

CSC Findings of IANA Naming Function Performance Report for the Month of February 2026

Date: 9 March 2026

Overall finding

The CSC completed its review of the February 2026 IANA Naming Function Performance Report and finds that PTI's performance for the month was:

Satisfactory – PTI met the service level agreement for 98.4% of defined metrics. This was due to missing the SLA of:

Metric: Technical Check (Retest)

Category: Routine (Technical)

SLA Description: Time to return results for subsequent performance of technical checks during retesting due to earlier failed tests.

Expected: 10m

Actual: 12.39m

The missed SLA has been satisfactorily explained by PTI and the CSC has determined that this exception is no cause for concern. No persistent problems were identified and no further action is needed.

Metrics that the CSC is tracking closely

Currently, there are no metrics requiring close tracking.

SLA metrics that are in the process of being changed

Currently, there are no SLAs in the process of being changed.

Report of escalations

No new escalations were received during the reporting period.
