Re: Registry-Registrar Agreement Amendment for TLD to add the Temporary Specification for gTLD Registration Data

I attest that <registry operator> is amending the Registry-Registrar Agreement for the TLDs under the management of this registry operator listed in the Naming Services portal, only to include the approved language referenced by the Temporary Specification for gTLD Registration Data.

Attached is the amended Registry-Registrar Agreement to replace or supplement, as applicable, the approved Registry-Registrar Agreement that is attached as an appendix (if any) to Registry Operator's Registry Agreement.

Signed,

Registry Operator
