## 1. Accredited Registrar Status (Appendix 4, Item 1)

**Table 1** displays the current number and status of the ICANN accredited registrars. The registrars are grouped into three categories:

1. **Operational Registrars:** Those who have authorized access into the Shared Registration System (SRS) for processing domain name registrations.
2. **Registrars In The Ramp-Up Period:** Those who have received a password to access the Registry operational test and evaluation (OT&E) environment. The OT&E environment is provided to allow registrars to develop and test their systems with the SRS.
3. **Registrars In The Pre-Ramp-Up Period:** Those who have been sent a welcome letter from the Verisign Registry but have not yet executed the Registry Registrar Agreements and/or have not yet submitted a completed Registrar Information Sheet. In most cases registrars are sent welcome letters via overnight express mail or e-mail on the same day accreditation notification is received from ICANN.

**Table 1 – Accredited Registrar Status – March 2012**

Status	# of NET Registrars
Operational Registrars	945
Registrars In Ramp-Up Period	25
Registrars In Pre-Ramp-Up Period	40

## 2. Service Level Agreement Performance (Appendix 4, Item 2)

**Table 2** compares Service Level Agreement (SLA) Requirements with Actual Performance for the reporting month. As required by the ICANN/Verisign .net Registry Agreement (Section 3.1(d)(ii)), the Verisign Registry is committed to provide service levels as specified in Appendix 7 of the .net Registry Agreement and to comply with the requirements of the SLA in Appendix 10 of the .net Registry Agreement. The SLAs are incorporated into the Verisign Registry Registrar Agreements that are executed with all operational registrars.

### 3. TLD Zone File Access Activity (Appendix 4, Item 3)

**Table 3** summarizes the zone file access activity for the current reporting month. As required by the ICANN/Verisign .net Registry Agreement (Section 3.1(c)(iii)), the Verisign Registry provides third parties bulk access to the zone files for the .net TLD.

<sup>3</sup> The number in the "No RGP Report" column is calculated by taking the difference between the number of restore commands and the number of restore reports received in the month. This number may vary slightly from the actual number of restores for which no report was received for a given month because of timing between when the restore command was issued and when the report was received.

<sup>4</sup> Figures prior to December 2011 include both .com and .net data. December 2011 and later include only .net data.
