

Dear Registry Operator,

On 08 June 2023, ICANN org [communicated](#) that the [global amendment](#) to the [base gTLD Registry Agreement](#) was approved and became effective on 7 August 2023.

As noted in the implementation notes provided on ICANN's dedicated [2023 Global Amendment webpage](#), please be reminded that registry operators may continue to submit the Registry Functions Activity Report (RFAR) without the new field 'rdap-queries' up until the report for the month of December 2023, but are encouraged to start using the updated report format as soon as possible. Enforcement of the updated report structure in ICANN's [Registration Reporting Interfaces \(RRI\) system](#) begins with the submission of the report for the month covering the period of **January 2024**.

If you have any questions, please submit a General Inquiry case in the [Naming Services portal](#) or email globalsupport@icann.org.

Best regards,

Technical Services Team
