ensure successful implementation. The timing of such planning and preparatory work is dependent upon completion of community activities and Board action on community-developed recommendations.
CONSIDERATIONS, Cont’d.

• This project requires an upfront commitment to design and build the operational infrastructure (people, processes, and systems) without precise knowledge of and insight into the demand and the number of applications in the next and future rounds. Determining the scope and level of investment will need to be based on certain assumptions. ICANN org has developed a set of operational planning assumptions that has been shared with the Board and community. The assumptions will be refined over time based on input received and additional information that becomes available such as the policy recommendations resulting from the SubPro Policy Development Process.
Promote the Universal Acceptance of Domain Names and Email Addresses

PURPOSE
This program encompasses ICANN org’s Universal Acceptance (UA) efforts to ensure that Internet applications and systems treat all TLDs in all scripts and email addresses based on those domains in a consistent manner. UA promotes consumer choice and provides broader access to end users.

SCOPE
The current scope of this initiative covers these work areas:

• Outreach to providers of standards, programming language, tools, and platforms to support UA.

• Raise awareness and capacity of technology developers to develop or update applications to be UA-ready.

• Raise awareness and capacity of email tool and service providers to support internationalized email addresses.

• Raise awareness in the public sector for governments to require UA readiness in their tendering processes.

• Update ICANN org’s relevant technical systems to be UA Ready.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN engages in greater cooperation with stakeholder groups and different policy and standards development bodies locally, regionally, and globally, to raise awareness about Universal Acceptance.

• Internationalized Domain Names (IDNs) are increasingly adopted and treated in a standard fashion by software vendors.

• Foster competition, consumer choice, and innovation in the Internet space by increasing awareness and encouraging readiness for Universal Acceptance, IDN implementation, and IPv6.
HOW PROGRESS IS TRACKED

Document a broader state of implementation, started in FY21 and will progress until FY25. These will cover:

- The remediation of technology, e.g. programming languages, email tools, etc., from FY21–24.
- Develop and deliver training for UA readiness in FY21–23.
- Train technical stakeholders on developing and deploying UA-ready software from FY21 to FY24.
- Creating public sector awareness from FY21–25. This may be a slow and consistent effort.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- The ICANN community, particularly the At-Large Advisory Committee (ALAC) and Governmental Advisory Committee (GAC), and ICANN org functions including Communications, Global Stakeholder Engagement, and Government Engagement will need to help raise awareness of UA.
- Support is also needed for the community-based working groups addressing UA at a global level as well as for local initiatives focusing on specific geographies through Universal Acceptance Steering Group (UASG).

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Efforts to increase UA readiness means reaching and activating stakeholders beyond the conventional ICANN community that may have different priorities.
- Raising awareness and encouraging UA as a mainstream design consideration may require considerable effort and time.

Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.
Root Zone Management Evolution

PURPOSE

This initiative supports the continued advancement of the technology platform used to provide root zone management services. This system manages the workflow of change requests from customers, automates many aspects of the processing, and ensures quality, accuracy, and timeliness of the business process.

Root Zone Management today continues to evolve toward more complex requirements and the need to cater for higher customer expectations. Work to improve the platform and service offering adapts to these requirements in order to retain high levels of customer satisfaction and continue to adhere to advancing policy requirements.

SCOPE

The scope of this initiative covers these work areas:

- Identify features and enhancements of how the root zone is managed that will improve operations while ensuring accuracy, quality, and timeliness of business processes.
- Develop solutions for the evolution of requirements from the SubPro Policy Development Process and technological developments related to IDNs.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Mechanisms are established with which ICANN assesses new technologies and, when appropriate, embraces them.
- ICANN collaborates with relevant parties and effectively leverages partnerships in the IETF, RIRs, and naming communities to develop and integrate new technologies with existing Internet protocol structures, including the DNS.
- ICANN org continues to provide reliable delivery and continuous improvement of the IANA functions, consistent with community service level agreements.
- ICANN promotes and supports awareness of the IANA functions, including among stakeholders, to successfully maintain the broad array of Internet unique identifiers and deliver effective DNS root zone operations.
Root Zone Management Evolution, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• The expansion of the DNS root zone attracts continued investment and innovation, as indicated by market developments and new registry services.

• The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

• Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following milestones will be used over the five-year period to track progress for this initiative:

• Launch of a significant new version of the Root Zone Management System (RZMS) with redesigned backend.

• Launch of a new authorization model to allow additional appropriate parties to be authorized as TLD managers with associated user management improvements.

• Launch of customer application programming interface (API) access.

• Implementation of approved policy recommendations on IDNs.

• Implementation of approved policy recommendations on New gTLD Subsequent Procedures. ICANN org’s Operations team needs to be trained.

• Audit criteria of the RZMS needs to be updated, documented, and managed.
RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. This initiative is accomplished through:

• Personnel who are assigned a percentage of their time to this project, along with minor additional ad-hoc resources for things like security testing of the applications prior to deployments.

• Approximately 1.5 FTEs within ICANN org’s Engineering and IT function perform software development and 1 FTE on the IANA team provides product management, design and requirements setting.

• Activities support ICANN’s efforts to preserve and enhance the security, stability, and resiliency of the DNS including Root Server System governance, mitigation of DNS security threats, promotion and/or facilitation of DNSSEC deployment, the mitigation of name collisions, and DNS operations research.

Learn more about ICANN’s overall approach in Appendix C — ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers.

<table>
<thead>
<tr>
<th>OPERATING INITIATIVE</th>
<th>FIVE-YEAR FINANCIAL ESTIMATE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Root Zone Management Evolution</td>
<td>Low</td>
</tr>
<tr>
<td></td>
<td>$3.0</td>
</tr>
</tbody>
</table>

Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.
CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Success is heavily dependent on the stability and commitment of engineering resources. In the past year there has been a more predictable cadence of development which helped ICANN org bring enhancements to the community in a timely fashion.

- The greatest risks are the loss of development resources that are prioritized to other objectives.

- The inability for IANA to provide sufficient designs and requirements settings to inform development.

- Policy development work being done in the ICANN community, such as in the New gTLD Subsequent Procedures Policy Development Process and for Internationalized Domain Names, must be monitored to ensure RZMS will meet those emerging requirements.
Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem

PURPOSE

Increasingly, governments and intergovernmental organization forums develop policies, legislation, and regulations that impact the Internet. In some cases, this may also impact ICANN’s ability to develop policies, run its operations, and fulfill its Mission. To address this and to ensure a single, globally interoperable Internet, ICANN plans to identify where these discussions and initiatives are taking place and determine where ICANN has or should engage to address these initiatives. This work follows the issues identified through the trend assessment work conducted by ICANN as part of the strategic planning process. This process also will identify any activities ICANN org’s Government and IGO Engagement team will need to reduce or stop as well as where targeted engagement must increase.

SCOPE

The scope of this initiative covers these work areas:

• Reviewing trends, existing agreements and relationships, conducting an analysis of the relationship between ICANN and these organizations, and developing an approach to align engagement through face-to-face and virtual gatherings.

• Identifying bodies within the Internet ecosystem that are relevant to ICANN’s remit and analyzing others to assess whether ICANN org should be more involved with them or in other arenas.

• Considering other opportunities for influencing global Internet issues.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN fosters successful and mutually beneficial relationships with local, regional, and global partners to ensure knowledge building about ICANN and its Mission continues.

• ICANN is engaged, its role acknowledged, and its presence valued in the arenas where topics within its remit are discussed.

• ICANN plays an important role in raising awareness among legislators, regulators, and stakeholders about its Mission and the effect of various regulatory and other proposals on the Internet ecosystem.
Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following milestones will be used over the five-year period for this initiative:

- FY21: Complete a cross-functional inventory of relationships in the Internet ecosystem.
- FY22: Assess the current mechanisms and identify gaps.
- FY22–25: Build relationships in gap areas as an ongoing activity. In conjunction with legislative and regulatory tracking, this will give ICANN org another layer of insight and help to prioritize targeted engagement.
- Ongoing annual review of alliances based on emerging issues or changes in other org focuses.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. While the Government and IGO Engagement team will lead global strategy and political and environmental assessments of global intergovernmental organizations and initiatives, collaboration will be needed as follows:

- Political assessment input from ICANN org’s regional engagement offices regarding activities in the national capitals, regional trends, and influences.
- Communications team to develop narratives to ensure consistent messaging.
- Legal analysis of reports on the potential impact of legislative or regulatory activity.

Resources for this initiative are included within the functional activities of the financial plan and therefore no incremental resources are needed.
Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Possible increased resources needed to cover new venues with additional technical resources for legislative analysis.
- Possibility of forging an alliance with an organization that takes the contrary position to ICANN’s on a common issue.
- Potential perception from some in the community that reassignment of work might lead to a change in funding or reducing some participation in events at a level that the community previously had become accustomed.
Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGO) Engagement and Participation in ICANN

PURPOSE

This operating initiative focuses on two areas: working with governments and IGOs engaged with ICANN and the policy development process through the GAC and, more broadly, working with governments and IGOs on issues beyond those being addressed through policy development processes.

Governments and IGOs participate in the ICANN policy development process through the GAC. The GAC considers and provides advice on the activities of ICANN as they relate to concerns of governments, particularly matters where there may be an interaction between ICANN’s policies and various laws and international agreements or where they may affect public policy issues.

The GAC has steadily grown in membership and participation, yet has more turnover of its representatives than other ACs. As a result, some GAC representatives are less familiar with ICANN’s processes and issues, making it difficult for them to effectively engage. It is important, where possible, for governments to participate in ICANN rather than addressing potential issues through external legislative or regulatory activity, or taking those issues to be discussed at the UN and/or other IGOs.

Additionally, dialogues that will impact ICANN increasingly involve different aspects or ministries of national governments than those commonly participating in ICANN through the GAC. Therefore, activity has to be broader than government and IGO activity within ICANN’s policy development process. This requires targeted engagement through global, regional, and national governmental events, including new structures and diversified venues where dialogue is conducted on topics such as cybersecurity, data protection, privacy, cultural and geographic identifiers, emerging technologies, and proposed new systems of unique identifiers.
SCOPE

The scope of this initiative covers these work areas:

- Assessing the expectations of government participants within the GAC.
- Creating targeted information and capacity development materials to better equip government stakeholders around the world, enabling them to become more active participants in ICANN’s policymaking processes.
- Assessing expectations of government participants in capacity-development activities
- Creating targeted materials as needed for government participants.
- Assessing and mapping the scope of global dialogue venues relevant to ICANN on topics such as cybersecurity and the unique identifiers.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN org continues to develop and evolve systems to detect and monitor legislative and regulatory initiatives and other governmental or IGO actions or initiatives that could impact ICANN’s Mission or operations.
- ICANN fosters successful and mutually beneficial relationships with local, regional, and global partners to ensure knowledge-building about ICANN and its Mission continues.
- ICANN plays an important role in raising awareness among legislators, regulators, and stakeholders about its mission as well as the effect of various regulatory and other proposals on the Internet ecosystem.
HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following measures will be used over the five-year period as indicators of progress for this initiative:

- Delivery of High-Level Governmental meetings.
- Reports and statistics on participation in outreach, technical briefings and capacity-development sessions for the GAC as well as through collaboration with other organizations in the ecosystem. Similar data will be provided for briefings and capacity building events for diplomats from the Permanent Missions to the UN, UN staff, as well as other UN agencies or other IGOs, where appropriate.
- Comparison of before and after capacity-development event surveys to measure delivery of information against expectations and knowledge gained.
- Contributions to open consultations over legislative, regulatory, policy or standards initiatives and technical briefings to policy makers.
- Completed review of existing Memoranda of Understanding (MoUs) for continuing alignment with goals.
- Metrics related to the number of countries and intergovernmental organizations represented in the GAC as well as the number of countries and IGOs actively participating in GAC and ICANN policy processes.
Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGO) Engagement and Participation in ICANN, Cont’d.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- Regional Global Stakeholder Engagement teams to identify which countries are not part of the GAC.
- Government Engagement and Global Stakeholder Engagement teams to conduct gap analysis on IGOs that are not part of the GAC.
- Communications team to develop a consistent narrative for outreach messaging.
- Public Responsibility Support team to develop online courses.
- Office of the Chief Technology Officer to develop technical capacity-development curriculum to assist with trainings and capacity development through the GAC’s Underserved Regions Working Group (USRWG) work plans and other collaborative initiatives in the Internet governance ecosystem.

Resources for this initiative are included within the functional activities of the financial plan core budget and therefore no incremental resources are needed.

CONSIDERATIONS

The following risk and consideration exists for this initiative and may impact its advancement over the FY22–26 period:

- Allocation of adequate resources to sufficiently monitor global dialogue and alignment with the Strategic Plan.
Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration With Others That May Impact the ICANN Mission

PURPOSE

This initiative builds on the work begun by ICANN org in 2018 to identify and report on legislative and regulatory developments around the world that could have an impact on ICANN’s ability to fulfill its Mission. Part of ICANN’s work within this initiative is providing educational information to governments on those issues in order to help ensure that lawmakers have the full benefit of ICANN’s technical expertise.

SCOPE

The scope of this initiative covers these work areas:

- Examine existing processes and further develop the mechanisms to capture community feedback and input.

- Creation of an internal assessment mechanism. ICANN org will also review its experience in FY21 to inform the process of determining the criteria for escalation from monitoring to activity of a use case. This will act as a resource in outreach and engagement efforts.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN org continues to develop and mature systems to detect and monitor legislative initiatives and other governmental or IGO actions or initiatives that could impact ICANN’s Mission or operations.

- ICANN org proactively engages with the community to develop common awareness of ICANN’s contribution to the early warning system.

- ICANN has effective processes in place to receive and act on input from the community.

- ICANN effectively convenes and facilitates discussions with relevant parties to help address relevant global challenges and opportunities.
Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration With Others That May Impact the ICANN Mission, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following milestones will be used over the five-year period for this initiative:

- FY21: Assess and refine the legislation, regulatory, standards or other external initiative monitoring process. This includes developing criteria for when an item that is being monitored should be escalated to educational action.
- Development of community dialogue mechanism with support of ICANN org’s Policy Development Support function.
- Ongoing Performance Measurements.
  - Publication of reports to community on legislative or regulatory events being tracked.
  - Publication of technical assessments and use cases.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- Regional Global Stakeholder Engagement teams to provide analysis of upcoming regional legislation that might impact ICANN. Government and IGO Engagement team to provide data collection and analysis, awareness raising, and technical briefings.
- Office of the Chief Technology Officer to assess the impact of proposed legislation on the DNS and to conduct use case analysis as applicable.
- Legal to review reports on legislative and regulatory activity.
- Communications to develop a narrative to ensure consistent messaging on key issues.

Resources for this initiative are included within the functional activities of the financial plan core budget and no incremental resources are needed.
Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration With Others That May Impact the ICANN Mission, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Resources are needed to monitor and compare information across various venues to detect the “weak signals” early enough to identify trends and evaluate actions to address possible challenges. In certain cases deliberations on issues related to ICANN’s Mission take place with multilateral settings behind closed doors without much, if any, information being released publicly.

- Political judgment is crucial in determining when to move from monitoring to active educational engagement efforts.

- Limited ability to provide briefings, technical training, and other engagement efforts in some governmental or IGO bodies.
Formalize the ICANN Org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers

PURPOSE

The domain name marketplace has matured over the past five years, following the 2012 round of the New gTLD Program. ICANN org must analyze its funding model within the context of the marketplace, reviewing key market enablers and challenges to domain name industry growth over the same period to provide a solid foundation for future funding projections. This initiative brings together those activities.

SCOPE

The scope of this initiative covers these work areas:

- Review and analyze trends and driving forces of the domain name industry marketplace.
- Seek to validate and improve forecasting accuracy through review of data including zone files, registry transaction reports, contracted party family affiliation, corporate disclosures, market intelligence, and more.
- As ICANN org formalizes its funding model, it plans to evaluate the migration of the forecast model to a platform that will provide a robust system for preparing and analyzing future funding projections.
Formalize the ICANN Org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- The Five-Year Strategic Plan is supported by a Five-Year Operating and Financial Plan. All plans are updated as and when necessary to take into account relevant changes in ICANN’s environment.

- Evolution to five-year rolling financial planning allows ICANN to appropriately address changes that impact ICANN’s budget, operating and financial plan, or strategic plan.

- ICANN has reliable and predictable five-year funding projections, based on a sound understanding of the evolution in the domain name marketplace and realistic assumptions.

- ICANN utilizes data about the directions and trends in the market to effectively guide the organization.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following measures will be used over the five-year period for this initiative:

- Build and establish a process to develop the funding model during FY21.

- Explore options for a new modeling tool or platform.

- Annual delivery of funding assumptions and projections for the next five fiscal years.

- Continued enhancement of funding model tool and an increase in the Global Domains and Strategy (GDS) team’s domain market intelligence in relation to the forecasting process.
Formalize the ICANN Org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers, Cont’d.

RESOURCES
Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• The skills of ICANN org’s GDS, Finance, and Engineering and IT teams to evaluate and migrate the current forecast model to a more robust platform.

• The skills of ICANN org’s GDS, Finance, Office of the Chief Technology Officer, and Global Stakeholder Engagement teams to collect and contextualize market intelligence in relation to the forecast.

• Processes and tools are in place to effectively prioritize and periodically reprioritize work.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Formalize the ICANN Org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers</td>
<td>Low  $0.5</td>
</tr>
</tbody>
</table>

*Note: The Five-Year Financial Estimate (mid-point) is the scenario ICANN proposes.*

CONSIDERATIONS
The following risks and considerations exist for this initiative and may impact its advancement:

• It is not clear how threats to the DNS might impact ICANN’s funding. ICANN org must expand its understanding and knowledge of the impact these threats may have.
Implement New gTLD Auction Proceeds Recommendations as Approved by Board

PURPOSE
This initiative relates to preparations for the implementation of the Board-approved recommendations arising from the Cross-Community Working Group on New gTLD Auction Proceeds (CCWG-AP).

SCOPE
The scope of this initiative covers these work areas:
- ICANN org will facilitate a review of the specific roles of the Board and ICANN org in this initiative. The specific roles of the Board and ICANN org in the various stages of the operational and review stage are yet to be determined. However, regardless of the eventual processes or structures needed and/or the use of external entities, the Board remains ultimately accountable for the actions related to the proceeds.
- ICANN org will provide feasibility assessments and costs for the ICANN Board’s consideration of the CCWG-AP recommendations.
- ICANN org to implement the Board decisions following the recommendations, including coordination with a community implementation review team.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
- Funding, expenses, and reserves are addressed in each plan in a manner consistent with policies, Board decisions, strict financial responsibility, and conservatism.
- ICANN prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.
- ICANN has processes and tools in place to effectively manage and control costs.
- Financial accountability and responsibility guide how decisions are made prior to committing ICANN’s resources, how expenses are managed once approved, and those commitments.
- Key cost drivers are clearly defined and understood.
Implement New gTLD Auction Proceeds Recommendations as Approved by Board, Cont’d.

HOW PROGRESS IS TRACKED

Work within this initiative will happen in distinct stages, dependent on ICANN Board and community actions. The specific milestones guiding next steps are:

• Submission of the CCWG-AP Final Report to the Chartering Organizations for approval. (Completed in FY21.)
• Chartering Organization approval. (Completed in FY21.)
• Submission to the ICANN Board for consideration. (Completed in FY21.)
• Implementation feasibility review assessment.
• Board consideration of recommendations.
• Implementation plan development.
• Board approval of implementation plan.
• Implementation work commences.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• The final recommendations approved by the Board and the design of the implementation plan will drive costs, which will be funded out of the auction proceeds.

• The recommendations will need to be reviewed from a resourcing standpoint in order to understand practicalities, including estimated workload, potential new hires, and needed skills.

• As implementation progresses, the internal ICANN resources supporting this work will be reimbursed to ICANN’s operations from the auction proceeds.

Resources for this initiative are included within the functional activities of the financial plan core budget and therefore no incremental resources are needed.

CONSIDERATIONS

This work is dependent on the pending Board action on the recommendations contained in the Final Report of the CCWG-AP.
Planning at ICANN

PURPOSE
Careful planning of ICANN activities helps safeguard ICANN’s long-term financial sustainability and ensure that ICANN org is accountable to the public in its stewardship of ICANN’s Mission. This initiative encompasses ICANN org planning activities.

SCOPE
As part of its planning efforts, ICANN org strives to improve the quantification of resources, evaluation of needs, prioritization, flexibility, and transparency of the management of ICANN’s resources and activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• ICANN org prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.
• ICANN org has processes and tools in place to effectively manage and control costs.
• Financial accountability and responsibility guide how decisions are made prior to committing ICANN’s resources, and how expenses are managed once approved in order to stay within those commitments.
• Key cost drivers are clearly defined and understood.
• Risk assessments are periodically reviewed to determine the adequacy of ICANN’s Reserve Fund level to address potential mitigation needs.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These include:
• Evolution of ICANN’s planning processes, including integration of the strategic outlook and strategic planning processes into an overall rolling planning process.
• Design and implementation of a progress and achievements reporting process.
• Research, analysis, design, and implementation of a work prioritization approach in collaboration with ICANN org, Board and the Community.
RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative:

• Planning involves all stakeholders of the ICANN ecosystem, including the ICANN Board, community, org, and the public.

• The number of ICANN org resources involved over the five-year plan period are expected to increase as compared to the previous five-year plan period. This is to accommodate the need for operational alignment, prioritization, increased number and quality of plans, and increased communication. Limited external resources will be needed to help with education, skills, and facilitation at the beginning of the period as internal capabilities ramp up.

Resources for this initiative are included within the functional activities of the financial plan core budget and therefore no incremental resources are needed.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

• A lack of organizational support for cross-collaboration efforts may delay an effective planning process.

• Newer community members need time to get used to ICANN’s planning process and may not fully engage in Public Comment proceedings. ICANN will need to provide information and engagement opportunities to ensure that the Bylaws-mandated review and Empowered Community timelines are achievable.
ICANN Reserves

PURPOSE
To safeguard ICANN’s long-term financial sustainability and ensure that ICANN org is accountable to the public in its stewardship of ICANN’s Mission, the level of ICANN reserves must be continuously set, reached, and maintained consistent with the complexity and risks of ICANN’s environment.

SCOPE
The scope of this initiative covers these work areas:
• Ensure implementation of the October 2018 Board resolution to replenish the Reserve Fund to an amount equal to one year of operating expenses as the minimum target level of the Reserve Fund.
• Maintain minimum target level of the Reserve Fund as operating expenses change.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Financial accountability and responsibility guide how decisions are made prior to committing ICANN’s resources, and how expenses are managed once approved in order to stay within those commitments.
• Replenishment strategy for ICANN’s Reserve Fund is adhered to and implemented successfully.
• Risk assessments are periodically reviewed to determine the adequacy of ICANN’s Reserve Fund level to address potential mitigation needs.
ICANN Reserves, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following measures will be used over the five-year period for this initiative:

- The replenishment strategy suggests that approximately USD $32 million be allocated to the Reserve Fund over eight years. Future increases in operating expenses may trigger an increase to the Reserve Fund target level, meaning that more funds would need to be added.
- The level of the Reserve Fund is expected to be approximately $139 million at the beginning of FY22 and reach $165 million by the end of FY26.

RESOURCES

Resources for this initiative are included within the functional activities of the financial plan core budget and therefore no incremental resources are needed.

CONSIDERATIONS

The success of the replenishment strategy is dependent upon:

- Stability of ICANN’s funding,
- That there are no events requiring Board-approved withdrawals from the Reserve Fund during the period.
- Stability of the minimum target level for the Reserve fund.
Functional Activities

FY22–26

Functional activities are those necessary to operate the organization, such as Human Resources or Finance, or implement ICANN's Mission, such as Contractual Compliance or the IANA department. These 34 functional activities describe ICANN's ongoing work for the period of FY22–26.

The 34 functional activities have been placed into five service groups:

- Technical and DNS Security
- Policy Development and Implementation Support
- Community Engagement and Services
- ICANN Org Governance
- ICANN Shared Services

These service groups were selected because they represent the broad categories of work that ICANN org conducts in fulfillment of its Mission. The five service groups express the functional activities at a high level.
Functional Activities

Technical & DNS Security

FY22–26

- Office of the Chief Technology Officer
- ICANN Managed Root Server
- Internationalized Domain Names and Universal Acceptance
- IANA Functions
- Contractual Compliance
Office of the Chief Technology Officer

PURPOSE
ICANN org’s Office of Chief Technology Officer (OCTO) aims to constantly improve knowledge about the identifiers ICANN helps coordinate, to disseminate this information to the Internet community, to improve the technical operation of the Internet’s system of unique identifiers, and to improve ICANN’s technological stature.

OPERATING INITIATIVE CONTRIBUTIONS
- Lead: Support the evolution of the Root Server System.
- Lead: Facilitate DNS ecosystem improvements.
- Support: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.
- Support: Through targeted engagement improve governmental and Intergovernmental Organization (IGO) engagement and participation in ICANN.
- Support: Monitor legislation, regulation, norms, principles, and initiatives in collaboration with others that may impact the ICANN Mission.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
- ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.
- ICANN continues to provide a trusted forum that effectively convenes relevant parties for discussions on the security, stability, evolution, and interoperability of the DNS.
- ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.
- Working with DNS root server operators and other relevant parties, ICANN continues to enhance the governance and technical evolution of DNS root server operations and services.
- ICANN, in collaboration with DNS root server operators and other relevant parties, develops a coordinated emergency plan to address DNS Root Server System attacks.
THE TECHNICAL & DNS SECURITY

Office of the Chief Technology Officer, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• The inherent security of the DNS and unique identifiers system measurably increases, due to higher adoption of global open Internet standards and greater awareness of security threats among stakeholders.

• ICANN, in collaboration with relevant hardware, software, and service vendors, enhances knowledge about DNS safety and security.

• Security threats leveraging the DNS measurably decline as a result of encouraging relevant hardware, software, and service vendors to incorporate key security measures.

• The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

• Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

• The Internet community’s trust in ICANN to provide resilient, scalable, and accountable Key Signing Key management – as an adjunct to existing public key infrastructures – increases, facilitating improved security technologies and greater use of the DNS.

• Enhanced engagement with contracted parties creates more robust industry relationships, dynamic participation, and improved responsiveness to emerging technologies.

• Mechanisms are established with which ICANN assesses new technologies and, when appropriate, embraces them.

ACTIVITIES

• **External Operations:** Activities that have an external impact, such as creating the DNS Security Facilitation Center and prototyping the Emergency Warning System. A new activity in the feasibility phase in FY22 is the Domain Name Security Threat Identification, Collection and Reporting (DNSTICR) activity which aims to develop an ongoing solution for identifying, documenting and reporting domain names that are being actively abused.
TECHNICAL & DNS SECURITY

Office of the Chief Technology Officer, Cont’d.

ACTIVITIES, Cont’d.

- **Technical Engagement and Outreach:**
  - Support and provide training, engagement, and outreach to the technical community on current and upcoming technologies.
  - Support other ICANN org teams such as Global Stakeholder Engagement and Government Engagement.

- **Research:** Activities centered around the analysis of the impact of new and existing technologies to the Internet’s unique identifier systems as well as the investigation of new technologies and how they may impact the unique identifier ecosystem. ICANN org anticipates a number of OCTO-led implementations will result from the Board-approved recommendations from the Security, Stability and Resiliency (SSR2) review. ICANN org will continue work related to the Name Collision Analysis Project (NCAP) Study 1 and monitor and support decisions related to next steps for NCAP studies 2 and 3.

- **Reporting:**
  - Providing tools and platforms in which to report on various aspects of the unique identifier ecosystem, such as Domain Abuse Activity Reporting (DAAR) and Identifier Technologies Health Indicators (ITHI).
  - Leading or supporting other work such as the Contractual Compliance Registrar Audit Study or verifying ICANN’s contracted parties are meeting their contractual obligations related to IPv6 deployment.
  - Track and implement Board-approved recommendations from SSR2.

- **Internal Operations:**
  - Activities that have an internal impact or recurring activities such as support of the Action Request Register (ARR) and implementation of recommendations from Specific Reviews and policy development processes.
  - Collaboratively working with ICANN’s Public Responsibility Support team on online learning development.
  - Project management.
  - Team meetings and planning.
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- **External Operations:** Much of the progress and milestones will be tracked via the operating initiatives, such as:
  - The progression of recommendations within the Root Server System Advisory Committee document RSSAC037 “A Proposed Governance Model for the DNS Root Server System” and RSSAC038 “RSSAC Advisory on a Proposed Governance Model for the DNS Root Server System,” both published on 15 June 2018.
  - Formalization of the Special Interest Forum on Technology (SIFT) program.
  - Establishing community agreement on the DNS Security Facilitation Center
  - Items related to root zone availability service being deployed.
  - Development and evaluation of DNSTICR.

- **Technical Engagement and Outreach:**
  - More DNS resolver developers enabling hyperlocal technology.
  - Additional personnel added in FY21 will help the team deliver engagement and outreach activities in a more timely, efficient, and broadened capacity.

- **Research:**
  - Track and implement as appropriate Board-approved recommendations from SSR2.
  - Track and support recommendations for NCAP studies 2 and 3.

- **Reporting:**
  - Data or reports published as relevant to the various efforts underway such as DAAR and ITHI reporting, publication of technical papers, etc.
  - Implement data collection and gathering for various statistical analyses.
  - Track and implement Board-approved recommendations from SSR2.
TECHNICAL & DNS SECURITY

Office of the Chief Technology Officer, Cont’d.

RESOURCES
FY22–26: Resource requirements expected to increase.

CONSIDERATIONS
The following risks and considerations exist for this functional activity and may impact its advancement:

• Bandwidth constraints or competing demands on the available personnel resources due to a resource acting as a subject matter expert for internal and community efforts.

• Assumptions regarding community interest in security and stability could be reduced, which may cause a reprioritization of personnel time and effort.

• Community appetite for technical outreach, training, and engagement is strong but this could change, which may lead to a reprioritization.

• In FY22, ICANN org anticipates a number of OCTO-led implementations will be forthcoming resulting from the Board-approved recommendations from SSR2.
ICANN Managed Root Server

PURPOSE
Through the ICANN Managed Root Server (IMRS) program, ICANN org provides trusted technical expertise and solutions to support the global Internet by building and maintaining a sustainable, stable, and resilient root server that is able to respond to identified and vetted technical needs.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Working with DNS root server operators and other relevant parties, ICANN continues to enhance the governance and technical evolution of DNS root server operations and services.
• ICANN, in collaboration with DNS root server operators and other relevant parties, develops a coordinated emergency plan to address DNS Root Server System attacks.

ACTIVITIES
• Deliver and maintain a highly secure, stable, and resilient root server.
• Respond to defined strategic initiatives and vetted community expectations of the Root Server System.
• Maintain a low total cost of operations while building capacity, good engineering practices, and RSS community engagement.
ICANN Managed Root Server, Cont’d.

HOW PROGRESS IS TRACED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- Tracking the number of ICANN Managed Root Server (IMRS) instances deployed every 12 months.
- Tracking the number of IMRS service outages every 12 months.
- Financial: measuring actual expenses against planned budget.

RESOURCES

FY22–26: Resource requirements expected to increase.

△ Additional locations of IMRS large “clusters” will require additional year-on-year funding to cover connectivity, colocation, and power costs.

△ Additional locations of IMRS large “clusters” will require year-zero capital expenses funding followed by year-two maintenance and hardware upgrades to maintain stability and resiliency.

CONSIDERATIONS

Risks and considerations exist for this functional activity and may impact its advancement:

- Hiring and retaining expert-level personnel continues to be challenging in the current economic climate.
- Personnel may leave if clear paths for professional development are not implemented.

Internationalized Domain Names and Universal Acceptance

PURPOSE
This functional activity supports community-based work and leads internal work for Internationalized Domain Names (IDNs) and Universal Acceptance (UA) efforts.

OPERATING INITIATIVE CONTRIBUTIONS
- Lead: Promote the Universal Acceptance of Domain Names and Email Addresses.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
- ICANN engages in greater cooperation locally, regionally, and globally, with stakeholder groups and different policy and standards development bodies to raise awareness about UA, IDN implementation, and IPv6.
- UA readiness measurably increases.
- IDNs are increasingly adopted and treated in a standard fashion by software vendors.

ACTIVITIES
- Make the IDN table review process more consistent, transparent, and secure; and its publication in the IANA Repository of IDN Practices smoother.
- Support the development of Root Zone Label Generation Rules (RZ-LGR) by the community for remaining scripts identified in Maximal Starting Repertoire (MSR).
- Support policy development work on IDNs, including IDN variant top-level domains.
- Develop messaging and undertake communication to reach out to technical and gTLD registries and registrars to promote UA readiness in applications.
- Develop and undertake training for technology developers and email tools and service providers to promote UA readiness.
- Reach out to the public sector to promote UA readiness awareness and demand.
Internationalized Domain Names and Universal Acceptance, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics and reports to track functional activities. The following milestones will be used over the five-year period for this functional activity:

• The IANA Repository for IDN Practices is updated by addition of missing IDN Tables for the gTLD registries. Also, the Reference IDN Tables are published at icann.org/idn and the IDN Table review process is updated to make it more transparent and consistent using the Reference IDN tables.

• For the scripts identified in Maximal Starting Repertoire, proposals currently underway are finalized and integrated in subsequent versions of RZ-LGR.

• Continued community progress on UA based on its annual action plans which are developed with the support of UA Program, both through global working groups and local initiatives.

• Continued progress of ICANN org in making its own systems UA-ready.

• IDN guidelines are implemented based on input from the GNSO and approval by the ICANN Board.

• IDN variant TLDs for gTLDs and ccTLDs are implemented based on the policies finalized by GNSO and ccNSO and approved by the ICANN Board.

RESOURCES

FY22–26: Resource requirements expected to increase.

CONSIDERATIONS

Risks and considerations exist for this functional activity and may impact its advancement:

• The work on implementation of IDN variant TLDs depends on the finalization of the respective policies by the GNSO and ccNSO. The ICANN Board has asked the SOs to develop a consistent set of policies for variant TLDs.

• Implementation of IDN Guidelines depends on the direction provided by GNSO and its eventual approval by the ICANN Board.

• Work on UA is based on influencing technology developers and policymakers who may have other priorities.

• ICANN has started the IDN-UA Steering Committee to coordinate the cross-functional work on IDNs and UA.
TECHNICAL & DNS SECURITY

IANA Functions

PURPOSE
The purpose of the IANA functions is to assign unique identifiers for the Internet in accordance with relevant policies, and to be the registry of record for those allocations. This work is essential to promoting Internet interoperability by ensuring devices on the Internet communicate in a standardized manner. This work is administered through contracts that provide accountability to the respective communities that use these services.

ICANN’s affiliate Public Technical Identifiers (PTI) performs these functions on behalf of ICANN org according to service level agreements and other obligations defined in the contracts. PTI has a separate operating plan and budget process that is reviewed by the PTI Board of Directors. The PTI Operating Plan and Budget constitutes a large component of the IANA Operating Plan and Budget and is included in ICANN’s Operating Plan and Budget. Read the Adopted FY22 PTI and IANA Operating Plans and Budgets.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Root Zone Management Evolution.
• Support: Support the evolution of the Root Server System.
• Support: Facilitate DNS ecosystem improvements.
• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Promote the Universal Acceptance of Domain Names and Email Addresses.
TECHNICAL & DNS SECURITY

IANA Functions, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Mechanisms are established with which ICANN assesses new technologies and, when appropriate, embraces them.
- ICANN collaborates with relevant parties and effectively leverages partnerships in the IETF, RIRs, and naming communities to develop and integrate new technologies with existing Internet protocol structures, including the DNS.
- ICANN org continues to provide reliable delivery and continuous improvement of the IANA functions, consistent with community service level agreements.
- ICANN promotes and supports awareness of the IANA functions, including among stakeholders, to successfully maintain the broad array of Internet unique identifiers and deliver effective DNS root zone operations.
- The expansion of the DNS root attracts continued investment and innovation, as indicated by market developments and new registry services.
- ICANN engages in greater cooperation locally, regionally, and globally, with stakeholder groups and different policy and standards development bodies to raise awareness about UA, IDN implementation, and IPv6.
- New stakeholder services are defined, delivered, and effectively supported.
- UA readiness measurably increases.
- IDNs are increasingly adopted and treated in a standard fashion by software vendors.
- IPv6 usage measurably increases.
- The Internet community’s trust in ICANN to provide resilient, scalable, and accountable Key Signing Key (KSK) management – as an adjunct to existing public key infrastructures – increases, facilitating improved security technologies and greater use of the DNS.
- The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.
- Increased availability of root zone data enables greater decentralization and distribution of DNS root service.
TECHNICAL & DNS SECURITY

IANA Functions, Cont’d.

ACTIVITIES

- Operations: Perform the IANA functions in accordance with contractual obligations.
- Operational Improvement: Monitor and improve operations through regular analysis and review, including third-party audits and operational excellence activities.
- System enhancement: Evolve the technical systems that manage the workflow of change requests from customers, and publish registry data to customers, ensuring quality, accuracy and timeliness of the business processes.
- Cryptographic Business Operations: Perform key ceremonies and improve key management facilities to mitigate security threats and maintain facility quality.

△ System enhancements: Root Zone Management System (RZMS).
△ System readiness for a subsequent round of new gTLDs when ICANN org is ready to implement Board-approved policy recommendations.
△ Continue to invest in the current key signing facilities.
△ Further streamlining and automation of business processes.
△ Evolve business excellence capabilities across the function.

HOW PROGRESS IS TRACKED

- Operations: Continue to report on IANA performance against its service level agreements.
- Operational Improvement: Continue to analyze customer feedback received through surveys as well as areas for improvement identified through external audits and use results to drive operational improvements.
- System enhancement: Publish registry data to customers, ensuring quality, accuracy and timeliness of the business processes.
- Cryptographic Business Operations: Maintain the transparency of ceremony administration practices and continue to engage with key stakeholders to ensure suggested improvements are implemented to the systems, processes and facilities.

Metrics include:
- Performance service level agreements.
- Customer satisfaction through surveys.
- Audit reports.
TECHNICAL & DNS SECURITY

IANA Functions, Cont’d.

RESOURCES
FY22–26: Modest incremental increases annually unless there is a significant scope change in the underlying IANA functions (e.g., new requirements driven by community-developed policies).

See Adopted FY22 PTI and IANA Operating Plans and Budgets.

CONSIDERATIONS
The following risks and considerations exist for this functional activity and may impact its advancement:

• Ongoing customer satisfaction relies on the evolution of IANA systems. Meeting growing customer volume while adhering to service level agreements is dependent on increasing advancement of the systems, and customer expectations on the level of sophistication in those systems grows over time.

• Increased demands relating to the operating envelope around the KSK management. This includes more regular hardware replacement cycles, more frequent key replacement cycles (rollovers), and new security facilities.

• Losing personnel can significantly impact the function. Most roles in the team lack redundancy and filling positions when personnel depart has often proved challenging.

• A higher number of gTLDs may impact the root zone.
Contractual Compliance

PURPOSE
The Contractual Compliance functional activity ensures that ICANN’s contracted parties (registries and registrars) demonstrate and are held in compliance with the applicable agreements and consensus policies.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.
• ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.

ACTIVITIES
• Conduct monitoring, outreach and audits to proactively ensure contracted parties are in compliance with agreements.
• Receive, analyze, respond and resolve complaints regarding potential compliance issues with contracted parties.
• Support policy development processes (PDPs), Organizational and Specific Reviews, and the Registrar Accreditation Agreement (RAA) and Registry Agreement (RA) contracting process by providing input from the contractual compliance perspective. Implement recommendations arising from Specific Reviews and PDPs as necessary and appropriate.
• To enhance operational excellence, the Contractual Compliance team plans to improve business operations, methods, and processes, including looking to increase automation in FY22–26.
• The team also plans to reduce professional services by completing migration to the Naming Services Portal in FY22, as well as increasing headcount to support Contractual Compliance audit and reporting activities.
Contractual Compliance, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- Number of low-complexity complaints processed.
- Number of high-complexity complaints processed.
- Turn-around time for processing low-complexity complaints.
- Closure rate of high-complexity complaints processed.
- The number of elevated-risk registrars or top-level domains audited.
- High-risk issues mitigated through audit.
- Contracted parties and reporter satisfaction level measured via perception survey.

RESOURCES

FY22–26: Resource requirements expected to be stable.

- Migration to Naming Services Portal (NSp) can potentially save approximately USD $50,000 annually.
- Adding personnel to perform audits can potentially save up to USD $430,000 annually by reducing services from external sources.
- Adding personnel to provide in-house performance and metrics reporting rather than relying on third-party professional vendors can potentially save almost USD $100,000 annually.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Complaints may increase in volume, type and complexity as Registry Directory Services (RDS) obligations are implemented. This may lead to a reallocation of existing resources among ticket queues. At this point, no additional personnel are considered necessary to address this consideration.
Functional Activities
FY22–26

Policy Development & Implementation Support

- Policy Development and Advice
- Policy Research and Stakeholder Programs
- Contracted Parties Services Operations
- Technical Services
- Strategic Initiatives
- Constituent and Stakeholder Travel
Policy Development and Advice

PURPOSE

The Policy Development Support functional activity facilitates the policy development and advisory work of the ICANN community. It provides process management, subject matter expertise, and administrative and professional secretariat support to ICANN’s Supporting Organizations (SOs), Advisory Committees (ACs), and other community structures recognized under the Bylaws.

OPERATING INITIATIVE CONTRIBUTIONS

- Lead: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
- Lead: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes, and committed to cooperating in global public interest.
- The knowledge and skill levels across the stakeholder community and organization increase, demonstrated by community members and personnel equipped with basic knowledge of the DNS as well as ICANN policy and advisory processes.
- The ICANN community establishes mechanisms, such as an accurate measure of community participation, to equitably distribute workload among the pool of stakeholder representatives.
- Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.
- Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.
Policy Development and Advice, Cont’d.

- Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.

- Decision-making processes ensure that input from all stakeholders is considered.

- Improved multistakeholder model processes, such as Policy Development Process 3.0 (PDP 3.0) or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.

- ICANN stakeholders collaborate to define prioritization mechanisms, which ensure that cumulative workload is reasonable at any one time and that ICANN priorities reflect the community’s collective needs.

**ACTIVITIES**

- Facilitate policy deliberations and consensus-building by managing the policy process from start to end for all community-driven policy-related projects (see Appendix A). This work includes:
  - Conducting research, drafting reports, tracking recommendations, preparing briefing papers and updating working drafts as policy work progresses.
  - Providing secretariat and administrative services such as meeting organization and record keeping.
  - Providing neutral advice on procedural and strategic approaches for successful consensus-building and effective policy outcomes.
  - Drafting briefing papers, conducting webinars and presentations, and producing other informational materials to inform community members and others about policy initiatives.
  - Managing community governance processes and relationships across multiple and diverse stakeholders globally.

- Manage Public Comment proceedings, a key mechanism for obtaining public feedback on all pending policy proposals before the ICANN Board considers and adopts them.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Policy Development and Advice, Cont’d.

ACTIVITIES, Cont’d.

- Support the management and oversight work performed by the various SO/AC councils and community leadership teams by providing process guidance, neutral advice, and briefings on the progress of all community-managed efforts.
- Support ICANN’s various community structures in their work to implement Cross Community Working Group on Enhancing ICANN Accountability Work Stream 2 recommendations.
- Improve effective organizational management and tracking of community activities, including milestones, work plans, and records by migrating and transitioning existing tools into ICANN org’s central Customer Relationship Management (CRM) platform.

△ Implement CRM to transition the following department functions in support of SOs and ACs:
  - Group enrollment and event management.
  - Membership management.
  - Council or advisory council management.
  - Project management and status reporting.
  - Initiative vs. activity management.
  - Engagement management.
  - Action requests for community support.
  - Business intelligence.
  - Centralize historical records.

△ Transition of SO and AC websites to the new platform and improve reporting and tracking using new features.

△ Improvements to Public Comment proceedings and (if funded) more effective data collection in support of PDPs.

△ Evaluate potential realignment of the Policy Development Support teams and functions to optimize policy development and advisory support services in response to outcomes of the Evolving ICANN’s Multistakeholder Model project.
HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- ICANN org reporting.
  - Membership tracking and reporting by community structures (including any diversity and other reporting as part of implementation of Work Stream 2).
  - Implement all Decisional Participants’ reviews of and amendments to internal processes to handle Empowered Community actions.
  - Implementation of recently-concluded Organizational Reviews and community charter review efforts.
  - Documenting and tracking improvements to Public Comment proceedings.
  - Progress on migration and transition to CRM platform.

- Metrics.
  - Number of active projects and recurring activities.
  - Extent of community deliberations measured by preparation, conference calls, webinars and meeting hours.
  - Milestone reporting by working groups and documenting of timelines.
  - Issuance of reports, resolutions, and other documented decisions.

- ICANN Public Meetings and report metrics.
  - ICANN Prep Week reports and statistics (including, where available, geographic distribution and SO/AC affiliation).
  - ICANN Public Meetings reports and statistics.
  - Annual ICANN Public Comment proceedings reports.
  - ICANN Public Meeting Policy Outlook and Policy Outcomes briefing papers.
 Policy Development and Advice, Cont’d.

RESOURCES

FY22–26: Resource requirements expected to increase.

△ There is a clear upward trend in the number and scope of policy initiatives across the ICANN community, as well as a continuing increase in the number of community members participating in these initiatives. Current strategic objectives and strategic goals further call for increased, diverse, and meaningful participation. Without deliberately capping the number of active policy efforts in concurrent operation, these trends will require a correlated increase in resources (e.g., personnel, travel, and professional services). Based on current trends and expected workload, it is anticipated that an additional three FTE policy specialists or managers will be required to adequately support the community work, in addition to two FTEs for SO and AC secretariat and community operations and one dedicated Project or Program Manager for the Policy Development Support team.

△ Professional services are a cost-effective, flexible way to supplement full-time personnel resource requirements and allow for organizational efficiencies in driving improvement efforts and should be considered along with additional hiring.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Community expectations for facilitation and other support from the Policy Development Support team must be balanced with robust discussions of costs and benefits. There is a connection between personnel levels and the ability to provide support to existing policy development work, especially given the potential launch of several new PDPs within this five-year timeframe.

• Generally, extended operations by the Policy Development Support function below the 35 FTE level run the risk of:
  – Lower levels of service to the community and regional disparities.
  – Delayed policy and advisory outputs.
  – Community frustration and loss of active participants.
  – Potential team member burnout.
Policy Development and Advice, Cont’d.

CONSIDERATIONS, Cont’d.

- Adequate funding for the Policy Development Support budget is important because it may signal to the community:
  - Prioritization of policy activities integral to ICANN’s Mission.
  - Emphasis of support for community operations central to ICANN governance processes.
  - Organizational support for efforts to ensure global, diverse volunteer participation that provides legitimacy to ICANN’s multistakeholder model.

- Need to ensure that the introduction of new technological tools as well as platform changes is orderly and well-planned, and that community training and transition needs are accounted for, particularly in view of the increased reliance on virtual meetings.

- Prioritization is challenging and tools are needed to engage in meaningful and effective prioritization.

- Lack of academic-quality policy research despite having qualified personnel, due to workload issues.

- Limited data collection to date means that data-driven policy work has been difficult and time consuming, and that decision-making is sometimes required without specific data or other factual evidence.

- Continued impact of COVID-19 could adversely impact the availability and engagement level of numerous stakeholders in ICANN policy processes.
Policy Research and Stakeholder Programs

PURPOSE

The Policy Research and Stakeholder Programs functional activity leads and supports implementation of key policies and cross-functional projects, provides research and thought leadership capabilities to support relevant organizational work, and leads and supports community-based work to develop and promote a multilingual Internet and secure user experience.

This function also includes ensuring cross-functional coordination and subject matter support for the Board’s and org’s activities around relevant recommendations and advice from the multistakeholder community.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Promote and sustain a competitive environment in the DNS.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Foster competition, consumer choice, and innovation in the Internet space by increasing awareness and encouraging readiness for UA, IDN implementation, and IPv6.

• Support the continued evolution of the Internet’s unique identifier systems with a new round of gTLDs that is responsibly funded, managed, risk-evaluated, and consistent with ICANN processes.

• Strengthen ICANN’s bottom-up multistakeholder decision-making process and ensure that work gets done and policies are developed in an effective and timely manner.

• Support and grow active, informed, and effective stakeholder participation.
Policy Research and Stakeholder Programs, Cont’d.

**ACTIVITIES**

- Supporting Board consideration of GNSO consensus policy recommendations. See Appendix A showing current and anticipated policy activities.

- Managing organizational activities around implementation of Board-approved GNSO consensus policy recommendations.

- Managing and performing policy reviews.

- Executing and supporting data, research and study requests from the stakeholder community.

- Providing subject matter support to internal and external stakeholder projects, including support during development of recommendations by Supporting Organizations and Advisory Committees.

- Managing implementation of relevant review team recommendations.

- Supporting the development of Root Zone Label Generation Rules (RZ-LGR) for multiple scripts.

- Supporting policy development and implementation work on Internationalized Domain Names (IDNs), including IDN variant top-level domains.

- Managing and supporting communications with technical and other stakeholders to promote UA readiness in applications.

- Developing and providing tools and training for technology developers to promote UA readiness.

- Provide support for Operational Design Phase prior to Board consideration of policy recommendations resulting from the multistakeholder process.
HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics and reports to track functional activities, as follows:

- Progress on implementation of Board-adopted policy recommendations is reported on a dedicated consensus policy implementation page. Milestones include draft policy language, terms and requirements, analysis of input received on implementation via Implementation Review Team feedback and public comment, and announcement of policy effective dates.
- Progress on implementation of relevant advice items is reported on a dedicated webpage which provides status of advice to the Board from Advisory Committees. Milestones include confirmation of understanding, exchanges and discussions with the relevant advisory committee, and closure of the advice item.
- Progress on development of Root Zone Label Generation Rules (RZ-LGR) is reported via public comment periods and integration of additional scripts into updated versions of the LGR. Milestones include submission of proposals from script generation panels, integration and release of new versions of the RZ-LGR to accommodate additional scripts.

For many of this function’s activities, the timing and milestones depend on factors such as community decisions and engagement and Board consideration and direction. The team communicates progress by direct engagement with the relevant SOs, ACs and other stakeholder groups, by sharing work plans and draft documents for community comment and consultation, by publication of blogs and announcements, and by webinars and public meeting sessions.

RESOURCES

FY22–26: Resources requirements expected to increase.

Increased resources will likely be needed to deliver this work, as major policy efforts move into implementation, operational readiness planning continues to support future gTLD applications and operations, activity increases in the IDN policy space and the need for UA coordination rises. Existing personnel will collaborate with other functions including:
Policy Research and Stakeholder Programs, Cont’d.

RESOURCES, Cont’d.

△ Support from multiple functions across ICANN org, including: Legal, Contractual Compliance, Multistakeholder Strategy and Strategic Initiatives, Communications, Office of the Chief Technology Officer, Policy Development Support, Global Stakeholder Engagement, and Operations.

△ Development and execution of data functions model may require procurement of specialized expertise.

△ Particular study and research requests may require procurement of professional services, e.g., consumer or registrant surveys, extension of statistical analysis of DNS abuse in gTLDs, or economic analysis.

CONSIDERATIONS

• A number of recommendations from the CCT and RDS Review Teams relate to this team’s areas of responsibility. Prioritization and resource allocation for these activities is subject to the forthcoming Planning process.

• A defined set of prerequisites and milestones to subsequent New gTLD Program rounds will need to be established.

• There may be insufficient resources to cover major implementation efforts such as work around registration data (EPDP Phase 1 and if approved, Phase 2) and a future application round in the New gTLD Program simultaneously.

• The work on implementation of IDN variant TLDs depends on the finalization of the respective policies by the GNSO and ccNSO. The ICANN Board has asked the SOs to develop a consistent set of policies for variant TLDs.

• Implementation of IDN Guidelines depends on the direction provided by GNSO and eventual approval by the ICANN Board.

• Progress on UA is based on influencing technology developers and policymakers and subject to external prioritization.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Contracted Parties Services Operations

PURPOSE
Contracted Parties Services Operations delivers and evolves defined, high quality, repeatable services and processes to applicants and contracted parties in a timely, consistent and predictable manner.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN's ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• New stakeholder services are defined, delivered, and effectively supported.

ACTIVITIES
• Process contracted party service requests.
• Manage contracted party contracts.
• Facilitate execution of contracted party agreements.
• Generate and execute contract amendments as a result of service requests.
• Process agreement terminations.
• Manage registrar application and evaluation process.
• Monitor conditions required by contracted party agreements and execute outbound communications to facilitate contracted party compliance with agreements.
• Manage procurement, negotiation, contracting, onboarding, and oversee accountability of vendors that provide contracted party capabilities and evaluation functions needed to process service requests.
• Develop business systems requirements and provide management functions for Operations platforms.
Contracted Parties Services Operations, Cont’d.

**ACTIVITIES, Cont’d.**

- Manage Action Request Register (ARR) functions for Correspondence and Advice to the Board.
- Deliver WHOIS ARS functions when and if unpaused.
- Support all New gTLD Program services and functions for remaining applicants of the 2012 round:
  - Application Processing (evaluation, objections, content resolution, application change requests, etc.).
  - Predelegation activities (predelegation testing, onboarding, and transition to delegation).
  - Vendor management of new gTLD services including service development and contract renewals.
  - Support initiatives and projects related to the New gTLD Program.
  - Support for ICANN org’s Legal team on New gTLD Program-related Accountability Mechanisms and litigation.

**HOW PROGRESS IS TRACKED**

ICANN org uses a combination of milestones, metrics and reports to track functional activities. The following milestones will be used over the five-year period for this functional activity:

- Service Level Targets will continue to be monitored and modified as per operational needs.
- Reporting of service delivery against Service Level Targets will continue.
- Transactional reporting of Service Level Targets.
- Monitor contracted party transactional survey responses.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Contracted Parties Services Operations, Cont’d.

RESOURCES

- Stable in FY22.
- Expansion expected in FY23, FY24, and FY25 to support Board-approved policy recommendations, including the New gTLD Subsequent Procedures Policy Development Process and Expedited Policy Development Process (EPDP) on the Temporary Specification for gTLD Registration Data.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Services defined by contracts and policies are varied, complex and difficult to automate. Critical thinking and human judgment are required to complete transactions.
- Global amendments offer an opportunity to reduce operational complexity, clarify language, and increase efficiency.
- Board action to initiate work on Subsequent Procedures for New gTLDs readiness will require resources from this group to be realigned to support readiness activities. The possibility exists that additional resources may be needed if this functional activity is designated for new responsibilities based on potential future Board-approved recommendations related to the Expedited Policy Development Process on the Temporary Specification for gTLD Registration Data (EPDP).
- Global Domains and Strategy Operations resources are in high demand both internally and outside the organization. Providing development opportunities and career growth to retain personnel is critical to successful ongoing operations.
- Tapping current personnel to fill positions related to implementation of Board-approved recommendations from the New gTLD Subsequent Procedures Policy Development Process will increase load on Human Resources to fill current positions so as not to negatively impact operational continuity.
- New gTLD Program 2012 Round support activities are currently projected to run through FY24. Changes to that timeline would impact resources and activities.
- Changes to service strategy and objectives could impact the service delivery approach in several key areas such as Registry Services Testing (RST) and data escrow.
- Accountability Mechanisms and litigation pertaining to the New gTLD Program typically require significant and unplanned support from the team and may require significant expenditure of resources to manage.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Technical Services

PURPOSE
The Technical Services functional activity provides technical knowledge and data regarding domain name space inside ICANN org, working to maintain the security and stability of the DNS.

OPERATING INITIATIVE CONTRIBUTION
Support: Promote and sustain a competitive environment in the Domain Name System.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.
- Consumer confidence in the evolving domain name marketplace remains strong, as measured by increasing domain name registrations and other indicators.

ACTIVITIES

- Manage systems such as the Service Level Agreement Monitoring (SLAM), Technical Compliance, Registration Reporting Interface (RRI), Technical Onboarding, Monitoring System Application Program Interface (MoSAPI), Zone File Access (ZFA), Bulk Registration Data Access (BRDA), Controlled Interruption (CI) monitoring and the Centralized Zone Data Service (CZDS). Coordinate and support ICANN initiatives, such as Registration Data Access Protocol (RDAP) implementation.
- Manage services such as the Emergency Back-end Registry Operation (EBERO) and Registry System Testing (RST).
- Develop and maintain technical specifications used by the contracted parties, such as data escrow, TMCH, RRI, MoSAPI.
- Engage with the technical community.
Technical Services, Cont’d.

HOW PROGRESS IS TRACKED

- Deliver new and updated systems.
- Update services as needed.
- Maintain up-to-date technical specifications.

RESOURCES

FY22–26: Resource requirements expected to increase marginally.

- Potential need for additional resources due to:
  - EPDP phase 2 implementation.
  - Operational readiness planning to support future gTLD applications and operation.

CONSIDERATIONS

- A potential increase of resources is needed when unbudgeted projects are assigned or delegated to the team.
Strategic Initiatives

PURPOSE
The Strategic Initiatives functional activity focuses on strategic initiatives and evolving issues that impact ICANN org’s remit and its stakeholders. It includes supporting work undertaken by the community such as the evolution of ICANN’s multistakeholder model, and coordination of ICANN org’s strategy as it relates to compliance with the European Union’s General Data Protection Regulation (GDPR). More broadly it coordinates cross-functional strategic efforts related to mitigating DNS abuse, New gTLD Subsequent Procedures, the operationalization of RDAP, UA and IDN-related topics, and ICANN’s Registrant Program.

OPERATING INITIATIVE CONTRIBUTIONS
• Support: Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking.
• Support: Promote and Sustain a Competitive Environment in the Domain Name System.
• Support: Promote the Universal Acceptance of Domain Names and Email Addresses.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Strengthen ICANN’s bottom-up multistakeholder decision-making process and ensure that work gets done and policies are developed in an effective and timely manner.
• Foster competition, consumer choice, and innovation in the Internet space by increasing awareness and encouraging readiness for UA, IDN implementation, and IPv6.
• ICANN engages in greater cooperation locally, regionally, and globally, with stakeholder groups and different policy and standards development bodies to raise awareness about UA, IDN implementation, and IPv6.
• UA readiness measurably increases.
• IDNs are increasingly adopted and treated in a standard fashion by software vendors.
• New gTLD awareness increases, as measured in surveys of Internet users.
Strategic Initiatives, Cont’d.

**ACTIVITIES**

- **Subsequent Procedures for New gTLDs:**
  - Support the preparation for and implementation of Board-adopted recommendations developed through the New gTLD Subsequent Procedures Policy Development Process.

- **Registrant program:**
  - Development of materials to educate registrants about their rights and responsibilities as well as their roles within the DNS.
  - Raise awareness about issues and challenges impacting registrants.
  - Ensure that registrants’ perspectives are represented in ICANN org’s work when implementing policies and services.

- **Registration Directory Services (RDS) and WHOIS:**
  - Cross-functional coordination as it relates to data protection/privacy issues, including RDS compliance with GDPR and other laws.
  - Continued engagement and activities related to the Expedited Policy Development Process on Temporary Specification for gTLD Registration Data Policy Phase 2 (EPDP Phase 2) recommendations.
  - Cross-functional coordination of various work streams related to the launch of RDAP services in the gTLD name space.

- **Cross-functional coordination and strategizing as it relates to other initiatives and program areas of strategic importance to ICANN, including mitigating DNS abuse, UA and IIDNs, RDS, and data protection/privacy issues.**
**POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT**

**Strategic Initiatives, Cont’d.**

**HOW PROGRESS IS TRACKED**

Standard project management tracking will ensure timely completion of deliverables and coordination among functions as they relate to strategic initiative support.

For New gTLD Subsequent Procedures:
- Provide support for implementation of policy recommendations resulting from the New gTLD Subsequent Procedures Policy Development Procedure.

For Registrant Program:
- Continue to produce content, including blogs, reports and other communications to inform registrants of their rights as domain name holders, and how they fit within the domain name ecosystem.

For Registration Directory Services:
- Provide support for implementation of policy recommendations resulting from EPDP Phase 2 on a System for Standardized Access/Disclosure.
- Coordinate ICANN org’s strategy and related activities across functions to ensure alignment with org’s goals related to ensuring RDS and access to non-public gTLD registration data meet with the requirements of data protection/privacy laws, including the GDPR.

**RESOURCES**

FY22–26: Resource requirements expected to increase, though this depends on the direction provided by Board-approved recommendations from the New gTLD Subsequent Procedures Policy Development Process and EPDP Phase 2.

**CONSIDERATIONS**

The following risks and considerations exist for this functional activity and may impact its advancement:

- Activities related to recommendations from the New gTLD Subsequent Procedures Policy Development Process and EPDP Phase 2 are expected to be a major effort during this period. Ongoing project planning will inform when additional resources are necessary to support required activities in this time period.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Constituent and Stakeholder Travel

PURPOSE
The purpose of the Constituent and Stakeholder Travel functional activity is to provide travel support for community members selected through appropriate processes and broaden participation in ICANN’s processes.

OPERATING INITIATIVE CONTRIBUTIONS
- Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
- Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
- Support: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
- Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.
- Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.
- Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

ACTIVITIES
- Provide travel support for community members selected through appropriate processes following Travel Support Guidelines.
- Update Travel Support Guidelines as needed and solicit public comment on updates.
Constituent and Stakeholder Travel, Cont’d.

HOW PROGRESS IS TRACKED
The following measures will be used over the five-year period for this functional activity:

- Publication of reports following each ICANN Public Meeting with details of travel support provided.

RESOURCES
FY22–26: Resource requirements expected to be stable.

The number, cost, and support of funded seats for SO and AC constituent travel is stable.

CONSIDERATIONS
The following risks and considerations exist for this functional activity and may impact its advancement:

- Allocating limited travel funding among ICANN community members requires prioritization.
- Advance planning is needed to ensure cost-effective pricing.
Community Engagement & Services

- Global Stakeholder Engagement
  - Regional Offices
- Public Responsibility Support
- Government and Intergovernmental Organization Engagement
- GDD Accounts and Services
- Consumer Safeguards
- Global Communications and Language Services
- Global Meetings Operations
- Ombudsman
COMMUNITY ENGAGEMENT & SERVICES

Global Stakeholder Engagement

PURPOSE
ICANN org’s Global Stakeholder Engagement (GSE) team leads engagement and outreach around the world with stakeholders about ICANN and its Mission. Through local coverage in eight GSE regions, the team is a point of contact for ICANN org and the ICANN community. Its purpose is:

• Raising awareness and understanding of ICANN’s role and remit.
• Encouraging participation in ICANN policy development and technical activities.
• Enhancing ICANN org’s operating model across all regional offices and ensuring alignment of regional engagement efforts with ICANN org strategic and operational priorities.

OPERATING INITIATIVE CONTRIBUTIONS
As GSE’s role is to lead engagement and outreach for ICANN org, it provides direct and indirect support to many of the operating initiatives which have outreach components that contribute to success.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of GSE function, all strategic goals’ targeted outcomes are supported directly or indirectly.
COMMUNITY ENGAGEMENT & SERVICES

Global Stakeholder Engagement, Cont’d.

ACTIVITIES

- Ongoing cross-functional regional engagement related to technical and policy work, participation in relevant national and regional discussions, and delivery of regional engagement strategies, with consideration given to the impact of the COVID-19 pandemic on travel and in-person gatherings.

- Capacity development to increase understanding of ICANN’s Mission and to diversify participation in ICANN’s core activities.

- Engagement measurement, planning, and administration.

- Support cross-organizational collaboration for legislative tracking, government engagement, operational and strategic planning, and other functions.

- Ongoing implementation of engagement activities related to Specific and Organizational Reviews’ implementation, community work on New gTLD Subsequent Procedures Policy Development Process recommendations. For example, we expect there to be more outreach and awareness-raising activities related to Board-approved recommendations for the subsequent round of new gTLDs.

- Support of other ICANN org team initiatives at a regional level, including OCTO, Government Engagement, and GDD Accounts and Services.

- GSE participates in internal subject matter expert teams on the implementation of the various Organizational and Specific Reviews.

△ GSE will evaluate the regional events ICANN org currently supports to determine effectiveness and modify if needed.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following milestones and metrics will be used over the five-year period for GSE:

- Update and alignment of regional engagement strategies with the Strategic Plan.

- Data on ICANN’s geographical presence and services to regional stakeholders.

- Number of capacity development and training events and analysis of community feedback.
Global Stakeholder Engagement, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

• Incorporation of stakeholder journeys data into ICANN org Open Data Initiative.
• Metrics related to cross-functional work on DNS ecosystem security, DNSSEC deployment, UA and IDNs, and ICANN Managed Root Server instances.
• Engagement reporting for Competition, Consumer Trust, and Consumer Choice (CCT) Review and Registration Directory Service (RDS-WHOIS2) Review Team recommendations implementation.
• Support of community prioritization effort at regional level to participate in Public Comment periods.
• DNSSEC statistics from regional trainings and local adoption levels by top-level domains, Internet service providers, and others.

RESOURCES

FY22–26: Resource requirements expected to increase.

△ Increased funding needed for the GSE team to support the demand for: engagement stemming from operating initiatives; implementation of Organizational Review recommendations; a potential next round of new gTLDs; and regional capacity development requests.

△ Regional ICANN Forums or meetings conducted in collaboration with GDS and OCTO to raise awareness of ecosystem security issues, technical Internet governance, DNS business issues, and policy development.

△ Additional resources are needed for legislative tracking in certain countries in Asia. GSE anticipates working closely with Government Engagement to share costs for monitoring developments that may impact ICANN org.

△ GSE also assumes that travel costs will increase as in-person gatherings resume from historically low levels due to the pandemic. Community demand for support with regional events is likely to continue to increase.
Global Stakeholder Engagement, Cont’d.

CONSIDERATIONS

The following considerations exist for the GSE team, some of which may pose risks:

• GSE anticipates continued close integration on engagement activities with the GDS, OCTO, and Government Engagement functions. Cross-organizational collaboration has improved significantly since the last Operating Plan was published.

• Improvements in collaboration were made in FY21 with the Managing Directors network for the regional offices. Some shifting of personnel with new VPs in Europe, North America and a new Managing Director of the Middle East and Africa regional office in Istanbul have provided opportunities for growth. Continued attention to personnel retention, development, and performance is important during this period.

• The organizational priority on legislative tracking continues to require resources and engagement.

• The community prioritization effort may identify the need to recruit new stakeholders, which will involve the GSE team to target new active participants.

• Work continues on full deployment of software tools through the ICANN CRM to enable cross-functional collaboration, request management, and performance tracking.

• Uncertainty remains on the resumption of in-person engagement and global travel due to the COVID-19 pandemic. While some regional and in-country travel may return before others, the pandemic has likely resulted in long-term changes to face-to-face engagement that will need to be considered. This may impact the ability for newcomers to participate in ICANN technical and policy work and may impact the volunteers in the ICANN community.
Regional Offices

ICANN has regional offices in Brussels, Belgium; Istanbul, Turkey; Montevideo, Uruguay, and Singapore. ICANN has engagement centers in Nairobi, Washington DC and Beijing.

PURPOSE

The primary purpose of the regional offices is stakeholder engagement. Besides bringing ICANN’s functions closer to stakeholders, the offices facilitate the functions housed in the region to achieve the goals set out in the Strategic Plan.

OPERATING INITIATIVE CONTRIBUTIONS

As each regional office leads stakeholder engagement in its region and collaborates with other ICANN functions at a regional level, each regional office directly or indirectly supports all operating initiatives.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

Effective regional stakeholder engagement underpins the success of many of targeted outcomes in the Strategic Plan and reflects the regional offices’ ongoing collaboration with other ICANN functions.

ACTIVITIES

ICANN’s regional offices work with the community to help them obtain the support and services they need from ICANN org. Each office provides a broad range of localized services to the community. The regional offices are often a first point of contact for stakeholders in the area, and serve as the regional interface for ICANN org.
Regional Offices, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. Key measures for the regional offices in the five-year period are:

- Facilitate collaboration to achieve identified cross-functional goals based on the Strategic Plan. The success of this collaboration will be tracked against the goals and targeted outcomes of agreed-upon goals.
- Collaborate to address engagement gaps, develop an engagement gaps matrix, and incorporate into an org-wide platform.
- Evaluate options for Singapore office expansion or relocation prior to current lease expiration on 30 September 2021.

RESOURCES

Brussels: Resources are expected to increase.

△ Personnel increase to support increased engagement around technical and legislative issues and new initiatives such as the possible next round of new gTLDs.
△ Support for community and engagement meetings.

Istanbul: Resources are expected to remain stable.

△ One new team member in the Africa region by FY23/24, supported by the Istanbul regional office.
△ Upgrade audio-visual equipment in support of community and engagement meetings (covered by Engineering and IT).
△ Allocation of adequate resources for MEA/Istanbul-based personnel to support ICANN org engagement activities in the region.
COMMUNITY ENGAGEMENT & SERVICES

Regional Offices, Cont’d.

RESOURCES, Cont’d.

Montevideo: Resources are expected to increase.
△ Increase funding for regional personnel to attend annual capacity development week and office-wide meetings.
△ Add administrative support in FY22.
△ Add contracted parties account manager in FY24.
△ Add Contractual Compliance personnel member in region in FY25.

Singapore: Resources are expected to increase.
△ Increased budget to expand space or relocate. Extra space to be used for hosting community meetings and workshops.
△ Support for community and engagement meetings.

CONSIDERATIONS

The following risks and considerations exist for the success of the regional offices and may impact their progression:

• Work depends on other functions which may have other priorities.
• Functional teams should have region-specific plans and goals in place.
• Use of a CRM platform to better coordinate regional requests and assign resources.
• Allocation of adequate budget for GSE personnel and regional support.
• Willingness of the community to use the regional offices for ICANN-supported face-to-face meetings.
• The Istanbul office may need to be expanded if the demand for larger face-to-face meetings in that region increases.
COMMUNITY ENGAGEMENT & SERVICES

Public Responsibility Support

PURPOSE

The Public Responsibility Support (PRS) team provides the community with the necessary support and tools to carry out public responsibility activities that support ICANN’s Mission. Increasing diversity and lowering barriers to participation at ICANN is central to these efforts.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Implement New gTLD auction proceeds recommendations as approved by Board.
• Support: Facilitate DNS ecosystem improvements.
• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
• Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
• Support: Through targeted engagement improve governmental and intergovernmental organization (IGO) engagement and participation in ICANN.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN, in collaboration with relevant hardware, software, and service vendors, enhances knowledge about DNS safety and security.
• Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.
• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.
• The knowledge and skill levels across the stakeholder community and organization increase, demonstrated by community members and personnel equipped with basic knowledge of the DNS as well as ICANN policy and advisory processes.
Public Responsibility Support, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

- Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.
- ICANN Board and org continue enhancing transparency initiatives and upholding accountability.
- Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.
- ICANN prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.

ACTIVITIES

- **Research and expertise:** Support for public responsibility initiatives within ICANN’s remit in the areas of diversity, human rights, anti-harassment, public interest, and continue to support preparation for implementation of Board-adopted recommendations from the New gTLD Auction Proceeds CCWG.
- **Diversity programs:** PRS is developing online curricula and virtual programming for the Fellowship Program, NextGen@ICANN, and Newcomer Day during ICANN Public Meetings.
- **Capacity-development initiatives:** ICANN Learn, Leadership Program, Chairing Skills Program, and the ICANN History Project. New online curricula and virtual programming are in development for the Chairing Skills Program.
- **Human rights initiatives:** PRS has assumed responsibility for these activities from Multistakeholder Strategy & Strategic Initiatives. This work includes facilitating support to other departments as they carry out the implementation of recommendations in ICANN’s Human Rights Impact Assessment. This work may include developing a framework or statement of intent, further assessments, surveys, trainings and/or research projects.

△ Establish ICANN Learn as the main capacity-development tool across ICANN, featuring a robust catalogue of technical and skill building courses.

△ Improve linkages between newcomers and individuals and groups who perform policy development and advice work.

△ Establish a more data-driven approach to diversity issues, program management, and evaluation.
COMMUNITY ENGAGEMENT & SERVICES

Public Responsibility Support, Cont’d.

ACTIVITIES, Cont’d.

△ Evaluate and improve PRS programs on a rolling basis; conduct community consultation for the Fellowship Program in FY23 and for NextGen@ICANN in FY25.
△ Phase out ICANN History Project work beginning in FY21 and reduce to minimal maintenance levels in FY25.
△ Evaluate new engagement opportunities for Fellows and NextGen alumni such as mentorship activities and resources and periodic meetups.
△ Facilitate support for ICANN Human Rights initiatives.
△ In conjunction with the Leadership Program and following community requests, PRS will facilitate a community-led Intercultural Awareness Program training session aimed at raising community awareness and understanding of cultural norms and best practices across regions.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

• Research and expertise:
  – A diversity dashboard will be implemented during this five-year planning cycle.
  – A procedural Public Interest Framework developed by FY25.
  – New gTLD Auction Proceeds CCWG: Continue to support coordination efforts leading up to Board approval of recommendations.
• Diversity programs: Fellowship Program, NextGen@ICANN, Newcomer Day at ICANN Meetings, the Newcomer Portal on icann.org, and the ICANN Community Childcare Grants Pilot.
  – ICANN Community Childcare Grants Pilot will be evaluated in FY21 to determine whether the program will continue as a recurring activity.
  – Evaluations of diversity programs will start five years after the previous review (Fellowship in FY23 and NextGen@ICANN in FY25).
  – Fellowship and NextGen@ICANN:
    ▪ Number of participants by region and sector.
    ▪ Number of pen holders on policy reports and documents.
    ▪ Number of mailing list contributors.
    ▪ Number of public comment contributors.
    ▪ Number of alumni in leadership positions.
Public Responsibility Support, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

- Capacity-development initiatives:
  - Other capacity development delivery will be evaluated and improved on a rolling basis.
  - Phasing out ICANN History Project work will begin in FY21 and reduced to minimal maintenance levels in FY25.
  - Online Learn (ICANN Learn):
    - Number of active users.
    - Number of new courses.
    - Number of multilingual courses.

RESOURCES

FY22–26: Resource requirements expected to increase.

- PRS resources will remain at FY22 levels (adjusted annually for inflation).

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Work depends on clear community and organizational public responsibility priorities and cross-functional collaboration.

- Reputational risk may arise from failure to provide sufficient transparency and ability to demonstrate impact and return on investment of programs. This includes failure to support educated and informed stakeholders and a perceived lack of diversity in PRS programs.

- Continued improvement to PRS operations is needed, increasing transparency and responsiveness to the community.

- ICANN Learn should be leveraged to improve scalability of capacity-development efforts.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement

PURPOSE

ICANN org’s Government and Intergovernmental Organization (IGO) Engagement team is responsible for outreach and engagement with national and regional governments and intergovernmental organizations to protect the remit and mandate of ICANN.

The team acts as a central point of contact to help government entities understand technology and its role in the problems they are seeking to solve. The team’s goal in engagement is to provide information to make governments aware of or mitigate the sometimes unintended consequences of government action on areas within ICANN’s remit or impacting policies developed through ICANN’s multistakeholder processes. The team specifically provides information about the global Domain Name System.

The Government and IGO Engagement team works with the Governmental Advisory Committee (GAC) as the constituency that is the home of governments and IGOs within ICANN. The team also represents the Mission of ICANN with government ministries and IGOs.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.
• Lead: Through targeted engagement improve governmental and intergovernmental organization (IGO) engagement and participation in ICANN.
• Lead: Monitor legislation, regulation, norms, principles, and initiatives that may impact the ICANN Mission in collaboration with others.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN is engaged, its role acknowledged, and its presence valued in the arenas where topics within its remit are discussed.
• ICANN plays an important role in raising awareness among legislators, regulators, and stakeholders about its Mission and the effect of various regulatory and other proposals on the Internet ecosystem.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• ICANN effectively convenes and facilitates discussions with relevant parties to help address relevant global challenges and opportunities.

• ICANN org continues to develop and mature systems to detect and monitor legislative initiatives and other governmental or intergovernmental actions or initiatives that could impact ICANN’s Mission or operations.

• ICANN org proactively engages with the community to develop common awareness of ICANN’s contribution to early warning systems.

• The inherent security of the DNS and unique identifiers system measurably increases, due to higher adoption of global open Internet standards and greater awareness of security threats among stakeholders.

• The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

• Decision-making processes ensure that input from all stakeholders is considered.

• Widespread understanding of the ICANN multistakeholder model is established through increased communication with relevant governmental organizations and institutions.

• ICANN fosters successful and mutually beneficial relationships with local, regional, and global partners to ensure knowledge building about ICANN and its Mission continues.

ACTIVITIES

• Assessment of risks to ICANN org due to legislative or regulatory activity or through global action by IGOs.

• Facilitation of global, regional and national government engagement strategies reflecting geopolitical changes and reflecting the changes in the Strategic Plan.

• Ongoing cross-functional regional engagement related to technical and policy work, participation in relevant national and regional discussions.

• Capacity development.

• Support cross-organizational collaboration for legislative tracking, government engagement, operational and strategic planning, and other functions.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement, Cont’d.

ACTIVITIES, Cont’d.

• Review and revision of the global government and IGO engagement strategies to align with the Strategic Plan, which expands the number of strategic objectives with engagement elements.

△ The team will update demand-driven government capacity development activities against the Strategic Plan, and ensure these activities align with the new Strategic Objectives for ICANN org.

△ The team will evaluate the government engagement events ICANN org currently supports to determine effectiveness and modify engagement strategy as needed.

△ The team will develop and implement an annual engagement plan for the Global Internet Governance Forum, to coordinate ICANN activities and maximize involvement through speaking engagements, workshops, the Open Forum, social media, booth and flash sessions. The Hybrid Global IGF four-day event is planned for December 2021. In addition, the engagement plan will work with the local host and the IGF Secretariat on opportunities for intersessional engagement with parliamentarians about technical Internet Governance and ICANN’s role managing the unique identifier system. Each year’s engagement is a basis for the following year’s work and uses the IGF Secretariat report, the community questions and feedback through the IGF portal, views and attendance participation information and feedback from presenters to assess and plan for the following year’s work.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

• Delivery of the postponed FY21 High-Level Governmental meeting may occur in FY22 as a virtual or in-person event in conjunction with ICANN71, depending on pandemic safety protocols and discussions with the Governmental Advisory Committee. If so, then subsequent High-Level Governmental meetings could potentially occur in FY24 and FY26.

• Reports and statistics on participation in outreach, technical briefings and capacity development sessions for the GAC and through collaboration with other organizations in the ecosystem.

• Comparison of surveys conducted before and after capacity development event surveys to measure information learned and delivery of information against expectations.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement, Cont’d.

• Completed review of existing Memoranda of Understanding (MoUs) for continuing alignment with goals.
• Metrics related to the number of countries and intergovernmental organizations represented in the GAC and the number of countries and IGOs actively participating in GAC and ICANN policy processes.

RESOURCES

FY22–26: Increased resources will be needed to address:

△ Growth in risks to ICANN org through intended and, more frequently, unintended consequences of the legislative and regulatory actions of governments and intergovernmental organizations.

△ Growth in risks to the single, stable global Internet through new technologies, lack of government understanding of those technologies, or political initiatives to address challenges governments believe are posed by those technologies.

△ Stakeholder demand for engagement and capacity development through the GAC’s Underserved Regions Working Group and Public Safety Working Group.

△ Increased regional capacity-building workshops, technical briefings, and training to fulfill collaboration with other organizations within the Internet ecosystem.

△ Increased activity in the cybersecurity areas reflecting growing governmental concerns and proactive and preemptive behavior to address or exploit possible vulnerabilities in the critical Internet infrastructure.

△ Increased need for professional service contracts to cover specialized events and information gathering.

△ Increased participation in arenas that ICANN has not previously engaged as the locus of political action that can impact ICANN shifts.
Government and Intergovernmental Organization Engagement, Cont’d.

- Personnel changes in FY21 reallocated the team’s nine personnel positions more evenly among the cities of Brussels, Geneva, Los Angeles, and New York, instead of primarily centered in Geneva. Moving forward, the Government and IGO Engagement team anticipates that the number of personnel in Geneva will decrease from two to one. These changes reflect a shift in location of activities and IGO dialogues that have the greatest likelihood to impact ICANN and its Mission.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Changes in the assessment of risk environment.

• Change in functional resources and team allocation. Given limited resources and pressure on ICANN org budget, there will need to be ongoing increasing collaboration with GSE, OCTO, Communications, and other community-facing functions in ICANN org.
COMMUNITY ENGAGEMENT & SERVICES

GDD Accounts and Services

PURPOSE

The GDD Accounts and Services functional activity is responsible for the effective implementation of GNSO Consensus Policy and contract-related services. Its team builds and maintains relationships with the ICANN-accredited registrars, gTLD registries, and their respective stakeholder groups.

OPERATING INITIATIVE CONTRIBUTIONS

- **Lead:** Formalize the ICANN org funding model and improve understanding of the long-term drivers of the domain name marketplace.
- **Support:** Promote and sustain a competitive environment in the Domain Name System.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Enhanced engagement with contracted parties creates more robust industry relationships, dynamic participation, and improved responsiveness to emerging technologies.
- ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.
- ICANN continues to provide a trusted forum that effectively convenes relevant parties for discussions on the security, stability, evolution, and interoperability of the DNS.
- ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.
- Evolution to five-year rolling financial planning allows ICANN to appropriately address changes that impact ICANN’s budget, operating and financial plan, or Strategic Plan.
- ICANN has reliable and predictable five-year funding projections, based on a sound understanding of the evolution in the domain name marketplace and realistic assumptions.
- ICANN utilizes data about the directions and trends in the market to effectively guide the organization.
COMMUNITY ENGAGEMENT & SERVICES

GDD Accounts and Services, Cont’d.

ACTIVITIES

• Continue to build and maintain relationships with ICANN’s contracted parties.
• Collect and contextualize market intelligence about the domain name industry ecosystem.
• Implement GNSO policy recommendations after adoption by the ICANN Board.
• Implement and enhance services for the contracted parties.
• Develop the annual and five-year funding forecast and funding assumptions.
• Support the contracted parties transition to the Registration Data Access Protocol (RDAP)-based technology platform for registration data directory services as called for in amendments to the Base gTLD Registry Agreement and Registrar Accreditation Agreement.
• Coordinates ICANN’s efforts, to conduct research, provide tools, factual information and education for the ICANN community regarding DNS Security Threats and DNS Abuse.
• Collaborate and coordinate with industry actors toward reducing DNS security threats (botnets, malware, pharming, phishing, and spam when used as vectors).
• Work with the community to identify gaps in addressing DNS security threats within ICANN’s remit and means to reduce DNS security threats.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

• Production of funding forecast and forecast assumptions for quarterly and annual budgeting processes.
• Implementation of adopted consensus policies.
• Periodic Survey of contracted parties.
GDD Accounts and Services, Cont’d.

RESOURCES

FY22–26: Resource requirements expected to increase.

Personnel levels may increase to provide account management support to a larger base of registries and registrars as more are added through subsequent rounds of new gTLDs. The team has also added responsibility to lead ICANN org’s coordinated efforts related to mitigating DNS security threats and combating DNS abuse. Additionally, the increased level of focus and priority applied to the funding forecasting requires an additional level of effort for market analysis and improved financial models.

CONSIDERATIONS

• The transition from WHOIS to RDAP depends on completion of amendments to gTLD Base Registry Agreement, and 2013 Registrar Accreditation Agreement, expected in early FY22.

• Implementation of approved GNSO Council-developed Policy Recommendations partially depends on volunteer-based Implementation Review Team (IRTs).
COMMUNITY ENGAGEMENT & SERVICES

Consumer Safeguards

PURPOSE
ICANN org’s Consumer Safeguards team facilitates community-wide discussions to identify:
• Existing safeguards within ICANN’s remit.
• Potential means to address safeguard gaps.
The functional activity also contributes to org assessments of local and regional regulations that may impact the DNS, as well as community and broader public engagement.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• ICANN effectively convenes and facilitates discussions with relevant parties to help address relevant global challenges and opportunities.

ACTIVITIES
• Facilitate community-wide sessions during ICANN Public Meetings and in regional venues to discuss safeguard and DNS abuse topics.
• Engage with the public and community members on legal and regulatory efforts that may impact the DNS.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:
• Number of facilitated community discussions.
• Issue papers.
COMMUNITY ENGAGEMENT & SERVICES

Consumer Safeguards, Cont’d.

RESOURCES
FY22–26: Resource requirements expected to be stable.

CONSIDERATIONS
The following consideration exists for this initiative and may impact its advancement:

• Level of community interest and engagement may not be constant. There may be pressure on the Consumer Safeguards director to go beyond the facilitator role to advocate in favor of a particular position or positions.
COMMUNITY ENGAGEMENT & SERVICES

Global Communications and Language Services

PURPOSE

The primary purpose of ICANN org’s Global Communications and Language Services function is to ensure that ICANN is represented accurately and consistently in all forms of communication. This is accomplished in several ways:

• Demonstrate successes, knowledge, and thought leadership through compelling, clear, and consistent positioning.
• Continue to grow, globalize, and diversify communications efforts and channels for geographic and target-audience reach.
• Expand to and engage with new audiences by reaching outside of traditional forums.
• Leverage media and industry contacts to amplify key messages.
• Increase external understanding of and increase participation in ICANN’s policy development process and multistakeholder model.
• Explain the role of the IANA functions and ICANN’s technical remit.
• Educate internal audiences and support personnel activities.
• Facilitate access to ICANN by providing translations, interpretation, and transcription services in the six UN languages for ICANN Public Meetings and other events.

The secondary purpose is to provide communication tools to personnel and community to advance their work.

OPERATING INITIATIVE CONTRIBUTIONS

• Support: Facilitate DNS ecosystem improvements.
• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
• Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
COMMUNITY ENGAGEMENT & SERVICES

Global Communications and Language Services, Cont’d.

OPERATING INITIATIVE CONTRIBUTIONS, Cont’d.

• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.
• Support: Through targeted engagement improve governmental and intergovernmental organization (IGO) engagement and participation in ICANN.
• Support: Monitor legislation, regulation, norms, principles, and initiatives in collaboration with others that may impact the ICANN Mission.
• Support: Implement new gTLD auction proceeds recommendations as approved by the Board.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN maintains a reputation as a source of unbiased, reliable, and factual information on DNS health.
• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed upon global public interest.
• Widespread understanding of the ICANN multistakeholder model is established through increased communication with relevant organizations and institutions.
• ICANN engages in greater cooperation locally, regionally, and globally, with stakeholder groups and different policy and standards development bodies to raise awareness about Universal Acceptance, IDN implementation, and IPv6.
• Universal Acceptance readiness measurably increases.
• IDNs are increasingly adopted and treated in a standard fashion by software vendors.
• New gTLD awareness increases, as measured in surveys of Internet users.
• ICANN promotes and supports awareness of the IANA functions, including among stakeholders, to successfully maintain the broad array of Internet unique identifiers and deliver effective DNS root zone operations.
GLOBAL COMMUNICATIONS AND LANGUAGE SERVICES

ACTIVITIES

- To ensure professional, consistent messaging that properly positions ICANN in the community, and the org, and through media and other sources. This team is responsible for brand and usage standards, website content, social media, graphic design, writing, proofing, and editing.

- Following the roll-out of the Information Transparency Initiative (ITI), the team will continue the development and implementation of the Information Transparency Platform (ITP).

- The Global Communications function supports capacity-building efforts in the regional offices through public relations, media facilitation, and communication strategy.

- This function is part of the strategic communications planning and implementation (drafting, editing, content review, and scorecard development) for many of the functions within ICANN org, as well as Internal Communications, editing, writing, and communications planning support for internal functions such as Engineering and IT, Finance, and HR.

△ In FY22–26, Global Communications anticipates adding writers and a graphic designer to the team pending an evaluation of how to best structure the resources to better support each function.

△ Several sets of community recommendations are now moving to Board consideration, and, upon approval, eventual implementation. The recommendations that will require strategic communications planning and content support include those from the New gTLD Subsequent Procedures Working Group, Expedited Policy Development Process (EPDP) on Temporary Specification for gTLD Registration Policy Phase 2, and the Cross-Community Working Group on new gTLD Auction Proceeds (CCWG-AP).

△ Since development of the FY21–25 plan, Global Communications has taken on ownership of the Open Data Program. This will include development of a roadmap for the program and managing progress of the program.
COMMUNITY ENGAGEMENT & SERVICES

Global Communications and Language Services, Cont’d.

HOW PROGRESS IS TRACKED

The Global Communications team will utilize tools, such as social listening tools, media monitoring, and Google analytics to track content likes, retweets, shares, etc.

RESOURCES

FY22–26: Resource requirements expected to increase, as the team has requested the addition of two personnel to increase capacity.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Overall, unclear or inconsistent communications and messaging to stakeholders can negatively impact ICANN’s reputation or put ICANN at legal risk.

- Advance notice of special projects or initiatives that will require communications support is key to ensuring that resources are available to provide assistance. Other functions are strongly encouraged to involve the team as early as possible.

- Promoting a shared understanding of key and current issues requires that personnel throughout ICANN org work with the Global Communications team to access accurate and consistent information on topics of interest.

- Translated materials, which are costly to produce, are not well used in some of the languages.
COMMUNITY ENGAGEMENT & SERVICES

Global Meetings Operations

PURPOSE

Global Meetings Operations supports face-to-face and virtual meetings hosted by ICANN globally. For face-to-face meetings, the team ensures that the selected cities, venues, meeting facilities, and services provide an environment conducive to an effective meeting. They work in close collaboration with the community to establish the meeting schedule and provide travel support for funded travelers and personnel.

For virtual meetings, the team works with the community and the org to establish the schedule and ensure effective participation strategy in the online environment.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.
- Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

ACTIVITIES

The team provides extensive pre-planning and on-site and/or virtual support to:

- Three ICANN Public Meetings a year.
- Three Board Retreats a year.
- Community face-to-face and virtual meetings, the number of which varies from year to year.
Global Meetings Operations, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.
- Continued efforts of the ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.
- Meetings team: Number of meetings supported.
- Travel Support: Number of travelers supported.

RESOURCES

FY22–26: Resource requirements expected to increase.

△ As face-to-face and virtual meeting demand continues to increase and consume available resources, our ability to complete work in a timely manner is increasing direct and indirect costs due to reduced lead times. The team anticipates additional resources in FY22–26.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- There is a need to define the purpose of ICANN Public Meetings and work toward internal alignment within ICANN org.
- ICANN org is seeing an upward trend in the number of face-to-face and virtual meetings, even with flat funding.
- ICANN org has confirmed locations through March 2023 and is in the process of finalizing contracting for some meeting venues. Changes to the number or type of meetings could incur cancellation penalties.
- The COVID-19 pandemic-related disruption is likely to affect the format and cost of meetings conducted face-to-face or virtually in FY22.
COMMUNITY ENGAGEMENT & SERVICES

Ombudsman

PURPOSE

The Office of the Ombudsman is a neutral dispute resolution practitioner for the ICANN community. The principal function of the Ombudsman shall be to provide an independent internal evaluation of complaints by members of the ICANN community who believe that the ICANN org, Board, or an ICANN constituent body has treated them unfairly. The Ombudsman serves as an objective advocate for fairness, and seeks to evaluate and resolve complaints about unfair or inappropriate treatment by ICANN org personnel, the Board, or ICANN constituent bodies, clarifying the issues and using conflict resolution tools such as negotiation, facilitation, and “shuttle diplomacy” to achieve these results.

The Ombudsman also has a formal role in conducting a substantive review of Reconsideration Requests. However, the Ombudsman recuses the office from such a review if the office has been previously involved in the subject matter of the Reconsideration Request.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Continued efforts of ICANN Board, community, and org to facilitate the inclusion and participation of all stakeholders.
- ICANN community enhances their transparency practices to increase cross-community accountability and trust.
Ombudsman, Cont’d.

ACTIVITIES

The primary role of the Ombudsman includes:

• Complaint management.

△ Raise awareness of expected standards of behavior and anti-harassment policies within the community, Board, and org. There is currently some awareness but plans over the next five years would increase visibility and activity.

△ Substantive evaluation of Requests for Reconsideration under ICANN Bylaw 4.2.1.

• Ongoing education to empower leadership in community via ICANN Learn and providing training for community leaders to empower and educate on conflict resolution.

• Implementation of recommendations related to the Ombudsman from the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2.

HOW PROGRESS IS TRACKED

ICANN Bylaws require the Office of the Ombudsman to produce an annual report with consolidated analysis of the year’s complaints and resolutions, documentation of adherence to confidentiality obligations and concerns, as well as recommendations for steps to minimize future complaints.

RESOURCES

FY22–26: Resource requirements expected to be stable.

The number of Reconsideration Requests affects resources required. The Ombudsman collaborates with several teams within the org including: Communications, Public Responsibility Support, Legal, Meetings, as well as the Board and the community.

CONSIDERATIONS

Work Stream 2 of the Cross-Community Working Group on Enhancing ICANN Accountability issued recommendations that have been accepted by the Board, relating to the Office of the Ombudsman. This portion of the plan will be updated as the planning work continues.
Functional Activities
FY22–26

ICANN Org Governance

- Board Activities
- Office of the President and CEO
- Governance Support
- Nominating Committee Support
- Complaints Office
- Planning
- Review Support and Implementation
ICANN ORG GOVERNANCE

Board Activities

PURPOSE

The Board Activities functional activity represents the work and responsibilities of the ICANN Board of Directors. Among its duties, the ICANN Board:

• Ensures that ICANN remains at all times true to its Mission, Vision, commitments and core values.

• Oversees ICANN org’s performance to ensure it operates with efficiency and effectiveness, in a fiscally responsible and accountable manner and, where practicable and not inconsistent with ICANN’s other obligations under the Bylaws, in a manner that is responsive to the needs of the global Internet community.

• Oversees development and periodic revisions of the Strategic Plan and Operating Plan.

• Ensures that ICANN operates pursuant to the highest ethical standards, complies with applicable laws, and considers adherence to best practices in all areas of operation.

• Ensures all policy development and decision-making processes are transparent, open, reflective of the public interest, and accountable to all stakeholders.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. The Board supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• The ICANN Board aligns its core FY22–26 activities with the FY21–25 Strategic Plan. At a high level the ICANN Board focuses on the following aims:
  – Strengthening the security of the DNS and the DNS Root Server System.
  – Improving the effectiveness of ICANN’s multistakeholder model of governance.
  – Evolving the unique identifier systems in coordination and collaboration with relevant parties to continue to serve the needs of the global Internet user base.
  – Addressing geopolitical issues impacting ICANN’s Mission to ensure a single and globally interoperable Internet.
  – Ensuring ICANN’s long-term financial sustainability.
ICANN ORG GOVERNANCE

Board Activities, Cont’d.

ACTIVITIES

• Board Committees form a fundamental part of Board activities. Committees allow a smaller group of Board members to work together when a more focused approach is needed. The list of Committees as well as their charters defining the scope of their duties and activities can be found here: https://www.icann.org/resources/pages/board-committees-2018-04-13-en.

• When necessary, the Board may also establish working groups or caucuses that are focused on a specific topic or issue.

• Board members focus on serving the global public interest.

• Board members participate in external events in order to develop effective relationships across the global Internet ecosystem. The Board advocates ICANN’s Mission and its multistakeholder model of governance within the Internet governance ecosystem.

HOW PROGRESS IS TRACKED

The ICANN Board fulfills its objectives and outcomes by directing the President and CEO to implement the Board’s decisions. The following measures will be used over the five-year period:

• Outcomes:
  – Successful implementation of the Strategic Plan and the Operating and Financial Plan.
  – Implementation of the work plan to improve the effectiveness of ICANN’s multistakeholder model.
  – Strengthen DNS and DNS Root Server System security.
  – Evolution of unique identifier systems.
  – ICANN’s long-term financial sustainability.

• Performance metrics:
  – Timely revision of the Strategic Plan and the Operating and Financial Plan.
  – Amount of funds transferred into the Reserve Fund, per Board resolution for replenishment.
  – Number of geopolitical issues impacting ICANN’s Mission identified on time and successfully addressed.
ICANN ORG GOVERNANCE

Board Activities, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

- Number of additional stakeholders join ICANN globally.
- Number of effective relationships with key actors in the global Internet ecosystem established.

RESOURCES

FY22–26: Resource requirements expected to be stable. This may change as community recommendations related to new gTLD auction proceeds and subsequent rounds of new gTLDs move to the Board for consideration and eventual implementation.

CONSIDERATIONS

The following risks and considerations exist for the ICANN Board in its activities:

- Workload and competing priorities may slow down progress in key areas of work.
- Maintaining institutional knowledge is helped if there is stability in the Board’s composition over the long-term.
- The ability to select and retain qualified and diverse Board members is dependent on factors such as available candidate pool, time commitments required, and compensation.
- Failure to identify trends impacting ICANN and subsequent adaptation of the Strategic Objectives could have important repercussions.
- The COVID-19 pandemic has limited travel and face-to-face gatherings, which may impact the ability to establish effective relationships with key actors in the global Internet ecosystem.
Office of the President and CEO

PURPOSE
The Office of the President and CEO provides support to the President and CEO, who has fiduciary responsibility for the organization. The goals of the President and CEO are achieved through work conducted by ICANN org.

OPERATING INITIATIVE CONTRIBUTIONS
The President and CEO oversees progression of all operating initiatives.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
The Office of the President and CEO provides support to the President and CEO, thus contributing to many of ICANN’s strategic goals and targeted outcomes.

ACTIVITIES
The nature of the Office of the President and CEO is to provide ongoing support to the President and CEO, to effectively manage ICANN org. No significant considerations were identified. It is notable that the ICANN Board has extended the employment contract of the current President and CEO, Goran Marby, through May 2024, which provides continued stability and consistency throughout the execution of the FY22–26 Operating and Financial Plan.

Activities include:
• Supporting the President and CEO as he provides direction to the Executive Team to achieve organizational goals.
• Day-to-day support of the President and CEO, including travel and meetings arrangement, and other administrative tasks, so that the President and CEO can run the organization effectively.
Office of the President and CEO

RESOURCES
FY22–26: Resource requirements expected to be stable.

HOW PROGRESS IS TRACKED
Progress of the Office of the President and CEO is related to the progress made on the established goals of the President and CEO, which are approved by the ICANN Board. Additionally, the President and CEO and Executive Team provide regular reports to the Board and the community ahead of ICANN Public Meetings.
ICANN ORG GOVERNANCE

Governance Support

PURPOSE
Governance Support legally safeguards ICANN org and mitigates adverse litigation and regulatory impacts to ICANN org.

OPERATING INITIATIVE CONTRIBUTIONS

- Lead: Develop internal and external ethics policies.
- Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
- Support: Promote and sustain a competitive environment in the Domain Name System.
- Support: Facilitate DNS ecosystem improvements.
- Support: Root Zone management evolution.
- Support: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.
- Support: Monitor legislation, regulation, norms, principles and initiatives in collaboration with others that may impact the ICANN Mission.
- Support: Implement New gTLD Auction Proceeds recommendations.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.
- Decision-making processes ensure that input from all stakeholders is considered.
- Improved multistakeholder model processes, such as Policy Development Process (PDP) 3.0 or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.
Governance Support, Cont’d.

**ACTIVITIES**

- Litigation support, such as maintaining litigation readiness and monitoring and managing ICANN litigation matters and issues, including Accountability Mechanisms.
- General legal internal support.
- Advice to senior management.
- Contractual support, such as contract review, analysis, recommendations, risk assessments and amendments.
- Secretarial support to ICANN Board and PTI Board, such as performing Secretary’s duties related to notices, meetings, corporate records and implementation of Board and committee decisions.
- Service as Chief Data Protection Officer, with a focus on ICANN organization-level data to ensure ICANN’s internal data protection and privacy program is compliant and up-to-date.
  - Anticipated implementation of a standardized system for accessing registration data.
- Continue to support ICANN org and community, and monitor dynamic privacy and data protection legislation.

**Establishment of a contract management database.** Currently, contracts are managed within each business unit, which can cause potential legal and financial risk to the organization.

**With the current global environment, there has been an increase in the activities and resources due to the support services provided by Governance Support to support the org’s response to the pandemic.**

**HOW PROGRESS IS TRACKED**

ICANN org uses a combination of milestones, metrics and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- Achieving functional purpose within funding allowance.
- Sufficient contingency funds to cover unforeseen legal events (e.g., skilled in looking at past trends, present environment and future projections to deriving contingency fund amounts year-over-year).
ICANN ORG GOVERNANCE

Governance Support, Cont’d.

RESOURCES

FY22–26: Resource requirements expected to increase.

• A growing trend for more legal analysis translates into additional resource requirements. This assumption is based on the continued increase in projects, reviews, and policy development processes coming before the Board for consideration. Governance resources are needed at each part of this effort, in assessing feasibility of recommendations, in supporting Board deliberations on recommendations, and in advising the org in implementation.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Dependency: Document management system readiness.

• Risk: unexpected legal events. To best mitigate this risk, ICANN org has to ensure sufficient contingency funding for unbudgeted events.

• Changing landscape of privacy regulations.

• Outcomes related to litigation or general internal legal support are dependent on when Legal team is engaged on matters or issues.

• Advance notice of special projects or initiatives that will require legal services is key to ensuring that budget and resources are available. Other functions are strongly encouraged to involve the Legal function as early in the planning stages as possible.
ICANN ORG GOVERNANCE

Nominating Committee Support

PURPOSE
The Nominating Committee Support function provides support and coordination for the ICANN Nominating Committee (NomCom), an independent committee responsible for appointing leadership positions to the ICANN Board, At-Large Advisory Committee, Country Code Names Supporting Organization, and Generic Names Supporting Organization. The NomCom acts on behalf of the interests of the global Internet community and within the scope of ICANN’s Mission and responsibilities in the Bylaws.

OPERATING INITIATIVE CONTRIBUTIONS
Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.
• Widespread understanding of the ICANN multistakeholder model is established through increased communication with relevant organizations and institutions.
• ICANN community enhances their transparency practices to increase cross-community accountability and trust.

ACTIVITIES
This team supports the NomCom by providing:
• Systems Administration: Configuring systems and tools for NomCom use including the NomCom application system, web pages, and wiki.
• Meeting Planning: Plans and coordinates telephonic, face-to-face and virtual NomCom meetings.
• Meeting Support: Facilitates the work of the NomCom, including maintaining process and procedures documents and agendas.
Nominating Committee Support, Cont’d.

ACTIVITIES, Cont’d.

- Training: Produce content used in NomCom meetings.
- Vendor Management: Procure, negotiate, contract, and manage vendors in support of NomCom functions, including training and recruitment firms.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. In FY22–26, the following metrics will be used:

- Number of face-to-face meetings supported.
- Number of telephonic/virtual meetings supported.
- Number of leadership positions filled.

RESOURCES

FY22–26: Resource requirements expected to be stable.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Implementation work to be undertaken by NomCom support personnel to implement Board-approved recommendations of the NomCom Organizational Review Team may exceed the skills and capacity of existing resources.
- Ongoing NomCom operational costs may increase as a result of the review team recommendations.
- Due to the fluid status of NomCom leadership, ICANN org must be prepared to revise operating procedures and approach.
- Due to the COVID-19 pandemic, more of NomCom’s work is conducted virtually, which will impact how progress is tracked.
Complaints Office

PURPOSE

The Complaints Office is an operational accountability mechanism that enables ICANN org to transparently identify and resolve issues in one centralized location. The Complaints Office handles complaints regarding ICANN org that do not fall into an existing complaints mechanism, such as Contractual Compliance, Request for Reconsideration, or the Office of the Ombudsman.

The Complaints Office reviews verifiable information to ensure recommendations and resolutions are based in fact. It strives to be open and transparent, responsive and accountable to all parties, and to make recommendations that are constructive and actionable. Above all else, the Complaints Office acts with the utmost integrity in service of ICANN’s Mission.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Continued efforts of ICANN Board, community, and org to facilitate the inclusion and participation of all stakeholders.
• ICANN community enhances their transparency practices to increase cross-community accountability and trust.

ACTIVITIES

The Complaints Office reviews verifiable information to ensure recommendations and resolutions are based in fact. The office strives to be open and transparent, responsive and accountable to all parties, and to make recommendations that are constructive and actionable. Its responsibilities include:
• Receiving, researching, analyzing, and responding to submitted complaints.
• Reporting.
• Business and communications planning and implementation.
• Internal and external engagement.
Complaints Office, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- Number of complaints received.
- Number of complaints received in scope.
- Number of complaints resolved.
- May consider reporting turnaround time in FY22–26.

RESOURCES

FY22–26: Resource requirements expected to be stable.

- Additional headcount to mitigate the risk caused by having limited staff resources.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Shifting to a centralized system for complaints depends on ICANN org’s prioritization and resource availability.
- The function has limited personnel, which creates risk that could lead to slow or stalled delivery on commitments.
- As awareness and visibility regarding the Complaints Office increases over time, the number of in-scope complaints could escalate rapidly.
ICANN ORG GOVERNANCE

Planning

PURPOSE

The purpose of this functional activity is to support the development, implementation, monitoring, and evolution of ICANN’s strategy and to carefully plan ICANN’s activities to help address efficiently and effectively essential requirements of ICANN’s Mission and ensure that ICANN org is accountable to the public in its stewardship of ICANN’s Mission. In July 2020, a new Planning department was formed to lead and coordinate all planning activities across ICANN and to prioritize and organize ICANN’s activities with all participants in the ICANN ecosystem (org, Board, and community). The long-term objective of the Planning department is to continuously develop the effectiveness of the organization through adequate planning and measurement of the delivery against the plans.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Planning at ICANN.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN Strategic Plan is supported by a five-year Operating and Financial Plan. All plans are updated as and when necessary to take into account relevant changes in ICANN’s environment.

• Evolution to five-year rolling financial planning allows ICANN to appropriately address changes that impact ICANN’s budget, operating and financial plan, or strategic plan.

• ICANN has processes and tools in place to effectively prioritize and periodically reprioritize its work.

• Community’s engagement in prioritization and decisions about affordability measurably increases.

• Funding, expenses, and reserves are addressed in each plan in a manner consistent with policies, Board decisions, strict financial responsibility, and conservatism.

• ICANN has reliable and predictable five-year funding projections, based on a sound understanding of the evolution in the domain name marketplace and realistic assumptions.
ICANN ORG GOVERNANCE

Planning, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• ICANN utilizes data about the directions and trends in the market to effectively guide the organization.

• ICANN prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.

ACTIVITIES

• Lead ICANN’s planning processes, including strategic outlook and strategic planning, operating planning, budgeting and progress reporting.

• Communicate and engage on the planning processes, timelines, and milestones with ICANN org, Board and Community.

• Manage the development of all plans per ICANN Bylaws’ requirements.

• Ensure alignment of regional and other planning programs and implementation efforts with ICANN plans.

• Manage progress reporting and measurement.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

• Timely delivery of ICANN’s Five-Year Strategic Plan, Five-Year Operating Plan, Annual Operating Plan and Budget.

• Regular completion of trends identification. Ability to factually inform trends based on public data.

• Regular completion of trends, prioritization, and impacts analysis.

• Regular decision to revise or prolong the Strategic Plan.

• As needed, revision of Strategic Plan.

• Regular production of reports on achievements and progress against the ICANN plans.
ICANN ORG GOVERNANCE

Planning, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

• Design and implement ICANN’s planning processes, including the strategic planning process, operating planning process, budgeting process and process reporting process.

• Research, analyze, design, and implement a prioritization approach in collaboration with ICANN org, Board and the community.

RESOURCES

FY22–26: Resource requirements expected to increase.

△ Support establishing a systematic set of activities to support the rolling planning process.

△ Facilitate the strengthening of monitoring of trends.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Lack of planning tools, including data collection and analysis, to facilitate organization-wide prioritization and progress reporting can impact the efficiency and effectiveness of planning activities.

• Cross-functional collaboration and resources are needed and progress will depend on their availability.
ICANN ORG GOVERNANCE

Review Support and Implementation

PURPOSE

The ICANN Bylaws-mandated reviews represent a fundamental mechanism to continuously improve ICANN’s multistakeholder model. The improvements result from the implementation of Board-adopted recommendations made by community-led review teams (for Specific Reviews) or by external independent reviewers (for Organizational Reviews). The org’s functional support of the reviews process is provided by two complementary teams actively involved in the entire process from inception of the review to the conclusion of the implementation:

• The Review Support team facilitates and supports both the Specific and Organizational Reviews. This work includes the evolution of review processes and ICANN org support from inception of the review through Board action on the recommendations made by the review team.

• The Implementation Operations team is responsible for the implementation of the Board-adopted recommendations and coordinates the efforts with all parties, including org, Board and community, to ensure effective implementation. These recommendations could result from reviews or other community-led working groups, such as the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2 (CCWG-Accountability WS2), the program to Evolve the Effectiveness of the Multistakeholder Model, and the Cross-Community Working Group on Auction Proceeds.

OPERATING INITIATIVE CONTRIBUTIONS

• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.

• Support: Implement New gTLD Auction Proceeds recommendations as approved by Board.

• Support: Planning at ICANN.
ICANN ORG GOVERNANCE

Review Support and Implementation, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.

• Decision-making processes ensure that input from all stakeholders is considered.

• Improved multistakeholder model processes, such as Policy Development Process 3.0 (PDP 3.0) or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.

• ICANN stakeholders collaborate to define prioritization mechanisms, which ensure that cumulative workload is reasonable at any one time, and that ICANN priorities reflect the community’s collective needs.

• ICANN Board and org continue enhancing transparency initiatives and upholding accountability.

• ICANN community enhances their transparency practices to increase cross-community accountability and trust.

• Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

ACTIVITIES

• Support ICANN org cross-functional engagement in the review life cycle from inception to implementation of Board-approved recommendations.

• Establish a cohesive streamlining of reviews to enhance the efficiency and effectiveness of Reviews and the review program as part of continuous improvement.

• Design and establish a cohesive approach to the resourcing and prioritization of community recommendations.

• Evaluate the effectiveness of review recommendations as part of informing the next cycle of that review, and also in a broader sense to ensure that all Reviews deliver on community and Board expectations.
Review Support and Implementation, Cont’d.

ACTIVITIES, Cont’d.

• Continue the implementation of the recommendations from the CCWG-Accountability WS2. This work involves coordination across ICANN org, as well as with the Board and the community structures carrying out their work to implement WS2 recommendations incumbent on the community.

• Define, plan for and implement the program ‘Evolve the Effectiveness of the Multistakeholder Model’ through monitoring of the activities already in progress which contribute to this program, and implementation of the new activities or projects that complement those already in progress to fully address the three issue areas prioritized by the community in the August 2020 public comment. In a second phase, the remainder of the issues identified will be considered for implementation.

• Define, plan for and implement the CCT, ATRT3, RDS and SSR2 recommendations (See Appendix B) as adopted by the Board, so that such implementation work can be considered for prioritization and scheduled for implementation accordingly.

△ In FY21 and FY22, the team plans to support the Board and community efforts to streamline the Bylaws-mandated Specific and Organizational Reviews, based on the Board action taken on ATRT3 recommendations in November 2020. The implementation of the streamlined process is targeted for FY22 as supported by the community and approved by the Board.

△ In FY21, the team plans to propose modifications to the Operating Standards for Specific Reviews to reflect improvements included in the Draft Proposal on Resourcing and Prioritization of Community Recommendations community input on this topic, based on the Board action taken on ATRT3 recommendations and related work to streamline reviews.

△ Improve both the performance measurement and outcome measurement of reviews, by identifying and agreeing on a set of measurements for ICANN org, review teams, and independent examiners. Better measurement will hold each party accountable and ensure quality reporting of reviews activities.
Review Support and Implementation, Cont’d.

HOW PROGRESS IS TRACKED

The Review Support and Implementation Operations functional activities progress depends on progress made in FY21 in the following areas:

- Streamlining of reviews.
- Prioritization and resourcing of the Board-approved ATRT3 recommendations pertaining to reviews.
- Prioritization and resourcing of the implementation of community recommendations.
- Implementation planning of the CCWG-WS2 recommendations.
- Completed Improvements included in the program to Evolve the Effectiveness of the Multistakeholder Model.

Measurement of progress will be updated to reflect the Board action on ATRT3 recommendations, such as facilitating a pilot for the Holistic Review and the Continuous Improvement Program for all ICANN structures in addition to developing a framework of prioritization with input from the community.

The following measures will also be used over the five-year period for this functional activity:

- ICANN org provides cross-functional support to the review teams, so that each Review Team understands progress since the last review, considerations that may impact implementability of recommendations, the associated resources and costs involved in the implementation, and dependencies that could delay implementation. ICANN org provides analysis and assessment to inform Board actions and decisions in accordance with timelines set in the ICANN Bylaws and Review work plan.
- Track resources and expenditures as compared to plans and budgets via fact sheets.
- Produce high-level implementation plan to inform Board consideration of review final report and recommendations; facilitate Board consideration within the Bylaws-mandated six-month period.
- Produce periodic progress reports on the status of implementation planning and implementation of recommendations resulting from reviews and cross community working groups.
- Produce Annual Review Implementation Report on time, in compliance with the Bylaws provision.
ICANN ORG GOVERNANCE

Review Support and Implementation, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

• Maintain up-to-date Operating Standards for Specific Reviews, in compliance with the Bylaws.

Review Team and Independent Examiner Performance Measurement:

• Review team’s adherence to its terms of reference, work plan, and operating standards and other relevant processes.

• Completion of review within the defined timeframe and allocated budget.

• Adherence to Bylaws requirements.

• Review team considers substantive feedback from the community, Board and ICANN org, to inform focused, useful and implementable recommendations leading to intended review outcomes.

For Organizational Reviews, the entity under review prepares an implementation plan and implements all Board-approved recommendations within a reasonable time frame.

RESOURCES

FY22–26: Unknown.

△ As reviews are streamlined and improvements or changes made to how ICANN org supports reviews throughout their life cycle in alignment with the Board-directed actions resulting from ATRT3 recommendations, any resourcing adjustments to ensure strong ICANN org support will be addressed.

△ Note: the resources needed to support the next cycle of reviews will be impacted by the outcomes of various work streams to improve reviews in alignment with Board-directed actions to implement ATRT3 recommendations, such as budget amount, personnel, and timing. These resource items will be forecasted once the improvement work is further along.
ICANN ORG GOVERNANCE

Review Support and Implementation, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• FY22–26 operations will be impacted by the events that are currently unfolding, but the outcome is not yet known at the time of publication of this plan. Specifically, the ICANN Board and community work to streamline reviews, including efforts as approved by the Board through its November 2020 action on ATRT3 recommendations. The ATRT3 recommendations related to reviews, when implemented will bring significant changes to the timing and the nature of the reviews starting in FY22. These changes would require Bylaws amendments. Progress also depends on ICANN org’s ability to support and facilitate the process of conducting reviews as directed by ICANN Board in its action on ATRT3 Recommendation related reviews, from planning phase through assessment of implementation, and considering the Holistic Review pilot and the Continuous Improvement Program pilot.

• Given the large number of recommendations resulting from the current cycle of specific Reviews and other community work, and their complexity and dependencies on other work, there needs to be an agreed upon set of principles for effective recommendations and their effective implementation. Discussions are currently underway, as reflected in “Resourcing and Prioritization of Community Recommendations: Draft Proposal for Community Discussions”; the effective consideration and implementation of the large number of community recommendations depends on ICANN community, ICANN Board and ICANN org reaching agreement on applicable principles and related process steps.
Functional Activities

FY22–26

ICANN Shared Services

- Finance and Procurement
- Risk Management
- Engineering and Information Technology
- Global Human Resources and Administrative Services
- Global Support Center
- Board Operations
- Security Operations
- ICANN Offices
ICANN SHARED SERVICES

Finance and Procurement

PURPOSE
The Finance and Procurement function is the steward of ICANN’s public funds, and the champion of financial accountability and transparency. It provides timely, accurate, and reliable financial and procurement services that support responsible decision-making.

OPERATING INITIATIVE CONTRIBUTIONS
• Lead: ICANN Reserves.
• Support: Formalize the ICANN org funding model and improve understanding of the long-term drivers of the domain name marketplace.
• Support: Planning at ICANN.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
The Finance and Procurement functional activity handles all accounting, audit, planning, financial analysis, financial reporting, statutory reporting, tax, payroll, billing and collections, insurance, treasury (including payments), procurement, and sourcing for ICANN operations, IANA functions, or PTI as applicable.
ICANN SHARED SERVICES

Finance and Procurement, Cont’d.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

• Continuous improvement of processes to gain efficiency and improve quality.
• Continuous improvement of financial analysis.
• Measuring and reporting service-level metrics.
• Tracking of ICANN’s Reserve Fund replenishment.
• Contribute to the operating initiative planning at ICANN.

RESOURCES
FY22: Resources are expected to increase.
FY23–26: Resources are expected to remain stable.

CONSIDERATIONS
No new risks or considerations noted.
ICANN SHARED SERVICES

Risk Management

PURPOSE
The primary purpose of Risk Management is to facilitate the identification and articulation of risks faced by ICANN org so that it may make informed decisions about planning for and managing those risks. Through the established Risk Framework, the function focuses on developing a risk-aware culture which incorporates the risk framework into activities.

OPERATING INITIATIVE CONTRIBUTIONS
Support: Risk Management supports all operating initiatives.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
• Active identification and articulation of risks to the organization allowing for a conscious decision to be taken regarding risks.
• Transparency of risks so that risks are managed before they become a threat to fulfilling the organization’s objectives. While adverse events will occur, the goal is a proactive approach to risk management and a minimization of surprises.
• A risk-aware culture where all personnel feel empowered to identify and escalate risk concerns.
• Personnel and functions own the risks and responses related to their activities.
• Provide concise and insightful reporting to executive management and the Board.
ICANN OPERATING & FINANCIAL PLANS
FISCAL YEARS 2022–2026

ICANN SHARED SERVICES

Risk Management, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

• Disciplined risk planning.
• Risk Appetite Statement referenced by personnel.
• Risk ownership by personnel.
• Board feels assured that org Risk Management Framework is effective.

RESOURCES

FY22–26: Resource requirements expected to be stable.

CONSIDERATIONS

The Strategic Plan does not create any new risks or challenges in itself for the Risk Management function. The Strategic Risks in the Strategic Plan are included in the work done by the Risk Management function in its normal operations. The existing challenges and dependencies of working with multiple other functions applies to managing any new risks added to the Risk Register from the Strategic Plan.

The largest consideration for this functional activity is the team’s dependency on other functions and personnel, who may have other priorities. The team must rely on Risk Liaisons to respond and also personnel alerting Risk Management when issues arise.
ICANN SHARED SERVICES

Engineering and Information Technology

PURPOSE
Engineering and Information Technology (E&IT) provides trusted technical expertise to support the global multistakeholder model and ICANN org by:

- Building a sustainable and resilient team that is able to respond to organizational needs.
- Fostering trusted, transparent relationships with stakeholders through collaborative planning and data-driven decisions.
- Delivering secure, effective, and accessible services through innovation and persistence.

OPERATING INITIATIVE CONTRIBUTIONS

- Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
- Support: Root zone management evolution.
- Support: Promote and sustain a competitive environment in the Domain Name System.
- Support: Formalize ICANN org funding model and improve understanding of the long-term drivers of the domain name marketplace.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES

- Align E&IT delivery capacity along the organization’s long-term strategy.
- Enable organizational effectiveness through efficient use of ICANN’s digital services.
- Provide effective support to ICANN’s international office strategy.
- Maintain financial soundness and business continuity.
- Achieve lower total cost of ownership while building capacity.
ICANN SHARED SERVICES

Engineering and Information Technology, Cont’d.

ACTIVITIES, Cont’d.

• Secure ICANN’s digital services and systems.

• Support all functions within ICANN org, Board, and community via end-user support, business analysis, custom application development, and off-the-shelf software selection and support, infrastructure support, security monitoring, and network services.

• Continue to emphasize portfolio management and platform reduction mindset.

• Rough cut capacity planning tool for organizational capacity planning to define, develop, and deliver on requests to the organization.

• To improve personnel and subject matter expertise retention as well as execution control, the E&IT team is potentially changing the development model from a mix of internal and external or offshore outsourcing, to 100 percent internal.

• Investigate professional development opportunities to improve retention, provide greater clarity to personnel, and help identify resource gaps.

• Expectation to move from Capability Maturity Model (CMM) Level 3 to CMM Level 4, with process definition, redesign, measurement, and improved transparency being some of the desired outcomes.

• Continue to prioritize platform rationalization and consolidation.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

• Number of projects and services requested and completed every six months.

• Number of projects delayed or cancelled every six months.

• Evaluation of financial management through review of planned and actual budgets.

• Digital services availability.

• Universal Acceptance readiness.

• Overall Center for Internet Security (CIS) Score for cybersecurity.
ICANN SHARED SERVICES

Engineering and Information Technology, Cont’d.

RESOURCES

FY22–26: Resource requirements expected to be stable.

- FY20–21: Shifting to a development team that is entirely internal personnel will require additional resources.
- FY21–23: Likely to need external or outsourced resources to backfill and add to internal resources as personnel is reallocated to new strategic initiatives.
- FY21: Projects such as implementation of the Board-approved Competition, Consumer Trust, and Consumer Choice Review Team recommendations will likely add pressure to the identified resource gaps. External resources will likely be needed to complete these projects per expected timelines and scope.
- The internal resource count and mix could be impacted if a net new platform technology is sourced to support new initiatives.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Completion of strategic projects depends on Board and community efforts.
- Finding a suitable offshore location for outsourced work is challenging.
- Hiring and retaining personnel continues to be challenging in the current economic climate. Personnel may leave, but improvements in process documentation will lessen new employee onboarding time and costs.
- Personnel may leave if initiatives offering career progression are not implemented.
- Business decisions may mean ICANN org is not able to reduce the number of platforms it uses. This may lead to retaining talent to deal with potential issues. A possible mitigation is to make platform reduction part of the functional business strategies.
- Lack of understanding of capacity and capability, leading to unrealistic scope and delivery expectations from Board and community.
ICANN SHARED SERVICES

Global Human Resources and Administrative Services

PURPOSE

The primary purpose of Global Human Resources is to attract and retain top talent for ICANN org throughout the entire human capital life cycle. This includes talent acquisition, onboarding and offboarding of personnel, administration of global compensation and benefit plans, performance management, employee relations, investigations, training and development, employment policies and workplace compliance, global mobility and immigration, team member morale and engagement activities, Enterprise Resource Planning (ERP) data integrity and reporting, and organizational planning and development.

The primary purpose of Administrative Services is to provide office administrative support and facilities management for ICANN org across all locations. This includes real estate and lease management, construction management, ergonomics program management, office security access controls management, and special events planning for employee morale activities and events.

OPERATING INITIATIVE CONTRIBUTIONS

• Support: Develop internal and external ethics policies.
• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Implement New gTLD Auction Proceeds CCWG recommendations.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.
ICANN SHARED SERVICES

Global Human Resources and Administrative Services, Cont’d.

ACTIVITIES

Global Human Resources activities include:

- Throughout FY22–26, Global Human Resources will ensure appropriate personnel levels as needed for initiatives including support of technical platforms, implementation of Board-approved recommendations from the New gTLD Subsequent Procedures Policy Development Process, Auction Proceeds, and more.

- In partnership with the Legal team, Global Human Resources will support the development of ethics policies as applicable to personnel.

- Global Human Resources will provide the internal programs necessary for leadership training and professional development of personnel in order to retain talent.

- Global Human Resources will provide an update to the internal grades and ladders to provide more guidance and clear structure for conversations around career path and development.

Administrative Services activities include:

- In FY22–26, Administrative Services will oversee four major lease negotiations for its locations in Singapore (renewal or relocation September 2021), Los Angeles (renewal or relocation June 2022), Istanbul (renewal or relocation October 2022), and Washington D.C. (renewal or relocation January 2023).

- Provide support for a healthy work environment in ICANN offices and for those working remotely. Support the safety readiness of ICANN offices as personnel return from working remotely as a result of the COVID-19 pandemic.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the five-year period for this functional activity:

- Global Human Resources will focus on maintaining personnel engagement by sustaining ICANN’s organizational culture seamlessly between offices, regions, and remote working while continuing to build our diversity to best represent the community we serve.

- Administrative Services will ensure lease negotiations result in favorable outcomes to maintain budgetary commitments.
ICANN SHARED SERVICES

Global Human Resources and Administrative Services, Cont’d.

RESOURCES

FY22–26: Resource requirements expected to be stable.

CONSIDERATIONS

The following risks and considerations exist for the Human Resources component:

• Maintaining productivity and efficiency when personnel have to balance work with personal isolation, concerns for family health, safety and schooling, political turmoil and prevailing economic challenges during the COVID-19 pandemic.

• Geographic spread over 32 countries and 20 U.S. states makes it hard to efficiently handle employee relations issues within existing policies and local differences.

• Personnel are eager for development opportunities but may leave before taking advantage of what is currently available to them because they do not see a path to clear career progression.

The following risks and considerations exist for the Administrative Services component:

• Uncertainty exists in the global real estate market as a result of the COVID-19 pandemic which may create instability in cost for office space in the next five years.

• Maintain a flexible workspace environment for personnel remotely and in offices during the COVID-19 pandemic and as personnel return to ICANN facilities.
ICANN SHARED SERVICES

Global Support Center

PURPOSE
ICANN’s Global Customer Service and Support (Global Support) supports ICANN’s Mission, vision, and strategy, through the continued pursuit of excellence in the execution of world-class service delivery practices and principles.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time, as this is business-as-usual.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
• Contracted party support.
• New gTLD applicant support.
• Account and contact management.
• Registrant and community support.
• Stakeholder communication.
• Portal access management.
• Inbound org request triage and routing.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. During FY22–26, the following milestones will be met:

• Service level targets will continue to be monitored and modified as per operational needs.
• Customer satisfaction will continue to be measured through transactional surveys and reported regularly.
ICANN SHARED SERVICES

Global Support Center, Cont’d.

RESOURCES

FY22–26: Resource requirements expected to initially remain steady and then increase.

△ Resources are expected to be steady in FY22.

△ Resources are expected to grow in FY23 to support increased demand to support community members and the general public in the subsequent procedures for new gTLDs.

△ Potential for expansion in FY24 to FY26 to support Board-approved policy recommendations, including the New gTLD Subsequent Procedures Policy Development Process, which may result in an increase of contracted parties.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• The role of Global Support to provide Tier 1 support for contractual compliance inquiries is currently under discussion. Should Global Support take on this function, resources and tools would need to be reviewed.

• Policies and contractual obligations continuously evolve. This requires the Global Support team to stay abreast of the changing landscape in order to provide accurate responses to contracted parties and community members.

• The effectiveness and efficiency of the Global Support function is highly dependent on the operating systems and tools upon which it relies. Specifically, the team is highly reliant on the usability of the Naming Services Portal (NSp).

• Global Support resources are in high demand both internally and outside the organization. Retaining personnel is critical to successful ongoing operations.
ICANN SHARED SERVICES

Board Operations

PURPOSE
The purpose of this function is to support the ICANN and PTI Boards, and to serve as liaison between the ICANN Board and org. This includes coordinating with ICANN org to provide substantive content and logistical support to the ICANN Board, as well as its committees and subgroups. This function also facilitates the interaction between the Board and the community.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
- Content management: Supports the agenda development of Board meetings and workshops, facilitates preparation and submission of org-wide materials for Board Meetings, workshops, committees, and other subgroup meetings, manages Board materials publication, supports drafting of Board operational priorities, Board Correspondence and Board Public Comments submissions, and facilitates preparation for Board and stakeholder meetings.
- Logistics management: Manages Board members travels and expenses, vendor management and relations, manages and reports Board budget, facilitates and organizes calls and meetings.
- Training and capacity development: Supports the Board training programs and tools, including Board members onboarding, development, and mentorship programs.
- Board communications and engagement: Supports and facilitates the Board's communications and engagement efforts with the community as well as participation in other meetings, events, and speaking engagements.
- Org cross-functional improvements efforts: Participates in cross-functional ICANN org teams and projects aimed at improving effectiveness and cost management.
Board Operations, Cont’d.

ACTIVITIES, Cont’d.

△ The team does not anticipate any significant changes, but will embark on operational excellence and team member development efforts that focus on process improvements and tools enhancement. One team member’s role will be shifted to focus on collaborating with Engineering and IT and other org teams on cross-functional tools and processes development.

HOW PROGRESS IS TRACKED

• Outcome measurement:
  – Smooth operations of the Board activities (content, logistics, skills development, etc.) and continuous advancement in Board best practices.
  – Continuous advancement of org-wide support to Board.

• Performance measurement:
  – Content Management: Bylaws compliance, accountability and transparency metrics.
    ▪ Percent of Board Materials ready prior to Board Meeting per Bylaws.
    ▪ Percent of Board meeting agenda published prior to meeting per Bylaws.
  – Logistic management:
    ▪ Number of trips booked for Board.
    ▪ Number of expense reports managed for Board.
  – Training and capacity development:
    ▪ Number of Board members completing the onboarding process.
    ▪ Number of trainings attended by individual Board members.
    ▪ Number of trainings attended by full Board.
    ▪ Improvements in Board skill sets.
Board Operations, Cont’d.

RESOURCES
FY22–26: Resource requirements expected to be stable.

CONSIDERATIONS
The following risks and considerations exist for this functional activity and may impact its advancement:

• A key performance measurement relies on a survey that often receives a low response rate due to Board workload. The team will work on addressing this challenge as part of its process improvement.

• The team works closely with ICANN org, including the Legal team, to timely deliver content to the Board and publish Board materials, but that support depends on the workload and priorities of other functions within the org that prepare the initial drafts.

• The loss of institutional knowledge on the Board poses a significant risk and could have a negative impact on the Board’s operational effectiveness and subsequent negative impact to ICANN org. The team plans to continue teaming up with the President and CEO and the General Counsel and Secretary to advance Board and committees manuals, process documentation, training and development, and more.
Security Operations

PURPOSE
The purpose of Security Operations is to provide a safe and secure environment in which the community, Board, and ICANN org operate.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN's ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
- **Event Security:** Provide on-site health, safety, and security support to ICANN Public Meetings and other ICANN-hosted events.
- **Travel Security:** Review, assess, and support personnel and Board travel. Ensure COVID-19 risks are assessed, understood, and minimized. The Travel Safety Committee to assess all high-risk travel.
- **Security Intelligence:** Research and provide key security information and situational awareness for ICANN’s presence around the world, including offices, personnel, events, and travelers.
- **Response Planning:** Furnish ICANN with the necessary tools to successfully respond to any incident at both tactical (emergency response) and strategic (crisis management) levels to include pandemic and business continuity preparedness in response to COVID-19.
- **Physical Security:** Ensure that ICANN’s global offices are sufficiently secured. Implement physical security upgrades and enhancements where warranted and feasible.
- **Knowledge Management:** Create and deliver comprehensive training to ensure ICANN org has consistent, relevant, and actionable information and skills to address security and safety needs.
- **Threat Management:** Detect, assess, mitigate, and respond to ICANN’s internal and external security threats.
ICANN SHARED SERVICES

Security Operations, Cont’d.

ACTIVITIES, Cont’d.

△ In FY22–26, the Security Operations team will further evolve the Regional Security Manager (RSM) model by deepening RSM engagement within the geographic regions where ICANN has offices and, where appropriate, incorporating existing regional personnel from other functions as Regional Security Coordinators (RSCs). The team will also look at ways to further optimize the effectiveness of the RSM model by better aligning regions with their respective RSMs and potentially relocating RSMs to achieve this.

HOW PROGRESS IS TRACKED

• Risk Identification and Assessment
  – Ensure Security Operations is formally and consistently incorporated into the ICANN Public Meeting location selection process, to allow for an advance risk assessment of the health and safety profile of prospective cities.
  – Continue to refine the Event Risk Assessment and Event Security Planning processes to ensure that Security Operations supports ICANN Public Meetings and events as cost-effectively and efficiently as possible while sufficiently mitigating identified risks.
  – Continue to refine the Travel Risk Assessment process, in particular ICANN org’s internal Travel Safety Committee, and in light of COVID-19, to ensure all proposed travel to higher-risk locations is thoroughly and sufficiently assessed, justified, and supported.
  △ Establish and maintain regular cadence of collaboration between Security Operations, Risk Management, Information Security, Administrative Services, and OCTO teams to ensure ICANN’s comprehensive risk profile is sufficiently understood and managed.

• Culture of Security Awareness
  – Continue to promote a culture of security awareness to inform the org’s decision-makers and furnish personnel with the tools and know-how to operate and travel safely and securely in an increasingly insecure threat landscape. Personnel are “street-smart” and “travel-savvy.”

• Bolster Incident Response Capabilities
  – Complete annual training for the Global Crisis Management Team (G-CMT), office Emergency Response Teams (ERTs), and Workplace Violence Prevention (WVP) Teams.
ICANN SHARED SERVICES

Security Operations, Cont’d.

RESOURCES
FY22–26: Resource requirements expected to be stable.

CONSIDERATIONS
The following risks and considerations exist for this functional activity and may impact its advancement:

- ICANN’s Mission and engagement requires the org to send travelers to and host events within locations of highly variable risk profiles. Over time, ICANN may conduct more frequent and robust engagement in higher-risk locations, requiring increased and more costly Security Operations support in the form of risk assessment and mitigation and security planning. While Security Operations does not control where ICANN hosts events or travels, the team is still responsible to sufficiently support events and travel as cost-effectively as possible.

- Security Operations should be more deeply integrated in the early consideration and planning stages of engagement of travel and events in higher-risk locations. This would afford all key stakeholders the opportunity to assess and understand the total cost of such engagement.

- Security Operations will continue its efforts to develop and bolster an organizational culture of security awareness. This will both inform the decision-making of the organization’s key stakeholders and empower individual personnel to proactively mitigate security risks and reduce the likelihood of safety incidents.

- Security Operations will continue to ensure that the org is sufficiently prepared to respond to and manage the ongoing COVID-19 pandemic. This includes robust office, meeting, and travel procedures and protocols in order to promote the health and safety of personnel and the community, as well as maintain agile crisis management teams and mechanisms to respond efficiently and effectively to incidents and spikes in cases.
ICANN Offices

PURPOSE
ICANN offices are located around the world and work together to serve the global community. Brussels, Istanbul, Montevideo and Singapore have detailed plans described in the GSE section of the FY22–26 Operating and Financial Plan.

RESOURCES
FY22–26: Resource requirements expected to increase.
FIVE-YEAR FINANCIALS

• Approach
• Funding Assumptions and Projections
• Financial Projections
Approach

The following FY22–26 financials provide forward-looking information that represents ICANN’s attempt at conservatively estimating its future funding and expenses. The intent is to maximize the chances that such future funding is higher than these projections would suggest, to allow ICANN to plan for a level of activity and expenses that minimize the risk that funding would be lower than expenses in the future.

The information contained within this document is derived from what ICANN org believes to be a reasonable assumption based on current information, understanding, market trends, and circumstances at the time of the FY22–26 Operating and Financial Plan’s publication. However, this information involves risks, variables, and uncertainties. As a result, it is expected that actual funding could differ from the one projected in this document, in any given year.

The FY22–26 financials are not fully costed. Instead, they are a high-level overview of ICANN org’s financial assumptions. The financials are intended to be flexible, and we anticipate that these numbers will shift as we learn and adjust accordingly. This also allows for activities to be reprioritized based on the current environment.

Please note the following considerations:

• The FY22–26 financials do not include headcount at the functional activity level, which allows for flexibility in internal personnel and external resources.

• Many of the activities in the FY22–26 financials will require substantial internal resources, meaning other activities will have less resources available. The Resources section of the FY22–26 Operating and Financial Plan highlights the cross-collaboration within the org.

This document will be supplemented by ICANN org’s annual plans and budgets, which will provide fully costed financial information for their respective year.

It is important to note that the Five-Year Operating and Financial Plan will be reviewed and updated on an annual basis, and any activity, initiative, or financial estimate included in the Five-Year Operating and Financial Plan will be reevaluated periodically through the five-year period.
Funding Assumptions and Projections

ICANN org uses external information to develop multiple scenarios that incorporate various assumptions of growth or decline for each of its funding categories. These assumptions are developed for the specific purpose of creating reasonably conservative funding assumptions. They are not intended to convey ICANN org’s views or positions on any specific aspect of the DNS ecosystem. Other parties may use the same information but for different purposes, which can lead them to draw different conclusions. A report on the Five-Year Funding Forecast Assumption is published, which can be found here.

This document contains forward-looking information (available at the time of publication) that reflects ICANN org’s efforts to conservatively estimate future funding. This approach assists the org in maximizing the use of expected funding, accommodating higher than expected projections, and minimizing risk and impact should future funding be lower than expected.

It is important to note that these projections have been prepared during unprecedented and uncertain times due to the COVID-19 pandemic. The true depth and duration of the ongoing economic recession and potential spillover effects on the DNS industry are yet to be fully understood. In light of these circumstances, a number of forecast scenarios, each with varying assumptions and thresholds that depict plausible viewpoints, have been included in this document.

In addition, ‘base-case’ funding assumptions for the period, along with ‘high’ and ‘low’ funding estimates are included, as well as related, potential impacts to funding. This is consistent with ICANN’s approach to developing funding forecast assumptions, which are regularly evaluated and recalibrated as additional data becomes available.

ICANN org used a three-step process to project what its funding levels will be for the next five years. At this point, considering the uncertainty on the timing of the release into the root of new top-level domain names resulting from a new round of applications, it is assumed, to be conservative, that no funding from such new top-level domains would be generated over the five-year period. Below, each step of the process is explained in greater detail.

1 The Marketplace Horizon Scan

A marketplace horizon scan was performed to take a comprehensive look at the key factors affecting the DNS industry. ICANN hired an independent industry analyst to summarize key historical and forecast trends. The work included interviews with industry representatives and a review of publicly available information. Out of this analysis, several trends driving the market were identified as follows:
Funding Assumptions and Projections, Cont’d.

1. The overall domain name market remains on an uptrend at a global scale, while seeing somewhat lower levels of expansion than experienced prior.

2. Uncertainty abounds about the longer-term effects of the COVID-19 pandemic both in terms of the wider economy and on the demand for domains.

3. Establishing and maintaining online identity remains a key part of contemporary life and the digital economy.

4. Efforts by market actors to expand their sales channels and range of domain offerings have been a key market enabler. Ensuring scale in business operations has also been a key priority.

5. Resellers are deemed to be an important channel for expanding market reach, particularly in smaller developing world markets and highly-fragmented local markets.

6. Significant differences remain in the levels of domain name registrations across regions.

7. A lack of Universal Acceptance challenges the rollout and adoption of new types of domains.

8. Given its potential for causing a drag on demand for domains, strengthening DNS security and addressing related bad actors remains a key task.

9. The effects of regional differences in regulatory regimes on the demand for domain names remain uncertain.

2 Formulation of Assumptions

Based on the trends identified in the marketplace horizon scan, assumptions were made about the growth of the industry. For example, a finding from the marketplace horizon scan was that the continued importance of controlling a domain name to craft and maintain a digital presence on the global Internet remains a key market enabler of the industry. Over the forecast period, it seemed that digital presence will continue to rely on the use of domain names, so an assumption was made that positive growth would be likely to occur. This then became the base-case scenario. Two more future scenarios were then created: a “high” scenario that builds on positive momentum and a more conservative “low” scenario.
3 Forecast Generation

With the scenarios in place, ICANN org assigned values to produce a range of projections related to ICANN’s future funding. Across the three scenarios generated, FY26 funding is forecasted to range between $119.5 million and $180.7 million from the current FY21 Forecast of $140.0 million.

</table>

Because forecasting relies on assumptions that are hypothetical and potentially infinite, ICANN org will continue to review its funding forecast regularly to adjust as needed.
The FY22-FY26 Financial Plan also includes a contribution to support ICANN’s efforts to preserve and enhance the security, stability, and resiliency of the DNS including root server system governance, mitigation of DNS security threats, promotion and/or facilitation of DNSSEC deployment, the mitigation of name collisions, and DNS operations research.

In January 2020, ICANN and Verisign, the registry operator of the .COM top-level domain (TLD), announced a proposed framework for working together on initiatives related to the security, stability, and resiliency of the DNS in the form of a binding Letter of Intent (LOI) as approved on 27 March 2020. This LOI also provides that Verisign will contribute a total of $20M over five years starting in calendar year 2021.

The FY22–26 Financial Plan includes the funding of these initiatives over the five-year period in support of the activities described above which will primarily be carried out as part of the following planned operating initiatives:

- Support the Evolution of the Root Server System.
- Facilitate DNS Ecosystem Improvements.
- Root Zone Management Evolution.

These initiatives and related expenses will be the subject of continued monitoring and reporting over the five-year period in a transparent manner, to ensure full accountability of the funds collected and used.
Funding Assumptions and Projections, Cont’d.

FINANCIAL SUSTAINABILITY PRINCIPLES AND APPLICATION

Over the FY22–26 period, ICANN’s expenses will be funded from the annual funding available. This reflects the application of two key principles of ICANN’s long-term financial sustainability:

- Expenses do not exceed funding.
- Sufficient reserves are reached and maintained at all times.

Updates to the Draft FY22 Budget will be subject to updates from a forecast during FY22 as part of the FY22–26 Operating and Financial Plan and FY22 Operating Plan and Budget process, and no later than in time for the publication of the FY23 annual planning documents, estimated to be in December 2021. ICANN’s activities will be carried out under a principle of increased prudence, frugality, and with heightened attention to necessity. It is important to understand that all activities previously planned will be reevaluated with this new perspective and mindset. These considerations apply to all ICANN activities and expenses.
The table below reflects financial projections for the five-year period FY22–26. The projections define the maximum amount of operational expenses to be incurred on an annual basis, considering the available funding net of an approved allocation to the Reserve Fund and the funding allocated to the Operating Initiatives. The Reserve Fund allocation is designed to enable the Reserve Fund balance to reach the minimum target level of 12 months of operating expenses by the end of the Board-approved Reserve Fund Replenishment Strategy.

(2) Figures only reflect Operating Initiatives that require resources in addition to functional activity plans.
(3) Contingency expense represents an amount of budgeted expenses unallocated to specific activities or functions.
Financial Projections, Cont’d.

**OPERATING INITIATIVES - FINANCIAL ESTIMATES**

The table below highlights the financial estimates for the Operating Initiatives requiring resources in addition to the plans indicated in the functional activities. A high and low scenario was estimated for each initiative. Our projections refer to the midpoint of these estimates since the high and low estimates are deemed to be less likely.

Financials for Operating Initiatives were only estimated for initiatives that required additional resources. The other initiatives are already being worked on and can be funded with existing functional activity budget other than for the initiatives “Promote and sustain a competitive environment in the Domain Name System” and “Implement New gTLD auction proceeds recommendation,” which will be funded separately.

ONE-YEAR OPERATING PLAN

• Approach

• FY22 Operating Initiatives

• FY22 Functional Activities
Approach

ICANN org’s FY22 Operating Plan includes descriptions of the major work ICANN org will undertake to achieve its Strategic Plan, operate the organization, and implement its Mission.

Operating initiatives describe how ICANN org will achieve the objectives and goals set out in the FY21–25 Strategic Plan. Functional activities are those necessary to operate the organization, such as Human Resources or Finance, or implement its Mission, such as Contractual Compliance or the IANA functions.

Each of the 15 operating initiatives and 34 functional activities provide what can be considered ICANN org’s statement of intention, outlining planned activities while acknowledging the challenges and dependencies that could impact ultimate delivery.
Operating Initiatives

FY22

The 15 operating initiatives listed here represent major areas of work that support the strategic objectives identified in the Strategic Plan. Each operating initiative describes the importance of the initiative as well as what ICANN org aims to achieve. Operating initiatives describe how ICANN org will achieve the objectives and goals set out in the ICANN Strategic Plan. Draft operating initiatives were published for Public Comment and presented to the ICANN Board for feedback.

- Support the Evolution of the Root Server System
- Facilitate DNS Ecosystem Improvements
- Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking
- Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking
- Develop Internal and External Ethics Policies
- Promote and Sustain a Competitive Environment in the Domain Name System
- Promote the Universal Acceptance of Domain Names and Email Addresses
- Root Zone Management Evolution
- Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem
- Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGOs) Engagement and Participation in ICANN
- Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration with Others that May Impact the ICANN Mission
- Formalize the ICANN Org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers
- Implement New gTLD Auction Proceeds Recommendations as Approved by Board
- Planning at ICANN
- ICANN Reserves
Support the Evolution of the Root Server System

PURPOSE
As the Root Server System evolves with greater demand, new technologies, and governance models, ICANN will continue to support and collaborate with key stakeholders to ensure the stable, secure, and resilient operation of the Domain Name System (DNS) root zone for the global Internet community.

SCOPE
This initiative covers these work areas:

• Support the implementation of the Root Server System Advisory Committee (RSSAC) document RSSAC037 “A Proposed Governance Model for the DNS Root Server System” and RSSAC038 “RSSAC Advisory on a Proposed Governance Model for the DNS Root Server System,” both published on 15 June 2018.

• Support eventual outcome of RSSAC 037 and 038 that could propose a plan for the coordination of an appropriate response to any Root Server System incidents.

• Develop mechanisms by which the community can be alerted to issues relating to overly-rapid growth in the root zone.

• Develop a prototype Root Server System Metric Monitoring System to collect data on the operation of the root server system as discussed in RSSAC 047.

• Encourage development of mechanisms to further distribute and scale the root of the DNS, e.g., “hyperlocal” root configuration in recursive resolvers and set up a root zone distribution service, as discussed in OCTO-016.

• Leveraging lessons learned from the first root zone Key Signing Key (KSK) rollover, define and publish a long-term root zone KSK Rollover Policy and implement the next rollover in accordance with that policy.
Support the Evolution of the Root Server System, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.
- Working with DNS root server operators and other relevant parties, ICANN continues to enhance the governance and technical evolution of DNS root server operations and services.
- ICANN, in collaboration with DNS root server operators and other relevant parties, develops a coordinated emergency plan to address DNS Root Server System attacks.
- Increased availability of root zone data enables greater decentralization and distribution of DNS root service.
- The Internet community’s trust in ICANN to provide resilient, scalable, and accountable Key Signing Key (KSK) management—as an adjunct to existing public key infrastructures—increases, facilitating improved security technologies and greater use of the DNS.

ACTIVITIES

During FY22, ICANN will:

- Begin prototype development of the Root Zone Scaling Early Warning System.
- Develop prototype of RSS Metric Monitoring System.
- Encourage hyperlocal configuration in recursive resolvers.
- Set up root zone distribution service.
- Publish and implement KSK Rollover Policy.

HOW PROGRESS IS TRACKED

During FY22, ICANN will establish formal projects for each of the activities above, including project plans with milestones and dates.
Support the Evolution of the Root Server System, Cont’d.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- The progression of RSSAC 037/038, such as development of a coordinated emergency response, requires collaboration between the Office of the Chief Technology Officer (OCTO) and Policy Development Support.

- Deployment of the root zone availability service will require collaboration with Global Stakeholder Engagement (GSE) and Government and IGO Engagement teams to reach audiences and coordinate messaging.

Learn more about ICANN’s overall approach in Appendix C — ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Political considerations surrounding root server operators.

- Continued unforeseen risks surrounding future Root KSK Rollovers.

- Ensuring the Root Server System continues to meet requirements as defined by the Internet community.
Facilitate DNS Ecosystem Improvements

PURPOSE
This initiative encompasses efforts to understand, document, and improve the emergency readiness of ICANN and other actors in the DNS ecosystem.

SCOPE
The scope of this initiative covers three main work areas:

• **Advocate and Promote Improvements to DNS Security Infrastructure**
  – Advocate for developers to enable Domain Name System Security Extensions (DNSSEC), both signing and validation, by default.
  – Promote hyperlocal as an additional root zone distribution model and encourage resolver developers to enable the technology by default.
  – Support the implementation of DNS-based Authentication of Named Entities (DANE).

• **Technical Engagement and Capacity Development**
  – Continue to improve and deliver capacity-building training on key Internet technologies that support a secured DNS ecosystem aligned with ICANN’s technical remit, such as DNSSEC and DANE. Work internally to expand ICANN org’s technical remit, such as DNSSEC and DANE.
  – Expand ICANN org’s training footprint.
  – Expand programs for DNS ecosystem security and technical engagement.
  – Work with the community to develop and promote commonly agreed norms for a secure DNS ecosystem.

• **Research**
  – Continue to collect data, analyze, and publish fact-based, unbiased, objective information on how the DNS is used and abused.
  – Research, report, and raise community awareness on Emerging Identifiers Technologies and how they impact and/or compare to the DNS.
  – Research the use of artificial intelligence to enhance understanding and identification of abusive trends in DNS registration.
STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.

- ICANN continues to provide a trusted forum that effectively convenes relevant parties for discussions on the security, stability, evolution, and interoperability of the DNS.

- ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.

- The inherent security of the DNS and unique identifiers system measurably increases, due to higher adoption of global open Internet standards and greater awareness of security threats among stakeholders.

- ICANN, in collaboration with relevant hardware, software, and service vendors, enhances knowledge about DNS safety and security.

- Security threats leveraging the DNS measurably decline as a result of encouraging relevant hardware, software, and service vendors to incorporate key security measures.

- The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

- Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

- The Internet community’s trust in ICANN to provide resilient, scalable, and accountable KSK management — as an adjunct to existing public key infrastructures—increases, facilitating improved security technologies and greater use of the DNS.

- Enhanced engagement with contracted parties creates more robust industry relationships, dynamic participation, and improved responsiveness to emerging technologies.

- Mechanisms are established for ICANN to assess new technologies and, when appropriate, embrace them.
Facilitate DNS Ecosystem Improvements, Cont’d.

ACTIVITIES

The FY22 activities will cover these work areas:

• **Advocate and Promote Improvements to DNS Security Infrastructure**
  – Advocate for developers to enable DNSSEC Validation by default.
  – Promote hyperlocal as an additional root zone distribution model and encourage resolver developers to enable the technology.

• **Technical Engagement and Capacity Development**
  – Create and continue to deliver capacity-building training on key Internet technologies, such as DNSSEC, that align with ICANN’s technical remit.
  – Work internally to expand ICANN org’s training presence.
  – Continue programs for DNS ecosystem security and technical outreach.
  – KINDNS launched in FY21 and work will continue in FY22.

• **Research**
  – Continue to collect data, analyze, and publish fact-based, unbiased, objective information on how the DNS is used and abused.
  – Research, report, and raise community awareness on emerging identifiers technologies and how they impact and/or compare to DNS.
  – Research artificial intelligence abuse prediction to better understand and identify abusive trends in DNS registration.
  – Continue collecting and presenting metrics surrounding Identifier Technology Health Indicators (ITHI).
  – Collect and report on domain abuse activity.
  – Identify and report on measurements that impact the work of ICANN org and the ICANN community.
  – Define the baseline and collect metrics based on security threats.

• **Facilitate**
  – Continue work with the community on identifying requirements for a DNS Security Facilitation Center Initiative.
  – Coordinate a Special Interest Forum on Technology (SIFT) to allow the community to engage technically with ICANN between Public Meetings.
  – Work with the community to define norms for proper DNS operations.
Facilitate DNS Ecosystem Improvements, Cont’d.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures will be used during FY22 for this initiative:

- Implementation of data collection and gathering for various statistical analyses.

RESOURCES
Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- Training and outreach activities require collaboration with the ICANN community as well as ICANN org functions such as GSE, Communications, and Government and IGO Engagement.
- Emergency preparedness efforts also support the work of teams such as Contractual Compliance.

Learn more about ICANN’s overall approach in Appendix C — ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers.

CONSIDERATIONS
The following risks and considerations exist for this initiative and may impact its advancement:

- Care must be taken not to exceed ICANN’s remit.
- Privacy considerations may impact activities.
- Lack of access to all the relevant data may impede activities.
- Key stakeholders may not agree with norms developed.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking

PURPOSE

This initiative aims to ensure that participation in the policy development work of ICANN’s three Supporting Organizations (SOs) and advice developed by the four Advisory Committees (ACs) are globally representative. The work of the SOs and ACs is carried out through the facilitation of informed participation in the policy process by diverse groups and interests, with clearly demonstrated levels of stakeholder support and commitment to reaching consensus.

SCOPE

The scope of this initiative covers these work areas:

- The regular cycle of Bylaws-mandated Organizational and Specific Reviews, which play a key role in identifying any new participation gaps and challenges, and developing and assessing possible short- and long-term solutions.

- The Bylaws-mandated reviews of stakeholder group and constituency charters ensure that the governance structures, membership and other rules of these groups are analyzed and improved to maintain recognition with the ICANN Board.

- The forthcoming implementation of the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2 recommendations will allow the community to inventory, document, and improve its processes and efforts to ensure diverse and inclusive participation in its work.

- Additional community, Board, and org work may be initiated to develop approaches and solutions as part of ongoing work to improve the effectiveness of ICANN’s multistakeholder model, including addressing the issue of representation and inclusivity as described in that work plan.

- Continuation of policy development support for the work of all the ICANN SOs and ACs, including stakeholder groups and constituencies, by providing subject matter and process expertise as well as day-to-day secretariat operations, is essential to ensure progress is made and documented.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.

• The knowledge and skill levels across the stakeholder community and organization increase, demonstrated by community members and ICANN org personnel equipped with basic knowledge of the DNS as well as ICANN policy and advisory processes.

• The ICANN community establishes mechanisms, such as an accurate measure of community participation, to equitably distribute workload among the pool of stakeholder representatives.

• Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.

• Continued efforts of the ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

• Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws

• Decision-making processes ensure that input from all stakeholders is considered.

• Improved multistakeholder model processes, such as Policy Development Process 3.0 (PDP 3.0) or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.

• ICANN stakeholders collaborate to define prioritization mechanisms that ensure the cumulative workload is reasonable at any one time, and that ICANN priorities reflect the community’s collective needs.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking, Cont’d.

ACTIVITIES

During FY22, ICANN org will focus on these work areas within this initiative:

• Continue planning and, where feasible, commence implementation of recommendations from the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2 (CCWG-Accountability WS2) final report.

• Continue implementation work on the outcomes of the third At-Large Summit (ATLASIII).

• Enhanced cross-functional work within the org to ensure effective collaboration with the community on next steps for addressing the issues identified in the work on Evolving ICANN’s Multistakeholder Model.

• Working with the community to evolve governance structures and prepare for implementation of Board-approved review recommendations.

• Formalize support for collaborative work by community leaders across the SOs and ACs and with ICANN org.

• Facilitate Generic Names Supporting Organization (GNSO) policy projects and activities, such as:
  – Continuation or completion of work on major policy development processes, including remaining work items from the Expedited Policy Development Process on Temporary Specification for gTLD Registration Policy (EPDP) Phase 2 and implementation of Phase 1 and Phase 2 recommendations adopted by the Board, and implementation planning on New gTLD Subsequent Procedures.
  – Support the new work track on IGO protections.
  – Support new policy work on Internationalized Domain Names (IDNs).
  – Continue developing improvements to tools for prioritizing, forecasting and tracking GNSO policy projects and activities.
Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking, Cont’d.

ACTIVITIES, Cont’d.

• Support for Country Code Names Supporting Organization (ccNSO) policy projects and activities:
  – Continuation or completion of work on a major ccNSO PDP on retirement of country code top-level domains (ccTLDs) and review mechanism pertaining to decisions on delegation, transfer, revocation, and retirement of ccTLDs.
  – Support new ccNSO PDP on review of IDN ccTLD policy.

• Facilitate and coordinate work on Address Supporting Organization (ASO) global policy projects and activities, including continued implementation of the 2019 Memoranda of Understanding with ICANN org.

• Support At-Large Advisory Committee (ALAC), Governmental Advisory Committee (GAC), Root Server System Advisory Committee (RSSAC), and Security and Stability Advisory Committee (SSAC) advice development, which includes drafting, research and facilitating the work of regional committees and working groups.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures are examples of those that will be used in FY22 for this initiative:

• Membership tracking by SOs, ACs, stakeholder groups, and constituencies and other metrics.

• Implementation of Board-approved recommendations from Organizational Reviews and Community Charter Reviews.

• Metrics related to Public Comment proceedings.

• Community activity indicators that track global participation in projects and activities as well as the translation and interpretation services required for those projects and activities.

• Reports and statistics for ICANN prep week and ICANN Public Meetings.
RESOURCES

The FY22 level of resources is generally expected to be consistent with the current level of personnel. Resources for increased use of virtual meeting tools and, if feasible in view of the COVID-19 pandemic, face-to-face or intersessional meetings may be needed to advance or complete major policy projects.

CONSIDERATIONS

Risks and considerations exist for this initiative and may impact its advancement:

• Community expectations for facilitation and other support from the Policy Development Support team must be balanced with robust discussions about costs and benefits. There is a connection between personnel levels and the ability to provide support to existing policy development and advisory work as well as the anticipated increase in projects and workload stemming from implementation of the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2 (CCWG-Accountability WS2) recommendations and Board-approved recommendations from the recently concluded reviews.

• Generally, extended operations by the Policy Development Support department below the 35 full-time employee (FTE) level runs the risk of:
  – Lower levels of service to the community and regional disparity.
  – Delayed policy and advisory outputs.
  – Community frustration and loss of active participants.
  – Potential team member burnout.

• Adequate funding for the Policy Development Support department budget is important as it may signal to the community:
  – Prioritization of policy activities integral to ICANN’s Mission.
  – Emphasis of support for community operations central to ICANN governance processes.
  – Organizational support for efforts to ensure global, diverse volunteer participation that provides legitimacy to ICANN’s multistakeholder model.
CONSIDERATIONS, Cont’d.

- Newer community members need time to get used to ICANN’s participation and working methods; veteran community members need to adjust to any new tools and platform changes.

- Ensuring effective participation can be challenging due to the diverse nature of community groups, priorities, interests, and structural issues (e.g., lack of alignment as between Board-community goals and priorities, need to factor in cadence of Bylaws-mandated review and Empowered Community timelines).

- As reliance on accurate and relevant data within the policymaking process increases, there is a need to develop capacity among community participants in data analysis and related skills.

- Continued impact of the COVID-19 pandemic is likely to affect the level of engagement and participation by community volunteers in ICANN policy activities, especially in view of time zone challenges and the greater reliance on virtual meetings.
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking

PURPOSE

This initiative focuses on the facilitation of more efficient, timely, and effective policy development work by ICANN’s three SOs and advice by the four ACs. Personnel support is provided for developing, documenting, and implementing changes, as well as improvements to community procedures and processes intended to reflect commitment to reaching consensus and effective policymaking.

SCOPE

The scope of this initiative covers these work areas:

• Periodic review by community groups of their internal procedures and requirements to address new challenges and gaps identified, such as improvements to membership outreach and participation requirements.

• Development and improvement of community templates and procedures in relation to the Empowered Community powers and Bylaws-mandated processes.

• Additional community, Board, and org work may be initiated to develop approaches and solutions to improve how consensus is achieved by addressing the issues identified in the ongoing work related to the Evolution of ICANN’s Multistakeholder Model.

• Policy Development Support personnel support for community projects and activities that strengthen the consensus-building process by providing guidance and clarifications on existing procedural rules, alternative processes, and possible improvements for community decision-making and planning.

• Management of Public Comment proceedings, community consultations, and other processes for public input that are essential for ICANN’s accountability and transparency.

• Organizational support for enhanced data collection and analysis, including legal or other types of expertise, surveys, and policy impact assessments.
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.

• Decision-making process ensures that input from all stakeholders is considered.

• Improved multistakeholder model processes, such as Policy Development Process 3.0 (PDP 3.0) or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.

ACTIVITIES

In FY22, activities for this initiative include:

• Support the Empowered Community and individual SOs, ACs, stakeholder groups, and constituencies in continuing to evaluate and revise their internal processes to ensure their ability to exercise Empowered Community powers under the Bylaws.

• Continue migration to ICANN org Customer Relationship Management (CRM) platform.

• Support Information Transparency Initiative (ITI), including implementation of improvements to Public Comment proceedings.

• Work with ICANN org Meetings, Language Services, Meetings Technical Services, Communications and Board Operations teams to implement improvements to ICANN meeting planning, in particular for virtual meetings support.

• Manage Public Comment proceedings, community consultations, and tools for communications from ICANN org and Board to the community.

• Collaborate with ICANN org’s new Planning function to engage the community in collaborative strategic planning to facilitate prioritization of community work in view of limited resources.
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures will be used in FY22 for this initiative:

- Progress on revisions to community charters and continued evaluation and refinements to procedures for Decisional Participants in the Empowered Community.
- Tracking implementation of GNSO PDP3.0 Improvements and use of the Consensus Playbook.
- Changes and process improvements related to ICANN Public Meeting planning.
- Establishing cadence for SO/AC community leaders’ roundtable sessions with ICANN org Executive Team and inter-sessional meetings between community leaders and groups with ICANN org Executives and Board.
- Progress on migration to CRM platform.

RESOURCES

The FY22 level of resources is generally expected to be consistent with the current level of personnel. Resources may be needed for additional face-to-face or intersessional meetings to advance or complete major policy projects.
Evolve and Strengthen the ICANN Community’s Decision-making Processes to Ensure Efficient and Effective Policymaking, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

• Community expectations for facilitation and other support from the Policy Development Support team must be balanced with robust discussions about costs and benefits. There is a connection between personnel levels and the ability to provide support to existing policy development and advisory work, especially given the potential launch of several new PDPs within this timeframe.

• Generally, extended operations by the Policy Development Support team below the 35 FTE level runs the risk of:
  – Lower levels of service to the community and regional disparity.
  – Delayed policy and advisory outputs.
  – Community frustration and loss of active participants.
  – Potential team member burnout.

• Adequate funding for Policy Development Support is important as it may demonstrate to the community:
  – Prioritization of policy activities integral to ICANN’s Mission.
  – Emphasis of support for community operations central to ICANN governance processes.
  – Organizational support for efforts to ensure global, diverse volunteer participation that provides legitimacy to ICANN’s multistakeholder model.

• Ensure the community is trained and supported on any changes or new technological tools or platforms, particularly in light of the increased reliance on virtual meetings.

• Prioritization is challenging and tools are needed to engage in meaningful and effective prioritization.

• Lack of academic-quality policy research despite having qualified personnel, due to workload issues.

• Limited data collection to date means that data-driven policy work has been difficult and time-consuming, and that decision-making is sometimes required without specific data or other factual evidence.

• Continued impact of the COVID-19 pandemic could negatively affect project timelines and community decision-making time frames.
Develop Internal and External Ethics Policies

PURPOSE
This operating initiative focuses on the continued development of internal and external ethics policies to guide behavior within ICANN org and the community. The internal ethics policy will provide additional guidance and direction for ICANN org. This will continue to improve the confidence that the ICANN community places in personnel, by providing further transparency into how ICANN org expects personnel to conduct their work.

The ICANN community ethics policy will provide transparency and guidance regarding how members of the ICANN community should approach their ICANN-related work and interact with one another.

SCOPE
The scope of this initiative covers these work areas:
- Develop an internal ICANN org ethics policy.
- Develop an ICANN community ethics policy.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
- ICANN Board and org continue enhancing transparency initiatives and upholding accountability.
- ICANN community enhances their transparency practices to increase cross-community accountability and trust.

ACTIVITIES
Over FY22, ICANN org will:
- Continue development of an ICANN org ethics policy to provide additional guidance and direction for ICANN org personnel.
- Continue development of an ICANN community ethics policy that provides transparency and guidance in how members of the ICANN community approach their ICANN work and interact with each other.
Develop Internal and External Ethics Policies, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures are examples of those that will be used in FY22 for this initiative:

- Development of an internal ICANN org ethics policy.
- Conduct community engagement on areas for community ethics policy and programs.
- Conduct an assessment to understand the baseline ethics level as of FY21.
- Continued research and development of plans or policies to continue evolution of ethics work.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- The Legal team leads this initiative and coordinates with Human Resources.
- Collaboration with ICANN org’s Engineering and IT department to help with tracking mechanisms.

CONSIDERATIONS

The primary risks that may impact this initiative’s advancement are the lack of internal and external awareness of the work and resulting lack of buy-in to the effort, as well as availability of community resources to meaningfully engage in discussion.
Promote and Sustain a Competitive Environment in the Domain Name System

PURPOSE

This initiative encompasses ICANN org activities in support of a competitive environment in the DNS marketplace. This includes preparation for the launch of additional rounds of new gTLDs, applying knowledge gained through the implementation of the 2012 round and subsequent reviews aimed at evaluating different aspects of the program. ICANN org is in the pre-planning phase of a potential subsequent round of new gTLDs, monitoring community discussions, supporting Board and community work, and estimating anticipated resource requirements.

Policy development concerning additional rounds is underway through processes such the GNSO’s New Generic Top-Level Domain Subsequent Procedures Policy Development Process Working Group. Based on the Working Group’s progress and work plan, it is anticipated that significant planning and implementation work around completed policy recommendations will occur in FY22.

SCOPE

The scope of this initiative covers these work areas:

• Implementation of community-developed recommendations that the Board adopts and then directs ICANN org to implement prior to opening the next application window.

• Implementation of an operational infrastructure (systems, processes, and people) to support ongoing operations of the New gTLD Program.

• Development and execution of a global communications and awareness campaign.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Support the continued education of the Internet’s unique identifier systems with a new round of gTLDs that is responsibly funded, managed, risk-evaluated, and consistent with ICANN processes.
Promote and Sustain a Competitive Environment in the Domain Name System, Cont’d.

ACTIVITIES

Planning assumes that the policy recommendations for the Subsequent Procedures Policy Development Process Working Group will have been completed and approved by the GNSO Council by or in FY22. Based on this assumption, activities for this initiative include.

• Supporting the Board of Directors in developing information and analysis necessary to inform decisions on the policy recommendations.

• If approved by the Board, developing program documentation for the application process in line with new policy guidance.

• Convening the Implementation Review Team (IRT) to review and provide input on the implementation plan.

• Planning and executing operational readiness activities including systems, tools, process definition, procurement, and other activities.

• Planning and executing communications and outreach to support the program.

HOW PROGRESS IS TRACKED

ICANN org will create a dedicated page for publications and announcements relating to the work on new gTLDs. This is in addition to the standard policy implementation tracking mechanisms. Reporting and feedback will also occur via meeting sessions, webinars, public comment periods, and other mechanisms as appropriate.
RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. This project will require significant cross-functional collaboration and support from across the organization, including Legal, Communications, GSE, Human Resources, Finance, Global Domains and Strategy, Office of the Chief Technology Officer, IANA, and Engineering and Information Technology.

Based on the initial reports issued by the New gTLD Subsequent Procedures (SubPro) Policy Development Process Working Group, the processing of applications received through future application rounds for new gTLDs is expected to remain subject to the principle of cost recovery, meaning that funding the necessary preparatory and development expenses (as well as future processing fees) comes from fees paid by applicants. Two implications should be noted: First, application fees may need to be set at levels that are appropriate for the repayment of the preparatory and development expenses to be incurred to launch the next round. Second, an alternative and temporary source of funds will need to be used to cover these expenses, which will be incurred before application fees are received. This source of funding will need to be identified and approved by the Board.

CONSIDERATIONS

At this pre-planning phase, ICANN org continues to monitor discussions and engage in pre-planning activities, provide Board and community support, support preliminary analysis of implementation feasibility and options, and estimate resources. Preparation for a subsequent round of new gTLDs is expected to be a major effort for ICANN org to support during FY22.
Promote the Universal Acceptance of Domain Names and Email Addresses

PURPOSE
This program encompasses ICANN org’s Universal Acceptance (UA) efforts to ensure that Internet applications and systems treat all top-level domains (TLDs) in all scripts and email addresses based on those domains in a consistent manner. UA promotes consumer choice and provides broader access to end users.

SCOPE
The current scope of this initiative covers these work areas:

• Outreach to providers of standards, programming language, tools, and platforms to support UA.
• Raise awareness and capacity of technology developers to develop or update applications to be UA-ready.
• Raise awareness and capacity of email tools and service providers to support internationalized email addresses.
• Raise awareness in the public sector for governments to require UA readiness in their tendering processes.
• Update ICANN org’s relevant technical systems to be UA Ready.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN engages in greater cooperation with stakeholder groups and different policy and standards development bodies locally, regionally, and globally, to raise awareness about UA, IDN implementation, and Internet Protocol version 6 (IPv6).
• IDNs are increasingly adopted and treated in a standard fashion by software vendors.
• Identify and mitigate security threats to the DNS through greater engagement with relevant hardware, software, and service vendors.
Promote the Universal Acceptance of Domain Names and Email Addresses, Cont’d.

- Foster competition, consumer choice, and innovation in the Internet space by increasing awareness and encouraging readiness for UA, IDN implementation, and IPv6.

**ACTIVITIES**

During FY22, ICANN org will:

- Conduct gap analyses of social media and networking tools and content management systems for UA readiness.

- Set up a mechanism to reach out to technology developers for UA remediation.

- Continue to raise awareness and capacity of technology developers for UA-readiness based on local initiatives in different geographies.

- Support the community-based UA working groups on technology, email address internationalization, communications, and measurements as well as its local initiatives in different countries to promote UA readiness.

- Conduct outreach to two relevant standards bodies and to providers of programming language, tools, and platforms to support UA. Raise awareness and capacity of technology developers for UA-readiness based on local initiatives in different geographies.

- Engage with the ALAC and GAC and work with ICANN org’s GSE and Government and IGO Engagement teams on a communication strategy to raise awareness especially among public sector organizations and implement local initiatives.

**HOW PROGRESS IS TRACKED**

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following milestones will be used in FY22 for this initiative:

- Document the progress on UA readiness of technology for FY22, with current status documented in FY21 annual report. This will include gap analysis for tools and technologies, development of training materials, training on UA, and outreach to stakeholders to make technology UA ready.
Promote the Universal Acceptance of Domain Names and Email Addresses, Cont’d.

RESOURCES

UA work will support the recently created community-based working groups and local initiatives focusing on specific geographies. The work will require close collaboration with ICANN org’s GSE and Government and IGO Engagement teams to prepare to support the local initiatives and engage the public sector. Support from the Communications team also will be needed to help in planning and outreach.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Efforts to increase UA means reaching and activating stakeholders beyond the conventional ICANN community that may have different priorities.
- Raising awareness and encouraging UA as a mainstream design consideration may require considerable effort and time.
Root Zone Management Evolution

PURPOSE

This initiative supports the continued advancement of the technology platform used to provide root zone management services. This system manages the workflow of change requests from customers, automates many aspects of the processing, and ensures quality, accuracy, and timeliness of the business process.

Root Zone Management today continues to evolve toward more complex requirements and the need to cater for higher customer expectations. Work to improve the platform and service offering adapts to these requirements in order to retain high levels of customer satisfaction and continue to adhere to advancing policy requirements.

SCOPE

The scope of this initiative covers these work areas:

- Identify features and enhancements of how the root zone is managed that will improve operations while ensuring accuracy, quality, and timeliness of business processes.

- Develop solutions for the evolution of requirements from the New gTLD Subsequent Procedures Policy Development Process and technological developments related to Internationalized Domain Names.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Mechanisms are established with which ICANN assesses new technologies and, when appropriate, embraces them.

- ICANN collaborates with relevant parties and effectively leverages partnerships in the IETF, Regional Internet Registries, and naming communities to develop and integrate new technologies with existing Internet protocol structures, including the DNS.

- ICANN org continues to provide reliable delivery and continuous improvement of the IANA functions, consistent with community service level agreements.

- ICANN promotes and supports awareness of the IANA functions, including among stakeholders, to successfully maintain the broad array of Internet unique identifiers and deliver effective DNS root zone operations.
Root Zone Management Evolution, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

- The expansion of the DNS root zone attracts continued investment and innovation, as indicated by market developments and new registry services.
- The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.
- Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

ACTIVITIES

In FY22, ICANN org will:

- Complete a rewrite of the Root Zone Management System (RZMS).
- Continue to monitor the policy development work being done in the ICANN community (most notably through the New gTLD Subsequent Procedures Policy Development Process and on Internationalized Domain Names) to ensure RZMS will meet those emerging requirements.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following are FY22 milestones for this initiative:

- Launch of significant new version of RZMS with rearchitected backend.
- Launch of new authorization model to allow additional appropriate parties to be authorized as TLD managers with associated user management improvements.
- Launch of customer application programming interface (API) access.
Root Zone Management Evolution, Cont’d.

RESOURCES
Software development resources (provided by ICANN org) through a contract between ICANN and its affiliate Public Technical Identifiers (PTI). Projected to remain constant for FY22 and likely to taper in subsequent years as maintenance backlog is cured and significant pending functionality is deployed.

Learn more about ICANN’s overall approach in Appendix C — ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers.

CONSIDERATIONS
The following risks and considerations exist for this initiative and may impact its advancement:

• Success is heavily dependent on the stability and commitment of engineering resources. In the past year ICANN has seen a more predictable cadence of development which helped bring the enhancements to the community in a timely fashion.

• The greatest risks are the loss of development resources that are prioritized to other objectives.

• The inability for IANA to provide sufficient designs and requirements settings to inform development.

• Policy development work being done in the ICANN community, such as through the New gTLD Subsequent Procedures Policy Development Process and for Internationalized Domain Names, must be monitored to ensure RZMS will meet those emerging requirements.
Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem

PURPOSE

Increasingly, governments and intergovernmental organization forums develop policies, legislation, and regulations that impact the Internet. In some cases, this may also impact ICANN’s ability to develop policies, run its operations, and fulfill its Mission. To address this and to ensure a single, globally interoperable Internet, ICANN plans to identify where these discussions and initiatives are taking place and determine where ICANN has or should engage to address these initiatives. This work follows the issues identified through the trend assessment work conducted by ICANN as part of the strategic planning process. This process also will identify any activities ICANN org’s Government and IGO Engagement team will need to reduce or stop as well as where targeted engagement must increase.

SCOPE

The scope of this initiative covers these work areas:

- Reviewing trends, existing agreements and relationships, conducting an analysis of the relationship between ICANN and these government and intergovernmental organization forums, and developing an approach to align engagement through face-to-face and virtual gatherings.

- Identifying bodies within the Internet ecosystem that are relevant to ICANN’s remit and analyzing others to assess whether ICANN org should be more involved with them or in other arenas.

- Considering other opportunities for influencing global Internet issues.
Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN fosters successful and mutually beneficial relationships with local, regional, and global partners to ensure knowledge building about ICANN and its Mission continues.
- ICANN is engaged, its role acknowledged, and its presence valued in the arenas where topics within its remit are discussed.
- ICANN plays an important role in raising awareness among legislators, regulators, and stakeholders about its Mission and the effect of various regulatory and other proposals on the Internet ecosystem.

ACTIVITIES

In FY22, ICANN org will:

- Continue cross-functional assessment work in collaboration with other ICANN functions to inform ongoing engagement work.
- Continue collaboration with other organizations in the Internet governance ecosystem following the completed FY21 mapping and assessment to address challenges that arise in various IGO arenas.
- Revise engagement plan to reflect the prioritization or reprioritization of engagement based on the ecosystem mapping and the MoU evaluation and relationship assessment completed in FY21.
- Continue socializing the concept of technical Internet governance through speaking engagements.
- Publish a document that serves as a definitional publication for the distinction between technical Internet governance and previous description of Internet governance.
Evaluate, Align, and Facilitate Improved Engagement in the Internet Ecosystem, Cont’d.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of measures, milestones and reports to ensure that initiatives advance. These measures are examples of those that will be used in FY22 for this initiative:

• Completion of cross-functional inventory of relationships in the Internet ecosystem.
• Completion of assessment of current mechanisms and identify gaps.

RESOURCES
While the Government and IGO Engagement team will lead global strategy and political and environmental assessments of global intergovernmental organizations and initiatives, collaboration will be needed as follows:

• Political assessment input from ICANN org’s regional engagement offices regarding activities in the national capitals, regional trends, and influences.
• Communications team to develop narratives to ensure consistent messaging.
• Legal analysis of reports on the potential impact of legislative or regulatory activity.

CONSIDERATIONS
The following risks and considerations exist for this initiative and may impact its advancement:

• Possible increased resources needed to cover new venues with additional technical resources for legislative analysis.
• Possibility of forging an alliance with an organization that takes the contrary position to ICANN on a common issue.
• Potential perception from some in the community that reassignment of work might lead to a change in funding or reducing some participation in events at a level that the community previously had become accustomed.
Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGO) Engagement and Participation in ICANN

PURPOSE

This operating initiative addresses two focal areas: working with governments and IGOs engaged with ICANN and the policy development process through the GAC; and more broadly working with governments and IGOs on issues beyond those being addressed through policy development processes.

Governments and IGOs participate in the ICANN policy development process through the GAC. Its members consider and provide advice on the activities of ICANN as they relate to concerns of governments, particularly matters where there may be an interaction between ICANN’s policies and various laws and international agreements or where they may affect public policy issues.

The GAC has steadily grown in membership and participation, yet has more turnover of its representatives than other advisory committees. As a result, some GAC representatives are less familiar with ICANN’s processes and issues, making it difficult for them to effectively engage. It is important, where possible, for governments to participate in ICANN rather than addressing potential issues through external legislative or regulatory activity.

Additionally, dialogues that will impact ICANN increasingly involve different aspects or ministries of national governments than those commonly participating in ICANN through the GAC. Therefore, activity has to be broader than government and IGO activity within ICANN’s policy development process. This requires targeted engagement through global, regional and national governmental events, including new structures and diversified venues where dialog is conducted on topics such as cybersecurity, data protection, privacy, cultural and geographic identifiers, emerging technologies, and proposed new systems of unique identifiers.
Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGO) Engagement and Participation in ICANN, Cont’d.

SCOPE

The scope of this initiative covers these work areas:

• Assessing the expectations of government participants within the GAC.

• Creating targeted information and capacity development materials to better equip government stakeholders around the world, enabling them to become more active participants in ICANN’s policymaking processes.

• Assessing expectations of government participants in capacity-development activities.

• Creating targeted materials as needed for government participants.

• Assessing and mapping the scope of global dialogue venues relevant to ICANN on topics such as cybersecurity and the unique identifiers.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN org continues to develop and evolve systems to detect and monitor legislative and regulatory initiatives and other governmental or IGO actions or initiatives that could impact ICANN’s Mission or operations.

• ICANN fosters successful and mutually beneficial relationships with local, regional, and global partners to ensure knowledge-building about ICANN and its Mission continues.

• ICANN plays an important role in raising awareness among legislators, regulators, and stakeholders about its Mission and the effect of various regulatory and other proposals on the Internet ecosystem.
Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGO) Engagement and Participation in ICANN, Cont’d.

ACTIVITIES

In FY22, ICANN org will:

• Prepare for the possibility of three capacity-building trainings in FY22.

• Continue creating targeted materials as needed for government participants. This may include informational papers on various IGO processes, resolutions, and issues so that participants understand the potential impacts of the resolutions or initiatives on the global, interoperable Internet.

• Delivery of the postponed FY21 High-Level Governmental meeting may occur in FY22 as a virtual or in-person event in conjunction with ICANN71, depending on the COVID-19 pandemic safety protocols and discussions with the GAC.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures are examples of those that will be used in FY22 for this initiative:

• Delivery of High-Level Governmental Meetings.

• Reports and statistics on participation in outreach, technical briefings, and capacity development sessions for the GAC as well as through collaboration with other organizations in the ecosystem.

• Completed review of existing Memoranda of Understanding (MoUs) for continuing alignment with goals.

• Metrics related to the number of countries and intergovernmental organizations represented in the GAC and the number of countries and IGOs actively participating in GAC and ICANN policy processes.
Through Targeted Engagement Improve Governmental and Intergovernmental Organization (IGO) Engagement and Participation in ICANN, Cont’d.

RESOURCES
Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- Regional Global Stakeholder Engagement teams to identify which countries are not part of the GAC.
- Government and IGO Engagement team and Global Stakeholder Engagement team to conduct gap analysis on IGOs that are not part of the GAC.
- Communications team to develop a consistent narrative for outreach messaging.
- Public Responsibility Support Team to develop online courses.
- Office of the Chief Technology Officer to develop technical capacity development curriculum to assist with training and capacity development through the GAC’s Underserved Regions Working Group (USRWG) work plans and other collaboration initiatives in the Internet governance ecosystem.

CONSIDERATIONS
The following risks and considerations exist for this initiative and may impact its advancement in FY22:

- Leadership changes and challenges in partnering agencies.
- Realignment of work plan to reflect the revisions to the engagement strategy, changes in roles for ICANN org’s Government and IGO Engagement team and Global Stakeholder Engagement team.
Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration With Others That May Impact the ICANN Mission

PURPOSE
This initiative builds on the work begun by ICANN org in 2018 to identify and report on legislative and regulatory developments around the world that could have an impact on ICANN’s ability to fulfill its Mission. Part of ICANN’s work within this initiative is providing educational information to governments on those issues in order to help ensure that lawmakers have the full benefit of ICANN’s technical expertise.

SCOPE
The scope of this initiative covers these work areas:

• Examine existing processes and further develop the mechanisms to capture community feedback and input.

• Creation of an internal assessment mechanism. ICANN org will also review its experience in FY20 to inform the process of determining the criteria for escalation from monitoring to activity of a use case, which will act as a resource in outreach and engagement efforts.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN org continues to develop and mature systems to detect and monitor legislative initiatives and other governmental or IGO actions or initiatives that could impact ICANN’s Mission or operations.

• ICANN org proactively engages with the community to develop common awareness of ICANN’s contribution to the early warning system.

• ICANN has effective processes in place to receive and act on input from the community.

• ICANN effectively convenes and facilitates discussions with relevant parties to help address relevant global challenges and opportunities.
Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration With Others That May Impact the ICANN Mission, Cont’d.

ACTIVITIES

In FY22, ICANN org will:

- Utilize the to-be-completed assessment and monitoring process during FY21, continue monitoring and assessing legislative and regulatory developments around the world that could have an impact on ICANN’s ability to fulfill its Mission.
- Conduct outreach and education activities such as events and speaking opportunities.
- Develop community dialogue mechanism with support of ICANN org’s Policy Development Support department.
- Plan two sessions at the United Nations in New York, two sessions in Brussels, and two to four capacity-building sessions for governments.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following measures will be used in FY22 for this initiative:

- Publication of reports to the community on legislative or regulatory events being tracked.
- Publication of technical assessments and use cases.
- Number of outreach events and speaking opportunities.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- Regional Global Stakeholder Engagement teams to provide analysis of upcoming regional legislation that might impact ICANN.
- Government and IGO Engagement team to provide data collection/analysis, awareness raising, and technical briefings.
- Office of the Chief Technology Officer to assess the impact of proposed legislation on the DNS and to conduct use case analysis as applicable.
Monitor Legislation, Regulation, Norms, Principles, and Initiatives in Collaboration With Others That May Impact the ICANN Mission, Cont’d.

RESOURCES, Cont’d.

- Legal to review reports on legislative and regulatory activity.
- Communications to develop a narrative to ensure consistent messaging on key issues.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Resources are needed to monitor and compare information across various venues to detect the “weak signals” early enough to identify trends and evaluate actions to address possible challenges.
- Political judgment is crucial in determining when to move from monitoring to active educational engagement efforts.
- Limited ability to provide briefings and technical trainings and other engagement efforts in some political structures.
Formalize the ICANN Org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers

PURPOSE

The domain name marketplace has matured over the past five years, following the 2012 round of the New gTLD Program. To provide a solid foundation for future funding projections, ICANN org must analyze its funding model within the context of the marketplace, reviewing key market enablers, and challenges to domain name industry growth over the same period. This initiative brings together those activities.

SCOPE

The scope of this initiative covers these work areas:

• Review and analyze trends and driving forces of the domain name industry marketplace.

• Seek to validate and improve forecasting accuracy through review of data including zone files, registry transaction reports, contracted party family affiliation, corporate disclosures, market intelligence, and more.

• As ICANN org formalizes its funding model, it plans to evaluate the migration of the forecast model to a platform that will provide a robust system for preparing and analyzing future funding projections.
Formalize the ICANN org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- The ICANN Strategic Plan is supported by a five-year Operating and Financial Plan. All plans are updated as and when necessary to take into account relevant changes in ICANN’s environment.

- Evolution to five-year rolling financial planning allows ICANN to appropriately address changes that impact ICANN’s budget, operating and financial plan, or strategic plan.

- ICANN has reliable and predictable five-year funding projections, based on a sound understanding of the evolution in the domain name marketplace and realistic assumptions.

- ICANN utilizes data about the directions and trends in the market to effectively guide the organization.

ACTIVITIES

In FY22, ICANN org will:

- Continue to enhance the funding forecast tool and supporting platform. This may include exploring additional software or hardware resources to support the forecasting process.

- Continue to increase ICANN’s overall domain market intelligence in relation to the forecasting process. For instance, ICANN org must expand its understanding and knowledge of the prospective impacts of the COVID-19 pandemic on its future funding.

- Continue to improve in cross-functional knowledge-sharing to contextualize market intelligence in relation to the forecast.

- Annual delivery of funding assumptions and projections for the next five fiscal years.
Formalize the ICANN org Funding Model and Improve Understanding of the Long-term Domain Name Market Drivers, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. These measures are examples of those that will be used in FY22 for this initiative:

• Build and establish a process to develop the funding model during FY22.

• Explore options for a new tool or platform.

• Annual delivery of funding assumptions and projections for the following five fiscal years.

• Continued enhancement of funding model tools and increasing the team’s domain market intelligence in relation to the forecasting process.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• The skills of ICANN org’s Global Domains and Strategy (GDS), Finance, and Engineering and IT teams to evaluate and migrate the current forecast model to a more robust platform.

• The skills of ICANN org’s GDS, Finance, Office of the Chief Technology Officer, and Global Stakeholder Engagement teams to collect and contextualize market intelligence in relation to the forecast.

• Processes and tools are in place to effectively prioritize and periodically reprioritize work.

CONSIDERATIONS

It is not clear how threats to the DNS might impact ICANN’s funding. ICANN org must expand its understanding and knowledge of the impact these threats may have.
Implement New gTLD Auction Proceeds Recommendations As Approved by Board

PURPOSE

This initiative relates to preparations for the implementation of the Board decisions following the recommendations arising from the Cross-Community Working Group on New gTLD Auction Proceeds (CCWG-AP).

SCOPE

The scope of this initiative covers these work areas:

• ICANN org will facilitate a review of the specific roles of the Board and ICANN org in this initiative. The specific roles of the Board and ICANN org in the various stages of the operational and review stage are yet to be determined. However, regardless of the eventual processes or structures needed and/or the use of external entities, the Board remains ultimately accountable for the actions related to the proceeds.

• ICANN org will provide operational design and feasibility assessments and costs for the ICANN Board’s consideration of the CCWG-AP recommendations.

• ICANN org to implement the Board decisions following the recommendations, including coordination with a community implementation review team.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Funding, expenses, and reserves are addressed in each plan in a manner consistent with policies, Board decisions, strict financial responsibility, and conservatism.

• ICANN prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.

• ICANN has processes and tools in place to effectively manage and control costs.

• Financial accountability and responsibility guide how decisions are made prior to committing ICANN’s resources, and how expenses are managed once approved, not to exceed those commitments.

• Key cost drivers are clearly defined and understood.
Implement New gTLD Auction Proceeds Recommendations As Approved by Board, Cont’d.

ACTIVITIES

In FY22, ICANN org:

- Expects to conduct an implementation feasibility review assessment, develop the implementation plan and begin execution of deliverables outlined in the plan dependent on Board direction and approval.

HOW PROGRESS IS TRACKED

Work within this initiative will happen in distinct stages, dependent on ICANN Board and community actions. The specific milestones guiding next steps are:

- Implementation feasibility review assessment.
- Board consideration of recommendations.
- Development of implementation plan.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

- The final recommendations approved by the Board and the design of the implementation plan will drive costs, which will be funded out of the auction proceeds.
- The recommendations will need to be reviewed from a resourcing standpoint in order to understand practicalities, including estimated workload, potential new hires, and needed skills.
- As implementation progresses, the internal ICANN resources supporting this work will be reimbursed to ICANN’s operations from the auction proceeds.

CONSIDERATIONS

This work is dependent on the pending Board action on the CCWG-AP Final Report recommendations. As the community has an expected role in participation in parts of the implementation effort, community resources and prioritization must be taken into account.
Planning at ICANN

PURPOSE
Careful planning of ICANN activities helps safeguard ICANN’s long-term financial sustainability and ensure that ICANN org is accountable to the public in its stewardship of ICANN’s Mission. This initiative encompasses ICANN org planning activities.

SCOPE
As part of its planning efforts, ICANN org strives to improve the quantification of resources, evaluation of needs, prioritization, flexibility, and transparency of the management of ICANN’s resources and activities over FY22–26.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• ICANN org prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.
• ICANN org has processes and tools in place to effectively manage and control costs.
• Financial accountability and responsibility guide how decisions are made prior to committing ICANN’s resources and how expenses are managed once approved in order to stay within those commitments.
• Key cost drivers are clearly defined and understood.
• Risk assessments are periodically reviewed to determine the adequacy of ICANN’s Reserve Fund level to address potential mitigation needs.

ACTIVITIES
In FY22, ICANN org will:
• Further refine ICANN’s strategic planning and operating planning processes.
• Research, develop and engage with community and Board regarding a draft prioritization approach.
Planning at ICANN, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that this initiative advances during FY22. ICANN org plans to:

• Deliver a draft prioritization approach.

RESOURCES

Effective cross-functional collaboration is an essential element for success in most of ICANN org’s work. Specific examples of collaboration needed for this initiative are:

• Planning involves all stakeholders of the ICANN ecosystem, including the ICANN Board, community, org, and the public.

• The number of ICANN org resources involved over the plan period is expected to increase as compared to the previous plan period. This is planned to accommodate the need for operational alignment, prioritization, increased number and quality of plans, and increased communication.

• Limited external resources will be needed to help with education, skills, and facilitation at the beginning of the period as internal capabilities ramp up.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

• A lack of organizational support for cross-collaboration efforts may delay an effective planning process.

• Newer community members need time to get used to ICANN’s planning process and may not fully engage in Public Comment proceedings.

• Planning team will need to provide information and engagement opportunities to ensure that the Bylaws-mandated review and Empowered Community timelines are achievable.
ICANN Reserves

PURPOSE
To safeguard ICANN’s long-term financial sustainability and ensure that ICANN org is accountable to the public in its stewardship of ICANN’s Mission, the level of ICANN reserves must be continuously set, reached, and maintained consistent with the complexity and risks of ICANN’s environment.

SCOPE
The scope of this initiative covers these work areas:

- Ensure implementation of Board resolution from October 2018 to replenish the Reserve Fund to an amount equal to one year of operating expenses as the minimum target level of the Reserve Fund.
- Maintain minimum target level of the Reserve Fund as operating expenses change.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Financial accountability and responsibility guide how decisions are made prior to committing ICANN’s resources, and how expenses are managed once approved, to stay within those commitments.
- Replenishment strategy for ICANN’s Reserve Fund is adhered to and implemented successfully.
- Risk assessments are periodically reviewed to determine the adequacy of ICANN’s Reserve Fund level to address potential mitigation needs.

ACTIVITIES
For information on FY22 finances, please see the FY22 Budget for the Reserve Fund balance and planned replenishment.
Functional Activities

FY22

Functional activities are those necessary to operate the organization, such as Human Resources or Finance, or implement ICANN’s Mission, such as Contractual Compliance or the IANA department.

The 34 functional activities have been placed into five service groups. These service groups were selected because they represent the broad categories of work that ICANN org conducts in fulfillment of its Mission, and express the functional activities at a high level.

Five Service Groups:

- Technical & DNS Security
- Policy Development & Implementation Support
- Community Engagement & Services
- ICANN Org Governance
- ICANN Shared Services
Functional Activities

FY22

Technical & DNS Security

- Office of the Chief Technology Officer
- ICANN Managed Root Server
- Internationalized Domain Names and Universal Acceptance
- IANA Functions
- Contractual Compliance
TECHNICAL & DNS SECURITY

Office of the Chief Technology Officer

PURPOSE
ICANN org’s Office of Chief Technology Officer (OCTO) aims to constantly improve knowledge about the identifiers ICANN helps to coordinate, to disseminate this information to the Internet community, to improve the technical operation of the Internet’s system of unique identifiers, and to improve ICANN’s technological stature.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Support the evolution of the Root Server System.
• Lead: Facilitate DNS ecosystem improvements.
• Support: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.
• Support: Through targeted engagement improve governmental and intergovernmental organization (IGO) engagement and participation in ICANN.
• Support: Monitor legislation, regulation, norms, principles, and initiatives in collaboration with others that may impact the ICANN Mission.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.
• ICANN continues to provide a trusted forum that effectively convenes relevant parties for discussions on the security, stability, evolution, and interoperability of the DNS.
• ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.
• Working with DNS root server operators and other relevant parties, ICANN continues to enhance the governance and technical evolution of DNS root server operations and services.
• ICANN, in collaboration with DNS root server operators and other relevant parties, develops a coordinated emergency plan to address DNS Root Server System attacks.
Office of the Chief Technology Officer, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• The inherent security of the DNS and unique identifiers system measurably increases, due to higher adoption of global open Internet standards and greater awareness of security threats among stakeholders.

• ICANN, in collaboration with relevant hardware, software, and service vendors, enhances knowledge about DNS safety and security.

• Security threats leveraging the DNS measurably decline as a result of encouraging relevant hardware, software, and service vendors to incorporate key security measures.

• The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

• Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

• The Internet community’s trust in ICANN to provide resilient, scalable, and accountable Key Signing Key (KSK) management — as an adjunct to existing public key infrastructures — increases, facilitating improved security technologies and greater use of the DNS.

• Enhanced engagement with contracted parties creates more robust industry relationships, dynamic participation, and improved responsiveness to emerging technologies.

• Mechanisms are established with which ICANN assesses new technologies and, when appropriate, embraces them.

ACTIVITIES

• External Operations: Activities that have an external impact, such as creating the DNS Security Facilitation Center and prototyping the Emergency Warning System. A new activity in the feasibility phase in FY22 is the Domain Name Security Threat Identification, Collection and Reporting (DNSTICR) activity which aims to develop an ongoing solution for identifying, documenting, and reporting domain names that are being actively abused.

• Technical Engagement and Outreach:
  – Support and provide training, engagement, and outreach to the technical community on current and upcoming technologies.
**ACTIVITIES, Cont’d.**

- Support other ICANN org teams such as Global Stakeholder Engagement and Government Engagement.

**Research:** Activities centered around the analysis of the impact of new and existing technologies to the Internet’s unique identifier systems as well as the investigation of new technologies and how they may impact the unique identifier ecosystem. ICANN org anticipates a number of OCTO-led implementations will be forthcoming from the final recommendations from the Security, Stability, and Resiliency (SSR2) review. ICANN org will continue work related to the Name Collision Analysis Project (NCAP) Study 1 and monitor and support decisions related to next steps for NCAP studies 2 and 3.

**Reporting:**

- Providing tools and platforms in which to report on various aspects of the unique identifier ecosystem, such as Domain Abuse Activity Reporting (DAAR) and Identifier Technologies Health Indicators (ITHI).
- Leading or supporting other work such as the Registrar Audit Study or verifying ICANN’s contracted parties are meeting their contractual obligations related to IPv6 deployment.
- Track and implement Board-approved recommendations from SSR2.

**Internal Operations:**

- Activities that have an internal impact or recurring activities, such as support of the Action Request Register (ARR) and implementation of recommendations from Specific Reviews and policy development processes.
- Collaboratively working with ICANN’s Public Responsibility Support team on online learning development.
- Project management.
- Team meetings and planning.
TECHNICAL & DNS SECURITY

Office of the Chief Technology Officer, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the fiscal period for this functional activity:

- **External Operations:** Many of the progressions and milestones will be tracked via the operating initiatives, such as:
  - Formalization of the Special Interest Forum on Technology (SIFT) program.
  - Establishing community agreement on the DNS Security Facilitation Center.
  - Items related to root zone availability service being deployed.
  - Development and evaluation of DNSTICR.

- **Technical Engagement and Outreach:**
  - More DNS resolver developers enabling hyperlocal technology.
  - Increase in community technical engagement and training to relevant community stakeholders.

- **Research:**
  - Track and support recommendations for NCAP studies 2 and 3.

- **Reporting:**
  - Data or reports published such as DAAR and ITHI reporting, publication of technical papers, etc.
  - Implement data collection and gathering for various statistical analyses.
  - Track and report on implementation of Board-approved recommendations for SSR2.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Bandwidth constraints or competing demands on the available personnel resources due to the resource acting as a subject matter expert for internal and community efforts.

• Assumptions regarding community interest in security and stability could be reduced, which may cause a reprioritization of personnel time and effort.

• Community appetite for technical outreach, training, and engagement is strong but this could change, which may lead to a reprioritization.

• In FY22, ICANN org anticipates a number of OCTO-led implementations will be forthcoming from the final recommendations from the Security, Stability, and Resiliency (SSR2) Review.
ICANN Managed Root Server

PURPOSE

Through the ICANN Managed Root Server (IMRS) program, ICANN org provides trusted technical expertise and solutions to support the global Internet by building and maintaining a sustainable, stable, and resilient root server that is able to respond to identified and vetted technical needs.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Working with DNS root server operators and other relevant parties, ICANN continues to enhance the governance and technical evolution of DNS root server operations and services.
- ICANN, in collaboration with DNS root server operators and other relevant parties, develops a coordinated emergency plan to address DNS Root Server System attacks.

ACTIVITIES

- Deliver and maintain a highly secure, stable, and resilient root server.
- Respond to defined strategic initiatives and vetted community expectations of the Root Server System.
- Maintain a low total cost of operations while building capacity, good engineering practices, and RSS community engagement.
ICANN Managed Root Server, Cont’d.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used for this functional activity:

• Tracking the number of ICANN Managed Root Server (IMRS) instances deployed every 12 months.

• Tracking the number of IMRS service outages every 12 months.

• Financial: measuring actual expenses against planned budget.

CONSIDERATIONS
The following risks and considerations exist for this functional activity and may impact its advancement:

• Hiring and retaining expert-level personnel continues to be challenging in the current economic climate.

• Personnel may leave if job ladders or clear paths to promotion are not implemented.
Internationalized Domain Names and Universal Acceptance

PURPOSE
This functional activity supports community-based work and leads internal work for Internationalized Domain Names (IDNs) and Universal Acceptance (UA) efforts.

OPERATING INITIATIVE CONTRIBUTIONS
• Lead: Promote the Universal Acceptance of Domain Names and Email Addresses.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• ICANN engages in greater cooperation locally, regionally, and globally with stakeholder groups and different policy and standards development bodies to raise awareness about UA and IDN implementation, and IPv6.
• UA readiness measurably increases.
• IDNs are increasingly adopted and treated in a standard fashion by software vendors.

ACTIVITIES
• Support policy development work on IDNs, including IDN variant top-level domains, by ccNSO and GSNO.
• Support the development of Root Zone Label Generation Rules (RZ-LGR) for Chinese, Greek, Japanese, Korean, Latin and Myanmar scripts.
• Support the community-based UA working groups on technology, Email Address Internationalization, communications, and measurements, as well as its local initiatives in different countries to promote UA readiness.
• Support UA working groups in ALAC and GAC, as needed.
• Develop and undertake training and UA-related communications in collaborations with the community.
Internationalized Domain Names and Universal Acceptance, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following milestones will occur in FY22:

- Progress on UA readiness is published using UA annual report for FY21 as a baseline.
- Local initiatives are undertaking training on how to make technology and email services UA-ready in different countries with the support of ICANN org.
- RZ-LGR is published with Chinese, Greek, Japanese, Korean, Latin, and Myanmar scripts.
- IDN Table review process is updated to make it more consistent and transparent using Reference Label Generation Rules.
- IDN Guidelines reviewed by community for implementation in FY22; to be implemented by FY24
- Universal Acceptance Gap Analyses:
  - Programming languages Phase 2.
  - Content Management Systems Phase 1.
  - Social media and networking tools.
  - Email tools Phase 3.

$ in Millions

CONSIDERATIONS

Work on UA is based on influencing the technology developers and policymakers, who may also be motivated by additional considerations. This may impact advancement in this functional activity.
IANA Functions

PURPOSE
The purpose of the IANA functions is to assign unique identifiers for the Internet in accordance with relevant policies, and to be the registry of record for those allocations. This work is essential to promoting Internet interoperability by ensuring devices on the Internet communicate in a standardized manner. This work is administered through contracts that provide accountability to the respective communities that use these services.

ICANN’s affiliate Public Technical Identifiers (PTI) performs these functions on behalf of ICANN org according to service level agreements and other obligations defined in the contracts. PTI has a separate operating plan and budget process that is reviewed by the PTI Board of Directors. The PTI Operating Plan and Budget constitutes a large component of the IANA Operating Plan and Budget and is included in ICANN’s Operating Plan and Budget. Read the Adopted FY22 PTI and IANA Operating Plans and Budgets.

OPERATING INITIATIVE CONTRIBUTIONS
• Lead: Root Zone Management Evolution.
• Support: Support the evolution of the Root Server System.
• Support: Facilitate DNS ecosystem improvements.
• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Promote the Universal Acceptance of Domain Names and Email Addresses.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Mechanisms are established with which ICANN assesses new technologies and, when appropriate, embraces them.
• ICANN collaborates with relevant parties and effectively leverages partnerships in the IETF, Regional Internet Registries, and naming communities to develop and integrate new technologies with existing Internet protocol structures, including the DNS.
• ICANN org continues to provide reliable delivery and continuous improvement of the IANA functions, consistent with community service level agreements.
TECHNICAL & DNS SECURITY

IANA Functions, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• ICANN promotes and supports awareness of the IANA functions, including among stakeholders, to successfully maintain the broad array of Internet unique identifiers and deliver effective DNS root zone operations.

• The expansion of the DNS root attracts continued investment and innovation, as indicated by market developments and new registry services.

• ICANN engages in greater cooperation locally, regionally, and globally, with stakeholder groups and different policy and standards development bodies to raise awareness about UA, IDN implementation, and IPv6.

• New stakeholder services are defined, delivered, and effectively supported.

• UA readiness measurably increases.

• IDNs are increasingly adopted and treated in a standard fashion by software vendors.

• IPv6 usage measurably increases.

• The Internet community’s trust in ICANN to provide resilient, scalable, and accountable KSK management — as an adjunct to existing public key infrastructures — increases, facilitating improved security technologies and greater use of the DNS.

• The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

• Increased availability of root zone data enables greater decentralization and distribution of DNS root service.

ACTIVITIES

• Operations:
  – Process requests from customers per service level agreements in contracts.
  – Meet contractual obligations with the Internet Engineering Task Force (IETF), Regional Internet Registries, and naming communities.
  – Engage with IANA stakeholders through community event attendance, IETF helpdesk, webinars, and ICANN Public Meeting sessions.
  – Continue to support the PTI Board.
TECHNICAL & DNS SECURITY

IANA Functions, Cont’d.

ACTIVITIES, Cont’d.

- **Operational Improvement:**
  - Service Organizational Control 2 (SOC2) and SOC3 Information Security Audits.
  - Operational Excellence: Qualitative assessments, process review cycles, customer feedback surveys.
  - Project management.

△ Implement new business processes to support system changes (enhancements to RZMS and evolved Registry Workflow Systems).

△ Continue to evaluate customer feedback to drive improvements.

△ Evaluate ongoing personnel skill requirements following implementation of significant system changes.

- **System Enhancements:**
  - Release of the next major version of RZMS and plan future versions of the system.
  - Continue to enhance the Registry Workflow System.

- **Cryptographic Business Operations:**
  - Evaluating, planning, and implementing enhancements to the root zone key management facility (KMF) and the related security system setup for DNSSEC in the root zone.
  - Performing four key signing ceremonies per year. This work includes:
    - Reviewing and revising the policy and procedures documents.
    - Selecting Trusted Community Representatives for each of the ceremonies.
    - Updating ceremony scripts and other administrative tasks related to signing of the root zone.
  - Root Zone DNSSEC Management Enhancements.
    - Asset inventory control system for Key Signing Key (KS) management.
    - Next generation cryptographic key exchange platform.
HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. In FY22, the following milestones will be met:

- Launch of the next major version of RZMS.
- Launch of Registry Workflow Systems.
- Meet all contractual deliverables.
- SOC2 Audit Report issued and delivered to stakeholders.
- Exception-free SOC3 Audit Report published.
- KSK Ceremonies performed in compliance with the DNSSEC Practice Statement (DPS).
- Root Zone Key Management Facilities Upgrades completed in U.S. East and West regions.

Metrics

- Performance service level agreements.
- Customer satisfaction through surveys.
- Audit Control Matrix.

<td>$4.2</td>
</tr>
</tbody>
</table>

$ in Millions
IANA Functions, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Ongoing customer satisfaction relies on the evolution of IANA systems. Meeting growing customer volume while adhering to SLAs is dependent on increasing advancement of the systems, and customer expectations on the level of sophistication in those systems grows over time.

- Losing personnel can significantly impact the function. Most roles in a team lack redundancy and filling positions quickly when personnel depart has often proved challenging.
Contractual Compliance

PURPOSE
The Contractual Compliance functional activity ensures that ICANN’s contracted parties (registries and registrars) demonstrate and are held in compliance with the applicable agreements and consensus policies.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.

• ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.

ACTIVITIES

• Conduct monitoring, outreach, and audits to proactively ensure contracted parties are in compliance with agreements.

• Receive, analyze, respond, and resolve complaints regarding potential compliance issues with contracted parties.

• Support policy development processes (PDPs), Organizational and Specific Reviews, the Registrar Accreditation Agreement (RAA) and Registry Agreement (RA) contracting process by providing input from the contractual compliance perspective. Implement recommendations arising from Specific Reviews and PDPs as necessary and appropriate.

• To enhance operational excellence, the Contractual Compliance team plans to improve business operations, methods, and processes, including looking to increase automation in FY22.

• Reduce professional services by completing migration to Naming Services Portal in FY22.
Contractual Compliance, Cont’d.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used in FY22 for this functional activity:

- Number of low-complexity complaints processed.
- Number of high-complexity complaints processed.
- Turn-around time for processing low-complexity complaints.
- Closure rate of high-complexity complaints processed.
- The number of elevated-risk registrars or top-level domains audited.
- High-risk issues mitigated through audit.
- Contracted parties and reporter satisfaction level measured via perception survey.

<tbody>
<tr>
<td>Contractual Compliance and Consumer Safeguards</td>
<td>23</td>
<td>$3.5</td>
<td>$0.7</td>
<td>$4.2</td>
</tr>
</tbody>
</table>

$ in Millions

CONSIDERATIONS
The following risks and considerations exist for Contractual Compliance and may impact its advancement:

- Successful execution of recurring activities depends on hiring and training for five backfill positions.
- Opportunities to reduce spending depends on timely and successful migration to Naming Services Portal (NSp) Contractual Compliance ticketing platform.
- Cross-functional work related to supporting reviews and policy development reduces Contractual Compliance resources available to execute core functions.
- Unknown impact on volume, type, and complexity of complaints submitted to compliance as a result of unknown RDS obligations.
Functional Activities

FY22

Policy Development & Implementation Support

- Policy Development and Advice
- Policy Research and Stakeholder Programs
- Contracted Parties Services Operations
- Technical Services
- Strategic Initiatives
- Constituent and Stakeholder Travel
Policy Development and Advice

PURPOSE
The Policy Development Support functional activity facilitates the policy development and advisory work of the ICANN community. It provides process management, subject matter expertise, and administrative and professional secretariat support to ICANN’s Supporting Organizations (SOs), Advisory Committees (ACs), and other community structures recognized under the Bylaws.

OPERATING INITIATIVE CONTRIBUTIONS
• Lead: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
• Lead: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes, and committed to cooperating in global public interest.
• The knowledge and skill levels across the stakeholder community and organization increase, demonstrated by community members and personnel equipped with basic knowledge of the DNS as well as ICANN policy and advisory processes.
• The ICANN community establishes mechanisms, such as an accurate measure of community participation, to equitably distribute workload among the pool of stakeholder representatives.
• Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.
• Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.
Policy Development and Advice, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.

• Decision-making processes ensure that input from all stakeholders is considered.

• Improved multistakeholder model processes, such as Policy Development Process 3.0 (PDP 3.0) or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.

• ICANN stakeholders collaborate to define prioritization mechanisms, which ensure that cumulative workload is reasonable at any one time and that ICANN priorities reflect the community’s collective needs.

ACTIVITIES

In FY22, activities for this functional activity will include:

• Implementation of Board-approved recommendations from recently concluded SO and AC reviews as well as Board-approved recommendations from the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2.

• Collaborate with other functions on planning for any community work that may be agreed on and needed for next steps on the Evolving the Multistakeholder Model.

• Support community leaders in collaborative work across the SOs and ACs and with ICANN org.

• Support GNSO policy projects and activities, such as major policy development processes and implementation of GNSO PDP 3.0 improvements.

• Support ccNSO policy projects and activities, such as the PDP on retirement of ccTLDs and review mechanism pertaining to decisions on delegation, transfer, revocation and retirement of ccTLDs.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Policy Development and Advice, Cont’d.

ACTIVITIES, Cont’d.

• Support the ACs’ policy advice development.

• Work on Root Server Security Advisory Committee (RSSAC) Advice about restructuring governance of the Root Server System.

• Work on Security and Stability Advisory Committee (SSAC) Name Collision Analysis Project.

• Organize and manage intersessional meetings for community structures, working groups and management/leadership teams to accelerate progress of work.

• Continue work on changes to Decisional Participants’ processes to exercise new Empowered Community powers.

• Support Address Supporting Organization (ASO) integration work on its role under the ICANN Bylaws.

• Continue migration to ICANN org CRM platform, including completion of new working group enrollment portal.

• Work with ICANN org Meetings and Board Operations teams on improvements to ICANN Public Meeting planning.

• Launch improvements to Multistakeholder Ethos Award process and Community Recognition Program.

• Manage community consultations and tools for communications between ICANN org, Board, and community.

• Provide drafting and facilitation support for changes to community group governance processes and community-wide guidelines.
HOW PROGRESS IS TRacked

ICANN org uses a combination of milestones, metrics and reports to track functional activities. The following measures will be used in FY22 for this functional activity:

- Number of active projects and recurring activities across the SOs and ACs.
- Milestone reporting by working groups (and similar) and documenting of timelines.
- Issuance of reports, resolutions and other documented decisions.
- ICANN prep week reports and statistics (including, where available, geographic distribution and SO/AC affiliation).
- ICANN Public Meeting reports and statistics (including session hours and, where available, attendance figures).
- ICANN Public Comment proceedings annual report.
- ICANN Pre- and Post-Meeting briefings (published for every ICANN Public Meeting).
- Progress of work on reviews, GNSO PDP 3.0, and ATLASIII implementation, community charters, and improvements to procedural rules for Decisional Participants in the Empowered Community.
- Implement improvements to Community Recognition Program, Multistakeholder Ethos Award, and ICANN Public Meeting planning.
- Organize SO/AC community leaders’ roundtable sessions at ICANN Public Meetings and, if needed, intersessionally.
- Progress on migration to CRM platform.

CONSIDERATIONS

The following risks and considerations exist for this initiative and may impact its advancement:

- Community expectations for facilitation and other support from the Policy Development Support department must be balanced with robust discussions of costs and benefits. There is a connection between personnel levels and the ability to provide support to existing policy development work, especially given the potential launch of several new PDPs within FY22.

- Generally, extended operations by the Policy Development Support team below the 35 FTE level runs the risk of:
  - Lower levels of service to the community and regional disparities.
  - Delayed policy and advisory outputs.
  - Community frustration and loss of active participants.
  - Potential team member burnout.

- Adequate funding for the Policy Development Support budget is important because it may signal to the community:
  - Prioritization of policy activities integral to ICANN’s Mission.
  - Emphasis of support for community operations central to ICANN governance processes.
  - Organizational support for efforts to ensure global, diverse volunteer participation which provides legitimacy to ICANN’s multistakeholder model.

- Need to ensure that the introduction of new technological tools as well as platform changes is orderly and well-planned, and that community training and transition needs are accounted for.

- Prioritization is challenging and tools are needed to engage in meaningful and effective prioritization.

- Lack of academic-quality policy research despite having qualified personnel, due to workload issues.

- Limited data collection to date means that data-driven policy work has been difficult and time consuming and that decision-making is sometimes required without specific data or other factual evidence.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Policy Research and Stakeholder Programs

PURPOSE

The Policy Research and Stakeholder Programs functional activity leads and supports implementation of key policies and cross-functional projects; provides research and thought leadership capabilities to support relevant organizational work; and leads and supports community-based work to develop and promote a multilingual Internet and secure user experience.

This function also includes ensuring cross-functional coordination and subject matter support for the Board’s and org’s activities around relevant recommendations and advice from the stakeholder community.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Promote and sustain a competitive environment in the Domain Name System.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Foster competition, consumer choice, and innovation in the Internet space by increasing awareness and encouraging readiness for UA, IDN implementation, and IPv6.

• Support the continued evolution of the Internet’s unique identifier systems with a new round of gTLDs that is responsibly funded, managed, risk-evaluated, and consistent with ICANN processes.

• Strengthen ICANN’s bottom-up multistakeholder decision-making process and ensure that work gets done and policies are developed in an effective and timely manner.

• Support and grow active, informed, and effective stakeholder participation.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Policy Research and Stakeholder Programs, Cont’d.

ACTIVITIES

- Supporting Board consideration of GNSO consensus policy recommendations.
- Managing organizational activities around implementation of GNSO consensus policy recommendations.
- Managing and performing policy reviews.
- Executing and supporting data, research and study requests from the stakeholder community.
- Providing subject matter support to internal and external stakeholders, including support during development of recommendations by Supporting Organizations and Advisory Committees.
- Managing implementation of relevant review team recommendations.
- Supporting the development of Root Zone Label Generation Rules (RZ-LGR) for multiple scripts.
- Supporting policy development and implementation work on IDNs, including IDN variant top-level domains.
- Managing and supporting communications with technical and other stakeholders to promote UA readiness in applications.
- Developing and providing tools and training for technology developers to promote UA readiness.
- Promoting UA readiness awareness and demand.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities, such as:

- Progress on implementation of policy recommendations is reported on a dedicated consensus policy implementation page.
- Progress on implementation of relevant advice items is reported on a dedicated webpage which provides status of advice to the Board from Advisory Committees.
- Progress on development of RZ-LGR is reported with public comment periods and integration of additional scripts into updated versions of the LGR.
Policy Research and Stakeholder Programs, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

For many of this function’s activities, the timing and milestone depend on factors such as community decisions and engagement, and Board consideration and direction. The team communicates progress by direct engagement with the relevant SOs, ACs and other stakeholder groups, by sharing work plans and draft documents for community comment and consultation, by publication of blogs and announcements, and by webinars and public meeting sessions.

CONSIDERATIONS

- Several recommendations from the Competition, Consumer Trust, and Consumer Choice Review Team (CCT-RT) and other review teams have been approved or are pending Board further decisions. The team anticipates taking on responsibility for a set of these recommendations, subject to the forthcoming planning and prioritization process. However, the outcomes and priorities for resource allocation are unknown.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Contracted Parties Services Operations

PURPOSE
Contracted Parties Services Operations delivers and evolves defined, high quality, repeatable services and processes to applicants and contracted parties in a timely, consistent, and predictable manner. ICANN org’s Global Implementation team leads the transformation of a program or service from concept to reality, taking point on service delivery development and preparation activities.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN's ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• New stakeholder services are defined, delivered, and effectively supported.

ACTIVITIES
• Process contracted party service requests.
• Manage contracted party contracts.
• Facilitate execution of contracted party agreements.
• Generate and execute contract amendments as a result of service requests.
• Process agreement terminations.
• Manage registrar application and evaluation process.
• Monitor conditions required by contracted party agreements and execute outbound communications to facilitate contracted party compliance with agreements.
• Manage procurement, negotiation, contracting, onboarding, and oversee accountability of vendors that provide contracted party capabilities and evaluation functions needed to process service requests.
• Develop business systems requirements and provide management functions for operations platforms.
Contracted Parties Services Operations, Cont’d.

ACTIVITIES, Cont’d.

- Manage Action Request Register (ARR) functions for Correspondence and Advice to the Board.
- Deliver WHOIS ARS functions when and if unpause.
- Support all New gTLD Program services and functions for remaining applicants of the 2012 round:
  - Application processing (evaluation, contention resolution, application change requests, etc.).
  - Pre-delegation activities (pre-delegation testing, onboarding, and transition to delegation).
  - Vendor management of new gTLD services including service development and contract renewals.
  - Support GDD initiatives and projects related to the New gTLD Program.
  - Support for ICANN org’s Legal team on New gTLD Program-related Accountability Mechanisms and litigation.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following milestones will be used over the fiscal year for this functional activity:

- Service Level Targets will continue to be monitored and modified as per operational needs.
- Reporting of service delivery against Service Level Targets will continue.
- Transactional reporting of Service Level Targets.
- Monitor contracted party transactional survey responses.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Contracted Parties Services Operations, Cont’d.

<td>$1.6</td>
<td>$3.6</td>
</tr>
</tbody>
</table>

$ in Millions

CONSIDERATIONS

- Operations resources are in high demand both internally and outside the organization. Providing development opportunities and career growth to retain personnel is critical to successful ongoing operations.
- New gTLD Program 2012 Round support activities are currently projected to run through FY24. Changes to that timeline would impact resources and activities.
- Changes to service strategy and objectives could impact the service delivery approach in several key areas such as Registry Services Testing (RST) and Data Escrow.
- Accountability Mechanisms and litigation pertaining to the New gTLD Program typically require significant and unplanned support from the team and may require significant expenditure of resources to manage.
Technical Services

PURPOSE
The Technical Services functional activity provides technical knowledge and data regarding domain name space inside ICANN org, working to maintain the security and stability of the Domain Name System.

OPERATING INITIATIVE CONTRIBUTIONS
Support: Promote and sustain a competitive environment in the Domain Name System.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
- ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.
- Consumer confidence in the evolving domain name marketplace remains strong, as measured by increasing domain name registrations and other indicators.

ACTIVITIES
- Coordinate projects and activities related to the implementation of RDAP.
- Enhance RDAP web client.
- Deploy an RDAP response validation tool for gTLDs.
- Deploy Technical Compliance Monitoring system for gTLDs.
- Enhance Service Level Agreement monitoring for gTLDs.
- Enhance Monitoring System API for gTLDs.
- Enhance Centralized Zone Data Service (CZDS).
- Support the implementation of EPDP phases 1 and 2, and the next round of new gTLDs, if they move forward in FY22.
Technical Services, Cont’d.

HOW PROGRESS IS TRACKED

- Deployment of various systems and system enhancements.

RESOURCES

<table>

</tr>
</tbody>
</table>

$ in Millions

CONSIDERATIONS

- Additional personnel will be required to support implementation of the Expedited Policy Development Process for Temporary Specification for gTLD Registration Data (EPDP) Phase 2 and/or the next round of new gTLDs if these move forward in FY22.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Strategic Initiatives

PURPOSE

The Strategic Initiatives functional activity within Global Domains and Strategy focuses on strategic initiatives and evolving issues that impact ICANN org’s remit and its stakeholders. It includes work undertaken by the community, such as the evolution of the multistakeholder model, and coordination of ICANN org’s strategy as it relates to compliance with the European Union’s General Data Protection Regulation (GDPR). It more broadly coordinates cross-functional strategic efforts related to mitigating DNS abuse, New gTLD Subsequent Procedures, the operationalization of RDAP, UA and IDN-related topics, and ICANN’s Registrant Program.

OPERATING INITIATIVE CONTRIBUTIONS

• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Evolve and Strengthen the Multistakeholder Model to Facilitate Diverse and Inclusive Participation in Policymaking.
• Support: Promote the Universal Acceptance of Domain Names and Email Addresses.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Strengthen ICANN’s bottom-up multistakeholder decision-making process and ensure that work gets done and policies are developed in an effective and timely manner.
• Foster competition, consumer choice, and innovation in the Internet space by increasing awareness and encouraging readiness for UA, IDN implementation, and IPv6.
• ICANN engages in greater cooperation locally, regionally, and globally, with stakeholder groups and different policy and standards development bodies to raise awareness about UA, IDN implementation, and IPv6.
• UA readiness measurably increases.
• IDNs are increasingly adopted and treated in a standard fashion by software vendors.
• New gTLD awareness increases, as measured in surveys of Internet users.
Policies Development & Implementation Support

Strategic Initiatives, Cont’d.

**ACTIVITIES**

- Subsequent Procedures for New gTLDs.
  - Support for the implementation of the Board-adopted recommendations developed through the New gTLD Subsequent Procedures Policy Development Process.

- Registrant program.
  - Development of materials to educate registrants about their rights and responsibilities as well as their roles within the DNS.
  - Raise awareness about issues and challenges impacting registrants.
  - Ensure that registrants’ perspectives are represented in ICANN org’s work when implementing policies and services.

- Registration Directory Services (RDS) and WHOIS.
  - Cross-functional coordination as it relates to data protection/privacy issues, including RDS compliance with the GDPR.
  - Continued engagement and follow-on activities in relation to the Expedited Policy Development Process (EPDP) on Temporary Specification for gTLD Registration Data Policy Phase 2 recommendations.
  - Cross-functional coordination of various work streams related to the launch of RDAP services in the gTLD name space.

- Cross-functional coordination and strategic planning as it relates to other initiatives and program areas of strategic importance to ICANN, including mitigating DNS abuse, UA and IDNs, RDS, and data protection/privacy issues.

- Planning is underway for possible close of the 2012 round of the New gTLD Program.
POLICY DEVELOPMENT & IMPLEMENTATION SUPPORT

Strategic Initiatives, Cont’d.

HOW PROGRESS IS TRACKED

Standard project management tracking will ensure timely completion of deliverables and coordination among functions.

For New gTLD Subsequent Procedures:
• Provide support for Operational Design Phase prior to Board consideration of policy recommendations resulting from the New gTLD Subsequent Procedures Policy Development Procedure.

For Registrant Program:
• Continue to produce content, including blogs, reports and other communications to inform registrants of their rights as domain name holders, and how they fit within the domain name ecosystem.

For Registration Directory Services:
• Provide support for Operational Design Phase prior to Board consideration of policy recommendations resulting from EPDP Phase 2 on a System for Standardized Access/Disclosure.
• Provide support for EPDP Phase 2A, which will consider recommendations related to the distinction between legal and natural persons in registration data and the feasibility of using anonymized unique contacts in gTLD registration data, as well as any additional policy development process related to data accuracy in gTLD registration data.
• Coordinate ICANN org’s strategy and related activities across functions to ensure alignment with org’s goals related to ensuring RDS and access to non-public gTLD registration data meet with the requirements of data protection/privacy laws, including the GDPR.

Strategic Initiatives, Cont’d.

CONSIDERATIONS

Activities related to recommendations from the New gTLD Subsequent Procedures Policy Development Process and the Expedited Policy Development Process (EPDP) on Temporary Specification for gTLD Registration Policy Phase 2 are expected to be a major effort during this period. Ongoing project planning will inform when additional resources are necessary to support required activities in this time period.
Constituent and Stakeholder Travel

PURPOSE
The purpose of Constituent and Stakeholder Travel is to provide travel support for community members selected through appropriate processes and broaden participation in ICANN’s processes.

OPERATING INITIATIVE CONTRIBUTIONS
• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
• Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
• Support: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.
• Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.
• Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

ACTIVITIES
• Provide logistical travel assistance to funded travelers who are selected by SOs, ACs, review teams, the Nominating Committee, other supported groups and ICANN support personnel for events requiring travel. These may include ICANN Public Meetings and other approved ICANN events. Approved ICANN events are those that advance ICANN’s Mission, such as intersessional meetings, review team meetings, workshops, or conferences.
Constituent and Stakeholder Travel, Cont’d.

**HOW PROGRESS IS TRACKED**

The following measures will be used in FY22 for this functional activity:

- Publication of reports following each ICANN Public Meeting with details of travel support provided.

**RESOURCES**

<table>
<thead>
<tr>
<th>FUNCTIONAL ACTIVITY</th>

**CONSIDERATIONS**

The following risks and considerations exist for this functional activity and may impact its advancement:

- Allocating limited travel funding among ICANN community members requires prioritization.
- Advance planning is needed to ensure cost-effective pricing.
Functional Activities

Community Engagement & Services

FY22

- Global Stakeholder Engagement
  - Regional Offices
- Public Responsibility Support
- Government and Intergovernmental Organization Engagement
- GDD Accounts and Services
- Consumer Safeguards
- Global Communications and Language Services
- Global Meetings Operations
- Ombudsman
COMMUNITY ENGAGEMENT & SERVICES

Global Stakeholder Engagement

PURPOSE
ICANN org’s Global Stakeholder Engagement (GSE) team leads engagement and outreach around the world with stakeholders about ICANN and its Mission. Through local coverage in eight regions, the team is a point of contact for ICANN org and the ICANN community. Its purpose is:

• Raising awareness and understanding of ICANN’s role and remit.
• Encouraging participation in ICANN policy development and technical activities.
• Enhancing ICANN org’s operating model across all regional offices and ensuring alignment of regional engagement efforts with ICANN org strategic and operational priorities.

OPERATING INITIATIVE CONTRIBUTIONS
As GSE's role is to lead engagement and outreach for ICANN org, it provides direct and indirect support to many of the operating initiatives which have outreach components that contribute to success.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of GSE function, all strategic goals and targeted outcomes are supported directly or indirectly.
COMMUNITY ENGAGEMENT & SERVICES

Global Stakeholder Engagement, Cont’d.

ACTIVITIES

• In light of the suspension of in-person engagements due to the COVID-19 pandemic, GSE is reviewing the impact of virtual engagement on ICANN org and the wider ICANN community. While a plan for the return to in-person meetings has been developed and is being discussed with the ICANN community, GSE will further consider the future of engagement in ICANN both virtual and in-person.

• Capacity development to increase understanding of ICANN’s Mission and to diversify participation in ICANN’s core activities.

• Build partnerships and relationships related to capacity development with regional and local stakeholders.

• In FY22, GSE will continue to extend its engagement measurement and planning function and its use of a Customer Relationship Management (CRM) platform for managing its engagement activity, community contacts, trip reports, cases, and Memoranda of Understanding with outside organizations.

• Ongoing cross-functional regional engagement related to technical and policy work, participation in relevant national and regional discussions, and delivery of regional engagement strategies.

• Engagement measurement, planning, and administration.

• Support cross-organizational prioritization to deliver on needs for international office strategy.

• Ongoing implementation of engagement activities adopted by the Board related to Specific and Organizational Reviews’ implementation, community work on New gTLD Subsequent Procedures Policy Development Process recommendations, and support of initiatives in OCTO, Government Engagement, and Global Domains and Strategy.

△ In FY22, GSE will continue its careful consideration of resource allocation to ICANN participation in national and regional Internet Governance Forum (IGF) events. In FY21, GSE assumed responsibility for this from the Government and IGO Engagement team and conducted a review of these events to ensure national and regional IGFs fit within ICANN’s policy and technical work.

△ In FY22, the vice president for North American engagement will continue work begun in the prior fiscal year to integrate all of ICANN’s engagement and outreach activities in the region and coordinate with other ICANN org functions including GDD Accounts and Services, OCTO, and Government Engagement.
Global Stakeholder Engagement, Cont’d.

HOW PROGRESS IS TRacked

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. In FY22, the following metrics will be tracked and milestones will be met:

- Enhance the GSE presence on the ICANN org website with regional pages, incorporating updates made to the Africa, Asia Pacific, Latin America and Caribbean, and Middle East & Adjoining Countries regional engagement plans.

- Data on ICANN’s geographical presence and services to regional stakeholders.

- Number of capacity development and training events and analysis of community feedback.

- Incorporation of stakeholder journeys data into ICANN org’s Open Data Program.

- Metrics related to cross-functional work on DNS ecosystem security, DNSSEC deployment, UA, and IMRS instances.

- Engagement reporting for Competition, Consumer Trust, and Consumer Choice (CCT) Review and Registration Directory Service (RDS/WHOIS2), as well as ATRT3 and SSR2 Review Team recommendations adopted by the Board for implementation.

- Support of community prioritization effort at regional level to participate in Public Comment periods.

- DNSSEC statistics from regional trainings and local adoption levels by top-level domains, Internet service providers, and others.

COMMUNITY ENGAGEMENT & SERVICES

Global Stakeholder Engagement, Cont’d.

CONSIDERATIONS

The following considerations exist for GSE team, some of which may pose risks in FY22:

• Demand for GSE team support continues to increase across ICANN org functions.

• The GSE team has been largely stable over time but succession planning, ongoing professional development, and cross-functional training opportunities must be implemented for personnel retention.

• The engagement work needed to support a potential next round of gTLDs and to implement reviews' recommendations will be significant and budget and personnel resources will be required.

• GSE team members have improved their ability to speak more effectively for ICANN org on DNS and DNSSEC, DNS abuse and misuse, IPv6 and other technical topics. OCTO also plans to add technical engagement personnel.

• GSE assumes there will be a return to face-to-face meetings and engagement events in FY22, but the pace of this return is uncertain due to continued travel restrictions and impacts from the COVID-19 pandemic.

• GSE continues to make improvements to cross-functional collaboration with OCTO, Government Engagement and GDS. GSE is reviewing its regional engagement events to ensure these incorporate a track for contracted party engagement with GDS and that these events are considered with any requirements for the safe resumption of in-person engagement.

• Reputational risk may arise from failure to retain active regional stakeholders in ICANN work during the extended period without face-to-face meetings. The inability to attract newcomers and maintain volunteers in a post-COVID era may also pose a risk.
Regional Offices

ICANN has regional offices in Brussels, Belgium; Istanbul, Turkey; Montevideo, Uruguay, and Singapore. ICANN has engagement centers in Nairobi, Washington DC and Beijing.

PURPOSE

The primary purpose of the regional offices is stakeholder engagement. Besides bringing ICANN’s functions closer to stakeholders, the offices facilitate the functions housed in the region to achieve the goals set out in the Strategic Plan.

OPERATING INITIATIVE CONTRIBUTIONS

As each regional office leads stakeholder engagement in its region and collaborates with other ICANN functions at a regional level, each regional office directly or indirectly supports all operating initiatives.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

Effective regional stakeholder engagement underpins the success of many of targeted outcomes in the strategic plan and reflects the regional offices’ ongoing collaboration with other ICANN functions.

ACTIVITIES

The FY22 activities of the regional offices encompass recurring work related to the functions located in each office and are not listed here. Major activities undertaken by GSE personnel in the regional offices in FY22 include:

- Facilitate collaboration on cross-functional goals with other ICANN org functions.
- Facilitate engagement with stakeholders at a regional level in line with recommendations on the future of meetings post-COVID.
- Update regional engagement strategies to reflect major developments in the Strategic Plan, particularly in relation to technical and government engagement.
COMMUNITY ENGAGEMENT & SERVICES

Regional Offices, Cont’d.

ACTIVITIES, Cont’d.

• Continue to identify and address internal and external issues, needs and demand across the region, and facilitate collaboration, or request for resource support from the Executive Team to address them.

• Develop a system for the collection and analysis of metrics to measure progress and success in regional and functional participation in the ICANN community, as well as accountability indicators concerning trust in ICANN.

• Identify engagement gaps in the region and facilitate collaboration, or request resource support to address gaps.

△ If the community process recommends a new round of new gTLDs, develop region-specific plans for promoting the program.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics and reports to track functional activities. In FY22, key measures for the regional offices are:

• Development of documents to track goals and targeted outcomes of cross-functional work by region.

• Incorporation of regional issues, engagement gaps and needs into org-wide Customer Relationship Management (CRM) platform.

• Development of tailored plans for European legislation tracking and technical engagement.

• Development of a People Development Plan for the European Region that includes tailored personal growth and training goals for personnel.

RESOURCES

The administrative costs of running each regional office can be found in the ICANN Offices functional activity section in this document.
Regional Offices, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for the success of the regional offices in FY22 and may impact their progression:

- Work depends on other functions and personnel, who may have other priorities.
- Functional teams should have region-specific plans and goals in place.
- Full deployment of an org-wide CRM platform in FY22.
- Allocation of adequate budget for GSE personnel and regional support.
- Willingness of the community to use the regional offices for ICANN-supported face-to-face meetings.
Public Responsibility Support

PURPOSE
The Public Responsibility Support (PRS) team provides the community with the necessary support and tools to carry out public responsibility activities that support ICANN’s Mission. Increasing diversity and lowering barriers to participation at ICANN is central to these efforts.

OPERATING INITIATIVE CONTRIBUTIONS

• Lead: Implement New gTLD auction proceeds recommendations as approved by Board.
• Support: Facilitate DNS ecosystem improvements.
• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
• Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
• Support: Through targeted engagement improve governmental and intergovernmental organization (IGO) engagement and participation in ICANN.
COMMUNITY ENGAGEMENT & SERVICES

Public Responsibility Support, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN, in collaboration with relevant hardware, software, and service vendors, enhances knowledge about DNS safety and security.

• Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.

• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.

• The knowledge and skill levels across the stakeholder community and organization increase, demonstrated by community members and personnel equipped with basic knowledge of the DNS as well as ICANN policy and advisory processes.

• Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.

• ICANN Board and org continue enhancing transparency initiatives and upholding accountability.

• Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

• ICANN prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.
Community Engagement & Services

Public Responsibility Support, Cont’d.

**Activities**

- Lead research and expertise: Support for public responsibility initiatives within ICANN’s remit in the areas of diversity, human rights, anti-harassment, public interest, and continue to support pre-implementation coordination efforts of New gTLD Auction Proceeds recommendations. Work on human rights initiatives includes those internal to ICANN org and those with community-driven objectives assigned as a result of the planning process.

- Lead diversity programs: Fellowship Program, NextGen@ICANN, Newcomer Day at ICANN Public Meetings, and Newcomer portal on icann.org, ICANN Community Childcare Grants Pilot.

- Lead and support capacity development initiatives: ICANN Learn, Leadership Program, Chairing Skills Program, and the ICANN History Project.

- Expand ICANN Learn curriculum to meet increased demand for online learning and capacity development.

- Support implementation of Board-approved recommendations from WS2 on human rights and diversity.

- Depending on the outcome of the Subsequent Procedures Working Group recommendations, PRS may implement new deliverables related to applicant freedom of expression rights.

- Improve existing and explore possible new mentoring structures for the NextGen and Fellowship programs based on community feedback.

- Identify and deliver effective anti-harassment training opportunities across the ICANN community.

- Community to decide whether the proposed public interest framework can be used to demonstrate how specific recommendations, advice, and public comments are in the global public interest.

- Implement changes to the NextGen@ICANN Program based on input from FY20 community consultation.

- Start to phase out ICANN History Project activities.

- Evaluate the ICANN Community Childcare Grants Pilot and determine whether the program will continue as a recurring activity.
Public Responsibility Support, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. In FY22, the following milestones will be met:

- Research and expertise:
  - New gTLD Auction Proceeds: Continue to support coordination efforts leading up to Board consideration of recommendations from CCWG-AP.
  - Identify and deliver anti-harassment training opportunities across the ICANN community.

- Diversity programs:
  - ICANN Community Childcare Grants Pilot will be evaluated to determine whether the program will continue as a recurring activity.
  - Implement a new NextGen application system.
  - Fellowship and NextGen:
    - Number of participants by region and sector.
    - Number of pen holders on policy reports and documents.
    - Number of mailing list contributors.
    - Number of Public Comment contributors.
    - Number of alumni in leadership positions.

- Capacity development initiatives:
  - Start to phase out ICANN History Project work.
  - Continue to leverage ICANN Learn for capacity development.
  - Online Learn:
    - Number of active users.
    - Number of new courses.
    - Number of multilingual courses.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Work depends on clear community and organizational public responsibility priorities and cross-functional collaboration.

- Reputational risk may arise from failure to provide sufficient transparency and ability to demonstrate impact and return on investment of programs. This includes failure to support educated and informed stakeholders and a perceived lack of diversity in PRS programs.

- Continued improvement to PRS operations is needed, increasing transparency and responsiveness to the community.

- ICANN Learn should be leveraged to improve scalability of capacity development efforts.

- Reduce barriers to participation in ICANN by improving the newcomer experience.

- Successful implementation of New gTLD Auction Proceeds Board-adopted recommendations, the costs of which will be funded out of the auction proceeds and not ICANN’s operational budget.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement

PURPOSE

ICANN org’s Government and Intergovernmental Organization Engagement team is responsible for outreach and engagement with national and regional governments and intergovernmental organizations to protect the remit and mandate of ICANN.

The Government and IGO Engagement team acts as a central point of contact to help government entities understand technology and its role in the problems they are seeking to solve. The team’s goal in engagement is to provide information to make governments aware of or mitigate the sometimes unintended consequences of government action on areas within ICANN’s remit or impacting policies developed through ICANN’s multistakeholder processes. The team specifically provides information about the technical underpinnings of the global Internet particularly the unique identifiers and the role and operation of the DNS.

The Government and IGO Engagement team works with the Governmental Advisory Committee as the constituency that is the home of governments and intergovernmental organizations (IGOs) within ICANN. The team also represents the Mission of ICANN org with government ministries and IGOs outside of ICANN’s processes.

OPERATING INITIATIVE CONTRIBUTIONS

- Lead: Evaluate, align and facilitate improved engagement in the Internet ecosystem.
- Lead: Through targeted engagement improve governmental and intergovernmental organization (IGO) engagement and participation in ICANN.
- Lead: Monitor legislation, regulation, norms, principles, and initiatives that may impact the ICANN Mission in collaboration with others.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN is engaged, its role acknowledged, and its presence valued in the arenas where topics within its remit are discussed.

• ICANN plays an important role in raising awareness among legislators, regulators, decision makers and stakeholders about its Mission and the effect of various regulatory and other proposals on the Internet ecosystem.

• ICANN effectively convenes and facilitates discussions with relevant parties to help address relevant global challenges and opportunities.

• ICANN org continues to develop and mature systems to detect and monitor legislative initiatives and other governmental or intergovernmental actions or initiatives that could impact ICANN’s Mission or operations.

• ICANN org proactively engages with the community to develop common awareness of ICANN’s contribution to early warning systems.

• The inherent security of the DNS and unique identifiers system measurably increases, due to higher adoption of global open Internet standards and greater awareness of security threats among stakeholders. The reliable, resilient, and interoperable DNS remains the leading trusted platform for the Internet’s naming system.

• Decision-making processes ensure that input from all stakeholders is considered. Widespread understanding of the ICANN multistakeholder model is established through increased communication with relevant governmental organizations and institutions.

• ICANN fosters successful and mutually beneficial relationships with local, regional, and global partners to ensure knowledge building about ICANN and its Mission continues.

ACTIVITIES

• Assessment of risks to ICANN org due to legislative or regulatory activity or through global action by IGOs.

• Facilitation of global, regional, and national government engagement strategies reflecting geopolitical changes and reflecting the changes in the Strategic Plan.

• Ongoing cross-functional regional engagement related to technical and policy work, as well as participation in relevant national and regional discussions.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement, Cont’d.

ACTIVITIES, Cont’d.

• Capacity development.

• Support cross-organizational collaboration for legislative tracking, government engagement, operational and strategic planning, and other functions.

• Review and revision of the global government and IGO engagement strategies to align with the Strategic Plan, which expands the number of strategic objectives with engagement elements.

The team will update demand-driven government capacity-building activities against the new ICANN Strategic Plan, and ensure these activities align with the new strategic objectives for ICANN org.

The team will evaluate the government engagement events ICANN org currently supports, determine effectiveness, and modify engagement as needed.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used in FY22 for this functional activity:

• Delivery of the postponed FY21 High-Level Governmental meeting may occur in FY22 as a virtual or in-person event in conjunction with an ICANN Public Meeting, depending on pandemic safety protocols and discussions with the GAC and the host government.

• Reports and statistics on participation in outreach, technical briefings, and capacity development sessions for the GAC and through collaboration with other organizations in the ecosystem.

• Reports and statistics on participation for briefings and capacity building events for diplomats from the Permanent Missions to the UN, UN staff, as well as other UN agencies and IGOs, where appropriate, and on contributions to open consultations on legislative or policy initiatives.

• Comparison of pre- and post- capacity building event surveys to measure delivery of information against expectations and information learned.
COMMUNITY ENGAGEMENT & SERVICES

Government and Intergovernmental Organization Engagement, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

• Completed review of existing Memoranda of Understanding (MoUs) for continuing alignment with goals.
• Metrics related to the number of countries and intergovernmental organizations represented in the GAC and the number of countries and IGOs actively participating in GAC and ICANN policy processes.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:
• Changes in the assessment of the risk environment.
• Change in functional resources and team allocation.
COMMUNITY ENGAGEMENT & SERVICES

GDD Accounts and Services

PURPOSE
The GDD Accounts and Services functional activity is responsible for the effective implementation of GNSO’s Consensus Policy and contract-related services. Its team builds and maintains relationships with the ICANN-accredited registrars, gTLD registries, and their respective stakeholder groups.

OPERATING INITIATIVE CONTRIBUTIONS
• Lead: Formalize the ICANN org funding model and improve understanding of the long-term drivers of the domain name marketplace.
• Support: Promote and sustain a competitive environment in the Domain Name System.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Enhanced engagement with contracted parties creates more robust industry relationships, dynamic participation, and improved responsiveness to emerging technologies.
• ICANN, in partnership with relevant stakeholders, establishes and promotes a coordinated approach to effectively identify and mitigate DNS security threats and combat DNS abuse.
• ICANN continues to provide a trusted forum that effectively convenes relevant parties for discussions on the security, stability, evolution, and interoperability of the DNS.
• ICANN maintains a reputation as the source of unbiased, reliable, and factual information on DNS health.
• Evolution to five-year rolling financial planning allows ICANN to appropriately address changes that impact ICANN’s budget, operating and financial plan, or Strategic Plan.
• ICANN has reliable and predictable five-year funding projections, based on a sound understanding of the evolution in the domain name marketplace and realistic assumptions.
• ICANN utilizes data about the directions and trends in the domain name market to effectively guide the organization.
COMMUNITY ENGAGEMENT & SERVICES

GDD Accounts and Services, Cont’d.

**ACTIVITIES**

- Develop the annual and five-year funding forecast and funding assumptions.
- Continue to build and maintain relationships with ICANN’s contracted parties.
- Publish updated data for the community in the Domain Name Marketplace Indicators.
- Implement GNSO policy recommendations after adoption by the ICANN Board.
- Implement and enhance services for the contracted parties.
- Support the contracted parties transition to the Registration Data Access Protocol (RDAP)-based technology platform for registration data directory services as called for in amendments to the Base gTLD Registry Agreement and Registrar Accreditation Agreement
- Lead implementation of the registration data policy (per EPDP Phase 1) in FY22.
- Coordinates ICANN’s efforts, to conduct research, provide tools, factual information and education for the ICANN community regarding DNS Security Threats and DNS Abuse.
- Collaborate and coordinate with industry actors toward reducing DNS security threats (botnets, malware, pharming, phishing, and spam when used as vectors).
- Work with the community to identify gaps in addressing DNS security threats within ICANN’s remit and means to reduce DNS security threats.

**HOW PROGRESS IS TRACKED**

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over this fiscal year for this functional activity:

- Implementation of adopted consensus policies.
- Survey of contracted parties.
- Delivery of the annual and five-year funding forecast to Finance for incorporation into the budget and financial plans.
gTLD Accounts and Services, Cont’d.

RESOURCES

<table>
<thead>
<tr>
<th>FUNCTIONAL ACTIVITY</th>

</thead>
<tbody>
<tr>
<td>GDD Accounts and Services</td>
<td>16</td>
<td>$2.9</td>
<td>$0.7</td>
<td>$3.6</td>
</tr>
</tbody>
</table>

$ in Millions

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- The transition from WHOIS to RDAP depends on completion of amendments to gTLD Base Registry Agreement, and 2013 Registrar Accreditation Agreement, expected in early FY22.
- Implementation of approved GNSO policy recommendations partially depends on volunteer-based Implementation Review Team (IRTs).
Consumer Safeguards

PURPOSE

ICANN org’s Consumer Safeguards team facilitates community-wide discussions to identify:

- Existing safeguards within ICANN’s remit.
- Potential means to address safeguard gaps.

The functional activity also contributes to org assessments of local and regional regulations that may impact the DNS, as well as community and broader public engagement.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN effectively convenes and facilitates discussions with relevant parties to help address relevant global challenges and opportunities.

ACTIVITIES

- Facilitate community-wide sessions at ICANN Public Meetings and in regional venues to discuss safeguard topics.
- Engage with the public and community members on legal and regulatory efforts that may impact the DNS.
COMMUNITY ENGAGEMENT & SERVICES

Consumer Safeguards, Cont’d.

HOW PROGRESS IS TRacked

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used over the fiscal year for this functional activity:

• Number of facilitated community discussions.
• Issue papers.

RESOURCES

Resources for the Consumer Safeguard functional activity are found in the Contractual Compliance functional activity.

CONSIDERATIONS

The following consideration exists for this functional activity and may impact its advancement:

• Level of community interest and engagement may not be constant. There may be pressure on the Consumer Safeguards director to go beyond a facilitator role to advocate in favor of a particular position or positions.
COMMUNITY ENGAGEMENT & SERVICES

Global Communications and Language Services

PURPOSE

The primary purpose of ICANN org’s Global Communications and Language Services function is to ensure that ICANN is represented accurately and consistently in all forms of communication. This is accomplished in several ways:

• Demonstrate successes, knowledge, and thought leadership through compelling, clear, and consistent positioning.

• Continue to grow, globalize, and diversify communications efforts and channels for geographic and target-audience reach.

• Expand to and engage with new audiences by reaching outside of traditional forums.

• Leverage media and industry contacts to amplify key messages.

• Increase external understanding of and increase participation in ICANN’s policy development process and multistakeholder model.

• Explain the role of the IANA functions and ICANN’s technical remit.

• Educate internal audiences and support personnel activities.

• Facilitates access to ICANN by providing translations, interpretation, and transcription services in the six UN languages for ICANN Public Meetings and other events.

The secondary purpose is to provide communication tools to personnel and community to advance their work.

OPERATING INITIATIVE CONTRIBUTIONS

• Support: Facilitate DNS ecosystem improvements.

• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.

• Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
COMMUNITY ENGAGEMENT & SERVICES

Global Communications and Language Services, Cont’d.

OPERATING INITIATIVE CONTRIBUTIONS, Cont’d.

• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Evaluate, align, and facilitate improved engagement in the Internet ecosystem.
• Support: Through targeted engagement improve governmental and intergovernmental organization (IGO) engagement and participation in ICANN.
• Support: Monitor legislation, regulation, norms, principles and initiatives in collaboration with others that may impact the iCANN Mission.
• Support: Implement New gTLD auction proceeds recommendations as approved by Board.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• ICANN maintains a reputation as a source of unbiased, reliable, and factual information on DNS health.
• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed upon global public interest.
• Widespread understanding of the ICANN multistakeholder model is established through increased communication with relevant organizations and institutions.
• ICANN engages in greater cooperation locally, regionally, and globally, with stakeholder groups and different policy and standards development bodies to raise awareness about UA, IDN implementation, and IPv6.
• UA readiness measurably increases.
• IDNs are increasingly adopted and treated in a standard fashion by software vendors.
• New gTLD awareness increases, as measured in surveys of Internet users.
• ICANN promotes and supports awareness, including among stakeholders, of the IANA functions to successfully maintain the broad array of Internet unique identifiers and deliver effective DNS root zone operations.
COMMUNITY ENGAGEMENT & SERVICES

Global Communications and Language Services, Cont’d.

ACTIVITIES

- Support Global Domains and Strategy through dedicated communications personnel.
- Provide strategic communications support and content development for initiatives such as DNS security threats, Expedited Policy Development Process Phase 2, Auction Proceeds, and Subsequent Procedures for New gTLDs.
- Collaborate with engagement teams to strengthen alignment and consistency of messaging through narratives, briefs, presentations, media relations, and increased internal communications. Develop messaging to create awareness and strengthen ICANN’s position related to Internet Governance and Technical Internet Governance.

HOW PROGRESS IS TRACKED

The Global Communications team will utilize tools, such as social listening tools, media monitoring, Google analytics to track content likes, retweets, shares, etc.

Global Communications and Language Services, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Overall, unclear or inconsistent communications and messaging to stakeholders can negatively impact ICANN’s reputation.

• Advance notice of special projects or initiatives that will require communications support is key to ensuring that resources are available to provide assistance. Other functions are strongly encouraged to involve the team as early as possible.

• Promoting a shared understanding of key and current issues requires that personnel throughout ICANN org work with the Global Communications team to access accurate and consistent information on topics of interest.

• Translated materials, which are costly to produce, are not well used in some of the languages.
COMMUNITY ENGAGEMENT & SERVICES

Global Meetings Operations

PURPOSE

Global Meetings Operations supports face-to-face and virtual meetings hosted by ICANN globally. For face-to-face meetings, the team ensures that the selected cities, venues, meeting facilities, and services provide an environment conducive to the effective conduct of the meeting. The team works in close collaboration with the community to establish the meeting schedule and provide travel support for funded travelers and personnel.

For virtual meetings, the team works with the community and the org to establish the schedule and ensure effective participation strategy in the online environment.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Meaningful stakeholder participation increases, demonstrated by community members effectively engaged in multistakeholder model processes and committed to cooperating toward an agreed-upon global public interest.

• Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

ACTIVITIES

• Three ICANN Public Meetings scheduled for FY22:
  – ICANN72 Seattle | Annual General Meeting
  – ICANN73 San Juan | Community Forum
  – ICANN74 The Hague | Policy Forum

• Three Board Retreats.

• Community face-to-face and virtual meetings (as a comparison, there were 75 meetings in FY19 and 35 meetings pre-pandemic in FY20).
Global Meetings Operations, Cont’d.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. In FY22, the following milestone will be met:

- Continue to implement the approved cost-savings plan for three ICANN Public Meetings per year.

RESOURCES

<table>
<thead>

</tbody>
</table>

$ in Millions

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Potential increase in the demand for smaller face-to-face and virtual meetings, which will cause more work for the Meetings and Travel Support teams.

- The COVID-19 pandemic-related disruption is likely to affect the format and cost of meetings conducted face-to-face or virtually in FY22.
Ombudsman

PURPOSE
The Office of the Ombudsman is a neutral dispute resolution practitioner for the ICANN community. The principal function of the Ombudsman shall be to provide an independent internal evaluation of complaints by members of the ICANN community who believe that the ICANN org, Board, or an ICANN constituent body has treated them unfairly. The Ombudsman serves as an objective advocate for fairness, and seeks to evaluate and resolve complaints about unfair or inappropriate treatment by ICANN org personnel, the Board, or ICANN constituent bodies, clarifying the issues and using conflict resolution tools such as negotiation, facilitation, and “shuttle diplomacy” to achieve these results.

The Ombudsman also has a formal role in conducting a substantive review of Reconsideration Requests for the Board Accountability Mechanisms Committee. However, the Ombudsman recuses the office from such a review if the office has been previously involved in the subject matter of the Reconsideration Request.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• Continued efforts of ICANN Board, community, and org to facilitate the inclusion and participation of all stakeholders.
• ICANN community enhances their transparency practices to increase cross-community accountability and trust.

ACTIVITIES
The primary role of the Ombudsman includes:
• Complaint management.
• Raise awareness of Expected Standards of Behavior and Community Anti-Harassment policy within the community, Board and org. There is currently some awareness but actions in FY22 would increase visibility and activity.
COMMUNITY ENGAGEMENT & SERVICES

Ombudsman, Cont’d.

ACTIVITIES, Cont’d.

• Roll-out of anti-harassment training via ICANN Learn.

• Increase online presence in virtual meetings to demonstrate availability of the Office of Ombudsman and its service to the community and serve as a preventative measure to reduce conflict.

• Ongoing education to empower leadership in community via ICANN Learn and providing training for community leaders to empower and educate on conflict resolution.

• Implementation of recommendations related to the Ombudsman from the Cross Community Working Group on Enhancing ICANN Accountability Work Stream 2.

HOW PROGRESS IS TRACKED

ICANN Bylaws require the Office of the Ombudsman to produce an annual report detailing consolidated analysis of the year’s complaints and resolutions, documentation of adherence to confidentiality obligations and concerns, as well as recommendations for steps to minimize future complaints.

ICANN ORG GOVERNANCE

Board Activities

PURPOSE
The Board Activities functional activity represents the work and responsibilities of the ICANN Board of Directors. Among its duties, the ICANN Board:

• Ensures that ICANN remains at all times true to its Mission, Vision, commitments, and core values.
• Oversees ICANN org’s performance to ensure it operates with efficiency, effectiveness, in a fiscally responsible and accountable manner, and, where practicable and not inconsistent with ICANN’s other obligations under the Bylaws, in a manner that is responsive to the needs of the global Internet community.
• Oversees development and periodic revisions of ICANN’s Strategic Plan and operating plan.
• Ensures that ICANN operates pursuant to the highest ethical standards, complies with applicable laws, and considers adherence to best practices in all areas of operation.
• Ensures all policy development and decision-making processes are transparent, open, reflective of the public interest and accountable to all stakeholders.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. The Board supports ICANN’s ongoing, business-as-usual activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
• The ICANN Board aligns its core FY22 activities with the FY21–25 Strategic Plan. At a high level the ICANN Board focuses on the following aims:
  – Strengthening the security of the DNS and the DNS Root Server System.
  – Improving the effectiveness of ICANN’s multistakeholder model of governance.
  – Evolving the unique identifier systems in coordination and collaboration with relevant parties to continue to serve the needs of the global Internet user base.
  – Addressing geopolitical issues impacting ICANN’s Mission to ensure a single and globally interoperable Internet.
  – Ensuring ICANN’s long-term financial sustainability.
ICANN ORG GOVERNANCE

Board Activities, Cont’d.

ACTIVITIES

The ICANN Board organizes its FY22 work into five key areas of responsibilities, with a focus on community-driven activities:

• Policy Development and Cross-Community Initiatives:
  – Prepares for Board review and action by staying well informed of the content, priority, and timing of all policies being developed by the community.
  – Responds to SO policy recommendations and AC advice on a timely basis.
  – Participates and provides timely comments to cross-community working groups and initiatives.

• ICANN org Oversight:
  – Ensures that Board-approved policies are implemented in a manner consistent with the adopted policies.
  – Oversees implementation of significant engineering projects undertaken by the ICANN org such as the Information Transparency Initiative.
  – Oversees ICANN org’s efficient and effective delivery of operational services to the community.

• Strategic and Forward Thinking:
  – Periodic review and revision of the Strategic Plan.
  – Review and revision of the FY22–26 Operating and Financial Plan.
  – Works with the community on the work plan to improve the effectiveness of ICANN’s multistakeholder model.
  – Leads brainstorming discussions on key strategic topics affecting ICANN.

• Governance and Fiduciary Responsibilities:
  – Develops FY22 Board Operational Priorities aligned with ICANN President and CEO’s priorities to ensure greater operational efficiency and effectiveness.
  – Oversees work related to the GDPR.
  – Oversees ICANN’s governance and accountability issues.
  – Discharges its fiduciary (legal and financial) responsibilities.
Board Activities, Cont’d.

ACTIVITIES, Cont’d.

– Monitors organizational risks and mitigation actions.
– Progresses the implementation and understanding of the Bylaws.
– Improves Board transparency.

• Community Engagement and External Relationships:
  – Outreach and engagement with the community during and in between the ICANN Public Meetings.
  – Participation in Board-community working groups.
  – Development of effective relationships with key actors in the global Internet ecosystem.

In addition, some Board activities are handled by Board Committees, which form a fundamental part of Board activities. Committees allow a smaller group of Board members to work together when a more focused approach is needed. The list of Committees as well as their charters defining the scope of their duties and activities can be found here: [https://www.icann.org/resources/pages/board-committees-2018-04-13-en](https://www.icann.org/resources/pages/board-committees-2018-04-13-en).

When necessary, the Board may also establish working groups or caucus groups that are focused on a specific topic or issue. These activities are not included here.

HOW PROGRESS IS TRACKED

The ICANN Board fulfills its objectives and outcomes by directing the ICANN org to implement work. The following measures will be used over FY22:

• Outcomes:
  – Successful implementation of the Strategic Plan.
  – Implementation of the work plan to improve the effectiveness of ICANN’s multistakeholder model.
  – Strengthen DNS and DNS Root Server System security.
  – Evolution of unique identifier systems.
  – ICANN’s long-term financial sustainability.
ICANN ORG GOVERNANCE

Board Activities, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

- Performance metrics:
  - Timely revision of the Strategic Plan and FY22–26 Operating and Finance Plan.
  - Amount of funds transferred into the Reserve Fund, per Board resolution for replenishment.
  - Number of geopolitical issues impacting ICANN’s Mission identified on time and successfully addressed.
  - Number of additional stakeholders join ICANN globally.
  - Number of effective relationships with key actors in the global Internet ecosystem established.

CONSIDERATIONS

The following risks and considerations exist for the ICANN Board in its activities:

- Workload and competing priorities may slow down progress in key areas of work.
- Maintaining institutional knowledge is helped if there is stability in the Board’s composition over the long-term.
- The ability to select and retain qualified and diverse Board members is dependent on factors such as available candidate pool, time commitments required, and compensation.
- Failure to identify trends impacting ICANN and subsequent adaptation of the strategic objectives could have important repercussions.
Office of the President and CEO

PURPOSE
The Office of the President and CEO provides support to the President and CEO, who has fiduciary responsibility for the organization. The goals of the President and CEO are achieved through work conducted by ICANN org.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN's ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
The Office of the President and CEO provides support to the President and CEO, thus contributing to many of ICANN's strategic goals and targeted outcomes.

ACTIVITIES
The nature of the Office of the President and CEO is to provide ongoing support to the President and CEO to enable effective management of ICANN org. No significant considerations were identified. Activities include:
• Supporting the President and CEO as he provides direction to the Executive Team to achieve organizational goals.
• Day-to-day support for the President and CEO, including travel and meetings arrangement, and other administrative tasks, so that the President and CEO can run the organization effectively.

#### HOW PROGRESS IS TRACKED

Progress of the Office of the President and CEO is related to the progress made on the established **goals** of the President and CEO, which are approved by the ICANN Board and updated at the beginning of each fiscal year. Additionally, the President and CEO and Executive Team provide **regular reports** to the Board and the community ahead of ICANN Public Meetings.
Governance Support

PURPOSE
The Governance Support functional activity legally safeguards ICANN org and mitigates adverse litigation and regulatory impacts to ICANN org.

OPERATING INITIATIVE CONTRIBUTIONS
- Lead: Develop internal and external ethics policies.
- Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.
- Support: Promote and sustain a competitive environment in the Domain Name System.
- Support: Facilitate DNS ecosystem improvements.
- Support: Root zone management evolution.
- Support: Evaluate, align and facilitate improved engagement in the Internet ecosystem.
- Support: Monitor legislation, regulation, norms, principles and initiatives in collaboration with others that may impact the ICANN Mission.
- Support: Implement New gTLD Auction Proceeds CCWG recommendations.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
- Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.
- Decision-making processes ensure that input from all stakeholders is considered.
- Improved multistakeholder model processes, such as Policy Development Process (PDP) 3.0 or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.
ICANN ORG GOVERNANCE

Governance Support, Cont’d.

ACTIVITIES

• Litigation and Accountability Mechanisms support, such as maintaining litigation readiness, monitoring, and managing ICANN litigation matters and issues, and Accountability Mechanism Process proceedings.

• General legal internal support.

• Advice to senior management.

• Contractual support, such as contract review, analysis, recommendations, risk assessments, and amendments.

• Secretarial support to ICANN Board and PTI Board, such as performing duties related to notices, meetings, corporate records and implementation of Board and committee decisions.

• Service as Chief Data Protection Officer, with a focus on ICANN organization-level data to ensure ICANN’s internal data protection and privacy program is compliant and up-to-date.
  – Anticipated implementation of a standardized system for accessing registration data.

△ Establishment of the contract management database. Currently, contracts are managed within each business unit, which can cause potential legal and financial risk to the organization.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. In FY22, the following milestones will be met:

• Achieving functional purpose within funding allowance.

• Sufficient contingency funds to cover unforeseen legal events (e.g., skilled in looking at past trends, present environment, and future projections to deriving contingency fund amounts year-over-year).
Governance Support, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Changing landscape of privacy regulations.
- Outcomes related to litigation or general internal legal support are dependent on when Legal team is engaged on matters or issues.
- Advance notice of special projects or initiatives that will require legal services is key to ensuring that budget and resources are available. Other functions are strongly encouraged to involve the Legal function as early in the planning stages as possible.
ICANN ORG GOVERNANCE

Nominating Committee Support

PURPOSE

The Nominating Committee Support function provides support and coordination for the ICANN Nominating Committee (NomCom), an independent committee responsible for appointing leadership positions to the ICANN Board, PTI Board, ALAC, ccNSO, and GNSO. The NomCom acts on behalf of the interests of the global Internet community and within the scope of ICANN’s Mission and responsibilities in the Bylaws.

OPERATING INITIATIVE CONTRIBUTIONS

Support: Evolve and strengthen the ICANN community’s decision-making processes to ensure efficient and effective policymaking.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Representation across all stakeholders continues to reflect the evolving functional, geographic, and cultural diversity of the Internet.

• Widespread understanding of the ICANN multistakeholder model is established through increased communication with relevant organizations and institutions.

• ICANN community enhances their transparency practices to increase cross-community accountability and trust.

ACTIVITIES

This team supports the NomCom by providing:

• Systems Administration: Configuring systems and tools for NomCom use including the NomCom application system, web pages, and Wiki.

• Meeting Planning: Plans and coordinates telephone and face-to-face NomCom meetings.

• Meeting Support: Facilitates the work of the NomCom, including maintaining process and procedures documents and agendas.

• Training: Produce content used in NomCom meetings.
ICANN ORG GOVERNANCE

Nominating Committee Support, Cont’d.

ACTIVITIES, Cont’d.

• Vendor Management: Procure, negotiate, contract, and manage vendors in support of NomCom functions, including training and recruitment firms.

• Support the implementation of the NomCom org review recommendation.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. In FY22, the following metrics will be met:

• Number of face-to-face meetings supported.

• Number of telephonic meetings supported.

• Number of leadership positions filled.

RESOURCES

Resources for the NomCom Support functional activity are found in the Governance Support functional activity.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Implementation work to be undertaken by NomCom personnel to implement the recommendations of the NomCom Organizational Review Team may exceed the capacity of existing resources.

• Ongoing NomCom operational costs may increase as a result of the NomCom Organizational Review Team recommendations.

• Due to the short-term status of NomCom leadership, ICANN org must be prepared to revise operating procedures and approach.

• The COVID-19 pandemic has impacted the ability of the NomCom to meet in-person, which may impact the related performance metric.
ICANN ORG GOVERNANCE

Complaints Office

PURPOSE
The Complaints Office enables ICANN org to transparently identify and resolve issues in one centralized location. The Complaints Office handles complaints regarding ICANN org that do not fall into an existing complaints mechanism, such as Contractual Compliance, Request for Reconsideration, or the Ombudsman.

The Complaints Office reviews verifiable information to ensure recommendations and resolutions are based in fact. It strives to be open and transparent, responsive and accountable to all parties, and to make recommendations that are constructive and actionable. Above all else, the Complaints Office acts with the utmost integrity in service of ICANN’s Mission.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

• Continued efforts of ICANN Board, community, and org to facilitate the inclusion and participation of all stakeholders.

• ICANN community enhances their transparency practices to increase cross-community accountability and trust.

ACTIVITIES
The Complaints Office reviews verifiable information to ensure recommendations and resolutions are based in fact. The office strives to be open and transparent, responsive and accountable to all parties, and to make recommendations that are constructive and actionable. Its responsibilities include:

• Receiving, researching, analyzing, and responding to submitted complaints.

• Reporting on activities of the office.

• Business and communications planning and implementation.

• Internal and external engagement.
Complaints Office, Cont’d.

ACTIVITIES, Cont’d.

- Board-approved recommendations from the Cross Community Working Group on Enhancing ICANN Accountability Work Stream 2 (WS2), including:
  - Support Ombudsman in relaunch and help differentiate services provided by Complaints Office.
  - Assist ICANN org with development of mechanisms for assessing personnel performance.
  - Explore a new role for Complaints Officer in the review of Document Information Disclosure Process (DIDP) requests that have been denied.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used in FY22 for this functional activity:

- Number of complaints received.
- Number of complaints received in scope.
- Number of complaints resolved.

RESOURCES

Resources for the Complaints Office are found in the Governance Support functional activity.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Shifting to a centralized system for complaints depends on ICANN org’s prioritization and resource availability.
- The function has limited personnel, which creates risk that could lead to slow or stalled delivery on commitments.
- As awareness and visibility regarding the Complaints Office increases over time, the number of, the number of in-scope complaints could escalate rapidly.
Planning

PURPOSE

The purpose of this functional activity is to support the development, implementation, monitoring, and evolution of ICANN’s strategy and to carefully plan ICANN’s activities to efficiently and effectively address essential requirements of ICANN’s Mission. Planning also ensures that ICANN org is accountable to the public in its stewardship of ICANN’s Mission. In July 2020, a new Planning Department was formed to lead and coordinate all planning activities across ICANN and to prioritize and organize ICANN’s activities with all participants in the ICANN ecosystem (org, Board, and community). The long-term objective of the Planning department is to continuously develop the effectiveness of the organization through adequate planning and measurement of the delivery against the plans.

OPERATING INITIATIVE CONTRIBUTIONS

- Lead: Planning at ICANN.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- ICANN Strategic Plan is supported by a five-year Operating and Financial Plan. All plans are updated as and when necessary to take into account relevant changes in ICANN’s environment.

- Evolution to five-year rolling financial planning allows ICANN to appropriately address changes that impact ICANN’s budget, operating and financial plan, or Strategic Plan.

- ICANN has processes and tools in place to effectively prioritize and periodically reprioritize its work.

- Community’s engagement in prioritization and decisions about affordability measurably increases.

- Funding, expenses, and reserves are addressed in each plan in a manner consistent with policies, Board decisions, strict financial responsibility, and conservatism.

- ICANN has reliable and predictable five-year funding projections, based on a sound understanding of the evolution in the domain name marketplace and realistic assumptions.
ICANN ORG GOVERNANCE

Planning, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES, Cont’d.

• ICANN utilizes data about the directions and trends in the domain name market to effectively guide the organization.
• ICANN prioritizes its activities to deliver its Mission in the global public interest in the most cost-effective way.

ACTIVITIES

• Communicate and engage the FY23 planning processes and timelines, milestones with ICANN org, Board and Community.
• Carry out ICANN’s Strategic Outlook Trend exercise to inform the annual Strategic Plan update.
• Manage and develop ICANN FY23-27 Operating and Financial Plan and FY23 Operating Plan and Budget.
• Complete research and propose a draft prioritization approach, facilitate discussion among ICANN org, Board and Community.

HOW PROGRESS IS TRACKED

The following milestones will be used to track progress of this functional activity in FY22:

• Timely delivery of PTI FY23 Operating Plan and Budget, and IANA FY23 Operating Plan and Budget per Bylaws requirements.
• Timely delivery of ICANN’s Strategic Plan FY23 update, FY23-27 Operating and Financial Plan, and FY23 Operating Plan and Budget per Bylaws requirement.
• Further refine ICANN’s strategic planning and operating planning processes.
• Delivery of draft prioritization approach.
• Report progress towards the achievement of ICANN’s plans.
Planning, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- Lack of planning tools, including data collection and analysis, to facilitate org-wide prioritization.
- Progress reporting can impact the efficiency and effectiveness of planning activity.
ICANN ORG GOVERNANCE

Review Support and Implementation

PURPOSE
The ICANN Bylaws-mandated reviews represent a fundamental mechanism to continuously improve ICANN’s multistakeholder model. The improvements result from the implementation of Board-adopted recommendations made by community-led review teams (for Specific Reviews) or by external independent reviewers (for Organizational Reviews). The org’s functional support of the reviews process is provided by two complementary teams actively involved in the entire process from inception of the review to the conclusion of the implementation.

• The Review Support team facilitates and supports both the Specific and Organizational Reviews. This work includes the evolution of review processes and ICANN org support from inception of the review through Board action on the recommendations made by the review team.

• The Implementation Operations team is responsible for the implementation of the Board-adopted recommendations and coordinates the efforts with all parties, including org, Board and community, to ensure effective implementation. These recommendations could result from reviews or other community-led working groups, such as the Cross-Community Working Group on Enhancing ICANN Accountability Work Stream 2 (CCWG-Accountability WS2), the program to Evolve the Effectiveness of the Multistakeholder Model, and the Cross-Community Working Group on Auction Proceeds.

OPERATING INITIATIVE CONTRIBUTIONS

• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.

• Support: Implement New gTLD Auction Proceeds recommendations as approved by Board.

• Support: Planning at ICANN.
Review Support and Implementation, Cont’d.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

- Processes and tools are in place and consistently utilized to reach consensus, resolve impasses, and make timely, informed, and effective decisions that are in the global public interest, take policy advice into account, and ensure consistency with ICANN’s Mission and Bylaws.
- Decision-making processes ensure that input from all stakeholders is considered.
- Improved multistakeholder model processes, such as Policy Development Process 3.0 (PDP 3.0) or streamlined Organizational and Specific Reviews, and other evolutions of ICANN’s governance and cross-community working methods help produce timely and relevant results.
- ICANN stakeholders collaborate to define prioritization mechanisms, which ensure that cumulative workload is reasonable at any one time, and that ICANN priorities reflect the community’s collective needs.
- ICANN Board and org continue enhancing transparency initiatives and upholding accountability.
- ICANN community enhances their transparency practices to increase cross-community accountability and trust.
- Continued efforts of ICANN Board, community, and org facilitate the inclusion and participation of all stakeholders.

ACTIVITIES

As the Board-approved recommendations from ATRT3 may impact the timing of future Specific and Organizational Reviews, ICANN org, for planning purposes, assumes that the Review Support team will support the review requirements currently in effect. These are found in Appendix A – ICANN Rolling Five-Year Roadmap. ICANN org will update the roadmap and the plan as implementation work on Board-approved ATRT3 recommendations progresses. For planning purposes, FY22 activities are as follows:

- The third review of the GNSO will begin in June 2021 unless the GNSO asks for a deferral and this is supported by the community. Reviews conducted by the independent examiner typically last 12-18 months. The Review Support and Accountability team will provide support and project management. The work will also involve a GNSO-appointed review working party, to provide clarification and input to the independent examiner.
ICANN ORG GOVERNANCE

Review Support and Implementation, Cont’d.

ACTIVITIES, Cont’d.

- The third Security, Stability, and Resiliency Review (SSR) would start in March 2022, according to the current Bylaws-mandated schedule. This may not be feasible or practical, as the SSR2 is still conducting its review. Because the SSR2 review would be ongoing, there would not be sufficient time to implement SSR2 recommendations before the start of the next review. However, the Board does not currently have scheduling flexibility on Specific Reviews. The November 2020 Board action on the ATRT3 recommendations impacts the timing of initiation of the SSR3.

- The Review Support team continues to support the work of the NomCom Review Implementation Working Group, which could extend into FY22.

- Define and plan for the implementation of the CCT, ATRT3 recommendations as adopted by the Board in October and November 2020, respectively, so that such implementation work can be considered for prioritization and scheduled for implementation accordingly.

- Continue the implementation of the recommendations from the CCWG-Accountability WS2. This work involves coordination across ICANN org, as well as with the Board and the community structures carrying out their work to implement WS2 recommendations incumbent on the community.

- Define and plan for the implementation of the program Evolve the Effectiveness of the Multistakeholder Model, by coordinating the activities already in progress which contribute to this program, and plan for the implementation of the new activities or projects that complement those already in progress to fully address the issues prioritized.

HOW PROGRESS IS TRACKED

The Review Support functional activity’s progress depends on progress made in FY21 in the following areas:

- Streamlining of reviews.

- Prioritization and resourcing of the Board-approved ATRT3 recommendations pertaining to reviews.

- Prioritization and resourcing of the implementation of community recommendations.

- Completed Improvements included in the program to Evolve the Effectiveness of the Multistakeholder Model.
ICANN ORG GOVERNANCE

Review Support and Implementation, Cont’d.

HOW PROGRESS IS TRACKED, Cont’d.

ICANN org uses a combination of milestones, metrics and reports to track functional activities. In FY22, the following ICANN org measures will be used:

• Produce a high-level implementation plan to inform Board consideration of final report and recommendations from the SSR2 (potentially completed in FY21 dependent on timing of submission of final report to the Board); facilitate Board consideration within the Bylaws-mandated six-month period.

• Produce Annual Review Implementation Report on time, in compliance with the Bylaws.

• Produce periodic progress reports on the status of implementation planning and implementation of recommendations resulting from reviews and cross community working groups.

• Maintain up-to-date Operating Standards for Specific Reviews, in compliance with the Bylaws and to reflect improvements supported by community, and at Board direction.

• Initiate Bylaws revisions and modify the timing and cadence of the next cycle of reviews (as appropriate) based on community support and Board direction, and based on prioritization.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- FY22 operations will be impacted by the events that are currently unfolding, but the outcome is not yet known. Specifically, the review-related ATRT3 recommendations will require significant implementation work involving community, Board and org.

- Progress also depends on ICANN org’s ability to support and facilitate the new process of conducting reviews, from planning phase through assessment of implementation.

Given the large number of recommendations resulting from the current cycle of Specific Reviews and other community work, and their complexity and dependencies on other work, there needs to be an agreed upon set of principles for effective recommendations and their effective implementation. Discussions are currently underway, as reflected in “Resourcing and Prioritization of Community Recommendations: Draft Proposal for Community Discussions”; the effective consideration and implementation of the large number of community recommendations depends on ICANN community, ICANN Board and ICANN org reaching agreement on applicable principles and related process steps.
ICANN Org Shared Services

- Finance and Procurement
- Risk Management
- Engineering and Information Technology
- Global Human Resources and Administrative Services
- Global Support Center
- Board Operations
- Security Operations
- ICANN Offices
Finance and Procurement

PURPOSE

The Finance and Procurement function is the steward of ICANN’s public funds, and the champion of financial accountability and transparency. It provides timely, accurate, and reliable financial and procurement services that support responsible decision-making.

OPERATING INITIATIVE CONTRIBUTIONS

- Lead: ICANN Reserves.
- Support: Formalize the ICANN org funding model and improve understanding of the long-term drivers of the domain name marketplace.
- Support: Planning at ICANN.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES

The Finance and Procurement function handles all accounting, audit, planning, financial analysis, financial reporting, statutory reporting, tax, payroll, billing and collections, insurance, treasury (including payments), procurement, and sourcing for ICANN operations, IANA functions, or PTI, as applicable.
ICANN SHARED SERVICES

Finance and Procurement, Cont’d.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used in FY22 for this functional activity:

• Continuous improvement of processes to gain efficiency and improve quality.
• Continuous improvement of financial analysis.
• Measuring and reporting service-level metrics.
• Tracking of ICANN’s Reserve Fund replenishment.
• Contribute to the operating initiative planning at ICANN.

</table>

$ in Millions

CONSIDERATIONS
No new risks or considerations noted for FY22.
Risk Management

PURPOSE
The primary purpose of Risk Management is to facilitate the identification and articulation of risks faced by ICANN org so that it may make informed decisions about planning for and managing those risks. Through the established Risk Framework, the function focuses on developing a risk-aware culture which incorporates the Risk Framework into activities.

OPERATING INITIATIVE CONTRIBUTIONS
Support: Risk Management supports all operating initiatives.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
• Maintain and enhance the risk identification and communication within the org and to the Board, including strategic risks and existential threat monitoring.
• Expand education of a risk-aware culture within the org.
• Integrate Risk Management planning with Operational and Strategic Planning under the Office of the CFO.
• Continuity Planning: Plan that the organization can continue operating at minimum capacity if resources become suddenly unavailable.
• New Activity Risk Assurance Process: Embed now that it is in place.
△ Broader Risk Awareness Training: Functional risk awareness presentations, review of Function Risk Register, ICANN Risk Register top risks, provide context to personnel.
△ Risk Management in Planning: Support achievement of the Strategic Plan, Operating and Financial Plan by leveraging the Risk Identification Management process.
△ Board Priorities Deliverable 3.3.1: Support the Board Risk Committee’s deliverable of monitoring existential threats by leveraging the Risk Identification Management process.
Risk Management, Cont’d.

HOW PROGRESS IS TRACKED

The following risks and considerations exist for this functional activity and may impact its advancement:

• Completion of continuity plan and implementation.
• New activity process used as appropriate.
• Trainings provided within the org.
• Successful implementation of the existential threats monitoring for the Board Risk Committee.
• Appropriate Risk Management planning input into the Operating and Strategic Planning Process.

RESOURCES

FY22 resources for Risk Management are found in the Finance and Procurement functional activity.

CONSIDERATIONS

The largest consideration for this functional activity is the team’s dependency on other functions and personnel, who may have other priorities. The team must rely on Risk Liaisons to respond and also personnel alerting Risk Management when issues arise.
ICANN SHARED SERVICES

Engineering and Information Technology

PURPOSE
Engineering and Information Technology (E&IT) provides trusted technical expertise to support the global multistakeholder model and ICANN org by:

• Building a sustainable and resilient team that is able to respond to organizational needs.
• Fostering trusted, transparent relationships with stakeholders through collaborative planning and data-driven decisions.
• Delivering secure, effective, and accessible services through innovation and persistence.

OPERATING INITIATIVE CONTRIBUTIONS

• Support: Evolve and strengthen the multistakeholder model to facilitate diverse and inclusive participation in policymaking.
• Support: Root zone management evolution.
• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Formalize ICANN org funding model and improve understanding of the long-term drivers of the domain name marketplace.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.
ENGINEERING AND INFORMATION TECHNOLOGY, CONT’D.

ACTIVITIES

- Better position and prepare the E&IT function to deal with Subsequent Procedures for new gTLD work.
- Better position and prepare the E&IT function to work on implementation of Board-approved recommendations from ATRT3, the CCT review team, and the CCWG-Accountability WS2.
- Proactively securing ICANN’s digital services and systems.
- Helping ICANN deliver results by aligning E&IT delivery capacity along the organization’s long-term strategy.
- Enabling organizational effectiveness through efficient use of ICANN’s digital services.
- Providing effective support to ICANN’s international office strategy.
- Maintaining financial soundness and business continuity.
- Supporting all functions within ICANN org, Board, and community via end-user support, business analysis, custom application development, off-the-shelf software selection and support, infrastructure support, security monitoring, and network services.
- Continuing to emphasize portfolio management and platform reduction mindset.
- Continuing work on capacity planning tools for organizational capacity planning.
- Investigating career development and promotional opportunities to improve retention, provide greater clarity to personnel, and help identify resource gaps.
- Continue to work on moving from Capability Maturity Model Level 3 to Level 4.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones, metrics and reports to track functional activities. The following measures will be used in FY22 for this functional activity:

- Number of projects and services requested and completed every six months.
- Number of projects delayed or cancelled in every six months.
- Evaluation of financial management through review of planned and actual budgets.
- Digital services availability.
- Universal Acceptance readiness.
- Overall Center for Internet Security (CIS) Score for cybersecurity.

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

• Completion of strategic projects depends on Board and community efforts.
• Finding a suitable offshore location for outsourced work is challenging.
• Geopolitical impacts on international office locations.
• Hiring and retaining personnel continues to be challenging in the current economic climate. Personnel may leave, but improvements in process documentation will lessen new employee onboarding time and costs.
• Personnel may leave if initiatives offering career progression are not implemented.
• Business decisions may mean ICANN org is not able to reduce the number of platforms it uses. This may lead to retaining talent to deal with potential issues. A possible mitigation is to make platform reduction part of the functional business strategies.
• Lack of understanding of capacity and capability, leading to unrealistic scope and delivery expectations from Board and community.
• Global data regulations are fluid and could adversely affect roadmaps.
• Onboarding remote personnel is challenging and may have difficulty absorbing them into ICANN org culture absent any in-person meetings.
ICANN SHARED SERVICES

Global Human Resources and Administrative Services

PURPOSE
The primary purpose of Global Human Resources is to attract and retain top talent for ICANN org throughout the entire human capital life cycle. This includes talent acquisition, onboarding and offboarding personnel, administration of global compensation and benefit plans, performance management, employee relations, investigations, training and development, employment policies and workplace compliance, global mobility and immigration, team member morale and engagement activities, Enterprise Resource Planning (ERP) data integrity and reporting, and organizational planning and development.

The primary purpose of Administrative Services is to provide office administrative support and facilities management for ICANN org across all locations. This includes real estate/lease management, construction management, ergonomics program management, office security access controls management, and special events planning for employee morale activities/events.

OPERATING INITIATIVE CONTRIBUTIONS
• Support: Promote and sustain a competitive environment in the Domain Name System.
• Support: Implement New gTLD Auction Proceeds CCWG recommendations.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.
Global Human Resources and Administrative Services, Cont’d.

**ACTIVITIES**

Global Human Resources activities include:

- Focus on maintaining personnel engagement by sustaining organizational culture seamlessly between offices, regions, and remote and virtual working environments while continuing to build diversity to best represent the community ICANN org serves.

- Ensuring appropriate personnel levels as needed for initiatives including support of technical platforms, implementation of Board-approved recommendations from the New gTLD Subsequent Procedures Policy Development Process, the Information Transparency Initiative, and more.

- Providing the internal programs necessary for leadership training and professional development of personnel in order to retain talent and will focus on our Diversity and Inclusion initiative to continue to foster a diverse, inclusive, and respectful culture within ICANN org.

- Updating the internal grades and ladders to provide more guidance and clear structure for conversations around career path and development.

Administrative Services activities include:

- In FY22, Administrative Services will oversee one major lease renewal for its location in Singapore (office lease renewal or relocation September 2021).

- Provide support for a healthy work environment in ICANN offices and for those working remotely. Support the safety readiness of ICANN offices as personnel return from working remotely as a result of the COVID-19 pandemic.

**HOW PROGRESS IS TRACKED**

ICANN org uses a combination of milestones, metrics, and reports to track functional activities. The following measures will be used for this functional activity:

- Global Human Resources will prioritize maintaining productivity and efficiency for personnel challenges of balancing work with personal isolation, concerns for family health, safety and schooling, political turmoil and prevailing economic challenges.

- Administrative Services will ensure that lease negotiations result in favorable outcomes to maintain budgetary commitments.
Global Human Resources and Administrative Services, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for the Global Human Resources component:

• Maintaining productivity and efficiency when personnel have to balance work with personal isolation, concerns for family health, safety and schooling, political turmoil and prevailing economic challenges.

• Geographic spread over 32 countries and 20 U.S. states makes it hard to efficiently handle personnel relations issues within existing policies and local differences.

• Personnel are eager for development opportunities, but will need more understanding of what resources are currently offered and be able to take advantage of career progression opportunities.

The following risks and considerations exist for the Administrative Services component:

• Uncertainty currently exists in the global real estate market as a result of the COVID-19 pandemic which may create instability in cost for office space in the next five years.

• Maintain a flexible workspace environment remotely and in offices during the COVID-19 pandemic and as personnel return to ICANN facilities.
ICANN SHARED SERVICES

Global Support Center

PURPOSE
ICANN’s Global Customer Service and Support supports ICANN’s Mission, Vision, and strategy, through the continued pursuit of excellence in the execution of world-class service delivery practices and principles.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
• Contracted party support.
• New gTLD applicant support.
• Account and contact management.
• Registrant and community support.
• Stakeholder communication.
• Portal access management.
• Inbound org request triage and routing.

HOW PROGRESS IS TRACKED
ICANN org uses a combination of milestones, metrics, and reports to track functional activities. During FY22, the following milestones will be met:
• Service level targets will continue to be monitored and modified as per operational needs.
• Customer satisfaction will continue to be measured through transactional surveys and reported regularly.
Global Support Center, Cont’d.

CONSIDERATIONS

The following risks and considerations exist for this functional activity in FY22:

- The role of Global Support to provide Tier 1 support for contractual compliance inquiries is currently under discussion. Should Global Support take on this function, resources, and tools would need to be reviewed.

- The effectiveness and efficiency of the Global Support function is highly dependent on the operating systems and tools upon which it relies. Specifically, the team is highly reliant on the usability of the Naming Services Portal (NSp).

- Global Support resources are in high demand both internally and outside the organization. Retaining personnel is critical to successful ongoing operations.
ICANN SHARED SERVICES

Board Operations

PURPOSE

The purpose of this function is to support the ICANN and PTI Boards, and to serve as liaison between the ICANN Board and org. This includes coordinating with ICANN org to provide substantive content and logistical support to the ICANN Board, as well as its committees and subgroups. This function also facilitates the interaction between the Board and the community.

OPERATING INITIATIVE CONTRIBUTIONS

No linked initiatives at this time. This supports ICANN’s ongoing activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED

Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES

• Content management: Supports the agenda development of Board meetings and workshops; facilitates preparation and submission of org-wide materials for Board Meetings, workshops, committees and other subgroup meetings; manages Board materials publication; supports drafting of Board operational priorities, Board correspondence, and Board Public Comments submissions; and facilitates preparation for Board and Stakeholders meetings.

• Logistics management: Manages Board members’ travel and expenses, vendor management and relations, manages and reports Board budget, facilitates and organizes calls and meetings.

• Training and capacity development: Supports the Board training programs and tools, including Board members onboarding, development, and mentorship programs.

• Board communications and engagement: Supports and facilitates the Board’s communications and engagement efforts with the community as well as participation in other meetings, events, and speaking engagements.
ICANN SHARED SERVICES

Board Operations, Cont’d.

ACTIVITIES, Cont’d.

- Org cross-functional improvements efforts: Participates in cross-functional ICANN org teams and projects aiming at improving effectiveness and cost-management.

△ The team does not anticipate any significant changes, but will pursue its operational excellence and team development efforts that focus on process improvements and tools enhancement.

HOW PROGRESS IS TRACKED

- Outcome Measurement:
  - Smooth operations of the Board activities (content, logistics, skills development, etc.) and continuous advancement of Board best practices.
  - Continuous advancement of org-wide support for Board.

- Performance Measurement:
  - Content Management: Bylaws compliance, accountability and transparency metrics achievements
    ▪ Percent of Board Materials ready per ICANN Bylaws prior to Board Meeting.
    ▪ Percent of Board Meeting agenda published per ICANN Bylaws prior to meeting.
  - Logistic Management:
    ▪ Number of trips booked for Board.
    ▪ Number of expense reports managed for Board.
  - Training and Capacity Development:
    ▪ Number of Board members completing the onboarding process.
    ▪ Number of trainings attended by individual Board members.
    ▪ Number of trainings attended by full Board.
    ▪ Improvements in Board skill sets.
  - Board Priorities:
    ▪ Timely delivery on Board Ops-related priorities.
ICANN SHARED SERVICES

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- A key performance measurement relies on a survey that often receives a low response rate due to Board workload. The team will work on addressing this challenge as part of its process improvement.

- The team works closely with ICANN org, including the Legal team, to deliver content to the Board and publish Board materials, but that support depends on the workload and priorities of other functions.

- The loss of institutional knowledge on the Board poses a significant risk and could have a negative impact on the Board’s operational effectiveness and subsequent negative impact to ICANN org. The team plans to continue teaming up with the President and CEO and the General Counsel and Secretary to advance Board and committee manuals, process documentation, training and development, and more.
ICANN SHARED SERVICES

Security Operations

PURPOSE
The purpose of Security Operations is to provide a safe and secure environment in which the community, Board, and ICANN org operate.

OPERATING INITIATIVE CONTRIBUTIONS
No linked initiatives at this time. This supports ICANN’s ongoing, business-as-usual activities.

STRATEGIC GOALS AND TARGETED OUTCOMES SUPPORTED
Due to the nature of the shared services functions, all strategic goals and targeted outcomes are supported directly or indirectly.

ACTIVITIES
• Provide on-site event health, safety, and security support to ICANN Public Meetings and other ICANN-hosted events.

• Travel Security: Review, assess, and support org and Board travel. Conduct Travel Risk Assessments and activate the Travel Safety Committee for travel to Medium, High, and Extreme risk locations and support accordingly, weighing due diligence and cost-effectiveness when considering on-site support. Ensure COVID-19 risks are assessed, understood, and minimized.

• Security Intelligence: Regional Security Managers will continue to deepen their understanding of the security risk landscape of their respective regions and key local and regional factors which impact it.

ICANN SHARED SERVICES

Security Operations, Cont’d.

ACTIVITIES, Cont’d.

• Physical Security: Maintain and optimize physical security procedures, processes, and protocols across ICANN’s facilities. Implement physical security upgrades or enhancements where necessary and feasible.

• Threat Management: Detect, assess, mitigate and respond to ICANN’s internal and external security threats. Threat Management: Continue development of an Insider Threat Program in collaboration with HR and InfoSec teams.

• Knowledge Management: Provide tailored, region-specific training to personnel as well as org-wide core learning.

• Continue to optimize the Regional Security Coordinator (RSC) capability across all regions.

HOW PROGRESS IS TRACKED

ICANN org uses a combination of milestones and reports to ensure that initiatives advance. The following measures will be used over the period for this initiative.

• Work closely with the Meetings team to ensure Security Operations is incorporated into the formal long-term assessment and selection of meeting locations.

• Each RSC to complete designated training course or courses as agreed upon by their regular manager and their RSM.

• Culture of Security Awareness
  Promote a culture of security awareness to inform the org’s decision-makers and furnish personnel with the tools and know-how to operate and travel safely and securely in a COVID-19 world and increasingly insecure threat landscape. Personnel are “street-smart” and “travel-savvy.”

• Bolster Incident Response Capabilities
  Complete annual training for the Global Crisis Management Team (G-CMT), office Emergency Response Teams (ERTs), and Workplace Violence Prevention (WVP) Teams.
Security Operations, Cont’d.

$ in Millions

CONSIDERATIONS

The following risks and considerations exist for this functional activity and may impact its advancement:

- ICANN’s global Mission and engagement requires ICANN org to send travelers to and host events within locations of highly variable risk profiles. Over time, ICANN may conduct more frequent and robust engagement in higher-risk locations, requiring increased and more costly Security Operations support in the form of risk assessment and mitigation and security planning. While Security Operations does not control where ICANN hosts events or travels, the team is still responsible to sufficiently support events and travel as cost-effectively as possible.

- Security Operations should be more deeply integrated into the early consideration and planning stages of travel or events in higher-risk locations. This would afford all key stakeholders the opportunity to assess and understand the total cost of such engagement.

- Security Operations will continue its efforts to develop and bolster an organizational culture of security awareness. This will both inform the decision-making of the organization’s key stakeholders and empower individual personnel to proactively mitigate security risks and reduce the likelihood of safety incidents.

- Security Operations will continue to ensure that the org is sufficiently prepared to respond to, and manage, the COVID-19 pandemic. This includes robust office, meeting, and travel procedures and protocols to promote the health and safety of personnel and the community, as well as maintaining agile crisis management teams and mechanisms to respond efficiently and effectively to incidents and spikes in cases.
ICANN Offices

**PURPOSE**

ICANN offices are located around the world and work together to serve the global community. Brussels, Istanbul, Montevideo, and Singapore have detailed plans described in the Global Stakeholder Engagement section of the FY22 Operating Plan. Below is an overview of the Non-Personnel administrative costs of running each office.

ICANN Rolling Five-Year Roadmap: Policy, Reviews and Cross-Community Working Groups

The rolling five-year roadmap includes activities related to policy, reviews, and cross-community working groups with estimated timeline. Work related to these activities will be prioritized and resourced on an ongoing basis. The timelines on this roadmap are indicative, tentative and subject to update as work progresses.

The roadmap includes the implementation of Board-approved recommendations of the Cross-Community Working Group on ICANN Accountability Work Stream 2 and Organizational Review implementations. The Board-approved recommendations from the third Accountability and Transparency Review (ATRT3) may impact the timing of future Specific and Organizational Reviews. The future Reviews timing displayed is based on review requirements currently in effect. ICANN org will update the roadmap as implementation work on Board-approved ATRT3 recommendations progresses.

Appendix C:
ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers

The very idea of the secure, stable, and resilient operation of the Internet’s unique identifier systems is built into ICANN’s Mission. Commonly referred to as SSR, the essential elements of security, stability, and resiliency are paramount to the continued predictable manner in which the Internet currently operates. ICANN org contributes to the overall SSR of the Internet via its management and stewardship of Internet unique identifier systems that fall within ICANN’s remit. These identifiers include: the top-most level of the domain name system (DNS), IP address and autonomous system number allocation to the Regional Internet Registries, and other unique Internet identifiers as identified by the Internet Engineering Task Force. When used in accordance with globally recognized standards, these identifiers create an environment in which a secure, stable, and resilient Internet infrastructure can exist.

ICANN’s deep commitment to SSR underscores an approach to the concept that is holistic and interwoven into daily operations. In other words, every function of ICANN org contributes to the overall SSR through its support of org’s work to advance ICANN’s Mission. However, this Appendix aims to articulate some of the specific areas that particularly focus on supporting the SSR of these unique Internet identifiers.

SSR Definitions
ICANN’s Acronyms and Terms webpage and its FY15-16 Identifier Systems Security, Stability and Resiliency Framework define the SSR elements as:

- **Security** – the capacity to protect Internet identifier systems and prevent misuse.

- **Stability** – the capacity to ensure that Internet identifier systems operate as expected, and that users of these systems have confidence that the systems operate as expected or intended.

- **Resiliency** – the capacity of Internet identifier systems to effectively withstand, tolerate, or survive malicious attacks and other disruptive events without interruption or cessation of service.
## Appendix C: ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers, Cont’d.

<table>
<thead>
<tr>
<th>OPERATING INITIATIVE</th>
<th>SCOPE OF WORK</th>
</tr>
</thead>
</table>
| **Support the Evolution of the Root Server System** | ▪ Support the implementation of the Root Server System Advisory Committee (RSSAC) document RSSAC037 “A Proposed Governance Model for the DNS Root Server System” and RSSAC038 “RSSAC Advisory on a Proposed Governance Model for the DNS Root Server System,” both published on 15 June 2018.  
▪ Support eventual outcome of RSSAC 037/038 that could propose a plan for the coordination of an appropriate response to any Root Server System incidents.  
▪ Develop mechanisms by which the community can be alerted to issues relating to overly-rapid growth in the root zone.  
▪ Develop a prototype Root Server System Metric Monitoring System to collect data on the operation of the root server system as discussed in RSSAC 047.  
▪ Encourage development of mechanisms to further distribute and scale the root of the DNS, e.g., “hyperlocal” root configuration in recursive resolvers and set up a root zone distribution service, as discussed in OCTO-016.  
▪ Leveraging lessons learned from the first root zone Key Signing Key (KSK) rollover, define and publish a long-term root zone KSK Rollover Policy and implement the next rollover in accordance with that policy. |
| **Facilitate DNS Ecosystem Improvements**     | ▪ **Advocate and Promote Improvements to DNS Security Infrastructure:**  
▪ Advocate for developers to enable Domain Name System Security Extensions (DNSSEC), both signing and validation, by default.  
▪ Promote hyperlocal as an additional root zone distribution model and encourage resolver developers to enable the technology by default.  
▪ Support the implementation of DNS-based Authentication of Named Entities (DANE).  
▪ **Technical Engagement and Capacity Development Work:**  
▪ Continue to improve and deliver capacity-building training on key Internet technologies that support a secured DNS ecosystem aligned with ICANN’s technical remit, such as DNSSEC and DANE.  
▪ Expand ICANN org’s training footprint.  
▪ Expand programs for DNS ecosystem security and technical engagement.  
▪ Work with the community to develop and promote commonly agreed norms for a secure DNS ecosystem.  
▪ **Research Work:**  
▪ Continue to collect data, analyze, and publish fact-based, unbiased, objective information on how the DNS is used and abused.  
▪ Research, report, and raise community awareness on Emerging Identifiers Technologies and how they impact and/or compare to the DNS.  
▪ Research the use of artificial intelligence to enhance understanding and identification of abusive trends in DNS registration.|
| **Root Zone Management Evolution**            | ▪ Identify features and enhancements of how the root zone is managed that will improve operations while ensuring accuracy, quality, and timeliness of business processes.  
▪ Develop solutions for the evolution of requirements from the SubPro Policy Development Process and technological developments related to IDNs. |
Appendix C: ICANN Security, Stability, and Resiliency (SSR) of the Unique Internet Identifiers, Cont’d.

Special SSR Funding

The FY22–26 financials include a special contribution to support ICANN’s efforts to preserve and enhance the SSR of the unique Internet identifiers that ICANN manages, including the DNS, Root Server System governance, mitigation of DNS security threats, promotion and/or facilitation of DNSSEC deployment, the mitigation of name collisions, and DNS operations research.

This contribution stems from a proposed framework announced in January 2020 between ICANN and Verisign, in relation to its operation of the .COM top-level domain. A binding Letter of Intent between the two organizations, executed in March 2020, provides that Verisign will contribute a total of $20M over five years, starting in calendar year 2021. The FY22–26 Operating and Financial Plan begins 1 July 2021.

These initiatives and all SSR-related expenses will be the subject of continued monitoring and reporting over the plan period, conducted in a transparent manner to ensure full accountability of the funds collected and used.
