Exhibit A19-5
20 (f)

The advent of the internet has shifted the way the Music Community interacts and has affected how the Community operates in profound ways. As a result of Internet the Community has become more organic and decentralized with millions of people sharing music than ever before and engaging with the Community. This was a salient shift away from the centralized and highly controlled way in which the market for music once operated.

In effect, this marked the birth of the Community in the truest sense of the word, shifting away from monopolized power structures by creating a truly networked Community of music makers connected to their fans in a more direct manner (Direct-to-Fan). There were three salient developments that followed:

1) The music market experienced much more product diversity (see Chris Anderson’s Long Tail at: http://wired.com/wired/archive/12.10/tail.html) since music makes and music lovers could now interact with each other without the ‘forced’ mediation of parties who benefitted from the filtering process that they kept in place.

2) Copyright law was instantly outdated, prompting a major legislative overhaul in the US (for more info go to http://www.loc.gov/crb/proceedings/2006-3/ and http://www.loc.gov/crb/proceedings/2006-3/riaa-ex-o-103-dp.pdf). In effect, this marked a weaker appropriability regime, which benefits the Community but not parties who want to monopolize the means of appropriation.

3) The evaluation/selection process of music itself is now much more democratized; the days are over when the DJs and VJs at the major broadcasting stations were the single voice that mattered in how music was valued. Today the Internet is a massive space for evaluation by the masses.

The Community’s engagement, interactions and operations have changed significantly as a direct result of the advent of the Internet in an environment where the collective Community voice rather than the voice of the few are now able to make a difference that matters in music, its distribution and consumption (Joerj Merijn Mol, University of Melbourne, Faculty of Business and Economics, Department of Management and Marketing, http://www.managementmarketing.unimelb.edu.au/who/staff.cfm?StaffId=145, 2012).

PROCESS AND RATIONALE USED IN ARRIVING AT THE EXPRESSION OF SUPPORT

The DotMusic Mission, as expressed in response to question 18, is to (i) create a trusted, safe online haven for music consumption & licensing, (ii) establish a safe home on the Internet for Music Community members regardless of locale or size, (iii) protecting intellectual property and fight piracy, (iv) support musicians’ welfare, rights and fair compensation, (v) promote music and the arts, cultural diversity & music education, and (vi) follow a multi-stakeholder approach of fair representation of all types of global music constituents, including a rotating regional Advisory Committee Board working in the Community’s best interest, including both reaching commercial and non-commercial stakeholders.
To be aligned with its Mission, DotMusic has focused on expressions of support that cover an all-inclusive global, balanced and multi-stakeholder representation of the Community, as delineated in response to question 20(a), that collectively represents the majority of the recognized Community by size.

The size of the Community relates to the total number of constituents represented or covered by the recognized institutions, federations, associations, organizations, Coalitions or any other music entities that have expressed their support.

DotMusic's Mission, rationale and bottom-up, all inclusive multi-stakeholder process in obtaining expressed support has been conducted and executed to eliminate the likelihood of material detriment to the rights or legitimate interests of a significant portion of the Community to which .MUSIC may be explicitly or implicitly targeted. DotMusic’s Mission, support rationale and process has also taken into consideration objectives relating to competition, innovation and enhanced safeguards in intellectual property protection, security and safety, which are consistent with not only ICANN’s Affirmation of Commitments but also the Basic Principles of the “vital importance of transparency, openness and non-discrimination” expressed by the WIPO-led International Music Registry (with participants including music stakeholder groups RIAA, IFPI, SCAPR, ACTRA, SAMRO, IRSC, ECAD and CIAM).

The total expressions of support vary and are far-reaching, multi-stakeholder representative and balanced, including: (i) the only recognized federation representing national members from over 70 countries comprised of governments’ Ministries of Culture and Arts Councils covering all continents, (ii) an association representing a global network of 40 member music information centers in 37 countries which document and promote the music from our time, (iii) all the major digital distributors and aggregators representing the vast majority of all global digital music sold on iTunes (the world’s largest digital music retailer with 70% market share) and other popular legal music download stores, (iv) country-focused Music Coalitions, comprised of recognized associations and organizations representing the interests of Community members from those countries and regions, (v) multiple music export offices responsible for the export of music from their country/territory internationally (vi) global online music communities totaling millions of artists and music professionals, (vii) organization focused on licensing lyrics (one of the most searched terms on the Internet) online that represent over 2,000 music publishers, including all four major publishers (EMI Music Publishing, Universal Music Publishing Group, Warner/Chappell Music Publishing, and Sony/ATV Music Publishing), (viii) music professionals’ associations, guilds and other professional member-based organizations, (ix) music technology companies, (x) other music-related recognized institutions, (xi) social media participation totaling over 5 million participants across the DotMusic social profiles/accounts, (xii) over 1.5 million supporters from over 50 countries signing the .MUSIC Initiative petition to launch the .MUSIC TLD, and many more.

An example that illustrates that DotMusic represents the majority of the Community is the TuneCore support letter for DotMusic by founder Jeff Price, one of leaders in the music space and Community. Note the letter represents the support and opinion of Jeff Price/TuneCore and showcases the new Internet landscape and its relation to the Community moving forward:

“To Whom It May Concern

I am writing regarding the Music.us/.MUSIC initiative’s music-themed top level domain submission to ICANN.
There has been a significant shift in the music industry in the last decade. The majority of music being released, distributed, bought, shared, streamed is being created outside of the "traditional" industry.

As one example, TuneCore distributes between 15,000 - 20,000 newly recorded releases a month, this is more music being distributed monthly than all the major labels combined in 100 years. TuneCore’s customers are the artists as record label, songwriter, publisher and performer - none of the artist customers are members of the RIAA.

Over the past 3 years, the TuneCore customer base has sold over 600 million units of music generating over $300 million dollars in gross music sales representing over 60% of all new music sales. This market share continues to grow significantly quarterly. In addition, many of TuneCore’s artist customers dominate the iTunes, Amazon and other music retail charts outselling and out earning well over 98% of major label releases.

An important point to reiterate, not a single one of TuneCore’s hundreds of thousands artist customers are a member of or are affiliated with the RIAA. The voice of the RIAA is not the voice of the artist or of the new music industry.

The RIAA no longer represents the music industry. Fortunately, or unfortunately, its members have been disintermediated. As a trade group, it represents a minority section of the new industry that diminishes daily.

It has no right or legitimacy to control a .MUSIC domain. Further, if it did, it would harm the existing new industry while decreasing competition while working against the interests of the very artists it claims to serve.

This is an email of support for of Music.us/.MUSIC initiative’s music-themed top level domain submission to ICANN."

The process by which DotMusic has received its support is through its global communication outreach campaign. Pursuant to its Mission, DotMusic has been conducting extensive outreach to the Community since 2008 to brand itself and its mission to convey the benefits of .MUSIC and requesting Community support letters. Since 2008 DotMusic has led Music Community efforts to the ICANN community through dedicated participation at ICANN meetings and other DNS/new TLD related events. The Music Community Member Organization (mCMO) domain allocation method during the Landrush phase was created by DotMusic to allow Community members to register through established Community organizations. During the General Registration phase the TLD is open to all Community members for registration but also restricted by Eligibility, Use and other Policies, including enhanced safeguards.

DotMusic has been a strong Community supporter and participant as demonstrated in its ongoing efforts to build a sustainable TLD with policies dedicated to match the needs of the Community using a multi-stakeholder model, while ensuring it is implemented in a manner fulfilling DNS and ICANN technical, political and legal requirements.

DotMusic has publicly branded itself in an open, transparent and accessible manner through differentiated .MUSIC-related sites, social media, online marketing and through tens of thousands of web discussions/media mentions. Over 1,500,000 have signed the .MUSIC Initiative petition; over 5 million
have liked/followed DotMusic in popular social media sites; and a significant number of leading mCMOs have signed support/interest letters as shown in response to this question.

Other activities include sponsorships of Community events such as SxSW, Midem, Billboard, CMJ, Digital Music Forum, SF Music Tech, SoundCtrl, Social Media Week, ASCAP Expo, Popkomm, Miami Music Festival, Future of Music Policy Summit, Bandwidth, New Music Park Thing and others.

Social Media presence includes:

- Myspace, the Internet’s largest music artist community (4.2 million friends: www.myspace.com/musicextension)

- Facebook, the world’s largest social media site (Over 100,000 likes on www.facebook.com/musicextension and www.facebook.com/DotMusic and about 5,000 group members on www.facebook.com/groups/46381289474)

- Twitter, the world’s largest micro-blogging site (220,000+ followers on www.twitter.com/musicextension, about 50,000 followers on www.twitter.com/dotmusic, about 60,000+ followers on www.twitter.com/musicextension, about 31,000+ on www.twitter.com/dot_music, about 21,000+ followers on www.twitter.com/musicdomain) and other social media sites

While social media numbers do not explicitly translate into expressed support, the intent of the participants is interest in the .MUSIC TLD and engagement with the .MUSIC brand trademarked by DotMusic in 27 countries.

DotMusic also branded itself through earned media including:

- Google and Bing search engines have ranked the official DotMusic site (www.music.us) on the top of search engine results for the term “music” ((#23 Google, #25 Bing – March 6th, 2012), one of the most competitive keyword terms on the web according to Google Adwords (277 million global searches on Google, costing advertisers over $9k a day in clicks - www.music.us/adwords/google-adwords-keyword-music.jpg)

- The official DotMusic site ranks on the top of both Google’s and Bing’s search engines for terms such as “dotmusic”, “dot music”, “music domain”, “music TLD”, “music gTLD”, “music top-level domain”, “music generic top level domain” (www.music.us/seo)

A complete list of events relating to the ongoing outreach campaign can be found on www.music.us/events.htm

DotMusic will continue its active outreach and participation efforts in the Community and anticipates receipt of additional support letters from Community members throughout and beyond the ICANN TLD evaluation process.

With respect to “Support,” DotMusic has received documented support from the only international Federation of government ministries of culture agencies and arts councils representing the Music Community, namely arts and culture in general. The Federation’s mission is strongly aligned with the
DotMusic Mission as described in Question 18 and will assist in the outreach effort to protect geographic country names, as described in the response to Question 22 relating to Government Advisory Committee (GAC) advice, and the promotion of international music, diversity and arts culture from these countries.

DotMusic also has support from the International Association of Music Information Centres (IAMIC), a global network of organizations which document and promote the music from our time. IAMIC will also help .MUSIC with its outreach efforts relating to the protection of country-name domains and the allocation of the domains to the proper government authorities to promote culture and music from those territories and the advancement of the DotMusic Mission to benefit the Music Community. IAMIC “supports the work of 40 member organizations in 37 countries. Music Information Centers across the world bear fundamental similarities: they provide specialized music resources for music students, performers, composers and music teachers; they act as visitor centers for any member of the public with an interest in learning about national musical heritage; they develop audiences for new music through educational and promotional projects.”

Mr. Constantine G. Roussos
Founder
Music.us (dot Music)

Dear Constantine:

The Canadian Independent Music Association (CIMA) would like to formally express its full support for your .MUSIC (dotMUSIC) initiative, and enthusiastically commits to recruiting and leading an accredited national coalition, and becoming a music Community Member Organization, representing the Canadian market.

CIMA represents more than 180 Canadian companies and professionals engaged in the worldwide production and commercialization of Canadian independent music, who in turn represent thousands of Canadian artists and bands.

CIMA’s membership consists of Canadian-owned companies and representatives of Canadian-owned companies involved in every aspect of the English-language music and music-related industries. They are exclusively small and medium sized businesses which include: record producers, record labels, publishers, recording studios, managers, agents, licensors, music video producers and directors, creative content owners, artists and others professionally involved in the sound recording and music video industries across Canada.

For 36 years, CIMA has dedicated its efforts to developing business opportunities through an international network of business contacts in the music and entertainment industries and in the associated media such as film, TV, new media and other users of music products. CIMA’s mandate is to ensure the long-term development of the Canadian-owned music sector and to raise the profile of Canadian independent music both in Canada and around the world.

In short, our members are the owners and operators of small businesses who invest in the creation of intellectual property that spurs economic benefits in terms of jobs, increased GDP, contributions to our nation’s trade balance, and are an integral component of Canada’s culture as expressed through music.
CIMA has successfully recruited the support of Canada’s Provincial Music Industry Associations as active participants in the national coalition to support your .MUSIC initiative. What this means, is through CIMA (a national music trade association) and the provincial and territorial music industry associations (MIAs), the coalition truly represents a coast-to-coast community of music interests, from British Columbia in the west to Nova Scotia in the east. In addition to BC and Nova Scotia, the coalition will also include the provincial MIAs from Saskatchewan, Alberta, Manitoba, Ontario, Newfoundland, Prince Edward Island and New Brunswick.

CIMA and its partners look forward to working with you, and to ensure that Canada’s music industry as a whole takes advantage of and benefits from a safe and trusted top-level domain, through your innovative .MUSIC initiative. Thank you for the opportunity to be a part of this exciting venture.

Yours sincerely,

Stuart Johnston

To Whom It May Concern

I am writing regarding the Music.us/.MUSIC initiative's music-themed top level domain submission to ICANN.

There has been a significant shift in the music industry in the last decade. The majority of music being released, distributed, bought, shared, streamed is being created outside of the "traditional" industry.

As one example, TuneCore distributes between 15,000 (fifteen thousand) - 20,000 (twenty thousand) newly recorded releases a month, this is more music being distributed monthly than all the major labels combined in 100 years. TuneCore's customers are the artists as record label, songwriter, publisher and performer - none of the artist customers are members of the RIAA.

Over the past 3 years, the TuneCore customer base sold over 600 million units of music generating over $300 million dollars in gross music sales representing over 60% of all new music sales. This market share continues to grow significantly quarterly. In addition, many of TuneCore's artist customers dominate the iTunes, Amazon and other music retail charts outselling and out earning well over 98% of major label releases.

An important point to reiterate, not a single one of TuneCore's hundreds of thousands artist customers are a member of or are affiliated with the RIAA. The voice of the RIAA is not the voice of the
artist or of the new music industry.

The RIAA no longer represents the music industry. Fortunately, or unfortunately, its members have been disintermediated. As a trade group, it represents a minority section of the new industry that diminishes daily.

It has no right or legitimacy to control a .MUSIC domain. Further, if it did, it would harm the existing new industry, while decreasing competition and working against the interests of the very artists it claims to serve.

This is an email of support for the Music.us/.MUSIC initiative's music-themed top level domain submission to ICANN.

Sincerely,

Jeff Price
CEO

Mr. Constantine G. Roussos  
Founder  
Music.us (dot Music)  
Contact Information Redacted

Dear Constantine:

The Canadian Independent Music Association (CIMA) would like to formally express its full support for your .MUSIC (dotMUSIC) initiative, and enthusiastically commits to recruiting and leading an accredited national coalition, and becoming a music Community Member Organization, representing the Canadian market.

CIMA represents more than 180 Canadian companies and professionals engaged in the worldwide production and commercialization of Canadian independent music, who in turn represent thousands of Canadian artists and bands.

CIMA’s membership consists of Canadian-owned companies and representatives of Canadian-owned companies involved in every aspect of the English-language music and music-related industries. They are exclusively small and medium sized businesses which include: record producers, record labels, publishers, recording studios, managers, agents, licensors, music video producers and directors, creative content owners, artists and others professionally involved in the sound recording and music video industries across Canada.

For 36 years, CIMA has dedicated its efforts to developing business opportunities through an international network of business contacts in the music and entertainment industries and in the associated media such as film, TV, new media and other users of music products. CIMA’s mandate is to ensure the long-term development of the Canadian-owned music sector and to raise the profile of Canadian independent music both in Canada and around the world.

In short, our members are the owners and operators of small businesses who invest in the creation of intellectual property that spurs economic benefits in terms of jobs, increased GDP, contributions to our nation’s trade balance, and are an integral component of Canada’s culture as expressed through music.
Canadian Independent Music Association

CIMA has successfully recruited the support of Canada’s Provincial Music Industry Associations as active participants in the national coalition to support your .MUSIC initiative. What this means, is through CIMA (a national music trade association) and the provincial and territorial music industry associations (MIAs), the coalition truly represents a coast-to-coast community of music interests, from British Columbia in the west to Nova Scotia in the east. In addition to BC and Nova Scotia, the coalition will also include the provincial MIAs from Saskatchewan, Alberta, Manitoba, Ontario, Newfoundland, Prince Edward Island and New Brunswick.

CIMA and its partners look forward to working with you, and to ensure that Canada’s music industry as a whole takes advantage of and benefits from a safe and trusted top-level domain, through your innovative .MUSIC initiative. Thank you for the opportunity to be a part of this exciting venture.

Yours sincerely,

To Whom It May Concern

I am writing regarding the Music.us/.MUSIC initiative's music-themed top level domain submission to ICANN.

There has been a significant shift in the music industry in the last decade. The majority of music being released, distributed, bought, shared, streamed is being created outside of the "traditional" industry.

As one example, TuneCore distributes between 15,000 (fifteen thousand) - 20,000 (twenty thousand) newly recorded releases a month, this is more music being distributed monthly than all the major labels combined in 100 years. TuneCore's customers are the artists as record label, songwriter, publisher and performer - none of the artist customers are members of the RIAA.

Over the past 3 years, the TuneCore customer base sold over 600 million units of music generating over $300 million dollars in gross music sales representing over 60% of all new music sales. This market share continues to grow significantly quarterly. In addition, many of TuneCore's artist customers dominate the iTunes, Amazon and other music retail charts outselling and out earning well over 98% of major label releases.

An important point to reiterate, not a single one of TuneCore's hundreds of thousands artist customers are a member of or are affiliated with the RIAA. The voice of the RIAA is not the voice of the
artist or of the new music industry.

The RIAA no longer represents the music industry. Fortunately, or unfortunately, its members have been disintermediated. As a trade group, it represents a minority section of the new industry that diminishes daily.

It has no right or legitimacy to control a .MUSIC domain. Further, if it did, it would harm the existing new industry, while decreasing competition and working against the interests of the very artists it claims to serve.

This is an email of support for of Music.us/.MUSIC initiative's music-themed top level domain submission to ICANN.

Sincerely,

Jeff Price
CEO
