RZMS Monthly Report

From 05/05/2016 To 06/05/2016	Production (RZA)	Parallel System (RZA2)	Parallel Comparison
Total Change Requests:	59	60	No differences found
Successful Change Requests:	59	60	No differences found
Failed Change Requests:	0	0	No differences found
Withdrawn Change Requests:	0	0	No differences found
Current Number of TLD(s):	1338	1338	No differences found
Current Number of Host(s):	3535	3535	No differences found

Explanations of differences found:

The current production system treats an initial request and all subsequent modifications to that request as a single request. In the parallel system, the original request and any subsequent modifications are treated as distinct requests. As a consequence, there was a discrepancy in the number of requests counted by each system, but the root zone files produced by each system were identical.
