

CSC Findings of IANA Naming Function Performance Report for the Month of October 2024

Date: 10 November 2024

Overall finding

The CSC completed review of the October 2024 IANA Naming Function Performance Report and finds that PTI's performance for the month was:

Satisfactory – PTI's performance over October 2024 was 98.4% for defined metrics. This was due to the missing SLA of:

Label Generation Rulesets – Implementation Time: Processing was stalled waiting for an update to the Root Zone Database on who could authorize posting the LGR (formerly IDN tables).

Metrics that the CSC is tracking closely

Currently, there are no metrics requiring close tracking.

SLA metrics that are in the process of being changed

Currently, there are no SLAs in the process of being changed.

Report of escalations

No new escalations were received during the reporting period.
