The Meeting Strategy Working Group Recommendations for Public Comment [PDF, 528KB] was provided for community discussion and public comment. It proposes a new strategy for the structure, purpose and locations of the ICANN public meetings to support broad, informed participation and reflect the functional, geographic, and cultural diversity of the Internet at all levels of policy development and decision-making.

The overall recommendations made by the MSWG for public comment are:

**Continue the three-meeting schedule annually**, but evolve the structure of the three meetings (defined as Meeting A, B, and C) to better address meeting objectives, scheduling conflicts and to use the time in a most effective way.

**Continue regional rotation for all meetings** and coordinate rotation to balance global coverage on a multi-year cycle, but evolve the rotation strategy to take advantage of the smaller mid-year meeting (Meeting B) to rotate through new geographic locations previously unavailable to the meetings due to the attendance and logistical requirements of the current meeting structure.

**Continue to allocate adequate time for SO/AC work**, but evolve the format of the meetings to afford greater opportunity for cross-community engagement and outreach.

**Continue with the public forum at the first and third meetings in the cycle**, but evolve the format by splitting the time into two portions with differing focus.

This Public Comment solicitation provided an opportunity for the community to consider the recommendations detailed in the report, provide feedback and request further clarifications. The responses will help inform any additional aspects to be considered for inclusion in the final recommendations to the Board in June 2014.
For all recommendations in the document, subject to Board approval, the anticipated timing for implementation would be calendar year 2016.

Believes the report is absent of any details related to the guiding principle to 'promote efficient use of community and ICANN staff time with less session conflicts.'
Believes ICANN should explore the use of streams to reduce scheduling conflicts and encourage cross-community interaction on key issues.
Supports Meeting B format to maintain the rotation and a dedicated SO/AC working meeting to support more cross-community interaction.
Has concerns about reducing the time allocated to the public forum; concerned about lack of Board attendance in Meeting B.
**IPC:**
Supports the recognition in the Meeting A recommendation that the actual duration of ICANN meetings is longer than 5 days.

**Clarification of recommendations:**

- While recommendations suggest splitting the Public Forum in two parts in Meetings A and C, there is no specific intention to reduce the overall time allocated to the forum per meeting.

- While the second meeting in the cycle (Meeting B) is intended to require fewer resources from a meeting venue, it is not necessarily expected to have fewer participants.

- The second meeting in the cycle (Meeting B) is not intended to be absent Board participation.

- While the second meeting in the cycle (Meeting B) would focus on policy development activities, this is not intended to suggest the absence of policy development activities from Meetings A and C.

- While the third meeting in the cycle would be slightly longer than the existing meetings, there is no eight (8) day long intention for Meeting C.

- Several comments suggested areas for improvement of the public forum and these will be forwarded on to the appropriate departments for review.
