

RZ-LGR-6 Code Tables: Part 3 — Hangul code points

Integration Panel

Date: 2025-09-23

This document shows the repertoire for RZ LGR-6 Hangul code points part corresponding to the Hangul Syllables block presented in the form of marked up tables in a format similar to that used for character code charts in the Unicode Standard using the conventions shown in the following example:

	Arabic															
	0600	0601	0602	0603	0604	0605	0606	0607	0608	0609	060A	060B	060C	060D	060E	060F

The background color indicates the status of the code point:

- Green: code points that are part of the RZ-LGR, including all members of code point sequences.
- Pink: code points that are not PVALID in IDNA2008 [RFC5892] [IDNADerived].
- White: PVALID code points which are *excluded* from the Root Zone in a generic fashion (digits, hyphen), or by being excluded from the Maximum Starting Repertoire [MSR-6].
- Lavender: PVALID code points not included in the RZ-LGR as results of decisions during the development of the LGR.

Unicode blocks that contain no code points with green or lavender background are suppressed.

Note: all code points in the Hangul Syllables block are part of the RZ-LGR.
