Subject: ICANN Registrar Naming Services portal Demo and launch date

Dear Registrar Primary Contact,

ICANN org is currently developing the initial version of the Naming Services portal for registrars. This version will provide registrar primary contacts and family group admins access to the Naming Services portal along with limited read-only access to ICANN Contractual Compliance ticket information.

We are excited to share the Naming Services portal demo with you. On 26 March, ICANN org will send an activation email to primary contacts of individual registrars and registrar groups, enabling you to create an account and log on to the system. Upon initial login, you will be prompted to review and agree to the Naming Services portal's Terms of Use.

In preparation to gain access to the new portal, we kindly remind you to verify your registrar's primary contact is up to date in RADAR. If you would like to update your primary contact, please follow the instructions on the Registrar Contact Updates page.

If you are an existing Naming Services portal registry user, you will continue to use your current credentials. You will have access to your registrar account information on 26 March 2018.

If you have any questions or issues, contact ICANN Registrar Services at registrarservices@icann.org.

Regards
