

Webinar: Briefing About the Upcoming Review of the Generic Names Supporting Organization (GNSO)

----- (05/06/2014 14:43) -----
Matt Ashtiani: Welcome all to the Briefing About the Upcoming Review of the Generic Names Supporting Organization (GNSO) on Wednesday, 7 May 2014 Time: 13:00-14:00 UTC

----- (05/07/2014 06:05) -----
Lalla Khan: hello. Nice to see everyone.

Hayley Laframboise: This session is now being recorded

Evan Leibovitch: Ah, the music just now ended.

----- (05/07/2014 06:14) -----
Avri Doria: Was the TOR of the independent examiner examined by the gns0 community?

----- (05/07/2014 06:20) -----
Avri Doria: Under report, I assume the Board Approve is not a pre-determination but rather indicates Board Review with possible approval or further consultations.

----- (05/07/2014 06:23) -----
wolf knobens: Is this small council group supposed to be the review working party or are other GNSO members invited?

----- (05/07/2014 06:26) -----
Philip: Philip Sheppard: To what extent is this areview of policy making and not just the GNSO ?

Alan Greenberg: I thought that Jen said "community members" not "GNSO community members" could be added.

Alan Greenberg: For the record, hitting *3 results in a message saying only presenters could do so.

Matt Ashtiani: @alan 0 try #3

Alan Greenberg: oops. But question typed.

Avri Doria: Thanks you for the response on the ToR. I take that to also mean that the ToR itself was never put out for public comment, it was just reported on in a single meeting.

Jonathan Robinson: My understanding is that Group is proposed to extend the Council Group and be open to community members in order to form the Working Party

Philip: Thanks Jonathan - just to confirm the Brand registry Group BRG is keenly interested

Avri Doria: I actually thought we had decided to bring that issue to the council. We were also concerned about the size of the group.

Alan Greenberg: To be clear, Jonathan, my question was which community - GNSO or ICANN.

Chuck Gomes: I want to thank and compliment the SIC and Ray for all the work they have done on this. In addition I want to thank Jenn for the liaison role she has played.

----- (05/07/2014 06:31) -----

Evan Leibovitch: As soon as mute came off I heard someone laughing.

guest: could you describe in more detail the 360 assessment process...what is it and how does it work?

Evan Leibovitch: Looks like this might be a short call.

Lalla Khan: Will the external processes that are underway be taken into account?

Lalla Khan: the external processes

Chuck Gomes: What external processes?

----- (05/07/2014 06:35) -----

Philip: Philip Sheppard this GNSO review is the most challenging ever as a function of ICANN's new stakeholders and the web of relationships between the old users and suppliers that now exists. (A typical user may be simultaneous: a BC member, an IPC member, a Registry, and have a supplier contractual relationship with the older Registries for the back-end services). Will 360 assessment cover this ?

----- (05/07/2014 06:36) -----

Philip: Thanks

----- (05/07/2014 06:37) -----

Hayley Laframboise: The slides have been unsynced for your use

Evan Leibovitch: Thanks all.

Rudi Vansnick: thanks

Rudi Vansnick: bye

Lima, Caio: Thank you

----- (05/07/2014 06:42) -----

Matt Ashtiani: Thank you, everyone!
