

Strategy Panel on Identifier Technology Innovation Webinar Session 1 – Wednesday, 22 January 2014

Alice Jansen: (1/21/2014 22:13) Welcome to Strategy Panel on Identifier Technology Innovation webinar - session 1! Please note that chat sessions are being archived and follow the ICANN Expected Standards of Behavior:

<http://www.icann.org/en/news/infocus/accountability/expected-standards>

Alice Jansen: (1/22/2014 03:59) Thank you for joining, we will begin shortly.

Alice Jansen: (04:05) We are trying to connect with a panel member - apologies for the delay. We will be starting soon

Alice Jansen: (04:12) Please feel free to post any questions or comments you may have in this pod.

Steve Crocier: (04:13) PEN might be worth explicit mention

Elise Gerich: (04:18) For those of you who may not know - PEN equals Private Enterprise Numbers registry.

John Demco: (04:20) Are SMD (Signed Mark Data) files in scope?

John Demco: (04:48) I was just curious ...

John Demco: (04:48) The TMCH is a relatively new thing.

Alice Jansen: (04:49) To voice comments or question, please join the bridge Dial-in numbers: <http://adigo.com/icann/> Password: 48291

Avri Doria: (04:50) you may have spoken of it, but i had a sound problem for a bit. Are you considering the possibility of building on what URI suggest with multiple forms of authority and schema with IANA being the actual point where all roots meet.

Geoff Huston: (04:52) There is an IANA URI registry:

<http://www.iana.org/assignments/uri-schemes/uri-schemes.xhtml>, so that in some sense one could observe that for URIs this is already happening within the scope of ICANN's activities

Avri Doria: (04:56) i have thought about it some, but ideas are fragmentary and probably not fodder for such a call

Avri Doria: (04:58) I guess my thought was to make it possible for various identifier schemes to compete.

Alice Jansen: (05:00) All, please note that the panel can be contacted at itipanel@icann.org (publicly archived mailing list)

Avri Doria: (05:04) thanks

John Demco: (05:04) Thanks

Aída Noblia: (05:05) Thanks. Bye

Alice Jansen: (05:05) Thank you for participating in this webinar!

WANAWIT Ahkputra: (05:05) thanks

guest: (05:05) bye all and thanks
