1. Accredited Registrar Status (Appendix 4, Item 1)

Table 1 displays the current number and status of the ICANN accredited registrars. The registrars are grouped into three categories:

1. **Operational Registrars:** Those who have authorized access into the Shared Registration System (SRS) for processing domain name registrations.
2. **Registrars In The Ramp-Up Period:** Those who have received a password to access the Registry operational test and evaluation (OT&E) environment. The OT&E environment is provided to allow registrars to develop and test their systems with the SRS.
3. **Registrars In The Pre-Ramp-Up Period:** Those who have been sent a welcome letter from the VeriSign Registry but have not yet executed the Registry Registrar Agreements and/or have not yet submitted a completed Registrar Information Sheet. In most cases registrars are sent welcome letters via overnight express mail or e-mail on the same day accreditation notification is received from ICANN.

Table 1 – Accredited Registrar Status – October 2010

Status	# of COM Registrars	# of NET Registrars
Operational Registrars	897	895
Registrars In Ramp-Up Period	20	20
Registrars In Pre-Ramp-Up Period	43	42
Total	960	957

2. Service Level Agreement Performance (Appendix 4, Item 2)

Table 2.1 and **Table 2.2** compare Service Level Agreement (SLA) Requirements with Actual Performance for the reporting month. As required by the ICANN/VeriSign Registry Agreements (Section 3.1(d)(ii)), the VeriSign Registry is committed to provide service levels as specified in Appendix 7 of the .com and .net Registry Agreements and to comply with the requirements of the SLA in Appendix 10 of the .com and .net Registry Agreements. The SLAs are incorporated into the VeriSign Registry Registrar Agreements that are executed with all operational registrars.

** This number decreased due to a recently completed username review that resulted in the deactivation of zone file usernames no longer in use.*

4. Completed System Software Releases (Appendix 4, Item 4)

Table 4 shows significant releases that have occurred in the last twelve (12) months, as well as other relevant information. The VeriSign Registry Shared Registration System (SRS) is continually being improved to better meet the needs of accredited registrars.

* The number in the “No RGP Report” column is calculated by taking the difference between the number of restore commands and the number of restore reports received in the month. This number may vary slightly from the actual number of restores for which no report was received for a given month because of timing between when the restore command was issued and when the report was received.
