

CURRICULUM VITAE

ZHOU Yonglin

Director of Admin & Operation Dept, National Computer Network Emergency Response technical Team /Coordination Center of China (CNCERT/CC)
Secretary General of Information Security Committee, Internet Society of China (ISC)

Mr. ZHOU Yonglin is a senior engineer in the national CERT (Computer Emergency Response Team) of China, CNCERT, leading the department of administration and operation. He has worked on cyber security area for more than 10 years.

He has been engaged in the research on information security for years and joined several national projects on Internet security as a core member of technical team. For the remarkable contribution and innovation of him, he was awarded the National Top Award of Science and Technology Advancement. In 2004, he began to work in the department of administration & operation, which is focusing on the public network incident and threat monitoring, early warning and responding. He has personally coordinated the response of many critical incidents happened in the public network of China, the online system of government and the key information infrastructure. In particular, he instructed the response on 5.19 event that most public DNS in China were down, as well as several serious attacks towards domain systems which influencing great number of internet users. He also play very important role with his team on the safeguarding of critical systems during important period like the Beijing Olympic Games, the Shanghai EXPO 2010, etc.

He is well connected with governments, ISPs, ICPs, CIIP and cyber security companies. By his great efforts, CNCERT has played a leading role of network security in China from technical and operational aspects, reached comprehensive cooperation with government, industry and private sectors. Currently, CNCERT has been authorized to coordinate ISPs and domain registrars to watching the security of public IP networks and domain systems of China, collect security information from all the industry and give timely notes after analysis. CNCERT also initiative the China National Vulnerability Database (CNVD) and Anti Network Virus Alliance (ANVA) by which the IT industry of China reach a very effective self-discipline campaign on cyber security.

Mr. ZHOU Yonglin has actively joined international communications and cooperation. On behalf of CNCERT and ISC, he attended and spoke at many conferences of ICANN, FIRST, APCERT, IGF, IETF and ITU. Be a senior consultant, he also attends a lot of inter-government meeting like APEC Tel, China-Japan-Korea cooperation, China-ASEAN cooperation, etc. He is now working as the coordinator of China-USA Dialogue on Cyber Security, which is launched by ISC, China and EastWest Institute, USA, covering anti-spam, youth protection, anti-hacking and intellectual property.
