'Nuclear option'

"If Icann does not move then we have to prepare to deal with that situation," said Dr Black of .uk registry Nominet.

The rogue regional registrars are reportedly even considering setting up shop with some of the companies that look after domains not recognised by Icann. Organisations such as OpenNic, Alternic and Image Online Design already run alternative domain systems.
ccTLDs and ICANN

- Relation on different levels.
- The ccTLD manager-ICANN relation does not depend on funding.
- Work with ccTLDs to find a solution.
- The ccTLDs are very diverse.
- The European ccTLDs are in a very good state, mostly used as the good example.
- If one of the ccTLD managers is ready to negotiate a contract based on the published template agreements -- ICANN is ready.
CENTR Meeting in Luxembourg

- ICANN participants
  - Stuart Lynn, President
  - Andrew McLaughlin, Vice President
  - Theresa Swinehart, International legal affairs
  - Herbert Vitzthum, ccTLD Liaison
- CENTR developed an excellent document with many questions regarding the relation CENTR-ICANN
  - ICANN Staff mainly Stuart Lynn answered the questions over 4 hours.
  - This is on ICANN’s side seen as a useful start of a dialog for future sessions and can lead to major outcomes.
IANA performance report

- Updated on 15 December
- Focus on name server changes only, this time.
- Average: 12 days
- Min: 0 days
- Max: 38 days

Goal: the best Service for ccTLDs!
