

# Registration Data Policy for All gTLDs - EPDP Phase 1 Implementation

## Policy Stages

### Most Recent Deliverable Completed:

The EPDP Phase 1 Implementation team published a [Public Comment Report](#) summarizing 269 comments received from 14 commenters on 20 January 2023.

### Description and Scope:

On 4 March 2019, the GNSO Council [adopted](#) the Expedited Policy Development Process (EPDP) on gTLD Registration Data Team's Phase 1 [Final Report](#). Following a [Public Comment](#) period, the ICANN Board passed a [resolution](#) on 15 May 2019 to authorize the implementation of 27 of the 29 recommendations contained within the Report. Of the two recommendations not adopted in full, the Board identified portions of the recommendations that require further consultation with the GNSO (see the ICANN Board's scorecard for the EPDP's Phase 1 recommendations [here](#)).

ICANN org implemented the [Interim Registration Data Policy for gTLDs](#) pursuant to the Board's 15 May 2019 resolution. The interim policy maintains requirements from the [Temporary Specification for gTLD Registration Data](#), which detailed how registries and registrars must handle gTLD registration data as a result of privacy legislation, and which expired on 20 May 2019. The implementation is currently engaged in analysis of the recommendations to produce an implementation plan to be published for public comment.

The EPDP Team completed the Phase 2 of their work and published the final report consisting of 22 recommendations. A subset of the recommendations termed "Priority 2" are related to the EPDP Team's Phase 1 work on the [Temporary Specification for gTLD Registration Data](#). On 21 June 2021, the Board [adopted the Recommendations 19-22](#) and the implementation of these recommendations were added to Registration Data Policy Implementation scope of work. On 24 February 2022, the Board [adopted](#) the GNSO Council's Supplemental Guidance on EPDP Recommendation 12, concerning the deletion of registrant data in the Organization field as it addresses the Board's overarching concern of loss of essential data.

The Registration data Policy implementation plan encompasses 34 policy recommendations from the following three ICANN Board Resolutions:

- EPDP Phase 1: [Board Resolution](#) in May 2019 (29 recommendations)
- EPDP Phase 2: [Board Resolution](#) in June 2021 (4 recommendations)
- Supplemental Recommendation 12: [Board Resolution](#) in February 2022 (1 recommendation)

The implementation plan includes:

- Draft policy language for Registration Data Policy
- Revisions to 20 [impacted policies and procedures](#)
- A new policy advisory to replace the [existing advisory](#)
- [Revised Registration Data Access Protocol \(RDAP\) Technical Implementation Guide](#)
- [Registration Data Access Protocol \(RDAP\) Response Profile](#)

ICANN org worked on the implementation plan with support from an Implementation Review Team (IRT) consisting of members of the PDP Working Group and interested community members, in line with the [Consensus Policy Implementation](#).

A [Public Comment](#) period for the Registration Data Policy implementation plan opened on 24 August 2022, and closed on 5 December 2022.
