**Subject:** Upcoming SLA Monitoring System API Update

Dear Colleague,

This is to notify you of an update to the ICANN Service Level Agreement (SLA) Monitoring System API (MoSAPI) for gTLD registries planned for 30 April 2019.

The MoSAPI will be updated to implement Version 2.9 of the technical specification, available [here](#).

The update will implement two main features:

- Per top-level domain (TLD) access to Domain Abuse Activity Reporting ([DAAR](#)) statistics generated on a daily basis. This new functionality will enable MoSAPI users to view rankings for their own TLDs on the various dimensions of DNS Abuse captured in the DAAR system.
- Access to measurement data for monitoring cycles outside of incidents. Currently, measurement data is only available for monitoring cycles within incidents.

For any questions, please contact ICANN Global Support at:  
[globalsupport@icann.org](mailto:globalsupport@icann.org).

Best regards,

Technical Services Team
